Since that time, the majority and minority staffs of both the Subcommittee on Telecommunications, Consumer Protection and Finance and the Committee on Energy and Commerce have been working with their counterparts from the other body to propose compromise language that members of both Houses could support.

The Senate has recently agreed to the House bill with an amendment.

The Senatge's amendment is a fair compromise between the House bill and that previously passed by the Senate. In particular, the Senate has agreed to the transitional mechanism established by the House bill. However, since interconnection requirements are already in the Communication Act of 1934, and have simply been restated in thge House-passed bill, the Senate proposes to sunset these provisions after 3 years.

It seems to me that this proposal makes a good deal of sense. None of the provisions which would be sunseted grant any new authority to the Commission of how the Congress would like to see the Commission implement its current obligations.

This guidance extends to the mandatory interconnection provisions. It extends to the "return-flow" provisions, hich will enable new carriers to enter the marketplace.

Finally, It extends to the concept of division of revenues derived from the provision of joint and through service.

While the transitional mechanisms of the House bill will be sunsetted after 3 years, the Commission's powers; obligations and authorities will not be.

In addition, there are a few other changes proposed by the Senate amendments.

First, the cross-subsidy provisions have been revised, in order to enable a customer or terminal equipment manufacturer to go directly to court or the Commission in order to halt cross subsidies from regulated services.

In addition, the current 214 process has been suspended for the provision of domestic record service, removing one of the regulatory barriers currently imposed by the Communications Act of 1934.

Mr. COLLINS. Will the gentleman yield?

Mr. WIRTH: I yield to ghe gentleman from Texas, the distinguished ranking minority member on the subncommittee (Mr. COLLINS).

Mr. COLLINS of Texas. Mr. Speaker, I thank the gentleman for yielding.

If I understand the gentleman's remarks correctly, the provisions of the House bill which are being sunsetted will not affect section 201 of the existing act, which requires interconnections between and among carriers, and the division of revenues for the provision of joint and through service; is that right?

Mr. WIRTH. The gentleman is correct. All of the powers of the Commission remain, those in section 201, as well as those contained in other sections of the act.

Mr. COLLINS of Texas. Mr. Speaker, if the gentleman from Colorado will yield further, one of the changes made by the Senate amendments is to exempt carriers who do not have a substantial market share from the requirement that they treat their domestic and international operations as different carriers for the purposes of interconnection. Now, which carriers will be required to treat their domestic and international operations separately under this provision?

Mr. WIRTH. I think it is clear that the major international record carriers will be affected. In particular, Western Union International, ITT, RCA, and TRT will be affected.

In addition, of course, if Western Union ever offers international service, it, too, will be subjected to this requirement.

79-059 O-85-23 (Pt. 24)

Finally, any new carriers which obtain a substantial market share will also be affected.

I would point out to the gentleman that although we have been talking about a lot of sunset provisions, I would emphasize that this particular provision remains in effect until it is repealed by the Congress.

Mr. COLLINS of Texas. Mr. Speaker, I thank the gentleman from Colorado for his explanation.

Mr. Speaker, this was a good bill when it passed this House last week. It is even better now.

The Senate amendments leave intact the fundamental objective of the bill—to clear away market divisions that have been incorporated into the law so that competition can develop in all aspects of the record carrier industry. Moreover, the Senate amendments improve the bill by further reducing Government regulation of this industry. Under the Senate amendments, companies desiring to offer domestic record services will not normally be forced to get the FCC's permission before initiating such service. This will reduce Government redtape. Moreover, under the Senate amendments, many of the other transition regulations that were in the House bill—such as FCC-prescribed usage charges for interconnected carriers and the so-called international return-flow provision—will be terminated in 3 years.

Three years from now our hope and our belief is that we will have true competition for the first time in both the domestic and the international record industries. When that happens, there will be no need for Government regulation. The Senate amendments recognize this and take action to assure that Government regulation is reduced as competition develops.

Mr. Speaker, I endorse S. 271 as amended by the Senate. I urge my colleagues to pass the bill and send it to the President so that customers of record services in this country can begin to enjoy the fruits of competition early next year.

□ 1610

Mr. WIRTH. Mr. Speaker, the reason that the Congress must address this issue is the fact that, despite the explicit obligations to interconnect that are contained in the Communications Act of 1934, full and fair interconnection among record carriers have not been implemented. The carriers involved have not lived up to their obligations, and, more importantly, the FCC has not forced them to. Had the Commission done its job, and mandated that record carriers interconnect, the Congress would not have had to address this issue—and if there were a need for Congress to address this issue, it most certainly would not be in this level of detail.

Thus, when the specific interconnection provisions of S. 271 cease to have effect in 3 years, I would advise the Commission to implement its standing interconnection obligations as specified in the act. In particular, I would point out the concern of this House about the inabililty of new carriers to obtain operating agreements with foreign carriers. The House bill—and the Senate amendments thereto—address this problem in a unique fashion. If this problem persists, and new entrants remain unable to obtain these operating agreements, it is certainly our intent that the return-flow provisions which expire be extended as necessary. As the House said in its committee report on H.R. 4927, it is extremely concerned about the problem posed by foreign carriers' refusal to interconnect. The standing powers that the Commission has are certainly sufficient to extend the return-flow provision cited in subsection (c)(1)(A)(ii), which will help to mitigate this vexing problem.

If the Congress has to revisit the issue of return flows or interconnection in 3 years because of the inability of the FCC to carry out its obligations under the Communications Act of 1934, then the Commission itself may be unnecessary. I trust that this will not be the case.

Mr. Speaker, there is one additional provision which the Senate has attached to S. 271, which has nothing at all to do with record communications. This provision effects the bankrupt Rock Island Railroad, which is being dissolved pursuant to bankruptcy court order.

This amendment is intended to clarify what the congressional intent was in enacting section 122(a) of the Rock Island Transition and Employee Assistance Act. The House and Senate committees with jurisdiction understand the critical emergency facing shippers and communities in Texas, Oklahoma, and Kansas as a result of the Bankruptcy Court's recent interpretation of section 122(a). Because of this emergency situation, the House committee has agreed to accept this amendment, despite the lack of any hearings or committee action. However, the House committee feels strongly that it must have the opportunity to review this problem, and other problems related to the Rock Island Railroad, through normal committee procedures, next year. For that reasons, the clarification intended by the amendment is effective, with respect to the OKT Railroad, the subject of ICC Service Order 1498, only until May 15, 1982.

Mr. Speaker, this amendment has been cleared with the Subcommittee on Transportation and Commerce; it has been cleared with the full Committee on Energy and Commerce. Both the majority and minority have agreed to this language. It is of a limited nature; it has been agreed to unanimously, and, most importantly, it is needed prior to the adjournment of the Congress this year.

Mr. Speaker, I have no further requests for time.

Mr. COLLINS of Texas. Mr. Speaker, I yield 3 minutes to the gentleman from Kansas (Mr. ROBERTS).

Mr. ROBERTS of Kansas. I thank my colleague for yielding me this time.

Mr. Speaker, I rise in strong support of the provision which deals with the bankrupt Rock Island Railroad now being operated by the OKT. Had this provision not passed, it would have cost our agriculture shippers in Kansas, for only one commodity, and that is wheat, nearly $50 million.

Again, I rise in support of this provision and thank my colleagues.

Mr. COLLINS of Texas. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Colorado (Mr. WIRTH) that the House suspend the rules and concur in the Senate amendment to the House amendments to the Senate bill, S. 271.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate amendment to the House amendments to the Senate bill, S. 271, was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WIRTH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just concurred in.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

AMENDING ACT WITH RESPECT TO CERTAIN FEES CHARGED UNDER THE BANKRUPTCY ACT

Mr. EDWARDS of California. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5116) to amend the act of November 6, 1978, with respect to certain fees charged under the Bankruptcy Act.

The Clerk read as follows:

H.R. 5116

Be it enacted by the Senate and House of Represenatives of the United States of America in Congress assembled, That section 403(e) of the Act of November 6, 1978 (92 Stat. 2683; Public Law 95-598), is amended—

(1) by inserting "(1)" after "(e)", and

(2) by adding at the end thereof the following new paragraph:

"(2) Notwithstanding subsection (a) of this section, a fee may not be charged under section 40c(2)(a) of the Bankruptcy Act in a

case pending under such Act after September 30, 1979, to the extent that such fee exceeds $200,000.".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. EDWARDS) will be recognized for 20 minutes, and the gentleman from Virginia (Mr. BUTLER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Speaker, I yield myself such time as I may consume.

H.R. 5116 would place a ceiling on administrative fees paid into the nowabolished referees' salary and expense fund in certain large-asset cases pending under the former bankruptcy law—the Bankruptcy Act of 1898.

The referees' salary and expense fund was established long ago in an era when the bankruptcy courts were supposed to be self-supporting. In 1978, Congress abolished the referees' salary and expense fund and eliminated the percentage fee for all cases brought under the new Bankruptcy Code. The fund had been running a large deficit for a number of years, and there was general agreement that the bankruptcy court system should be funded from the general revenues of the Treasury, just as the remainder of the judicial system is funded.

On several earlier occasions, the Judicial Conference had recommended to Congress that the fund be abolished in recognition of the fact that the bankruptcy court system could not be self-supporting without placing an inordinate burden on bankrupts through increased filing fees and on creditors through increased percentage charges on the assets of the estate.

The burden of the percentage fees assessed on the bankrupt estate fell on the creditors since the fees were simply deducted from what would otherwise go to them in repayment of the amounts owed.

Thus, the fund and the percentage fee system were eliminated as to all cases commenced after September 30, 1979.

The 1978 Bankruptcy Act provided that all cases commenced under the former Bankruptcy Act would continue to be governed by the prior law—Public Law 95-598, section 403(a)—but section 403(e) of the 1978 act placed a $100,000 limit on fees charged under the old law in chapter XI cases where the plan was confirmed after September 30, 1978—Public Law 95-598, section 403(e). The cap was designed to limit the extraordinarily high fees in one or more very large-asset chapter XI cases, which were pending at the time—but had not yet been confirmed—and which were brought to Congress attention.

Congress was not aware of any such extraordinarily high fee cases under chapter VII. No large-asset chapter VII cases were brought to Congress attention at the time of the 1978 legislation, and chapter VII liquidation cases generally do not generate extremely large fees. Chapter XI reorganization cases are usually larger than straight bankruptcy case and therefore generally produce much higher fees.

H.R. 5116 would amend section 403(e) of the 1978 Bankruptcy Act to set a limit of $200,000 on the referees' salary and expense fund fees assessed in chapter VII liqudation cases brought under the former Bankruptcy Act and pending under such act after September 30, 1979. The bill would place a $200,000 cap on the fees owing in at least three chapter VII liquidation cases pending under the old Bankruptcy Act—*In re W. T. Grant*, involving fees of $20 million; *In re Associated Transport, Inc.*, $1.5 million in fees; and *In re Eastern Freight Ways, Inc.*, $500,000 in fees. The reduction in the fees payable to the nowdefunct referees' salary and expense fund will result in more money being available to pay creditors.

A fee ceiling in chapter VII cases is consistent with the underlying rationale of present section 403(e) and with congressional action in eliminating the fee for all cases brought after September 30, 1979. The fees which are assessed in these cases and paid into the nowabolished referee's salary and expense fund should be limited to some reasonable amount in order to maximize the return of the assets of the estate to the creditors.

An identical provision placing a $200,000 cap on chapter VII cases pending under the former Bankruptcy Act passed the Senate on July 17, 1981, as part of S. 863, the Bankruptcy Amendments Act of 1981. Legislation similar to H.R. 5116, but involving a $100,000 cap, was passed by both the House and Senate in the 96th Congress as part of the so-called bankruptcy technical amendments bill, S. 658. However, other unrelated provisions of that bill differed in the House and Senate versions, and it was not enacted into law.

Mr. Speaker, I reserve the balance of my time.

Mr. BUTLER. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. RAILSBACK).

□ 1620

Mr. RAILSBACK. Mr. Speaker, in 1978, Congress abolished the referees' salary and expense fund as anachronistic and inequitable and totally eliminated the percentage fees assessed for this fund for all cases brought after September 30, 1979. At that time, in section 403(e) of the 1978 Bankruptcy Act, we also placed a cap on the referees' salary and expense fund fees in certain large-asset chapter XI cases which were pending at the time under the old act and which were brought to our attention. These cases had generated unexpectedly high fees, far in excess of what was contemplated under the fee system. In view of the fact that the fees were being eliminated for all cases brought after September 30, 1979, and that such extraordinarily high fees had never been contemplated, Congress in 1978 placed a $100,000 cap on the fees that could be charged in these pending cases.

The burden of the old referees' salary and expense fund percentage fees, which were assessed on the bankrupt estate fell on the creditors since the fees were simply deducted from what would otherwise go to them in repayment of the moneys owed to them.

On several earlier occasions, the Judicial Conference had recommended that the fund be abolished in recognition of the fact that the bankruptcy court system could not be self-supporting without placing an inordinate burden on creditors through increased percentage charges on the assets of the estate. The referees' salary and expense fund had been running a large deficit for many years. Congress eliminated the fund in 1978, since the system had not been self-sustaining for a long time, was inequitable to creditors, and there was general agreement that the bankruptcy court system should be funded from the general revenues of the Treasury, just as the remainder of the judicial system is funded.

H.R. 5116 would simply extend the existing cap which is contained in present section 403(e) of the 1978 Bankruptcy Act to cover other large-asset cases pending under the old Bankruptcy Act which were not brought to our attention in 1978. These cases would have been included then, had Congress been aware of them at the time. Congress was simply not aware of any extraordinarily high fee cases under chapter VII, since no large-asset chapter VII cases were brought to our attention and such cases generally do not generate extremely large fees. In the entire history of the fee system, fees in excess of $100,000 have been a rarity and have usually involved chapter XI cases.

When the last fee schedule was promulgated by the Judicial Conference in 1970, it was neither anticipated nor intended that fees would be assessed in excess of $100,000. At the time of the new fee schedule's promulgation in 1970, the Judicial Conference was informed by the Chairman of the Conference's Committee on Bankruptcy Administration that the new fees would generate receipts of only $11 million in fiscal year 1971 for the

entire bankruptcy system and would increase payments into the fund by only an estimated $1 million annually. Based upon these figures and the fact that receipts from the fund would be generated by thousands of cases—for example, 22,355 in 1969 alone—it is inconceivable that the Conference in setting the fees could have contemplated such large asset cases. (See "Reports of the Proceedings of the Judicial Conference of the United States," March 16-17 and October 29-30, 1970, p. 24.)

H.R. 5116 reaffirms congressional policy underlying the present statute—section 403(e) of the 1978 Bankruptcy Act—that fees in these unexpectedly large-asset cases should be limited to some reasonable amount, especially since no fees at all are assessed on any cases commenced after September 30, 1979. The reduction in fees will enable more money to be paid to the estate's creditors.

This bill is identical to a provision contained in legislation (S. 863) already passed by the Senate in July of this year. A similar provision was passed by both the House and the Senate in the 96th Congress, but was not enacted into law because of differences in other unrelated aspects of that prior legislation. The bill is consistent with congressional intent that administrative fees should be minimized in order to preserve as much of the assets of the estate as possible for the creditor's claims.

Mr. BUTLER. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I rise in opposition to H.R. 5116. Certainly, the gentleman from California (Mr. EDWARDS) has fairly stated the factual situation, as I would have anticipated. I would take issue with him on one statement. The referees' salary and expense fund is not defunct; it is extant. It has a deficit of $87 million, and this legislation will increase that deficit by approximately $22 million.

The gentleman from California and I disagree as to the need for this legislation, as to the urgency of it, and the effect of it. In my judgment, this legislation will provide an unprecedented and unwarranted windfall at the expense of the U.S. Government, exceeding $22 million, to be distributed between 26 of the major banks of the United States, and I expect to vote against it.

I could enlarge on this extensively. I invite the Members to read the dissenting views which are in the report which just came off the press a moment ago, and I will be glad to enlarge upon inquiry, but I urge the Members to vote against the bill.

Mr. Speaker, in my experience there is no surer way to clear the room than to discuss bankruptcy legislation. It is a subject, unfortunately, which contains little interest for the majority of legislators. I can only say to you that you do not know what you are missing, and I hope to have your attention for purposes of our discussion of H.R. 5116, a 12-line bankruptcy bill with consequences that you should know about.

By placing a $200,000 cap on the fees payable to the bankruptcy referees' salary and expense fund in chapter VII cases under the old Bankruptcy Act, this bill will cost the U.S. Treasury close to $22 million, and that is only for the four cases we now know will be affected—W. T. Grant (loss of $19 million), Associated Transport, Inc. (loss of $1.3 million), Eastern Freight Ways (loss of $300,000), and Universal Money Order Co. (loss of $175,000). There could well be more chapter VII cases awaiting confirmation to which the cap would apply, according to the Administrative Office of the U.S. Courts, at a cost to the Treasury which no one can tell. In my judgment, a Treasury raid of this magnitude should be stopped in its tracks.

The fee schedule for bankruptcy liquidation cases set by the Judicial Conference in 1970 cannot reasonably be characterized as excessive. It amounts to 3½ percent of the first $50,000 of net realization, and 3 percent of the balance. If the Judicial Conference had felt in 1970 or at any later date that application of the formula would result in unjustly high payments, it could and doubtless would have set a cap. But it did not do this. It did not, I suspect, because it believed the schedule was an equitable one.

As one of the largest chapter VII bankruptcies on record, we may safely assume that the W. T. Grant liquidation made staggering demands on the time and personnel resources of the bankruptcy court. And the legislative history is clear on the point that the fee in a particular case was never meant to equal the expenditures for the case, and the larger estate fees must help to carry the many no-asset and minimal-asset cases. Even so, there is currently an $87 million cumulative deficit in the referees' fund account with the U.S. Treasury. The $22 million lost to the Treasury (at a minimum) by enactment of this bill would increase that deficit by one-forth.

The proponents of this bill note that a $100,000 cap on chapter VII fees was contained in a so-called bankruptcy technical amendments bill passed by our committee and the House in the last Congress. That is true, but the cost to the U.S. Treasury of the four liquidation cases I have cited went completely undetected, I regret to say, and was not mentioned in the Congressional Budget Office cost estimate in the judiciary committee report. I would like to believe that we would not have acted then as we did had we known the consequences of what we were doing.

A distinction may be drawn between placing a cap on referees' fund payments in a chapter XI reorganization case, in which there is precedent for congressional intent in the 1978 Bankruptcy Code and in which the savings might improve the survival prospects for an ongoing enterprise, and a chapter VII liquidation proceeding. In the latter instance, which is what we are confronted with here, the claims of the creditors, who have already received an overwhelming percentage of the assets of the bankrupt estate, should be weighed against that small fraction which the law holds should be payable to the U.S. Government for orderly administration of a bankruptcy referee system. Without that system, creditors could hope for little, if anything, from the bankrupt estate.

This bill constitutes a totally unwarranted surprise attack on the U.S. Treasury. It deserves to be soundly defeated.

Mr. HYDE. Mr. Speaker, will the gentleman yield?

Mr. BUTLER. I yield to the gentleman from Illinois.

Mr. HYDE. Mr. Speaker, I thank my friend for yielding.

I rise in support of this legislation. I think it is fair and just. There are other creditors besides banks, and because there are banks does not make them totally devoid of merit in their claims. They advanced a lot of money in the Grant case, which is what we are talking about. They waited while other creditors received priority to try and keep the company alive, and it just seems to me that they should be able, like other creditors—and there are other creditors besides banks to get some of their money back.

Mr. EVANS of Georgia. Mr. Speaker, will the gentleman yield?

Mr. BUTLER. I yield.

Mr. EVANS of Georgia. Would the gentleman state whether the money we are talking about is money that is actually owed to these creditors, the so-called windfall?

Mr. HYDE. Yes, sir.

Mr. EVANS of Georgia. These are actually due to the creditors?

Mr. HYDE. Yes, sir.

Mr. BUTLER. If I may have 1 additional minute to clarify that point, of course this is the referees' salary and expense fund. This money is paid to the referees' salary and expense fund, and that money accrues to the United States, which of course will now have to make up the deficit. So, that is the source of the money. That is why I have represented to this body that the effect of this legislation is a windfall of $22 million which is out of the funds of the U.S. Government.

Mr. Speaker, I have no further requests for time.

Mr. EDWARDS of California. Mr. Speaker, the gentleman from Illinois (Mr. HYDE) is correct. There are other creditors. There are wage claimants; there are former employees who have a pension and welfare fund, and most of these employees are each owed over a $1,000.

Mr. BUTLER. The gentleman is quite correct as to the two bankruptcies for $100,000 or so, but the W. T. Grant bankruptcy, exceeding $20,000, is entirely 26 of the largest banks of the United States, several of which are, of course, from Illinois.

Mr. HYDE. Mr. Speaker, if the gentleman will yield further, I have trouble with the definition of "windfall." This money that we are talking about is money that is owed to these banks. Banks had advanced this money on credit, and the company is bankrupt. For them to retrieve some of that, not all of the money they advanced, how does that come under the definition of "windfall"?

Mr. BUTLER. Does the gentleman want me to answer that question?

Mr. HYDE. Yes, I do.

Mr. BUTLER. It is money that was not anticipated because it was the referees' salary and expense fund as being part of the expense of bankruptcy court. Of course, the W. T. Grant bankruptcy was run at considerable expense to the Federal Government. Of course, it was the largest bankruptcy in the history of the United States and took much more, considerably in excess of the $22 million we are talking about today, so it was money, when they entered bankruptcy, money expected to be paid to fund the bankruptcy and operation of the court.

If this bill passes, it will not be funded with these funds, but out of the taxpayer fund. Unexpected largesse at the expense of the taxpayers. So, I call it a windfall.

Mr. HYDE. If the gentleman will continue to yield, there were about $30 million in taxes paid out of this entire transaction, I am informed.

Mr. BUTLER. As the gentleman is well aware, taxes due the Federal Government are a priority claim in bankruptcy, and the Federal Government did salvage taxes already due it to an extent. Of course, not all of it.

Mr. HYDE. We have abolished this referees' salary and expense fund. What did we abolish it for?

Mr. BUTLER. We have not abolished it. It is still around. It has not been abolished for bankruptcies filed after the effective date of the Bankruptcy Act. It is no longer being funded out of the salary and expense fund. It is funded by the taxpayer.

Mr. HYDE. Like every other court in this land.

Mr. BUTLER. The gentleman is correct.

Mr. HYDE. OK, and this is money that was due to them. They did not expect to get it, but now if this legislation passes, they will get it, and it is a windfall in the sense that they did not expect to get it but it is their money.

Mr. BUTLER. It will be their money if the legislation passes. Otherwise, it is ours.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. EDWARDS) that the House suspend the rules and pass the bill, H.R. 5116.

The question was taken.

Mr. BUTLER. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were refused.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

AMENDING ACT TO ESTABLISH UNIFORM LAW ON BANKRUPTCIES

Mr. EDWARDS of California. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4353), to amend the act entitled "An Act To Establish a Uniform Law on the Subject of Bankruptcies," approved November 6, 1978.

The Clerk read as follows:

H.R. 4353

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 403(e) of the Act of November 6, 1978 (92 Stat. 2549; Public Law 95-598), is amended by inserting "or in which the final determination as to the amount of such fee is made after September 30, 1979, notwithstanding an earlier confirmation date," immediately after "September 30, 1978,".

□ 1630

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. EDWARDS) will be recognized for 20 minutes, and the gentleman from Virginia (Mr. BUTLER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Speaker, I yield myself such time as I may consume.

H.R. 4353 would place a ceiling on administrative fees paid into the now-abolished referees' salary and expense fund in certain large-asset cases pending under the former bankruptcy law, the Bankruptcy Act of 1898.

The referees' salary and expense fund was established long ago in an era when the bankruptcy courts were supposed to be self-supporting. Under the 1898 bankruptcy law, the bankruptcy court system was intended to be financed by filing fees and by additional fees assessed on the bankrupt estate and paid into the referees' salary and expense fund. The referees' fund was established to reimburse the bankruptcy court for expenses incurred in connection with bankruptcy proceedings and was until 1946 the source of the bankruptcy referees' compensation. Under section 40c(2) of the old Bankruptcy Act, a fee was levied on estates in chapter VII liquidations, chapter XI reorganizations, and chapter XIII wage earner plans and was assessed in accordance with a graduated fee schedule determined by the Judicial Conference.

In 1978, Congress abolished the referees' salary and expense fund and eliminated the percentage fee for all cases brought under the new Bankruptcy Code. The fund had been running a large deficit for a number of years, and there was general agreement that the bankruptcy court system should be funded from the general revenues of the Treasury, just as the remainder of the judicial system is funded.

On several earlier occasions, the Judicial Conference had recommended to Congress that the fund be abolished in recognition of the fact that the bankruptcy court system could not be self-supporting without placing an inordinate burden on bankrupts through increased filing fees and on creditors through increased percentage charges on the assets of the estate.

The burden of the percentage fees assessed on the bankrupt estate fell on the creditors since the fees were simply deducted from what would otherwise go to them in repayment of the amounts owed.

Thus, the fund and the percentage fee system were eliminated as to all cases commenced after September 30, 1979.

The 1978 Bankruptcy Act provided that all cases commenced under the former Bankruptcy Act would continue to be governed by the prior law (Public Law 95-598, section 403(a)), but section 403(e) of the 1978 act placed a $100,000 limit on fees charged under the old law in chapter XI cases where the plan was confirmed after September 30, 1978 (Public Law 95-598, section 403(e)). The cap was designed to limit the extraordinarily high fees in one or more very large-asset chapter XI cases, which were pending at the time—but had not yet been confirmed—and which were brought to Congress attention.

H.R. 4353 would amend section 403(e) of the 1978 Bankruptcy Act to set a limit of $100,000 on the referees' salary and expense fund fees assessed in chapter XI reorganization cases where the plan was confirmed prior to September 30, 1978, but the fee was not determined until after September 30, 1979. This would affect one chapter XI reorganization case involving fees in excess of $1.7 million, which falls outside of the date set forth in

the current statute. According to the Administrative Office of the U.S. Courts, H.R. 4353 would affect the fees in a chapter XI proceeding which was brought in the U.S. Bankruptcy Court for the southern district of New York (Lifetime Communities, Inc. (formerly In re Fidelity Mortgage Investors)) and which involves fees owing in the amount of at least $1.7 million. The reduction in the fees payable to the referees' salary and expense fund will result in more money being available to pay creditors under the chapter XI plan.

H.R. 4353 reaffirms congressional policy underlying the present statute that the fees in these unexpectedly large-asset cases should be limited to some reasonable amount, especially in light of the fact that Congress has abolished the fee for all cases commenced after September 30, 1979.

The date set forth in present section 403(e) of the 1978 act is an arbitrary one, and the reduction in fees payable to the referees' salary and expense fund will result in more money being available to pay creditors under the chapter XI plan. This is consistent with congressional intent that administrative fees should be minimized in order to preserve as much of the assets of the estate as possible for the creditors.

Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. EVANS).

Mr. EVANS of Georgia. Mr. Speaker, this legislation would amend section 403(e) of the 1978 Bankruptcy Act with respect to the fees required to be paid into the now-defunct referees' salary and expense fund in chapter 11 reorganization cases.

The referees' salary and expense fund was established long ago in an era when the bankruptcy courts were supposed to be self-supporting. Under the 1898 bankruptcy law, the bankruptcy court system was intended to be financed by filing fees and by additional fees assessed on the bankrupt estate and paid into the referees' salary and expense fund. This fund was to reimburse the bankruptcy court for expenses incurred in connection with bankruptcy proceedings.

Congress eliminated the referees' salary and expense fund in 1978 for all cases brought under the new Bankruptcy Code. The fund had been running a large deficit for a number of years, and there was general agreement that the bankruptcy court system should be funded from the general revenues of the Treasury, as is the remainder of the judicial system.

The 1978 act provided that all cases pending prior to the effective date of the act—October 1, 1979—would continue to be governed by the existing rules of procedures, fees and charges with one exception. Congress at that time placed a $100,000 limit on fees required to be paid into the referees' salary and expense fund for those pending chapter 11 cases whose plans were confirmed after September 30, 1978. This fee cap provision was included specifically to cover those large asset cases which had resulted from the unforeseen real estate recession of the midseventies. Without such a fee cap, the existing fee schedule would have allowed unreasonably high fees to be imposed in these large asset cases.

Inadvertently, we failed to include within this fee limitation those large asset chapter 11 cases in which the plan had been confirmed prior to September 30, 1978, but the final fee had not been determined by the court and paid by that date. H.R. 4353 would resolve this technical oversight in the 1978 act. Under the bill, the $100,000 fee cap would be extended to cover those chapter 11 cases in which the plan was confirmed after September 30, 1978, but the court order fixing the precise amount payable to the fund was entered by the court subsequent to September 30, 1979.

This bill would merely reaffirm the intent of Congress in 1978 to limit fees in these cases to $100,000.

According to the Administrative Office of the U.S. Courts this bill would affect only one known pending chapter 11 case, and the reduction in fees payable to the fund will result in more money being available to pay creditors under the chapter 11 reorganization plan.

The full Judiciary Committee has expressed unanimous support for this bill and at this time I would urge my colleagues to join in support of this measure.

Mr. EDWARDS of California. Mr. Speaker, I yield such time as he may consume to the gentleman from South Carolina (Mr. DERRICK).

Mr. DERRICK. Mr. Speaker, I rise in support of this legislation.

Mr. BUTLER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the bill.

Mr. EDWARDS of California. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. FITHIAN).

Mr. FITHIAN. I thank the chairman for yielding. What I am going to say very, very briefly is I am certainly no expert on bankruptcy, but I just wanted to relay to the House that in the past 4 to 6 months in Indiana I have had more people in the lending institution business come to me and say that the House absolutely, the Congress absolutely was going to have to redress the ease with which bankruptcies could be processed. I have never had quite this much outburst from the stable financial community in the 7 years I have been here. The general gist of the remark is that we in the House and the other body have made it far, far too easy for one to ask for and to achieve a bankrupt status.

Mr. EVANS of Georgia. Mr. Speaker, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from Georgia.

Mr. EVANS of Georgia. I invite the gentleman to cosponsor legislation which I have introduced to correct some of the abuses. We presently have 165 cosponsors and I hope the gentleman will take a look at that legislation.

Mr. FITHIAN. I know the gentleman does good work and I would be happy to make it 166.

Mr. EDWARDS of California. Mr. Speaker, will the gentleman yield?

Mr. FITHIAN. I yield to the gentleman from California.

Mr. EDWARDS of California. I would point out to the gentleman from Indiana that the distinguished chairman of the full Judiciary Committee and the chairman of the Subcommittee on Monopolies and Commercial Law of the House Committee on the Judiciary, the gentleman from New Jersey, (Mr. RODINO) has scheduled a series of hearings on consumer credit bankruptcy which will commence shortly.

Mr. EDWARDS of California. Mr. Speaker, I yield such time as he may desire to the gentleman from New Jersey, (Mr. RODINO), chairman of the committee.

Mr. RODINO. I thank the gentleman for yielding. I will not take much time other than to say that we recognize that there is much discussion and statements that there are problems. While the problems the gentleman from Indiana makes reference to may be problems that he says he has become cognizant of because many people have come to him. I want to assure the gentleman that this committee is well aware of the contentions and we have been holding hearings and we will be holding extensive, in-depth hearings on consumer bankruptcies early in the second session. And we certainly will address the problems that we find through these hearings are real problems.

We, however, want to assure the gentleman that we cannot ascribe all of the ills to the recently revised Bankruptcy Code.

There are certainly many other factors we have to consider, not the least being the economic situation that the country finds itself now involved in, and many other problems which suggest that it is not solely the fault of the law that we recently reformed.

However, I do want to assure the gentleman that there has been and will be serious attention and a great deal of study given to these serious matters.

Mr. FITHIAN. Would the chairman yield?

Mr. RODINO. I yield to the gentleman from Indiana.

Mr. FITHIAN. I thank the chairman and commend him for taking up this study. I would just add to the gentleman's information that in my congressional district there have been advertisements in newspapers saying

If you have monetary problems come in, we can get you out of all of your problems,

And there have been solicitations by the legal profession for bankruptcy cases. I have never seen this in good times nor bad ever before and, therefore, it lent some legitimacy to the claim that we had made it too easy.

Mr. RODINO. If I might just add briefly to what the gentleman says and then conclude, one cannot preclude anyone from advertising or posting notices. It is unfortunate that somehow there may be some people who view this as an opportunity to be able to try to solicit some kind of business. But that certainly was not the intent of, nor does the Bankruptcy Code address the problem of lawyer advertising.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. EDWARDS) that the House suspend the rules and pass the bill, H.R. 4353.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

AUTHORIZATION REPRINTING OF INVESTIGATION OF SENATOR HARRISON A. WILLIAMS, JR.

Mr. GAYDOS. Mr. Speaker, I call up the Senate concurrent resolution (S. Con. Res. 56) authorizing reprinting of the committee print entitled: "Investigation of Senator Harrison A. Williams, Jr.: Response of Senator Williams to Report of the Select Committee on Ethics on S. Res. 204," and ask unanimous consent for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, and I will not object, but I would, under my reservation, like to yield to the distinguished gentleman from Pennsylvania (Mr. GAYDOS) so he might explain this concurrent resolution.

Mr. GAYDOS. Mr. Speaker, this resolution authorized the reprinting of 300 additional copies of Senator WILLIAMS' response to the report of the Senate Ethics Committee on his investigation. It was just passed by the Senate and we have been asked to act upon it as soon as possible as the Senate expects to take up the Williams matter when the Congress reconvenes. The cost of reprinting is $3,275.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, this is a matter that the House usually considers one of comity. There is no objection on this side.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

The Clerk read the Senate concurrent resolution, as follows:

There was no objection.

S. CON. RES. 56

Resolved by the Senate (the House of Representatives concurring), That there shall be reprinted for the use of the Senate Select Committee on Ethics three hundred copies of its committee print entitled "Investigation of Senator Harrison A. Williams, Jr.: Response of Senator Williams to Report of the Select Committee on Ethics on S. Res. 204", Ninety-seventh Congress, first session, September 18, 1981

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

PROVIDING MUNICIPAL USE OF STORAGE WATER IN BENBROOK DAM, TEX.

Mr. ROE. Mr. Speaker, I move to suspend the rules and concur in the Senate amendment to the bill (H.R. 779) to authorize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District No. 1 and the city of Weatherford, Tex., for the use of water supply storage in Benbrook Lake, and for other purposes.

The Clerk read the Senate amendment, as follows:

Page 2, after line 19, insert:

SEC. 2. (a) The third sentence of section 205 of the Flood Control Act of 1948 (33 U.S.C. 701s) is amended to read as follows: "Not more than $4,000,000 shall be allotted under this section for a project at any single locality.".

(b) The amendment made by this section shall not apply to any project under contract for construction on the date of enactment of this Act.

SEC. 3. Section 164 of the Water Resources Development Act of 1976 (Public Law 94-587) is amended by deleting the figure "$21,000,000" and inserting in lieu thereof "$23,200,000".

SEC. 4. The Secretary shall relocate the water supply intake facility on the Missouri River at Springfield, South Dakota, which facility is subject to severe sedimentation, at an estimated cost of $2,190,000.

SEC. 5. (a) The Proviso of section 2 of Public Law 84-485 shall not be construed to prohibit the storage of San Juan-Chama project water acquired by contract with the Secretary of the Interior pursuant to Public Law 87-483 in any reservoir, including the storage of water for recreation and other beneficial purposes by any party contracting with the Secretary for project water.

(b) The Secretary of the Army, acting through the Chief of Engineers, is authorized to enter into agreements with entities which have contracted with the Secretary of the Interior for water from the San Juan-Chama project pursuant to Public Law 87-483 for storage of a total of two hundred thousand acre-feet of such water in Abiquiu Reservoir. The Secretary of the Interior is hereby authorized to release San Juan-Chama project water to contracting entities for such storage. The agreements to thus store San Juan-Chama project water shall not interfere with the authorized purposes of the Abiquiu Dam and Reservoir project and shall include a requirement that each user of storage space shall pay any increase in operation and maintenance costs attributable to the storage of that user's water.

(c) The Secretary of the Interior is authorized to enter into agreements with entities which have contracted with the Secretary of the Interior for water from the San Juan-Chama project pursuant to Public Law 87-483 for storage of such water in Elephant Butte Reservoir. The Secretary of the Interior is hereby authorized to release San Juan-Chama project water to contracting entities for such storage. Any increase in operation and maintenance costs resulting from such storage not offset by increased power revenues resulting from that storage shall be paid proportionately by the entities for which the San Juan-Chama project water is stored.

(d) The amount of evaporation loss and spill chargeable to San Juan-Chama project water stored pursuant to subsections (b) and (c) of this section shall be accounted as required by the Rio Grande compact and the procedures established by the Rio Grande Compact Commission.

SEC. 6. Notwithstanding any other provision of law, no houseboat, floating cabin, marina (including any with sleeping facilities), or lawfully installed dock or cabin and appurtenant structures shall be required to be removed before December 31, 1989, from any Federal water resources reservoir or lake project administered by the Secretary of the Army, acting through the Chief of Engineers, on which it was located on the date of enactment of this Act, if such property is maintained in usable condition, and, in the judgment of the Chief of Engineers, does not occasion a threat to life or property.

□ 1640

The SPEAKER pro tempore. Is a second demanded?

Mr. HAMMERSCHMIDT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. ROE) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. ROE).

Mr. ROE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, on June 1, 1981, the House passed H.R. 779, a bill which would enable the Corps of Engineers

to contract with Tarrant County and the cities of Weatherford and Granbury, Tex., to provide municipal water supply storage space for those communities in Benbrook Lake. Today the Senate passed H.R. 779 and returned it to us with amendments.

The first of these amendments would increase the authorized level of small flood control projects, which may be constructed by the corps without specific congressional authorization to $4 million. Under present law the limit is $2 million—or $3 million if the area to be protected has been declared a major disaster area within the previous 5 years. The last time the small flood control project authority was increased was in 1976, and a great deal of inflation has taken place since then. This amendment would raise the individual project limits, but would not raise the overall funding limit for the small flood control project program.

The second amendment would raise the authorization limit for the bridge from Lewiston, Idaho, to Clarkston, Wash., which was authorized by the Water Resources Development Act of 1976 and which is currently under construction by the corps. This increase from $21 to $23.2 million is necessary due to a funding delay when the bridge was orginally authorized.

The third amendment would authorize the corps to relocate a water supply intake facility at Springfield, S. Dak., on the Missouri River. This same provision was included in last year's water resources omnibus bill, H.R. 4788, which we passed on February 5 of last year.

The fourth amendment would allow public owners of water, such as the city of Albuquerque, to store water in the corps' Abiquiu Reservoir and Interior's Elephant Butte Reservoir in New Mexico. It would also expressly allow the Department of the Interior to release water from the San Juan-Chama project to contracting entities for that purpose. This amendment would entail no increased Federal cost, because the contracting users would be required to pay any increase in operation and maintenance costs.

The fifth amendment would provide that no presently existing houseboat, floating cabin, marina, or lawfully installed dock or cabin maintained in good condition shall be required to be removed from corps projects before December 31, 1989.

Mr. Speaker, these amendments to H.R. 779 are relatively minor ones, and I urge the passage of the bill, as amended.

Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from New Jersey (Mr. HOWARD), our full committee chairman.

Mr. HOWARD. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 779 and urge my colleagues to support it as well. As we passed it last June, H.R. 779 at no Federal cost would provide badly needed water supply storage space in Benbrook Lake for Tarrant County and the cities of Granbury and Weatherford, Tex. The Senate added five amendments. The first would increase the Corps of Engineers' flood control project authority from $2 to $4 million. But without raising the overall funding level of the program. The second would raise slightly the authorization level of a bridge being constructed by the corps between Idaho and Washington. The third would permit the corps to relocate a water supply intake for Springfield, S. Dak. The fourth would provide water supply storage space in two reservoirs in New Mexico for communities such as Albuquerque. And the fifth would provide that houseboats, floating cabins, marinas, and lawful docks and cabins maintained in good condition shall not be required to be removed from corps projects before the end of 1989. Mr. Speaker, I urge the passage of H.R. 779, as amended.

Mr. ROE. Mr. Speaker, I yield such time as he may consume to the distingushed gentleman from Texas (Mr. WRIGHT), the majority leader.

Mr. WRIGHT. I thank the gentleman for yielding and express my personal appreciation to the committee for having diligently pursued this particular legislative matter.

Benbrook Reservoir was constructed as a Federal reservoir in the early 1950's. It was a multipurpose project. One of its purposes was flood control, and another of its purposes was navigation. It was believed at the time of its original construction that waters to be stored in that reservoir would be needed for navigation purposes. It now seems totally unlikely that there ever will be any navigable stream which can use those waters, and for those reasons it seems very plausible that those waters otherwise uncommitted and unused might be made available to these relatively small and occasionally drought prone but growing municipalities that are served by the Tarrant County Water Control and Improvement District and, in addition, the city of Weatherford and the city of Granbury, Tex.

So I want to express my sincere appreciation to this committee and to the conferees for having permitted this bill to come forward. I assure the Members that it is badly needed, and its passage before the end of this year most emphatically will make a very happy Christmas for the citizens of those communities.

Mr. ROE. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. STENHOLM).

Mr. STENHOLM. I thank the gentleman.

Mr. Speaker, I would like to associate myself with the remarks of the majority leader, and I, too, would like to urge passage of this legislation.

Mr. ROE. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Indiana (Mr. FITHIAN).

Mr. FITHIAN. Mr. Speaker, I thank the distinguished chairman for yielding, and I want to assure the majority leader that my objection to this bill has nothing to do with the Texas project. In fact, I suspect, although I do not know, that that project has all of the merits that the gentleman says it has.

My objection, Mr. Speaker, is to the process that we are going through here. As I have read H.R. 779, it is a catch-all. Only the first paragraph deals with the Texas project. Many of the other projects are items of some controversy, it would seem to me, alteration of amounts of money, alteration of processes of the corps, and I will ultimately ask the chairman to explain for the House the relevance of section 6 to the basic bill.

But let me now proceed to discuss a matter with this House that I do not believe other Members are aware of. It is the absolute prostitution of the process.

Not long ago, a bill in which I had vital interest, on the Senate side deauthorized Lafayette Lake, 98 percent of which is in my district.

Now, the distinguished majority leader realizes the number of times that I have come to the Democratic leadership of this House in the past 3 or 4 years to seek some remedy, to seek some remedy for the folks of my district, a remedy which is sorely needed. And because of the objection of one Member of the minority side in this body, with 2 percent of the project in his district, the leadership, for some extraordinary reason, has caved in time and again and has in fact acquiesced to that Member objecting to the procedure.

Now, let me describe the most recent, and I think the most outrageous, of these proceedings. After the bill had passed the Senate, with the Lafayette Lake deauthorization in, with the concurrence and the support of both of my distinguished colleagues of the other body, Senators LUGAR and QUAYLE of the other party, and their support for it and the support of that body, the bill was brought over to the House. It was brought up under unusual circumstances, let us say. It was brought shortly after the President had shut down the Federal Government. And then when we finally got out of the reconciliation process and had worked out that enormous problem of state, there was a brief pro forma kind of session here by which we would adjourn the House; and at that time, with no bother to even alert

me in my office, and with 10 or 12 people on the floor, no advance warning, all of the normal protections of a Member of this body were violated, violated intentionally and willfully.

□ 1650

It is that to which I take such strenuous objection to the processes and the procedures of the committee who now has this bill on the floor.

When we contacted the staff of this committee and asked why such an outrageous procedure of the violations of the protocol of the House, and the treatment of a Member of this House and this body was handled thusly, we were told in effect, "Well, we knew how Congressman FITHIAN stood on that, we did not have to contact him."

Now, Mr. Speaker, when, in the processes of this body, is it justifiable to say that because an individual's position is known that a complete and intential end run would be pulled such as that in order to affect the goal of this committee?

It was an outrage. It was the process and procedure and protocol and indecency to a Member of this body.

I have no objection at all, of course, to the majority leader's need for this project. I will not even go into the argument that the funds involved in here may or may not be too much or too little. I do not know that project. I do not interfere in that project because I trust the majority leader and I trust the gentleman from Texas (Mr. STENHOLM).

I also almost said I trusted the gentleman from Texas (Mr. GRAMM). But the Gramm-Latta budget prevented this.

But I just am insensed by the fact that this body would do this to a Member. I lost once on the floor of the House on a deauthorizing bill with 19 projects and it was fairly fought and squarely fought and over my objections to it, 19 projects were removed before the bill passed the House. One of them was my project and I lost.

The SPEAKER pro tempore. The time of the gentleman from Indiana (Mr. FITHIAN) has expired.

Mr. ROE. Mr. Speaker, I yield one-half minute to the gentleman from Indiana.

Mr. FITHIAN. I lost in a fair and square way. If there were any way of my preventing this committee from getting any more legislation through this House in the remaining 13 months that I am going to be in this body I will be here in the well and I will do that because I think there is a reckoning due for this body.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. FITHIAN. Mr. Speaker, I yield to my friend, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. I want to apologize to the gentleman from Indiana very sincerely. If by deed or omission I have been guilty of anything on any other piece of legislation that has caused him this distress I was not aware of it, and the references he makes to the majority leadership's having made a decision which willfully denied him his rights I think may be misplaced.

I want to say to the gentleman that I respect him and I respect his judgment. I think he is one of the most innovative and creative Members of this House. I think he should have his rights fully protected.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

Mr. ROE. Mr. Speaker, I yield 2 additional minutes to the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. I sympathize with the gentleman's feeling and I can understand the depth of conviction and wounded hurt that brings him to this point; but I think the gentleman would acknowledge that it has nothing whatever to do with the bill presently before us, and I really believe the gentleman from Indiana, if he will examine his heart, will admit that even though grievously wronged, should not inflict upon this body an arbitrary decision to stand in the way of passage of any legislation that comes from a committee.

Mr. FITHIAN. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Indiana.

Mr. FITHIAN. In fact, it is my observation that the process by which this bill is going to pass—I suspect it shall pass—is the process that I object to—not to the one paragraph, but to the other two and three-quarter pages in which one collects up a number of things which may not stand the light of day on their own merit and tuck them into the bill, and finally it was precisely that process by which my own interests were not protected by taking some totally unrelated matter, sliding it into a bill without notifying a Member and then adding a number of other provisions which may or may not have passed the House on their own merit.

Mr. WRIGHT. Is the gentleman aware on its merits of any of the matters that had been included in this bill being hurtful to him or any other Member?

Mr. FITHIAN. I am a Member of this body and a citizen of this country, yes, I do object, strenuously object on the merit to section 6 and a couple of other items in the bill.

Mr. WRIGHT. That being the case, I can understand the gentleman.

Mr. FITHIAN. Is there not a process, I would ask the majority leader, whereby we can separate the Texas project on its own merits and leave these other matters which are substantive to another day?

Mr. WRIGHT. That was the very process I recommended, that is the very process that we asked for. That is the very process the House followed.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. WRIGHT) has again expired.

Mr. ROE. Mr. Speaker, I yield 1 additional minute to the gentleman from Texas.

Mr. WRIGHT. Unfortunately we cannot control the other body and when they take one of our bills and add amendments to it, then I think our only recourse is either to kill the bill, which I think would be infortuitous and perhaps maybe even petty of us to do—or to pass the bill and in the absence of some serious strenuous objection to the merits of something in this legislation——

I am just pleading with the gentleman not to make this legislation presently before us the victim of his scorn which may rightfully apply to some other piece of legislation or indeed to some process.

Mr. FITHIAN. A part of this bill was in that other bill, I believe, and I was treated in that fashion. I believe there is a remedy for this. I do not think we have to accept what the other body sends over here attached to a bill that has nothing to do with the bill. If that were the case, how in the world would we legislate on the merits.

I think there is a procedure. We do not have to accept the Senate amendments.

Mr. ROE. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Speaker, I rise in opposition to this bill, not based on the project of our distinguished majority leader, the gentleman from Texas (Mr. WRIGHT), but on the very comments that my colleague from Indiana makes.

I ask several questions. First, what is the emergency upon which at 5 o'clock on the day that we adjourn the first year of the 1st session of the 97th Congress that we bring this bill to the attention of the House?

Second, I ask the question that I asked on February 5, a year and a half ago, when I held 184 amendments before the House when we were dealing with the omnibus water bill. That question is this: When are we going to begin to develop a process in this House whereby flood control projects, water resource projects, reclamation projects, and projects that are under the jurisdiction of the Army Corps of Engineers are dealt with in an orderly process, whereby we have principles and standards upon which we judge projects?

Hidden in this legislation are projects in South Dakota, in New Mexico and other places, and they may stand the light of day on their

merits, but I would suggest that they have been added to this legislation because of the priority nature of it, given the fact that it is a project namely in the district of the majority leader and they are laid upon us in this eleventh hour without the opportunity to know whether the Army Corps of Engineers is supportive, whether there is any cost sharing in this time of fiscal restraint by the local communities, whether they have met all of the environmental standards that are required for meritorious projects, and whether or not they have met all of the considerations of the House of Representatives and its committee that is led by our distinguished colleague from New Jersey.

I would urge my colleagues to vote "no" on this legislation and to restore a process whereby we can develop a merit water policy that really looks at the question of how much people should pay for the value of water and what is significant for this country to build rather than in this kind of a process where we add commitments onto the Federal Government which we will have to pay for as taxpayers, but may in fact not know the value of the legislation, the value of the projects, because of the nature and form in which it comes.

So, Mr. Speaker, I urge my colleagues strongly to vote down this suspension and to move back to a process so that our committee, upon which I serve, can bring before the House an omnibus water bill that puts each project in that legislation based on thoughtful consideration, based on merit and based on our looking at all of the implications of this legislation.

□ 1700

Mr. ROE. Mr. Speaker, would the distinguished gentleman from Arkansas yield an additional 5 minutes to the chairman of the subcommittee?

Mr. HAMMERSCHMIDT. Mr. Speaker, I would be pleased to yield 5 additional minutes to the chairman.

Mr. ROE. Mr. Speaker, I thank the gentleman from Arkansas.

My fellow colleagues, Merry Christmas. You know, I sympathize with the gentleman from Indiana very much, but I resent anybody implying that this Member of Congress would work and participate in anything clandestine whatsoever.

Now, I think the catchwords that are used around here every time we try to get something done around here is a little bit much and somebody in this House has got to stand up and speak to this issue.

We have been waiting 9 months to pass that Texas bill and the other body held it captive, and the gentleman knows that, and they tacked on those other four amendments. That is a fact. That has been going around here in this House and in the other body for the last 500 years, if we were a nation that long.

This is nothing clandestine or new or dirty or whatever. That is the way the process works. Those are the rules and those are the regulations.

Now, it happens to be, whether it is right or wrong, I am not speaking to that issue.

Furthermore, as chairman of this subcommittee, I was not advised by the distinguished gentleman from Indiana what his problem was until after the deed had taken place.

I will yield in time. Please let me finish.

I want to say to the Members here that the items that the Senate has added are legitimate items. We have reviewed the items. They are not trying to be sharp or shrewd or anything. There are things that have to be done. Every day that is delayed in getting the project approved in this House or in the Senate and every month that goes by is increasing the cost by 10, 15, or 20 percent.

Now it is to the point that everything everybody is trying to do is evil.

Now, I would suggest to the Members here, I have the greatest regard and respect for the gentleman from Pennsylvania. May I suggest in the interest of trying to get these jobs done and get the work done that ought to be done in Texas and the other places—and we approved the bridge that is involved that has added funding because costs have gone up—that we approve this legislation.

I agree and I sympathize, and the Members know me well enough to know that any Member of this House that I can be helpful to or work with, I have done it, in bill after bill.

It is not the Committee on Public Works and it is not the Subcommittee on Water Resources that is evil in this process. This process exists. That does not make it right nor does it make it totally wrong.

I do sympathize with the gentleman from Indiana, because I think his grievance has merit, and I told the gentleman that.

Now I yield to the gentleman from Indiana (Mr. FITHIAN).

Mr. FITHIAN. Mr. Speaker, I thank the distinguished chairman.

I want to clarify that I am not suggesting that this particular procedure we are operating under at this moment was a clandestine operation. As the gentleman knows, in a phone call recently, I explained that it was the proceeding procedure. I explained right here at this table 2½ years ago, when Mr. ROBERTS preceded me in the subcommittee on this committee, the problem that we had.

I talked with the gentleman from New Jersey——

Mr. ROE. After the deed was done.

Mr. FITHIAN (continuing). And was assured by himself and the ranking Republican on the committee, the gentleman from California (Mr. CLAUSEN).

Mr. ROE. After the deed was done.

Mr. FITHIAN. Yes, it was all done 2½ years ago and I was assured, I was promised by the gentleman from California (Mr. CLAUSEN), and I was assured by the now chairman of this committee that we would address that particular grievance.

How was it addressed? It was addressed 2 weeks ago on the floor of the House in the moment of adjournment. It is that that was clandestine, not today. It is that that the committee did wrong.

I do not believe that the chairman was on the floor, or perhaps even in Washington at the moment.

There is nothing personal about this. I hold nothing but the highest respect and regard for the chairman, but the chairman did not participate—I want to point out to the Members of this body—this chairman did not participate in the violation of the protocol and in the prostitution of the process of this House; but nonetheless, the protocol was violated and the process was prostituted 2½ weeks ago, whenever that adjournment came, or 3 weeks ago now.

Mr. ROE. Mr. Speaker, let me reclaim my time and then I will finish.

Let me suggest this to the Members. The distinguished gentleman from Indiana has a very valid point and I am not contesting that point, but I am contesting the situation that we should hold up these four projects which have absolutely nothing to do with the issue involved and delay four other States their just rights in this House, too.

I would expect that the Members who represent those four or five respective States ought to get up and speak to the issue as it relates to their States. As strongly as I feel in rightness and fairness and justice, we do not have the right to deny other States the right to the things that they need.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, I rise in strong support of this legislation. The House has previously passed the Benbrook Lake provision. The modifications and additions which the bill now contains are not only acceptable but desirable. They will permit small projects to go forward in the interest of sound water resources development and will cure several other problems that are of limited scope but of local importance.

The provision also clarifies the intent which the House had in passing its version of S. 1493. A provision of that bill prohibits the Corps of Engineers from removing houseboats and other structures from their lake and reservoir projects prior to December 31, 1989. It was the intention when we

passed that bill that cabins and docks which were originally built illegally and are dangerous encroachments were not to be protected by the provision. As I say, this intention is clarified in this legislation. The Corps of Engineers must properly take action, in the face of a threat to life and property to seek removal, especially of illegal cabins which may be constructed within the area that the reservoir waters fluctuate. However, it is not our intent that modifications made to legally constructed cabins and docks are to be affected. In other words, the Corps of Engineers cannot look to some structural modification made to an otherwise legal dock or cabin and claim that it is illegal and must be removed.

With this understanding, I believe the provision is most sound and does provide the protection against any arbitrary actions that the Corps of Engineers may consider. Again, Mr. Speaker, I most strongly support this bill and urge its immediate passage.

Mr. Speaker, I yield 1 minute to the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. Mr. Speaker, I want to thank the gentleman for yielding. I was not going to get up, but as the chairman mentioned a little while ago, some of us from the affected States should perhaps get up and talk about this particular process. Sometimes the process allows for something to be done that needs to be done and in this particular case, this is what happened.

Section 5 of this bill allows Albuquerque to store water at the Abiquiu Dam, a dam which is a little further up north from Albuquerque and Elephant Butte Dam a few miles south of Albuquerque.

We find ourselves in the fortunate and perhaps unusual position in the arid southwest of Albuquerque having an excess amount of water and we need something to do with it. We are willing to share it with our neighbors.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. LUJAN. I would be happy to yield to the gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I thank the gentleman for expanding his project. I think it is important for us to know what the project is.

I just would like to ask two questions; one, has this project been approved by the regional engineer of the Army Corps of Engineers?

Second, is there any cost sharing by the people of Albuquerque in order to do this particular project?

Mr. LUJAN. I can answer the question very clearly, there is a cost sharing agreement for additional costs.

The SPEAKER pro tempore. The time of the gentleman from New Mexico (Mr. LUJAN) has expired.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I rise in support of H.R. 779 and urge its immediate passage.

The legislation before us contains a number of minor provisions most of which have already been favorably acted on by the full House of Representatives, either in this session or in previous Congresses. Three of the six provisions in this bill involve no additional costs to the Federal Government and the other three entail modest modifications to already existing project authorization. Of those provisions in the latter category, one authorized the Corps of Engineers to relocate a water supply intake which has suffered severe sedimentation. Another authorizes funds to complete construction of on-and-off ramps for a previously authorized bridge. And the third provides water supply authority for a municipality at an existing Corps of Engineers reservoir.

Mr. Speaker we have been informed that there is strong support for this legislation among our counterparts in the other body and, therefore, I urge its rapid passage here today.

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time.

Mr. ROE. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. ROE) that the House suspend the rules and concur in the Senate amendment to the bill, H.R. 779.

The question was taken.

Mr. FITHIAN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

Mr. FITHIAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

GENERAL LEAVE

Mr. ROE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

IMMIGRATION AND NATIONALITY ACT AMENDMENTS OF 1981

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4327) to amend the Immigration and Nationality Act, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 3, line 12, strike out "simple possession of marihuana" and insert "a single offense of simple possession of 30 grams or less of marihuana".

Page 3, line 25, strike out "paragraph" and insert "paragraphs".

Page 4, line 2, strike out "simple possession of marihuana" and insert "a single offense of simple possession of 30 grams or less of marihuana".

Page 16, line 16, strike out "simple possession of marihuana" and insert "a single offense of simple possession of 30 grams or less of marihuana".

Page 16, line 22, strike out "son or daughter" and insert "child".

Page 17, line 4, strike out "son or daughter" and insert "child".

Page 18, strike out all after line 22 over to and including line 5 on page 19 and insert:

SEC. 11. Section 265 (8 U.S.C. 1305) is amended to read as follows:

"SEC. 265. (a) Each alien required to be registered under this title who is within the United States shall notify the Attorney General in writing of each change of address and new address within ten days from the date of such change and furnish with such notice such additional information as the Attorney General may require by regulation.

"(b) The Attorney General may in his discretion, upon ten days notice, require the natives of any one or more foreign states, or any class or group thereof, who are within the United States and who are required to be registered under this title, to notify the Attorney General of their current addresses and furnish such additional information as the Attorney General may require.

"(c) In the case of an alien for whom a parent or legal guardian is required to apply for registration, the notice required by this section shall be given to such parent or legal guardian.".

Page 30, after line 2, insert:

SEC. 20. (a) Section 201(a) (8 U.S.C. 1151(a)) is amended by inserting after "two hundred seventy thousand" the following: ": *Provided*, That to the extent that in a particular fiscal year the number of aliens who are issued immigrant visas or who may otherwise acquire the status of aliens lawfully admitted for permanent residence, and who are subject to the numerical limitations of this section, together with the aliens who adjust their status to aliens lawfully admitted for permanent residence pursuant to subparagraph (H) of section 101(a)(27) or section 19 of the Immigration and Nationality Amendments Act of 1981, exceed the annual numerical limitation in effect pursuant to this section for such year, the Secretary of State shall reduce to such extent the annual numerical limitation in effect pursuant to this section for the following fiscal year".

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended by inserting after "year" the fol-

lowing: ", *And provided further,* That to the extent that in a particular fiscal year the number of such natives who are issued immigrant visas or who may otherwise acquire the status of aliens lawfully admitted for permanent residence and who are subject to the numerical limitation of this section, together with the aliens from the same foreign state who adjust their status to aliens lawfully admitted for permanent residence pursuant to subparagraph (H) of section 101(a)(27) or section 19 of the Immigration and Nationality Amendments Act of 1981, exceed the numerical limitation in effect for such year pursuant to this section, the Secretary of State shall reduce to such extent the numerical limitation in effect for the natives of the same foreign state pursuant to this section for the following fiscal year".

Page 30, line 3, strike out "20" and insert "21".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. FISH. Mr. Speaker, reserving the right to object, and I shall not object, this measure has been before our subcommittee, not only all this year, but most of the preceding year.

□ 1710

It is needed legislation, recommended by and large by the Department of Justice, and the Immigration Service. The issues between our version and that of the other body have been largely resolved, narrowed down to a very few.

I take this reservation to ask the chairman of the subcommittee if he would be good enough to explain the differences between the Senate-passed version and the version that passed the House a few months back, and to explain the disposition he wishes to make of these differences.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding.

Mr. Speaker, I would first like to thank the gentleman for his sterling help all through this year as a member of our subcommittee.

Mr. Speaker, as my colleagues may recall, H.R. 4327 passed the House under suspension of the rules on October 13, 1981. It is a noncontroversial legislative package that is designed to:

First. Improve the efficiency of the Immigration and Naturalization Service;

Second. Promote a more equitable application of our immigration laws; and

Third. Save several million dollars over the next few years.

The Senate has approved the legislation with just a few minor changes which I will now describe:

1. MARIHUANA POSSESSION

The House version would allow the Attorney General to admit certain aliens to the United States notwithstanding their conviction for "simple possession of marihuana."

The Senate adopted a clarifying amendment which would authorize the waiver of excludability only for possession of 30 grams or less of marihuana.

2. ALIEN REGISTRATION

The House bill eliminates yearly alien registration reporting requirements for immigrants, yet maintains it for nonimmigrants.

The Senate provision eliminates the annual yearly alien registration requirement completely.

3. DOCTORS AND INVESTORS

The House bill provides permanent residence to certain foreign medical graduates and investors without deducting visa numbers from the worldwide and per country immigration ceilings.

The Senate version charges any visas issued or adjustments of status to the worldwide and country numerical ceilings.

The Senate amendments do not alter—in any significant way—the House-passed bill and, as a result, I urge my colleagues to support my request.

I would say to the gentleman from New York (Mr. FISH) that the Senate amendments do not alter in any significant way the bill that the House passed. I think this will be a very important addition to the arsenal of the Immigration and Naturalization Service to improve its work not only in America but in its foreign posts as well.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

Mr. FISH. Mr. Speaker, further reserving the right to object, if I understand it, then, out of the 19-some different sections in the House-passed bill in October, the Senate has slightly modified three of them that do not materially change the work product of the House.

Mr. MAZZOLI. The gentleman is correct; three slight changes in the 19 sections.

Mr. FISH. I thank the chairman for that.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. FISH. I yield to the gentleman from California, a member of the subcommittee.

Mr. LUNGREN. Mr. Speaker, I would also like to suggest we accept these changes. This is an extremely important bill, probably the first step toward doing anything positive in reorganizing our immigration procedures, something which has been needed for some period of time.

Two of the three amendments that we are asked to accept from the Senate deal with parts of the law that I authored in the original House bill. I think they clarify what we were attempting to do. I think they protect us further in not opening the doors unintentionally to uncontrolled immigration with respect to the last amendment and making more clear with respect to the first amendment what we meant by the simple possession statement.

I concur in the statements of both the chairman and the ranking member and wholeheartedly support this effort.

Mr. MAZZOLI. I thank the gentleman for his work.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, could the gentleman clarify for me? It is just that I do not understand what we are doing with regard to the marihuana possession.

Mr. FISH. Mr. Speaker, I yield for a response to the author of the amendment, the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, to simply explain this, in the present law we have specific exclusions which do not allow any discretion to be exercised by the Attorney General with respect to past convictions on individuals who otherwise would be capable of coming into our country. We thought in the case of simple marihuana possession that the Attorney General ought to be able to look at the conviction to see whether it is relevant.

I used the language "simple possession." On the Senate side they had thought perhaps that was not definite enough. They wanted to specifically talk about the amount involved. They came up with 30 grams or less, to try to make more restrictive the definition we had placed in the law.

That is the sole change. It does not mean, however, that an individual with such a conviction would get in the country. It would merely allow the discretion to the Attorney General. At present he has no such discretion, and what is required is a private bill to come before those of us in the committee. This would allow him to exercise that discretion.

We tried to limit it only to those very, very restrictive cases.

Mr. WALKER. If the gentleman will yield further, in other words, what we have before us here in this language is really tougher language than what originally passed the House. Is that a fair statement?

Mr. LUNGREN. The Senate believes that to be true.

Mr. WALKER. I thank the gentleman.

Mr. MAZZOLI. I believe it should also be stated that the amendments of the gentleman from California are limited to family relationships. These are not beyond immediate family. So not only is it tighter than the current

language, but it does only affect family members and current mandatory bars are made discretionary bars.

Mr. FISH. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky (Mr. MAZZOLI)?

There was no objection.

A motion to reconsider was laid on the table.

NATIONAL JAYCEE WEEK

Mr. DASCHLE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 117) to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week," and ask for its immediate consideration.

The CLERK read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 117

Whereas the Jaycee idea began with a handful of young men in Saint Louis, Missouri, sixty-two years ago;

Whereas the Jaycee idea embraces today approximately three hundred thousand members in seven thousand five hundred American communities that have chapters in the United States Jaycees;

Whereas the Jaycee idea enriches the lives of communities around the world through affiliation in Jaycees International;

Whereas the Jaycee organization retains a youthful outlook, even in its maturity, and continues to build on the individual member, even with its global scope—first, helping him be the best man he can be, then helping him help his fellow man in need, one to one;

Whereas a Jaycee cares about people, and he shows it;

Whereas a Jaycee cares about progress, and he does something about it;

Whereas a Jaycee lives by the creed that "service to humanity is the best work of life", and throws himself into that work both in his vocation and avocation;

Whereas a Jaycee is the kind of young man this country will need in great numbers to help meet the challenges of our times and the coming century; and

Whereas it is fitting that we should give special recognition and encouragement to the Jaycee and his organization: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week", and calling upon all Government agencies and people of the United States to observe the week with appropriate programs, ceremonies, and activities.

● Mr. DASCHLE. Mr. Speaker, the Jaycees were founded by a handful of young men in St. Louis, Mo., some 62 years ago. Today the U.S. Jaycees count over 300,000 members in 7,500 communities.

The organization has grown because of its commitment to the individual. For 62 years the Jaycee idea, to help young men realize their full potential and to enlist that potential in the service of their fellow citizens, has improved the lives of Jaycee members and made their communities better places to live.

I am proud to sponsor this resolution calling on President Reagan to proclaim the week of January 17-23, 1982 as "National Jaycee Week." Passage of this resolution by the Congress is a tribute to the Jaycees organization and to each and every Jaycee.

I commend the National Jaycees for their commitment to excellence. Their 62-year tradition of caring about the lives of those with whom they live serves as a model of what is right with our Nation and richly qualifies them for the recognition they will receive during "National Jaycee Week" next month. I strongly urge its unanimous passage.●

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DASCHLE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolution just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

PROVIDING FOR PRINTING OF 3,000 COPIES OF GENERAL EXPLANATION OF THE ECONOMIC RECOVERY TAX ACT OF 1981

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the Senate concurrent resolution (S. Con. Res. 54) to provide for the printing of 3,000 copies of the General Explanation of the Economic Recovery Tax Act of 1981.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, and I will not object; this resolution will enable us to run some extra printing in the same run with a committee print. Because we normally print both anyway, we ought to do them at the same time. In so doing we can save, by my estimate, about $15,000.

I regret that the gentleman from Pennsylvania and I must inflict this additional bill on the House today, but we think the saving is worthwhile.

Mr. GAYDOS. Mr. Speaker, I would like to point out that this resolution is necessary at this time, since the staff publication will be printed during the congressional recess. Also, for GPO to print additional copies of the publication at a later date would cost substantially more than it would to print these copies at the initial printing. I should note that this publication will have a high demand from the Members' offices and from the general public. If the additional copies are not printed, there will be a very limited availability of the publication.

Mr. Speaker, I urge my colleagues to approve this concurrent resolution.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 54

Resolved by the Senate (the House of Representatives concurring), That 3,000 copies of the General Explanation of the Economic Recovery Tax Act of 1981, prepared by the staff of the Joint Committee on Taxation, be printed for the use of the Joint Committee on Taxation.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. RAHALL). Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order:

Senate amendment to H.R. 5159, on which the yeas and nays were ordered.

Senate amendment to H.R. 779, on which the yeas and nays were refused.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in the series.

BLACK LUNG BENEFITS REVENUE ACT OF 1981

The SPEAKER pro tempore. The pending business is the question of suspending the rules and concurring in the Senate amendment to the bill, H.R. 5159.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) to suspend the rules and

concur in the Senate amendment to the bill, H.R. 5159, on which the yeas and nays are ordered.The vote was taken by electronic device, and there were—yeas 363, nays 47, answered "present" 4, not voting 19, as follows:

[Roll No. 367]

□ 1730

The Clerk announced the following pairs:

Mr. AuCoin with Mr. Broomfield.
Mr. Leland with Mr. Trible.
Mr. Vento with Mr. Whitehurst.
Mr. Santini with Mr. Quillen.
Mr. Russo with Mr. Moorhead.
Mr. Moffett with Mr. Burgener.
Mr. McDonald with Mr. Conte.
Mr. Ford of Michigan with Mr. Young of Florida.
Mr. John L. Burton with Mr. Bonior of Michigan.

Messrs. KINDNESS, ASPIN, VOLKMER, KILDEE, STENHOLM, HERTEL, HANSEN of Idaho, ROEMER, FRANK, SMITH of Oregon, MITCHELL of New York, BETHUNE, SHUMWAY, STRATTON, GUNDERSON, SAM B. HALL, JR., WOLPE, and RALPH M. HALL changed their votes from "yea" to "nay."

Mr. BRODHEAD changed his vote from "nay" to "yea."

Messrs. JACOBS, DASCHLE, and SYNAR changed their votes from "yea" to "present."

□ 1740

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate amendment was concurred in.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING MUNICIPAL USE OF STORAGE WATER IN BENBROOK DAM, TEX.

The SPEAKER pro tempore. The pending business is the question of suspending the rules and concurring in the Senate amendment to the bill, H.R. 779.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. ROE). That the House suspend the rules and concur in the Senate amendment to the bill, H.R. 779.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the Senate amendment was concurred in.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 4503, MUNICIPAL WASTEWATER TREATMENT CONSTRUCTION GRANT AMENDMENTS OF 1981

Mr. ROE. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill (H.R. 4503) to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ROE. Mr. Speaker, I ask unanimous consent that the statement of the managers be read in lieu of the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of December 14, 1981.)

Mr. ROE (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. ROE) will be recognized for 30 minutes, and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. ROE).

Mr. ROE. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. HOWARD), the distinguished chairman of the Committee on Public Works and Transportation.

Mr. HOWARD. Mr. Speaker, I am pleased to rise in support of the conference report on H.R. 4503, the Municipal Wastewater Treatment Construction Grant Amendments of 1981.

I wish to commend the chairman of the Subcommittee on Water Resources, the gentleman from New Jersey (Mr. ROE), and the ranking minority member of that subcommittee, the gentleman from Arkansas (Mr. HAMMERSCHMIDT), as well as all of the members of the subcommittee for the fine job which has been done on this legislation. I also wish to express my appreciation to the ranking member of the full committee, the gentleman from California (Mr. CLAUSEN), for his usual cooperation and assistance. Finally, I wish to acknowledge the excellent job done by the House conferees in defending the House position on this important legislation.

The present Federal water pollution control program stems from major amendments made in the Federal Water Pollution Control Act Amendments of 1972. The 1972 act established a comprehensive program for the cleanup of our Nation's waters. Considerable progress has been made to date and it is important that this progress continue. Earlier this year, the administration proposed substantial changes in the program and stated that funding for fiscal year 1982 would not be supported unless these changes were made.

Our committee, after considerable efforts, reported H.R. 4503 which passed the House on October 27, 1981, by the overwhelming margin of 382 to 18. Shortly thereafter the Senate passed its version of this legislation. The agreement of the conferees represents a fair compromise which reasonably addresses the concerns of the House, the Senate, and the administration.

The conference agreement recognizes the need to reduce the Federal involvement in this program because of existing and expected budgetary constraints. It does so, however, in a manner which gives the States and local communities time to adjust to their increased responsibilities. The changes agreed to by the conferees take place after October 1, 1984. The program remains essentially intact until that date. After October 1, 1984, the Federal share is reduced from 75 to 55 percent. Also, the categories eligible for assistance are limited to treatment plants, interceptors, and infiltration-inflow correction. For projects which receive a step 3 construction grant before October 1, 1984, existing reserve capacity and the 75-percent Federal share are preserved.

With these provisions we have avoided harmful disruption to this very necessary program. It is essential that our Nation's commitment to clean waters not be abandoned. It is too important to the welfare of our people and to our economy as well. Our committee intends to continue its examination of this program in order to insure that it continues as a viable one.

Mr. Speaker, I believe that the conference agreement is reasonable and deserves the same overwhelming support that was given the House bill last October. I urge its passage.

Mr. ROE. Mr. Speaker, I yield myself such time as I may consume.

□ 1750

Mr. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. ROE. Mr. Speaker, I yield to the distinguished gentleman from California, the ranking minority leader of our subcommittee (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I rise in strong support of the Conference Report on the Municipal Wastewater Construction Grants Amendments of 1981 and I urge my colleagues to do likewise. This legislation has been hammered out over the course of the past year with our colleagues in the Senate, taking into consideration the administration's commitment to reform EPA's construction grants program, and I believe we have done an excellent job under most trying circumstances.

All of the members who have labored so hard on this legislation are to be congratulated for the product that is before us today. Special recognition belongs to the chairman of the Public Works and Transportation Committee, the gentleman from New Jersey (Mr. HOWARD), who provided the strong leadership and encouragement that has been the hallmark of his tenure as Public Works Committee chairman. The leadership of our Subcommittee on Water Resources, Chairman BOB ROE from New Jersey, and ranking Republican JOHN PAUL HAMMERSCHMIDT from Arkansas, also deserve particular credit for developing the original version of H.R. 4503, which the House passed just a few weeks ago by the overwhelming vote of 382 to 18, and for negotiating the excellent compromise that is embodied in this conference report. And, of course, Mr. Speaker, the staffs of both the House and Senate Public Works Committees on both sides of the aisle should be recognized for their outstanding efforts in connection with this legislation.

Mr. Speaker, when President Reagan took office less than a year ago, he initiated a program of major realinement with respect to governmental responsibility. The general thrust of his realinement was to reduce substantially the role that the Federal Establishment plays in the governmental process.

Within this overall context, the President proposed reducing the funding level authorized for fiscal year 1982 for EPA's construction grants program from $5 billion to $2.4 billion. Furthermore, the President proposed no wastewater treatment plant funding until legislation reforming the EPA's construction grants program was first enacted into law.

The conference report on H.R. 4503 represents the reform legislation that the Congress has developed in response to the President's initiative. I believe that the process has been extremely difficult and in some cases a painful one, but it has been most beneficial and the President and his emissaries, Anne Gorsuch and John Hernandez from the Environmental Protection Agency, are to be congratulated for taking the lead with respect to the need to reform this important environmental legislation.

Mr. Speaker, I agree with President Reagan's goal of balancing the budget and have supported and will continue to support efforts to achieve that goal. At the same time I believe we must be particularly painstaking in our efforts to insure that our budget balancing decisions are the best, most informed decisions possible.

This is especially important with respect to capital investments designed to further the development of the Nation's commerce and industry and the well-being of our people. For all their contributions to the Nation, public works investment programs are particularly vulnerable to disproportionate reductions when there are cutbacks nationwide for budgetary reasons. Because the programs are national in scope, the numbers are large and present a tempting target. They are characterized by long leadtimes and therefore are anticipatory; they must be commenced long before needs become critical. The deterioration they are intended to compensate for is slow, gradual, incremental, and diffused. Cutbacks are not immediately translated into public perception that needs are being shortchanged. Like our economic system in general, they are often taken for granted.

This situation poses a serious budgetary danger. While we quite correctly pursue a course over the immediate

future of reducing our Federal spending, we must strike a very careful balance. Excess cuts in public works investments could shortchange vitally needed programs and undercut the larger economic objectives which the cuts are intended to achieve.

In this context, it is precisely because I share the President's vision of a revitalized, reindustrialized America that I accord great priorities to our public works programs on which so much of the economy's vitality and the people's well-being depends. In other words, in attempting to address our immediate economic needs, we must guard against actions that could ultimately lead to severely undercutting our Nation's program of long-term revitalization.

I am convinced that the package of reforms embodied in the conference report before us today properly recogizes the need to balance budgetary objectives with equally important environmental objectives. H.R. 4503 significantly reduces the level of authorized Federal funding for EPA's construction grants program. It does this, not because there is either a realization or a perception that we do not have water quality needs greater than those able to be addressed by a $2.4 billion funding level. Rather, the conference report recognizes that, in these times of special economic sensitivity, the Federal Government is unable to spend as much money as some would like to address to legitimate water quality problems. At the same time, the amendments to the Clean Water Act made by H.R. 4503 continue to provide for stability and viability in our Nation's clean water program.

Mr. Speaker, I believe that the House, in passing the original provisions of H.R. 4503, and the conferees, in fashioning the compromise embodied in this conference report, were guided by a number of key concepts.

First, the hallmark of our efforts was balance and consensus. For too long we have attempted to solve our problems in an atmosphere of hostility and contentiousness and, with this legislation, we attempted to create a new and better precedent with respect to the development of essential environmental legislation.

Second, we never lost sight of how important it is—and will continue to be—to preserve and enhance the quality of our Nation's waters. I am convinced that all of the conferees believe, as I do, that, while we inherit the Earth from our fathers, we also borrow it from our children.

Third, even while we sought all possible ways of eliminating environmental hazards, we were guided by the conviction that it is impossible for us to have a society that is without risk. We recognized that our task must be to identify those risks that are socially acceptable, that we willingly assume because the alternatives are far more damaging.

Fourth, we viewed achieving our clean water goals in a total or holistic sense, always seeking to balance our environmental objectives against equally important economic, social, and international purposes. There was recognition that economic, energy, environmental, and social objectives were not opposed to one another; all must be coordinated in the attainment of the quality of life our people want and to which they are entitled.

Fifth, the policies we adopted were, I believe, founded on sound technical bases with assurance as to feasibility of implementation and with due regard for cost effectiveness. Implementation will allow for flexibility both in means and schedules to achieve our clean water goals.

Sixth, procedures were adopted to expedite decisionmaking in recognition of the fact that unnecessary delay harms both the environment and the economy.

Seventh, we made a special concerted effort to find new and better ways of addressing our water pollution needs. Strong incentives were developed to create more cost-effective, resource-efficient, reliable solutions to our clean water problems.

Eighth, the Clean Water Act establishes a national water pollution control program. As such, the conferees understood that the act must recognize and be equipped to respond to the legitimate significant water pollution needs of all regions and areas of our country: North and South, East and West, large and small, urban and rural.

Ninth, because we were dedicated to lessening the heavy Federal presence from every area of our national life, we strived to limit Federal intervention to those responsibilities which the National Government is uniquely qualified to carry out. We attempted to minimize the role that the Federal Government plays in attempting to solve our problems and emphasized, instead, reliance on institutions and individuals better equipped to deal with those problems.

And, finally, State and local governments were truly given a greater voice in determining environmental policy and a greater role in its administration. With the enactment into law of H.R. 4503, there will be more flexibility in the use of funds given to the States for environmental programs. Where authority is assigned to State and local levels, the delegation is intended to be a true one so that the process is made simple, and is not simply the addition of another tier of regulation.

Mr. Speaker, others have discussed in detail explanations of this conference report's provisions. I would just like to add some clarification on a few of those provisions.

Section 4 of the conference report directs the Administrator of the Environmental Protection Agency to make three grants for certain projects already in EPA's construction grants pipeline.

The first involves the expansion of the Southeast Sewage Treatment Plant located in the Bay View/Hunter's Point area of San Francisco. In order to mitigate the odors, noise, and visual impacts, and other adverse effects on the community identified in EPA's environmental evaluation of the proposed plant expansion, it was agreed that a greenhouse/skills training center would be constructed adjacent to the Southeast Sewage Treatment Plant. The center is to be connected to the plant by pipes which will carry methane to heat the center. In addition, sludge from the treatment plant will be used as fertilizer for the greenhouse.

A favorable grant eligibility determination and commitment to a $15 million greenhouse/skills training project was made on January 22, 1981, by the California State Water Resources Control Board, which acts as EPA's representative in determining grant eligibility in the State of California. However, although EPA was fully aware of CSWRCB's decisions, it was not until several months ago that EPA—incorrectly, the conferees believe—informed San Francisco that the greenhouse/skills center would not be eligible for grant funding under the Clean Water Act. In the meantime, the city and county of San Francisco had begun construction of the expansion to the Southeast Sewage Treatment Plant.

The second matter intended to be covered by this section involves the Greater Eureka wastewater treatment project. In the Eureka project, approximately 139 acres of property adjacent to the proposed Eureka Treatment Plant are considered to be environmental mitigation for siting of the proposed treatment plant and holding pond on 16 acres of wetland. The 139-acre site is to be dedicated as permanent open space and maintained and managed as a wetland/wildlife area, having the dual purpose of acting as a demonstration project to improve water quality while at the same time insuring restoration and enhancement of habitat values of a substantial wetland area. On November 21, 1980, the California State Water Resources Control Board issued its concept approval letter informing the city of Eureka and the U.S. Environmental Protection Agency of its determination that the purchase of the 139 acres was grant eligible. A little less than 2 weeks later, on December 3, the city of Eureka's mayor signed and accepted a step II grant award. Subsequently

EPA—again incorrectly, we believe—overturned CSWRCB's determination and advised the city that acquisition of the 139 acres was not eligible for Federal grant funds.

Both of these cases involve EPA's refusal to abide by the grant eligibility determination made by the duly appointed agency of a State having construction grants program delegation responsibilities. Both involve mitigation measures arising from the construction of a grant-eligible treatment works. Both situations involve costs associated with an integral part of the underlying grant eligible treatment works. In both instances, EPA erred in refusing to abide by the CSWRCB's grant eligibility determination.

The third project covered by section 4 of the conference report involves what the conferees believe was the need to provide innovative and alternative grant funding for the vascular plant, reverse osmosis technology that the city of San Diego is proposing for its sewage treatment recycling system.

Mr. Speaker, section 8 of the conference report deals with providing strong incentives for the use of innovative and alternative technologies and processes. As author of the original innovative and alternative technology provisions in the 1977 Clean Water Act, I am particularly heartened that the conferees agree that these provisions constitute an important opportunity to make our Nation's clean water program more cost effective and environmentally beneficial. During our Water Resources Subcommittee hearings on this construction grants reform legislation, EPA testified that "to date, EPA has found that for each dollar invested in the innovative and alternative technology program to provide this incentive, $6 is saved in project costs." The I/A provision contained in this conference report will, I am convinced, continue this excellent fiscal track record.

Mr. Speaker, I would just like to highlight one last provision of the conference report. Section 10 provides a new scheme for Federal funding of reserve capacity. Of special note, section 10 also has the effect of repealing the industrial cost exclusion (ICE) provision of the act. Section 10 provides that any grant made after November 15, 1981, for a publicly owned treatment works, will include funding for industrial capacity on the same basis as residential capacity. This is a most important provision and is one that was overwhelmingly supported by the House, in different form, on two separate occasions earlier this year.

Mr. Speaker, allow me to make one additional point. I am convinced that, perhaps more than in any other area, focusing on the tremendous wealth of talent that exists throughout our Nation offers the promise of the best water quality return for our construction grants program investment. It is a matter of investing in our Nation's infrastructure.

I spoke earlier about our national need to reinvest in our infrastructure. There, I was speaking of capital infrastructure. Here, I am talking about something else, something perhaps far more important. I'm talking about our political, our problem-solving, our people infrastructure.

I have long believed that the best government is the one closest to the people. There, it is less costly, more accountable, and more responsible to people's needs.

But over the years I believe our people have lost sight somewhat of this fact. We have had too much of a tendency to look to someone else to solve our problems, to let the Federal Government do things for us. In the process we have lost many of the most effective solutions to our problems and a great deal of control over our destinies. We have let our people infrastructure deteriorate.

This situation must be reversed. Nationwide, we can begin by truly returning the power and responsibility of government back where it belongs, to the hands of the people. In this way best of all we will achieve our clean water and other legitimate national objectives.

Mr. Speaker, I am convinced that the conference agreement on H.R. 4503 takes a major step in this direction. I, therefore, strongly support its passage today and urge all of my colleagues to do likewise.

Mr. ROE. Mr. Speaker, it is with great pleasure that I bring to the floor the conference report on H.R. 4503, the Municipal Wastewater Treatment Construction Grant Amendments of 1981. This bill represents the culmination of months of intensive efforts in our committee and in conference with the Senate. Throughout this time the assistance of the gentleman from Arkansas, the ranking minority member of the Subcommittee on Water Resources (Mr. HAMMERSCHMIDT), has been invaluable. I also wish to express my deep appreciation to the gentleman from New Jersey, the chairman of the full committee (Mr. HOWARD), for his usual fine leadership and the ranking minority member of the full committee, the gentleman from California (Mr. CLAUSEN), for his outstanding cooperation and assistance. A special expression of thanks is also owed the House conferees who did an outstanding job of defending the House position in conference.

In 1972 the Congress enacted landmark legislation providing for an intensive effort to reduce and ultimately eliminate the discharge of pollutants into our Nation's waters. The Federal Water Pollution Control Act Amendments of 1972 set increasingly stringent standards for discharges of industrial and municipal wastes. For municipal wastes it required secondary treatment by 1977 and the application of best practicable wastewater treatment technology by 1983. The 1977 date for secondary treatment was later extended to 1983 for those communities which were unable to meet the date because of a lack of Federal funding. In connection with these new requirements for secondary and best practicable treatment, the act provided a 75-percent Federal grant share for construction of publicly owned treatment works. The grants were to be available for such categories as secondary treatment, more stringent treatment, infiltration/inflow correction, major sewer system rehabilitation, new collector sewers, interceptors, and appurtenances, and correction of combined sewer overflows.

Earlier this year, the administration proposed drastic changes in the construction grants program. This was coupled with an announcement that fiscal year 1982 funding would not be supported unless the Congress passed legislation making changes in the program. Also, as part of this process, the Reconciliation Act reduced the fiscal year 1982 funding to zero with the provision that $2.4 billion would be authorized in the event that legislative changes are enacted into law.

The conference report I bring to the floor represents the response of the House and the Senate to the administration's call for changes in the program. It recognizes the need to reduce Federal participation in the program in view of existing and expected budgetary constraints. However, and this is most important, the States and localities are given a period of time in which to adjust to and make accommodations for their increased responsibility. The eligibilities for grants remain essentially intact until October 1, 1984. After that date the Federal share will be reduced from its current 75 percent to 55 percent. In addition, categories of treatment works eligible for grant assistance will be limited to secondary and more advanced treatment, interceptors and correction of infiltration/inflow problems. However, up to 20 percent of a State's annual allotment as determined by the Governor may be used to fund otherwise ineligible categories such as collector sewers, sewer rehabilitation, and correction of combined sewer overflows. With regard to reserve capacity, projects which receive a step 3 construction grant for a treatment plant or interceptor prior to October 1, 1984, will remain eligible for grant assistance for 20 years for reserve capacity in the funding of the remainder of the treatment plant and 20 to 40 years for interceptors. For projects receiving the first construction grant after October 1, 1984, Federal grant assistance

will be limited to the capacity needed to meet the needs (industrial and residential) existing as of the date of award of the step 3 construction grant. However, grant assistance will not be available for needs over and above those existing on October 1, 1990.

With regard to the Federal share, if a step 3 construction grant is approved before October 1, 1984, for a segment of a treatment plant or interceptor, then subsequent grants for the rest of the treatment plant, interceptors, and infiltration/inflow correction will be at 75 percent.

The statement of managers includes language urging the appropriation of funds to implement section 206 of the Federal Water Pollution Control Act. This section provides a mechanism for the reimbursement of communities which proceed with construction of treatment works at their own expense if the treatment works meet all of the requirements of the act. This enables communities to save money by moving ahead before Federal funds are available and thus avoid the increased costs associated with inflation. This provision of the act, however, has not been funded in appropriations acts. This has resulted in an unfortunate and unnecessary increase in cost for the program, both to local interests and to the Federal Government. With the reductions in Federal assistance incorporated in H.R. 4503, it is even more necessary that ways be found to decrease overall costs associated with the reduction of pollution of our Nation's waters. Permitting construction at present-day prices, with reimbursement later, is one way of doing this.

Mr. Speaker, one glaring example of the types of difficulties which are created because of the lack of proper implementation of the reimbursement provision in the act is found in the district of my distinguished colleague, Mr. MOTTL. The four communities of Rocky River, Bay Village, Fairview Park, and Westlake in suburban Cleveland, Ohio, built a sewer treatment plant with EPA guidance. However, when this "pilot program" plant was completed it turned out that it did not operate properly. The plant when finally completed with design modifications will serve about 80,000 residents. The attempts on the part of local communities to receive reimbursement from EPA go back many years. They have been unsuccessful both because of the lack of funding for section 206 and because of EPA's unwarranted allegation that the project involving as it does advanced technology of an experimental nature does not meet the criteria of a "normal" construction grant project. I wish to assure the gentleman that in my opinion the local communities are entitled to reimbursement and should be reimbursed upon the appropriation of funds for that purpose.

There is one other provision in the conference agreement that I would like to mention. Section 4 provides that the Administrator shall make a grant, from any funds otherwise allotted to the State of California, to the city of San Diego in connection with that city's aquaculture sewage process system as an innovative and alternative waste treatment process.

The city of San Diego is planning to construct a wastewater-to-potable recycle system. The product of this system will be not only treated sewage but potable water. This is the type of innovative and alternative project which is truly worthwhile because of its potential for establishing the practicability of reclaiming water for municipal purposes. This is the sort of thing which should be encouraged, especially in view of the droughts which have occurred in recent years. Our committee has long maintained the importance of the relationship between water quality and water quantity. They are inseparable. Section 4 embodies this principle.

Section 4 also provides that the Administrator shall make grants from funds allotted to the State of California for mitigation features associated with waste treatment projects in San Francisco and Eureka, Calif. Grants for these features were approved by the State pursuant to its delegated authority and were not disapproved by EPA until some time later. The provisions in section 4 are designed to correct the inequity which would result if the local communities were now required to pay the cost associated with these features after proceeding under the assumption that they would be grant eligible.

Mr. Speaker, I am including as part of my statement a brief section-by-section analysis of the bill agreed to by the conferees.

I believe this is a workable bill which will provide an opportunity for State and local governments to adjust to the changes made in the program. It will also provide us with the opportunity to continue our examination of the program and to make whatever further changes are determined to be necessary to assure its sound and equitable operation. The cleanup of our Nation's waters is a matter of immense importance to all of the citizens of this country. We must not sacrifice our commitment to the goal of clean water for purely budgetary reasons, because the cost we will pay for water pollution will far outweigh any costs of correcting the problem. I urge passage of the bill.

At this point I include the analysis of the conference report on H.R. 4503:

ANALYSIS OF THE CONFERENCE REPORT ON H.R. 4503

Section 1 provides that this act may be cited as the "Municipal Wastewater Treatment Construction Grant Amendments of 1981".

Section 2 provides that after October 1, 1984, grants may be made only for projects for secondary or more stringent treatment plants, new interceptors and appurtenances, and infiltration-inflow correction. Beginning on that date, any State may, at its option, use up to 20 percent of its annual allotment to fund categories of projects other than secondary treatment plants, new interceptors and appurtenances, and infiltration-inflow correction.

Section 3 eliminates, effective upon the date of enactment, grants for step 1 planning and step 2 design work. Instead, these costs will be reimbursed to the grantee upon award of the step 3 construction grant. States are required to use a portion of their funds to make advances to communities needing assistance in preparing planning and design work.

Section 4 amends section 201 of the Federal Water Pollution Control Act to authorize the Administrator of the Environmental Protection Agency to make grants for mitigation expenses and for special processes in the cases of projects in San Francisco, Eureka, and San Diego, Calif.

Section 5 provides two methods for funding correction of combined sewer overflow problems, notwithstanding section 2. First, after October 1, 1984, the Governor of a State may request that CSO problems be funded out of the State's regular allotment, rather than the 20 percent discretionary allowance, where correction of CSO discharges is a major priority of the State. Second, beginning fiscal year 1983, $200,000,000 per year is authorized to correct CSO discharges into marine bays and estuaries.

Section 6 directs the Administrator to encourage and assist grant applicants to develop and file capital financing plans which will project future treatment needs, costs, and methods of financing.

Section 7 provides that until October 1, 1984, the grant amount for eligible projects shall be 75 percent of the cost of construction. Beginning October 1, 1984, the grant amount for eligible projects shall be 55 percent of the cost of construction. However, where a grant for construction of a primary, secondary, or advanced waste treatment facility and related interceptors or for correction of infiltration-inflow was awarded prior to October 1, 1984, all subsequent segments and phases of such facility, related interceptors, and infiltration-inflow correction shall be 75 percent of the cost of construction.

Section 8 makes permanent the authority of the Administrator to make grants for projects using innovative and alternative processes and techniques, and provides that the Federal share of such grants shall be 20 percentage points greater than the prevailing Federal share, but in no event greater than 85 percent. Each State is required to set aside no less than 4 percent and no more than 7½ percent, for increasing the Federal share of such projects. Grants may be made for any innovative or alternative "operable unit" of a treatment system, including sewers, correction of combined sewer overflows, infiltration-inflow correction, and major rehabilitation. In addition, the definition of treatment works in section 212 of the Federal Water Pollution Control Act is amended to allow for the grant eligibility of field testing of innovative or alternative waste treatment processes and techniques.

Section 9 amends section 203(a) of the Federal Water Pollution Control Act to

raise the estimated cost limitation on small projects which may receive a combined step 2 design and step 3 construction grant from $4 million to $8 million.

Section 10 provides that beginning October 1, 1984, no grant shall be made to construct that portion of any treatment works providing capacity in excess of flows (including residential, commercial, industrial, and other flows) existing at the time of approval of the step 3 construction grant, but in no event shall the capacity funded exceed that necessary to treat flows existing on October 1, 1990. However, if a treatment plant or its associated interceptors has received any step 3 construction grant prior to October 1, 1984, remaining segmented or phased grants for that treatment plant and associated interceptors shall be eligible for funding consistent with reserve capacity which is currently eligible: 20 years for the plant and 20 to 40 years for the interceptors. Also, grants awarded prior to October 1, 1984, include funding for reserve capacity incorporated in associated collectors.

Section 11 modifies the requirement that two brand names or equal be listed in a proprietary specification for bids by providing that when it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a brand name or equal description may be used.

Section 12 requires that the prime consult- ant to a grantee remain on the site for one year following start-up of the facility to supervise operation and training. Such activity will be grant eligible. One year after the date of completion, the owner and operator of the facility shall certify whether the facility is in compliance with its permit; if it is not, the failure must be corrected in a timely manner at other than Federal expense.

Section 13 establishes the formula for allotment of grant funds to the States for fiscal years 1982 through 1985. For fiscal year 1982, the formula shall be that which is currently in effect, which is the formula contained in table 3 of Committee Print 95-30 of the Committee on Public Works and Transportation of the House of Representatives. Funds authorized for fiscal years 1983, 1984, and 1985 shall be allotted according to a formula which is an average of the formula for fiscal year 1982 and the Senate formula for fiscal year 1984.

Section 14 provides that for fiscal years 1982 through 1985, not to exceed 4 percent of the total amount authorized for each year is authorized to be reserved for making grants to States for the costs of administering provisions of the construction grants program.

Section 15 authorizes the Administrator to reserve one percent of each State's allotment, or $100,000, whichever is greater, to be used to make grants to the States to carry out water quality management planning.

Section 16 directs the Administrator to allot to the State of New York from fiscal year 1982 funds an amount necessary to pay the cost of conveying sewage from the convention center of the city of New York to the Newtown sewage treatment plant in Brooklyn.

Section 17 authorizes $2.4 billion for each of fiscal years 1982, 1983, 1984 and 1985 for the construction grants program.

Section 18 amends the Federal Water Pollution Control Act to state the policy of Congress that grant-assisted projects shall be those which, in the estimation of the State, are designed to achieve optimum water quality management, consistent with the public health and water quality goals and requirements of the act.

Section 19 expresses the policy of Congress that a grant-assisted project shall be considered as an overall waste treatment system and shall be that system which constitutes the most economical and cost-effective combination of treatment works to meet the requirements of the act. It also provides that water efficiency measures and devices are to be considered along with all other alternatives in determining what overall system is most cost-effective.

Section 20 provides that where a State has been delegated sufficient authority to administer the construction grants program, the Governor may certify to the Administrator that a grant application meets all applicable requirements. The Administrator must approve such an application within 45 days or state the reasons for disapproval in writing.

Section 21 amends section 301(i) of the Federal Water Pollution Control Act to allow for an extension of the deadline for achievement of secondary treatment by municipalities, from July 1, 1983, to July 1, 1988. The provision also eliminates the requirement that all municipalities achieve best practicable waste treatment technology by July 1, 1983.

Section 22 amends section 301(h) of the Federal Water Pollution Control Act, which allows certain communities to treat their wastes to less than secondary levels if they are discharging through a deep ocean outfall pipe and certain stringent environmental requirements can be met. Section 22 deletes from existing law a restriction of eligibility to communities which already had ocean discharges on December 27, 1977. In addition, section 22 clarifies that eligible applicants include communities which have achieved secondary treatment capability. All communities proposing ocean discharges will have one year from the date of enactment to submit an application for a variance from the secondary treatment requirement. No such variance shall be granted for any discharge of sewage sludge into marine waters from outfalls. In addition, no variance made possible by these amendments may be granted sooner than one year after the date of enactment.

Section 23 amends the Federal Water Pollution Control Act to allow the use of biological treatment facilities such as oxidation ponds, lagoons, and ditches, and trickling filters, to satisfy the secondary treatment requirement if it can be proven that water quality will not be adversely affected by such methods.

Section 24 requires states to review, revise and adopt revised or new water quality standards within three years of the date of enactment. After three years, no grant will be made unless this effort has been completed and approved by the Administrator.

Section 25 directs the Administrator of the Environmental Protection Agency to submit to Congress not later than December 31, 1982, a new "needs survey" as specified in section 516(b) of the Federal Water Pollution Control Act, and reflecting the changes made by H.R. 4503.

Section 26 expresses the sense of Congress that judicial notice should be taken of this act, including the reduced authorization levels for the construction grants program, and that Federal consent decrees should be modified accordingly where required by equity.

Section 27 provides that the project for Bath Township, Mich., shall be eligible for grant assistance.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

I want to commend the gentleman and the ranking member for the great work that he has done.

At some later point in these proceedings, I would like to speak further. But at this point, one of the issues that has been involved in this legislation between the House and the other body has been the question of the allocation formula, and I wonder if the gentleman could just give a brief description of how that issue ended up between the House and the other body.

I think it is very important when we are talking about $2.4 billion to know just where that is going to be divided.

Mr. ROE. The gentleman from Georgia asked the question in view of the fact that the legislation is a $2.4 billion bill, authorizing per year, for the next 4 years, what was the final adjudication between the House and the Senate on the formula allocation of funds?

We took for the first year the existing formula in the existing legislation and accepted that year.

We took the average over the last 3 years of the Senate formula and the House formula.

We combined them together and divided by two, based on the year 1984.

It was a fair and equitable decision on balance, we felt.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Speaker, I urge my colleagues to support the conference report on the municipal construction grants program. Both the Senate and the House came a long way during the conference. The result is a compromise that I believe my colleagues from extremely urban areas can live with as readily as those from more rural areas like myself.

The House conferees insisted that there could be no reforms without flexibility. The program had to be tailored so that States would have the means to overcome their particular problems—which differ region by region but which block our national goal of clean water. While no one is completely happy with any compromise, in this case I believe basic fairness has prevailed.

I am also pleased that the House convincingly made the case to the Senate that infiltration-inflow correction is a small ticket item with big re-

wards. The House position prevailed because infiltration-inflow correction makes commonsense. It means a better program at a cheaper long-term cost to protect and conserve our Nation's clean water.

Two of the major problems plaguing this program—high cost and poor performance of treatment plants—have been traced to excessive infiltration inflow—which is extraneous clean water entering the sewer system. Specifically, the flow of clean water equals or exceeds the total waste flow at plants across the country. If unchecked, municipalities build plants that are too large and too expensive. In other cases, infiltration inflow causes the disruption of treatment processes, and this results in the bypassing of plants and the dumping of raw waste into our waterways. In addition, leaky sewer lines are a likely contributor to ground water contamination. However, correction of the infiltration-inflow problem has been found to be cost effective, typically with a 6-to-1 benefit/cost ratio.

For these reasons, infiltration-inflow control should be an important concern to grant recipients in the ongoing program, and should be part of the entire facility planning, design, and construction process. Municipalities should be expected to conduct infiltration-inflow detection and make a commitment to solving this problem—not just temporarily but over the long haul. If this had been the case in the past, we might not now have this problem today.

In addition, there should be no question that this work taking place in step I and II is fully reimbursable at the Federal share in step III. And loans from any newly established revolving fund or any other advance funding mechanism selected by a State should be available for infiltration-inflow detection. Furthermore, with the surety of a 4-year authorization, the States have the opportunity to develop multiyear strategies for solving their significant municipal sewage pollution problems. Based on the findings of the Congress this year, vigorous infiltration-inflow control should be an integral element and high priority of any cost-effective municipal pollution control program.

Mr. Speaker, I would like to take this opportunity, if I may, to ask the distinguished chairman of the Subcommittee on Water Resources, who so ably led the House conferees, whether my statement accurately reflects the intent of the conference committee on the matter of infiltration-inflow control?

Mr. ROE. Mr. Speaker, if the gentleman will yield, I would like to assure him that his statement does reflect accurately the intent of the conference committee. The House persuaded the Senate conferees to accept the House position on this matter because infiltration-inflow correction has been found to be an integral element of a well run municipal construction grants program. It makes good engineering sense and should be part of the entire facility planning, design, and construction process. I would like to further point out that in the Statement of managers, under the Senate amendment to the section "Grants for Step 1 and 2," there is a specific statement, agreed to by the conferees, that the cost associated with infiltration inflow analysis and examination of the need for sewer rehabilitation will be eligible for reimbursement.

Mr. HAMMERSCHMIDT. Mr. Speaker, if the gentleman will yield, I would like to thank the gentleman from Louisiana for his statement on this aspect on the conference report and associate myself with the remarks of the distinguished chairman of the subcommittee.

Mr. ROE. Mr. Speaker, I reserve the balance of my time.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in most strong support of the conference report on H.R. 4503. The House overwhelmingly passed its version several weeks ago by a recorded vote of 382 to 18, and I believe that this conference report deserves even stronger support here today.

I want to express my most profound appreciation to the chairman of the full committee, the distinguished gentleman from New Jersey (Mr. HOWARD), the distinguished ranking minority member (Mr. CLAUSEN), and my good friend, the chairman of the Subcommittee on Water Resources (Mr. ROE). They have provided tireless leadership during the long and arduous development and passage of H.R. 4503. All the conferees on both sides of the aisle are to be heartily commended for their active participation in crafting what will be a landmark in improving this valuable environmental program. Hearings, meetings, markups, and conferences were extensive and often extended into the late evenings. I am particularly proud of the many Members who continued working throughout these long sessions, even when faced with the press of so many other matters. The balance, equity, reform, and environmental benefits this legislation will bring about is a direct result of the commitment to excellence the Members made. The legislation before us provides many of the kinds of important changes which the administration has sought in the Federal funding of municipal sewage treatment works. At the same time, these changes are phased-in over several years and include the increased flexibility that the States and communities believe is essential. Passage of H.R. 4503 will permit continued funding this year and beyond to construct needed waste water treatment facilities throughout the Nation.

The waste water treatment program has provided one of the main methods of reaching our clean water goals and is part of one of the most important environmental laws of our Nation. Funding for the waste water treatment construction grants program has been authorized since 1972 at $5 billion per year. The administration has sought and the House and Senate have agreed to reduce this to $2.4 billion per year for a 4-year period. In addition, the types of projects that are eligible for funding will be limited as will reserve capacity for future growth.

The fundamental changes will take place beginning in 1984. Until that time, the program will proceed without significant disruption. There will be, of course, reduced overall Federal funding and no direct funding for step 1 planning and step 2 design projects. The result of the changes which the conference agreement makes is to significantly reduce the overall program size. When coupled with the reduced funding over the next several years, this will keep the program within the budgetary constraints that are currently needed.

I would like to comment on several of the provisions in the conference report.

Eligible categories, as I mentioned, will be limited after 1984. However, if approval for a step 3 grant is received prior to October 1, 1984, for an interceptor or treatment plant, then the rest of the eligible categories pertaining to that system will be grandfathered. For those categories which will not be eligible after 1984, such as collectors, the Governor will have discretion to use up to 20 percent of the State's allotted funds for such ineligible categories. The version that passed the House included a 30-percent discretionary amount, but I believe that the compromise at a 20-percent level will still provide sufficient flexibility for the use of these funds. The sufficiency of this discretionary amount will be studied as part of the new needs survey that the legislation directs.

After the date of enactment of this legislation, up-front grants for planning and design will no longer be made in this program. The local and State money expended for such planning and design will, however, be reimbursable upon receipt of a grant for step 3 construction. It would be expected, of course, that municipalities will continue to concentrate their planning and design efforts on meeting local water quality needs regardless of the amount of and eligibility for eventual Federal

funding. It is also expected that communities will make the necessary efforts to adequately assess and reduce their flows to treatment plants as an essential part of their water quality program. The infiltration/inflow problems which have been shown to be a major problem in many areas will be eligible for funding throughout the program and it is expected that communities will do the necessary evaluation studies and design during steps 1 and 2 in order to correct infiltration/inflow problems with step 3 funds. Also, for small communities which may not have the financial resources to provide up-front funding of planning and design, States must advance out of their allotment funds for this purpose. These funds will be reimbursed, upon receipt of an approved step 3 construction grant for the relevant treatment works.

The Federal share will remain at 75 percent for all noninnovative/alternative grants until October 1, 1984. Where an interceptor or treatment plant is funded, in whole or part, for construction prior to that date, the Federal share will be grandfathered at 75 percent after October 1, 1984, for all subsequent interceptor and treatment plant grants that are part of the same system as the interceptor or treatment plant receiving pre-October 1, 1984, step 3 funding. The Federal share for projects not grandfathered will be reduced to 55 percent, except for innovative/alternative projects.

The administration sought to restrict reserve capacity funding eligibility and would have allowed only 1980 flow levels to be federally funded. Because of the need for proper engineering and planning, especially in our growing communities, we have provided in this conference report that, until October 1, 1984, all categories including collectors, interceptors, and treatment plants will have the existing 20 year reserve capacity, and in some cases up to 40 years reserve capacity. Grants for projects not grandfathered, that is, projects having no qualifying phased or segmented grants approved after October 1, 1984, will have reserve capacity limited to capacity existing at the date of such approval but in no case greater than capacity on October 1, 1990. The capacity of treatment plants eligible for Federal funding will include residential, commercial, and industrial users. The effect of this is to nullify industrial cost exclusion which the House has voted twice to repeal.

The allotment formula, which determines how much money each State will receive, will remain unchanged for fiscal year 1982 as the House bill had proposed. For the remaining 3 years of the bill, the allotment formula splits the difference between the existing formula and the third year of the Senate bill. This change will insure that, for each of the last 3 years covered by the bill, no State will lose more than 10 percent of the percentage of funds that they have been receiving since 1977.

Regarding the State certification provision, the conferees agreed to extend the approval period from 30 to 45 days. Other than that, the provision is the same as was contained in the House bill. It should be noted that this certification process applies to any grant which a Governor of an eligible State certifies. In other words, it applies not only to grants submitted after date of enactment but equally to those which are already pending before EPA. As soon as a Governor certifies that such a grant application meets all applicable requirements, the 45-day time period begins.

Many projects in the construction grants program are phased or segmented. Phased projects are conducted in the face of limited annual funding which requires several years of phased funding for completion. Segmenting of projects may result from limited funding availability or as a result of completing the design of portions of a total project system before other portions are completed. Several provisions of the conference report relate to grants made before October 1, 1984. These grants obviously are intended to include entire grants, phased grants, and segmented grants as the legislation and report clearly state. Decisions as to whether phasing or segmenting is appropriate in any project are to be the purview of the States and municipalities, using the same historical guidelines that have characterized implementation of the construction grants program over the course of the past few years exclusive, of course, of any outright prohibitions against making phased or segmented grants.

The water quality management planning provision is very similar to the House version. It provides that the States must use 1 percent of their allotted funds or $100,000, whichever is greater, to carry out water quality management planning and to concentrate these efforts through local, regional, and interstate entities. It is obvious that this becomes primarily a State and local aspect of the total program and, as such, Federal EPA should minimize any regulations and management related to this provision. The primary regulatory and management responsibilities will be with the States.

The planning under this provision includes the identification of the origin and extent of water pollution problems in various areas of a State, determination of the most cost-effective measures for treatment works and control of nonpoint sources, and development of implementation plans. Eligible activities would include determinations as to which treatment works should be built with grant assistance, where and when, with regard for the relative degree of effluent cleanup achieved and the relative extent to which water quality problems stem from point and nonpoint sources. Also eligible for assistance from funds provided is implementation of section 303(e) of the act, calling for the development of river basin water quality management plans.

This provision reflects a concern that reductions in the level of grant funds available to the construction grants program makes it imperative that sound planning underlie decisions with respect to expenditures on projects. Priority for such planning is to be given by the States to designated areawide waste treatment management planning entities, which have already been involved in the process, and other comprehensive planning organizations capable of conducting this activity.

The conference report contains a package of provisions intended to assure selection of the most cost-effective combination of elements of a wastewater treatment system in the development of projects.

First, the conference report declares it to be the policy of Congress that projects for waste treatment should constitute the most cost-effective system in terms of the ability to meet the requirements of the act, including the requirement that water conservation measures and devices be given adequate consideration.

Second, the report implements this policy by requiring that the Administrator, before approving any application for construction funds for a treatment works, must determine that the proposed project meets the cost-effectiveness test.

These provisions recognize that waste water treatment facilities can consist of a large number of alternative means for the collection, conveyance, storage and treatment of municipal wastewater, and the disposal of residues resulting from the treatment process. It is intended to assure that the combination of elements result in the most cost-effective system over the life of the project, with due regard for operation, maintenance, and replacement costs as well as initial capital costs.

The intent of this provision is to assure that the maximum pollution abatement result from the expenditure of increasingly limited funds available for the program.

The conference report authorizes $2.4 billion for the construction grants program for each of the fiscal years 1982, 1983, 1984, and 1985. This level, while far below the $5 billion-a-year authorizations of the early years of the program, nonetheless continues

authorizations for this important program at a time when reductions must be made Governmentwide in the overriding interest of asserting control over Federal spending.

This figure is consistent with the level supported by the administration for fiscal year 1982, assuming the enactment of program reforms. In addition, the authorization of funding for a full 4 years provides much needed continuity and predictability in a program characterized by long leadtime in planning and construction of projects. Funding of the program for fiscal year 1982 and beyond will assure that the Congress maintains a commitment to grant applicants working in good faith to comply with the requirements imposed on them by the Clean Water Act. Failure to provide such funding would result in a debilitating loss both of momentum and confidence in a program which has begun to show encouraging results.

The conference report also contains a provision intended to remove an inequity to which one particular community has been subjected through a combination of court action and the lack of availability of funds. Bath Township, in Michigan, was forced to proceed with construction of a project by court order at a time when funds were impounded. Had it not been for this fact and the timing, the community would have been eligible for 75 percent Federal funding of its project. This legislation therefore provides that the community shall be eligible for payment from the State's allotment in the same manner as if it had been constructed under the program.

This legislation also provides a useful device to encourage communities receiving assistance under the construction grants program to confront the reality of their long-term capital needs for construction and reconstruction of facilities. The construction grants program is not now, nor has it ever been intended to be, an entitlement program, much less one which will continue in perpetuity. We in the Congress are rightly concerned over explicit or implied long-term commitments or assertion of Federal responsibility, be they legal, moral, or political in nature. There must be greater awareness of this fact on the part of communities operating publicly owned treatment works. Therefore, the conference report contains a provision to encourage, well in advance of actual need, applicants to plan now for the time when their facilities will be inadequate for any reason such as physical deterioration, or the need to expand to accommodate future growth. This provison authorizes technical and other assistance by EPA to such communities, in determining what their needs will be, when they will occur, what the cost will be, and what steps must be taken to assure the needed funding to finance them when the need arises.

One of the sources of delay plaguing administration of the construction grants program has been the fact that the application process has been segmented into three steps: facility planning, engineering design, and construction. Despite that fact, there has been merit in handling the three steps as separate grant applications. There also has been merit, in the case of smaller projects, in combining steps 2 and 3 in the interests of reducing delays. Existing law imposes a limit of $4 million on projects eligible for such streamlined treatment, and of $5 million in the case of projects in high-cost areas. The conference report amends existing law by raising the dollar ceiling on projects in all areas eligible for combined step 2-3 funding to $8 million.

This legislation extends to July 1, 1988, from July 1, 1983, the authority of the Administrator to provide case-by-case extensions of the deadline for compliance by communities with the requirement to provide secondary treatment of their wastewater.

This is an important amendment, a realistic one; and it is necessary if this program is to maintain any credibility and avoid being run by the courts rather than the Agency.

In 1972, the Water Pollution Control Act amendments set forth an ambitious package of requirements to be met by both municipalities and industry, coupled with a massive commitment of Federal financial assistance in the case of the former. We have made progress, but not as much as initially contemplated because of a number of reasons, including the true magnitude of the task, the manner of EPA's administration of the program, and the availability of funding. This we recognized in 1977, when we extended the outside date for municipal compliance to 1983. And we in the House attempted in the 1980 amendments to extend it further until 1985. That latter amendment was never enacted into law. The same recognition of reality now argues for the 1988 date, and I am pleased to find that the other body now shares this view. Nothing in this provision is intended to suggest that a community's obligation to comply with the law is contingent upon the availability of Federal grant assistance. However, in rough terms of equity, when scaling back the amount of funding available, it is appropriate to adjust the overall schedule of the program.

The conference report also contains a provision intended to overcome continuing resistance on the part of grantees and their consultants to innovation in wastewater treatment technology. Recent hearings have demonstrated that this resistance indeed persists and is a deterrent to acceptance of processes and components which might prove cheaper to build and operate, more reliable, more energy-efficient, and which would foster recycling, reuse, and reclamation of resources, including water. This resistance stems from the concern over embarrassment, political in the case of the community and professional in the case of the design engineer, if the plant or process fails to work as intended. Much of this concern stems, in turn, from the fact that many promising innovations have had the benefit only of laboratory simulation or limited field testing. An additional increment of verification with respect to performance capability—under the circumstances of its proposed use—is necessary to overcome an understandable tendency to adhere to the tried-and-true. Therefore, the conference report contains a provision making grant-eligible the field testing of promising processes, components, and techniques under step 1 (facility planning) and step 2 (design engineering). It does so by broadening the definition of construction to include such purposes.

A number of communities in this country, for reasons which may or may not be of their own making, are under Federal consent decrees requiring them to proceed with construction of wastewater treatment facilities in compliance with specified schedules. In some cases, these consent agreements have been entered into in the expectation that Federal funds for the program will be available in the requisite amounts. However, there is no direct correlation in the law between the availability of funds and the obligation of a community to comply with its requirements. Necessary decreases in the amount of Federal assistance available under this program may create a problem of equity in some situations. Therefore, while the Congress is reluctant at this time to inject itself by statute into situations covered by consent decrees, the conference report contains a provision stating it to be the sense of Congress that judicial notice should be taken of the amendments to the Federal Water Pollution Control Act and other provisions contained in this legislation. Parties to consent decrees are encouraged to reexamine the provisions of such decrees and make adjustments as appropriate in the interests of equity.

This legislation makes a number of changes with respect to the eligibility of various types or categories of projects for funding under the construction grants programs. These modifications have been undertaken in recognition of a need to reduce the Federal commitment under this program over the years ahead. It is important, however, that the Congress be kept up to date with respect to needs in all categories for which any amount of funding continues to be available

under the act. Therefore, the conference report requires the Environmental Protection Agency to submit to the Congress, not later than December 30, 1982, a new report on the cost of meeting the requirements of the act as amended by this legislation. Because of the 20-percent discretionary amount available after October 1, 1984, this and subsequent needs surveys shall contain the needs for collectors, sewer rehabilitation, and any other category which may not otherwise have direct eligibility for Federal funding. The needs survey is to represent the total needs to meet the requirements of the act, whether such needs are funded by the local, State, or Federal Government.

Also in this legislation is a provision to deal with a temporary problem of wastes generated by the convention center of the city of New York. Since that plant which ultimately will serve the convention center has not been completed, this legislation authorizes the allotment to the State of New York of fiscal year 1982 funds in an amount sufficient to pay the cost of conveying sewage from the center to the Newtown Sewage Treatment Plant in the Brooklyn-Queens area. This provision was also contained in an earlier bill which passed the House on May 28 of this year.

The conference report makes a most constructive change in the provision of law dealing with procurement of equipment for wastewater treatment projects by grantees. Existing law provides that when the design engineer wishes to name a piece of equipment by brand in his specifications, he must specify two brand names or the equivalent thereto. There is no particular problem in the "or equal" requirement, which is intended to foster competition in the wastewater treatment industry. But there is a serious problem with the requirement that two brand names, rather than one, be specified. This has resulted in a disincentive to manufacturers to invest in the development of truly superior equipment for which there may in fact be no equal. Also, it tends to dilute the responsibility of the design engineer and the client grantee for the proper functioning of the treatment works by removing one key area of professional judgment and discretion. To address this problem, the conference report provides that, in the specification of brand name, trademark or other proprietary equipment, the naming of only one such item, plus the "or equal" caveat, will be sufficient.

One of the most constructive clean water amendments enacted in 1977 was State certification, also known as State management assistance, contained in section 205(g) of the act. It provided incentive for EPA to delegate the authority and responsibility for management of the construction grants program to qualifying States. And it authorized a modest set-aside of construction grant funds to be used by the so-called delegated States for this purpose. This has been a successful initiative, and extensive hearings by the committee have established that the efficient administration of the program will require far more reliance on State delegation in the future. It is also true that the delegation process has not been without its problems, and many of those problems have stemmed from the instability of the funding source provided. This conference report provides that, for the purposes of carrying out delegated management responsibilities, States may use up to 4 percent of their respective shares of amounts authorized annually for the construction grants program. This will mean that, despite declining authorizations and appropriations, States can rely on a stable source of funding for this important function, upon which the effective management of billions of dollars in construction grant funds so heavily depends.

This legislation also amends the act to declare it to be the policy of Congress that projects undertaken with Federal assistance for wastewater treatment and management shall be those which are designed to achieve optimum water quality management, consistent with the public health and water quality goals and requirements of the act. The rationale for this policy is a recognition that the ultimate justification for projects lies in the objectives of the act, which are the restoration and maintenance of the physical, chemical, and biological integrity of the Nation's waters. At the same time, the Congress has proclaimed it to be the national policy that the primary rights and responsibilities of the States in water pollution control be preserved. Therefore, this provision clearly specifies that any and all determinations with respect to a project's conformity with the policy objectives stated above be "in the estimation of the State." Thus, it is intended that determinations in the selection of projects and the priority accorded to them under this policy lie solely within the discretion of the State. This provision cannot be used by the Federal EPA to force certain priority categories, projects, and so forth, by regulation, rule, or policy. States are to give priority to projects in the way each State determines.

The many safeguards which the House bill contained, especially for small communities, remain, and are, in fact, strengthened. The valuable innovative and alternative program is expanded and the rural set-aside program is continued unchanged. These and other provisions insure that small and rural communities will continue to receive equitable treatment as we work toward our national goals of water quality.

In summary, Mr. Speaker, I strongly support this conference report and urge my colleagues here to join me in doing so.

Mr. JEFFRIES. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Kansas.

Mr. JEFFRIES. Mr. Speaker, I would like to engage the gentleman from New Jersey, the chairman of the Subcommittee on Waters and Resources in a colloquy.

As the gentleman knows, we in Kansas had a problem regarding some $4 million in municipal sewage grant funds which were lost to our State through an accounting error by EPA. Twice this year the entire Kansas delegation wrote the OMB to point out this error.

I would like at this time to insert copies of this correspondence in the RECORD.

My question is whether there is anything in this authorization for the Federal water pollution control program which would bar a remedial appropriation for Kansas.

We would like to restore the fund most likely through the supplemental appropriations which will be necessary to fund the authorization now being considered.

Again, these moneys were properly due Kansas and were lost simply through an untimely accounting error by the EPA.

The letters follow:

U.S. SENATE,
Washington, D.C., July 7, 1981.

Hon. DAVID STOCKMAN,
Director, Office of Management and Budget, Executive Office Building, Washington, D.C.

DEAR MR. STOCKMAN: We want to thank you for your letter of May 26, 1981, regarding the Region VII accounts for municipal sewerage grants in the State of Kansas. Our inquiry of March 27, 1981, alleged that the EPA Regional Office (Region VII—Kansas City) had improperly charged grants to 1980 and 1981 fiscal year funds, resulting in the recission loss to Kansas of almost $4 million in Talmadge/Nunn funds. We have discussed your response with representatives of the Kansas Department of Health and Environment.

Apparently EPA has either provided you with an incorrect analysis of the problem which existed in their Regional Office or they did not understand the issue which was being raised. The issue related to accounting practices of the Regional Office months before the recission and does not relate to projects which were in the Regional Office for processing at the time of the recission.

We are informed that Kansas agreed with the Regional Office on April 15, 1980, that all projects awarded after that date were to be charged first against Talmadge/Nunn funds and that charges were to be made against FY 1980 and 1981 funds only after the Talmadge/Nunn funds had been exhausted. The Kansas Department of Health

and Environment, with the concurrence of the EPA Regional Office, adopted this position to assure that they would be fully qualified in the event that the "two-tier funding amendment" then under consideration would become law. At the time of recission, Kansas officials learned that projects had been charged against the fiscal year rather than Talmadge/Nunn funds.

You have apparently been misinformed by the Environmental Protection Agency on the amount of funds that would remain available to Kansas after recission. The value of the projects in the Regional Office, one of which had been at the EPA office for at least a year, more than equaled the funds remaining after recission. Funds available to the state are now essentially exhausted and the grants program has been suspended indefinitely.

We will greatly appreciate your assistance in further investigation of the accounting error in the hope that approximately $4 million in Talmadge/Nunn funds can be restored for use by Kansas municipalities. A representative of the Kansas Department of Health and Environment would be pleased to meet with a representative of your office and/or the Environmental Protection Agency.

Sincerely yours,

NANCY KASSEBAUM,
U.S. Senate.
JIM JEFFRIES,
Member of Congress.
LARRY WINN,
Member of Congress.
PAT ROBERTS,
Member of Congress.
BOB DOLE,
U.S. Senate.
BOB WHITTAKER,
Member of Congress.
DAN GLICKMAN,
Member of Congress.

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., October 29, 1981.

Hon. JAMES JEFFRIES,
U.S. House of Representatives,
Washington, D.C.

DEAR JIM: Thank you for your letter of July 7, 1981, regarding the status of municipal sewage treatment grant funds in the State of Kansas.

I can certainly appreciate your continued concern over the loss of $4 million in Talmadge-Nunn funds. As a result, I have carefully reviewed your letter and consulted with the Environmental Protection Agency concerning the facts of the sequence of events surrounding the rescission of these funds. I find the facts as you present them to be essentially correct. Unfortunately, there is little I can do to rectify this error. Since the rescission for this program has already been enacted into law, the affected funds cannot be replaced through an administrative action.

The State of Kansas had received a cumulative total of $244 million in allotments under the Construction Grants program. It is true the State had planned to obligate most, if not all of its remaining Talmadge/Nunn funds in the first part of FY 1981. As of December 1980, the State's unobligated balance in this account was $13.2 million, only $0.7 million less than the original allotment received in 1976.

Between December 1980 and March 1981, EPA's Region VII Office in Kansas City charged $9.3 million of obligations for Kansas to this account, which is more than 70 percent of the December 1980 balance. An error did occur in the EPA office and some obligations intended to be charged against Talmadge/Nunn funds were charged to other appropriations. By the time the error was discovered, the remaining Talmadge/Nunn funds were "frozen" by the Administration's proposal for a rescission of $1.7 billion. Once funds are frozen by a proposed rescission, the Agency cannot adjust or obligate funds against the affected accounts since this would result in losses for all other States to account for the change in Kansas. So, while the error occurred in December, it was not discovered by either EPA or Kansas until three months later, after the account had been frozen, pending the enactment of the rescission.

I realize that this response does not answer your concerns favorably and want to apologize for the error in the Kansas Municipal Wastewater Treatment account. The only remedy would be a specifically earmarked appropriation for Kansas that would make up the loss. Once again, thank you for your letter.

Sincerely,

DAVID A. STOCKMAN,
Director.

U.S. SENATE
Washington, D.C., March 27, 1981.

Hon. DAVID STOCKMAN,
Director, Office of Management and Budget, Executive Office Building, Washington, D.C.

DEAR MR. STOCKMAN: The Kansas Department of Health and Environment has called our attention to a problem which stems from the recission of P.L. 94-369 funds. These funds were originally intended for the construction of sewerage works.

Kansas had programmed the flow of construction grants to obligate these funds by the end of calendar year 1980. The Regional Office (Region VII) of EPA was informed by the Kansas Department of Health and Environment that it was the Department's desire and intent that projects be charged against the P.L. 94-369 funds.

At the time of recission, the Department learned that projects had not, in fact, been properly charged and that a balance of $3,965,426 remained in the Kansas account. We are informed that Region VII advised Kansas that this was a "GS-4 clerical error and that nothing can be done."

We find it difficult to believe that an error of this nature cannot be easily rectified. We would greatly appreciate your investigating this problem and correcting the Regional accounts. Kansas does understand that this will have the effect of increasing the amount of FFY-80 and/or FFY-81 recission.

We also understand that Kansas communities are greatly supportive of the efforts to streamline the grant program provided there is a concurrent simplification of applicable regulations. Kansas does intend to testify when hearings are held on recission of the Water Pollution Control Act.

Sincerely yours,

BOB DOLE.
LARRY WINN, Jr.
JIM JEFFRIES.
DAN GLICKMAN.
NANCY KASSEBAUM.
BOB WHITTAKER.
PAT ROBERTS.

□ 1800

Mr. ROE. Mr. Speaker, will the gentleman yield for a response to his question?

Mr. HAMMERSCHMIDT. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Speaker, in response to the question, there is nothing in the conference report on H.R. 4503 that would bar a remedial appropriation for Kansas.

Furthermore, I assure the gentleman, my friend and colleague on the Committee on Public Works, that we will be supportive of the State of Kansas in their effort to restore the funds, which virtually everyone admits were improperly lost to the State.

Mr. JEFFRIES. Mr. Speaker, I thank the gentleman.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. GOLDWATER), a very distinguished member of our committee.

Mr. GOLDWATER. Mr. Speaker, I rise in strong support of the conference report on H.R. 4503, the Municipal Wastewater Treatment Construction Grant Amendments of 1981, and comend it to my colleagues as a measure deserving adoption by an overwhelming vote and prompt signature by the President.

H.R. 4503, as reported by the Committee on Public Works and Transportation, was a sound piece of legislation, as I indicated in my comments on the occasion of its passage by the House on October 27. Now I would observe, on the basis of my work as ranking minority member of the Subcommittee on Investigations and Review, that the conference report contains a number of improvements.

This is absolutely no reflection on the work of the Water Resources Subcommittee or the full committee. It reflects, instead, the fact that the conference took up some issues which the House side had originally regarded as best deferred until next year. This was in the overriding interest of passing out an authorization bill to serve as the basis for a fiscal year 1982 appropriation for the construction grants program.

Indeed, the majority and minority leadership of both the subcommittee and full committee are to be commended for their contributions to this legislation, as are all of the House conferees for their able assertion of the House position in negotiations with the Senate.

During the 1st session of the 97th Congress, the Public Works Investigating Subcommittee has conducted the most comprehensive investigation every undertaken into the performance of the wastewater treatment works constructed with Federal assistance under the Clean Water Act.

A subcommittee report now being issued lends strong support to many of the provisions of the measure now before us, including changes resulting from the conference deliberations:

MULTIYEAR FUNDING

Our hearings over a number of years have demonstrated that many of the ills plaguing the program can rightly be attributed to a lack of continuity, stability, and predictability. The 4-year authorization is most appropriate in this regard.

REDUCED FEDERAL SHARE

We concluded that, in addition to the need for this program to share in overall reductions in Federal spending, that a reduction of the Federal share to 55 percent from 75 percent—over an adequate transition period—should result in selection of less costly and more reliable treatment processes, and improved operation and maintenance by grantees.

MUNICIPAL COMPLIANCE DEADLINES

There is universal recognition that municipalities cannot meet the secondary treatment deadline of 1983 now in the law, what with reduced funding in recent years and other factors delaying initiation of projects. The shift of the outside deadline for compliance to 1988 from 1983 is absolutely critical. Members who recall the unsuccessful attempt by the House to make some adjustment in last year's amendments will applaud the Senate's new receptivity to reality.

SECONDARY TREATMENT REQUIREMENTS

Many problems of cost, overdesign, and construction of treatment plants that are difficult to operate justify the conference report's authorization of less sophisticated treatment technologies such as oxidation ponds, lagoons, and ditches, and trickling filters, provided no harm to water quality results.

ELIGIBLE CATEGORIES

Retention of grant eligibility for projects to eliminate excessive overloading of sewer systems by storm water will make it possible to continue repair projects that protect the functioning of treatment works and avoid the need for additional plant capacity.

I particularly want to express my appreciation to the House conferees for essentially preserving the House position on the granting of waivers from secondary treatment requirements to coastal communities discharging treated wastes into marine waters under strict environmental safeguards.

It also is gratifying that the conference retained my provision to make grant eligible the field testing of innovative and alternative processes and equipment where necessary to promote acceptance of promising developments.

Also of merit in the conference report are provisions to modify procurement requirements affecting wastewater treatment equipment, sustain a strong State role in management of the construction grants program, and further strengthen incentives for development of innovative and alternative technology.

Specific provisions aside, I just want to say a word about the approach to the changes in this bill, whether related to Federal share or categories of project eligibility. The word is gradual. There is a phased-in transition provided that should make it much easier for localities to adjust to these changes in the law.

Recently our subcommittee held a hearing in Austin, Tex., on the practical implications of a number of proposed changes in the act. And if any message came through loud and clear it was that the municipalities subject to the law's requirements need time to adjust to changes. I am encouraged to believe that the phasing in of this legislation, plus the easing of compliance deadlines, should go far in helping them do so.

To be sure, there are many areas of the act—including the construction grants program in title II—that will need further attention in the next session of the 97th Congress. With respect to the construction grants program alone, our subcommittee has proposed a number of changes which have yet to be put forth in legislative form. They include:

Consideration of alternative sources of funding.

Additional measures to increase the responsibility of grantees, such as withholding of a grant until the applicant operates any existing facilities with maximum efficiency, and withholding 20 percent of grant funding until a new facility performs as intended.

A strengthened role for the Environmental Protection Agency's Office of Inspector General in rooting out waste, fraud, and abuse.

Clearer and tighter lines of responsibility and accountability in the performance of design engineers, through such approaches as turnkey projects and reduced Federal interference in the design of facilities.

As I said, many of our oversight recommendations have yet to be formally offered on the assumption that the entire act will be reviewed again next year. But the extent to which our findings parallel the position taken by the conferees on the issues we both addressed suggests that our remaining recommendations—and earlier ones arising from our examination of the regulation of toxic pollutants—should find a receptive audience.

Meanwhile, I urge adoption of the conference report.

Mr. HAMMERSCHMIDT. Mr. Speaker, I reserve the balance of my time.

Mr. ROE. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. MOTTL).

Mr. MOTTL. Mr. Speaker, I certainly appreciate the distinguished subcommittee chairman yielding at this point.

Mr. Speaker, I would like to ask the distinguished chairman of the Subcommittee on Water Resources (Mr. ROE) a question with regard to the construction grants program.

In my district the four communities of Rocky River, Bay Village, Fairview Park, and Westlake built a sewage treatment plant with EPA guidance. However, when this "pilot program" plant was completed, it turned out that it did not operate properly. The plant when finally completed with design modifications will serve about 80,000 residents. The attempts on the part of local communities to receive reimbursement from EPA go back many years. They have been unsuccessful because of EPA's contention that the project, since it involved experimental technology, is not a "normal" construction grant project. I ask the gentleman's opinion as to whether or not this project is qualified for reimbursement under the act.

Mr. ROE. Mr. Speaker, in response to the gentleman's inquiry, in my opinion the local communities are entitled to reimbursement. We have included language in the statement of managers urging the appropriation of funds to implement section 206 which provides for reimbursement of local interests when they perform work with their own money in accordance with requirements of the act. The project which the gentleman mentions is certainly the type of project which should be eligible upon the appropriation of funds, and we shall certainly do all we can on behalf of the State of Ohio.

Mr. HAMMERSCHMIDT. Mr. Speaker, will the gentleman yield?

Mr. MOTTL. Yes, I yield to the distinguished gentleman.

Mr. HAMMERSCHMIDT. Mr. Speaker, I want to associate myself with the remarks of our distinguished chairman in support of his response to the question of the gentleman from Ohio.

Mr. MOTTL. I thank the distinguished subcommittee chairman, also the full committee chairman, the gentleman from New Jersey (Mr. HOWARD), also the gentleman from Arkansas (Mr. HAMMERSCHMIDT), and the gentleman from California (Mr. CLAUSEN) for their cooperation.

Mr. ROE. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from California (Mr. ANDERSON), a member of the committee.

Mr. ANDERSON. Mr. Speaker, I rise in support of the conference report on H.R. 4503, the Municipal Wastewater Treatment Construction Grant Amendments of 1981. I also wish to commend subcommittee chairman ROBERT ROE and ranking member JOHN PAUL HAMMERSCHMIDT for a job well done.

One of the provisions in the conference report on H.R. 4503 is of particular interest to me. This is section 4 which provides that the Administrator of EPA shall make a grant, from any funds otherwise allotted to the State of California, to the city of San Diego in connection with that city's aquaculture sewage process.

Nearly 100 percent of San Diego's water is imported. The high cost of this water together with the diminishing supply of ground and river water led San Diego to the planning of a wastewater-to-potable water recycle system. This system which will use vascular plants and reverse osmosis technology will result in the production not only of treated sewage effluent but of potable water. The production of potable water will not only help meet the water supply needs of the region but will result in a more economical system.

This type of innovative and alternative technology is important not only to San Diego but to other communities throughout the Nation which are facing water supply problems. The encouragement of this type of project is directly in the national interest. It represents the type of innovative and alternative technology which must be pursued so that we may truly achieve the optimum yield from our finite water resources.

Mr. ROE. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, I, too, rise in support of this legislation. I think it is extremely important to maintain our commitments that have been made over the years in this area. With regard to that, I would like to speak to one particular project.

The agricultural irrigation demonstration project in Castroville, Calif., is unique. It is the only program in the United States utilizing secondary treated municipal wastewater for commercial crop irrigation. The benefits of this program are twofold. It reduces the demand on precious limited water resources and by reducing the overdraft of the local ground water supply helps to combat the increasing threat of salt water intrusion into the agricultural producing areas along Monterey Bay.

Earlier this year some questions were raised over the use of construction grant funds for the agricultural irrigation demonstration project. Clearly use of these funds for water reclamation and reuse purposes serves the objectives and intent of Congress in creating the construction grants program. To prohibit further assistance for this project would be a tragic step backward from our national commitment to the innovative and creative conservation of our precious water resources.

The agricultural irrigation demonstration project serves to demonstrate that a lesser level of treatment than that which may be provided by a Monterey regional wastewater treatment plant, provides acceptable public health protection. It also demonstrates to local farmers and local public health officials that reclamation does not adversely affect crops or soils in the project area. Finally, the program demonstrates that crops so irrigated are marketable and acceptable to the public.

I would like to briefly review for you the project's progress over these past few years. In March of 1978 a 2-year study was completed in which the concept of the demonstration project was examined, a work plan developed, a site selected, and conceptual designs and environmental assessments completed. Between 1978 and 1980 design and construction of the Castroville treatment plant and irrigation systems and preparation of specifications for and purchase of necessary equipment was completed. The operational stage of the project has arrived during which treated wastewater is being used to irrigate crops under controlled circumstances to monitor and measure the effects. After less than 1 year of this highly successful stage of the project, its continued eligibility for funding has been drawn into question.

Mr. Speaker, I understand that section 8(d) of H.R. 4503 amends section 212(1) of the Federal Water Pollution Control Act to provide that field testing of innovative or alternative wastewater treatment processes and techniques shall be eligible for grant assistance under title 2 of the act. The agricultural irrigation demonstration program which I have just described would appear to be just the sort of thing intended to be covered by section 8(d), and I would appreciate your comments on this.

Mr. ROE. The gentleman is quite correct. The demonstration project he describes is indeed the type of project intended to be covered by section 8(d). The purpose of the provision in the bill is to provide grant assistance for the practical testing of innovative or alternative treatment procedures such as the use of treated water for irrigation, so that their effectiveness can be determined under carefully monitored conditions before widespread application is undertaken.

Mr. CLAUSEN. Mr. Speaker, will the gentleman yield?

Mr. PANETTA. I would be pleased to yield to the gentleman from California.

Mr. CLAUSEN. Mr. Speaker, for purposes of making legislative history, I just want to state that on behalf of the minority we concur in the statements that have been made in this colloquy. The gentleman from California has discussed it with me extensively.

The SPEAKER pro tempore. The time of the gentleman from California (Mr. PANETTA) has expired.

Mr. ROE. Mr. Speaker, I yield 1 additional minute to the gentleman from California (Mr. PANETTA).

Mr. CLAUSEN. Mr. Speaker, if the gentleman will yield further, the gentleman has discussed this matter with me extensively and I wish to state that on behalf of the minority we concur in the statements made in this colloquy.

Mr. PANETTA. Mr. Speaker, I want to thank the chairman and the gentleman from California, both of whom have been extremely helpful here. As I said, I think it is very important that commitments that are made to projects like this are maintained and I think this legislation helps do that. I thank both these gentlemen.

Mr. ROE. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, first of all, I want to commend the distinguished gentleman from New Jersey and the conferees for the magnificent job they have done under very difficult circumstances on this particular conference.

I would like to clarify a certain section of the conference report. Section 5 provides that beginning in fiscal year 1983 the Administrator shall have available $200 million in addition to the funds authorized in section 207. So there are $200 million in 1983, 1984, and 1985, or $600 million in addition to the $2.4 billion authorized for each year, 1982 through 1985, under section 207.

The reason for this separate provision, as I understand it, is to correct combined sewer overflows into marine bays and estuaries. I have no objection to it. But the wording of the section is somewhat vague.

Is it the understanding of the gentleman from New Jersey (Mr. ROE) that this section is strictly an authorization for appropriations?

Mr. ROE. Yes, absolutely.

Mr. BOLAND. So the gentleman does agree that no funds will be provided for CSO improvement in marine bays and estuaries unless made available in appropriation acts.

Mr. ROE. The gentleman is absolutely correct.

Mr. BOLAND. I thank the gentleman.

There is one more issue on which I would like to express some concern.

I want to comment briefly on another section of the conference report. And that is section 4, which adds a new subsection (m) to section 201 of the Federal Water Pollution Control Act. Paragraphs 2 and 3 of section 4 require the Administrator to make grants for certain projects. I am not going to address the merits of the projects. They may both be excellent

and may be very high priority projects. But I would hope those projects can stand on their own merit.

In my judgment, Mr. Chairman and Mr. Speaker, I think the Congress will be doing a great disservice to itself and to cleaning up the Nation's water pollution problems if it makes a habit of earmarking grants under the Environmental Protection Agency's construction grants program.

As everyone familiar with the waste water treatment program knows, historically the States have established project priorites under broad guidelines established by the Congress and regulations issued by the EPA. This system has not been without problems, but it has basically worked very well.

The Congress should not be in the business of establishing individual proj- ect priorities. That is exactly what the Congress is doing in this instance. Priorities established by Congress may bear no resemblance to those established by the States based on water quality requirements.

Let us keep the emphasis on the construction grants program in cleaning up the environment. Let us set the broad goals in the Congress. The States should continue to establish individual project priorities.

Mr. DICKS. Will the gentleman yield?

Mr. BOLAND. I would be glad to yield to the gentleman from Washington.

Mr. DICKS. The gentleman from Massachusetts serves as the chairman of the HUD-Independent Agencies Appropriations Subcommittee. I want to commend the committee first of all for having enacted this legislation. But I am very concerned about the fact that in the fiscal year 1982 appropriations bill there are zero dollars for the very important sewage construction treatment plant program.

I would like to ask the chairman of the subcommittee if it is his intention to try to bring out a supplemental appropriations bill early next year to take care of this matter.

Mr. BOLAND. I appreciate the gentleman's position and also the great interest he has shown in the construction grants program ever since he has joined the Congress. I commend him for it.

Let me say categorically that when we come back in January it is my intention to hold hearings at the first opportunity in the HUD-Independent Agencies Appropriations Subcommittee on 1982 funding for the construction grants program. Whether or not we get a budget request for the $2.4 billion, I will work to make money available for this program early in the next session by way of an urgent supplemental appropriation measure.

Mr. DICKS. I commend my chairman. He has done a great job in this area. Our States are very much interested in his leadership on this issue.

Mr. ROE. Mr. Speaker, I yield 4 minutes to the distinguished chairman of the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation, the gentleman from Georgia, (Mr. LEVITAS).

Mr. LEVITAS. Mr. Speaker, I rise in support of this legislation and commend the chairman of the subcommittee and ranking member of the subcommittee for the outstanding work they did in putting together the bill that originally passed the House and this conference report. It has been a real example of cooperation between a legislative committee and oversight committee, because this bill incorporates substantially all of the recommendations which our oversight committee of the Public Works and Transportation Committee has made following a very and thorough comprehensive review of the entire construction grants program during the last year.

The water pollution control program is a program that is so vital to the quality of life in this country and to the economy of this Nation that it could not be left to founder because it was not working well. That is the reason an oversight review was vital and the need for the types of reforms and changes in the program which this conference report reflects I think will go a long way to carrying out the types of reforms which our oversight committee has recommended. The two subcommittees worked closely, both among the members and the two staffs, in seeing this reform come about.

There are some additional administrative improvements that need to be made and we will continue our oversight of the Environmental Protection Agency to see that improved management in these operations is going to be seen.

But I think we have got to focus on both the quality of life and the economic impact of this program. Clean water is essential to a good and a full and a healthy life. It is also essential to our economy.

In a recent hearing we had in Austin, Tex., witnesses came in and talked about the public health problems related to the need for this program. When interceptor sewers in those communities would rupture and raw sewage would be flowing over schoolyards and into lawns, creating all manner of health problems. One such community was Port Arthur, Tex., if I remember correctly.

Then we had testimony about what the cost would be to the citizens of Texas and of this country in terms of failure to have economic growth potential and increased public utility rates to users.

I will never forget the mayor of Austin, Tex., just 2 or 3 weeks ago testifying that in the absence of this program going foward and if these funds were lost and not reauthorized and appropriated, Mayor Carole McClellan said:

> To replace those Federal funds we would be looking at tripling of the water rates. And I can assure you that our public would feel tremendously misled and angry and somewhat frustrated.

The councilman from San Antonio, Tex., said that their rates would go up 60 percent. And the Chamber of Commerce of North Channel, of Houston, Tex., said that economic development is at a standstill if they cannot get the funds to clean up their wastewater problems.

According to Port Arthur's director of public services, the cost to his city would be $39 million and that would be comparable in Port Arthur to the $1 trillion national debt that the Federal Government has.

The city of Houston is looking at perhaps a $1 billion cost in the next 8 years to come.

The impact of shifting more of the costs to the city of Houston would be monumental. Advised Martin J. Manning of the Houston Public Works Department:

> Certainly revisions proposed to the Clean Water Act will shift a substantial financial burden to the city, there can't be any question about it. The resulting impacts on the city are going to be substantial. *If all the funding changes occur, the projected level of EPA support in our overall program is going to be reduced from about 42 percent of the overall program to about 7 percent in an overall program that is estimated to cost around $1 billion* on an inflated basis over the next 8 to 10 years. (Emphasis added.)

This program is absolutely vital. It protects public health, it improves our total quality of life by providing fishable and swimmable waters and without this program the new jobs that you talk about with new plants and new industrial parks or new shopping centers or residential subdivisions would come to a standstill.

So we are discussing an extremely important program, one that now has seen some important reforms legislated in this bill and in the future additional reforms will be addressed to make this program even more efficient and effective.

Congress will be closely watching this program in the months and years to come. And it is the type of legislation which is illustrative of some of the finest hours and finest moments that this body does as a legislative body for the people of America expressing concern for our Nation's interests and needs and working cooperatively on a bipartisan basis to achieve our goals.

I want to express my personal commendation to the chairman of the subcommittee.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. ROE) has 5 minutes remaining.

Mr. ROE. Mr. Speaker, I will take but 1 minute to make the following statement for the benefit of the Members of this House.

I have not heard it said too much around here in the last couple of days, but I think we owe a great commendation to the staff members, both majority and minority, not only on this committee but every committee in this House for the superb work that they do on behalf of the Congress of the United States. I wanted to make that comment before advising you that I have no further requests for time and I reserve the balance of my time.

Mr. CLINGER. Mr. Speaker, Will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. Mr. Speaker, I rise in strong support of the conference report. It is going to go a long way toward cleaning up our waters. I had the privilege to serve on this conference committee and I would like to extend my congratulations to my chairman, the gentleman from New Jersey (Mr. ROE), the ranking minority member, the gentleman from Arkansas (Mr. HAMMERSCHMIDT), as well as all the members of the conference committee, for their efforts on a bill that restructures the program that funds the construction of sewage treatment projects and is essential to our Nation's water quality.

The conference agreement recognizes limited Federal dollars and limits the grant-eligible categories after October 1, 1984, to secondary treatment, new interceptors and appurtenances, and infiltration/inflow corrections. However, the legislation offers States and municipalities, which have expended considerable time, effort and local funds to comply with existing law, an adequate transition period to prepare for new eligibility criteria. Also, it became evident in our committee hearings and at the conference committee, water quality needs differ markedly from one State to the next. Importantly, this legislation allows the States, at the Governor's discretion, to reserve up to 20 percent of their allotment to cover categories otherwise ineligible under the new reforms. I mention this to bring to the attention of my colleagues that many rural communities have water quality needs that are not covered under eligible categories and I am hopeful that an evenhanded approach will be taken to insure the fair apportionment of discretionary funding to rural needs.

In addition, the legislation permits municipalities receiving a step 3 grant before October 1, 1984, an opportunity to project future growth and provide reserve capacity. After that date, reserve capacity is limited to the projected growth rate of 1990. It is my belief that an adequate sewage treatment facility with reserve capacity is absolutely necessary if a community is to have excess capacity for growth and jobs.

In conclusion, I urge my colleagues to support this legislation.

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time.

Mr. ROE. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. Without objection, the previous question was ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

□ 1820

GENERAL LEAVE

Mr. ROE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

CONFERENCE REPORT ON S. 1211, AUTHORIZATIONS FOR TOXIC SUBSTANCES CONTROL ACT

Mr. FLORIO. Mr. Speaker, I call up the conference report on the Senate bill (S. 1211) to extend the Toxic Substances Control Act for 1 year.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of December 9, 1981.)

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. FLORIO) will be recognized for 30 minutes, and the gentleman from New York (Mr. LENT) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. FLORIO).

Mr. FLORIO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conference report before the House to reauthorize the Toxic Substances Control Act for fiscal years 1982 and 1983 provides $60.1 million and $63.5 million in authority for each fiscal year respectively, and designates that $1.5 million of each authorization is for the purpose of providing grants to the States. The conference report is a straight reauthorization, containing no substantive amendment to the act.

The Toxic Substances Control Act provides for the protection of public health and the environment from unreasonable risks due to toxic chemical exposure, and establishes the authority to screen and test new chemicals before they enter the marketplace. I urge all of my colleagues to support the reauthorization of this vital public health statute.

Mr. LENT. Mr. Speaker, I yield such time as I may consume.

Mr. Speaker, what we have before us today in this conference report is a straight 2-year reauthorization for the Toxic Substances Control Act. This measure provides $60,146,000 for fiscal year 1982 and $63.5 million for fiscal year 1983. Of these amounts, $1.5 million is specifically earmarked each year for State grants under section 28 of the act. These grants are available to States for the establishment and operation of programs to prevent or eliminate unreasonable risks which are associated with a chemical substance or mixture. The balance of the authorization is available for carrying out the general purposes of the act.

The Toxic Substances Control Act was enacted in 1976 to respond to conerns regarding the risks to human health and environment associated with exposure to a wide array of natural and synthetic chemical substances. The act generally provides the EPA with authority to gather information, to require testing, and regulate the manufacture, distribution, use, and disposal of chemical substances and mixtures that may present an unreasonable risk of injury to human health and the environment.

Unfortunately, the EPA has been slow to implement portions of this vital, protective legislation. I believe that these next 2 years provided for in this conference report will give all parties concerned with TOSCA ample opportunity to determine whether it is working as intended. If, after this 2-year period, it is determined that TOSCA is not being properly implemented, I believe substantive amendments to TOSCA may be in order. It is my hope that during the coming 2-year period, many of the existing problems with TOSCA will be solved so that the country can fully benefit from this extremely important piece of legislation.

Mr. LENT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. FLORIO. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 3567, EXPORT ADMINISTRATION AMENDMENTS ACT OF 1981

Mr. BINGHAM. Mr. Speaker, I call up the conference report on the bill (H.R. 3567) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of December 11, 1981.)

The SPEAKER pro tempore. The gentleman from New York (Mr. BINGHAM) will be recognized for 30 minutes, and the gentleman from California (Mr. LAGOMARSINO) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, your conferees have brought back a bill that maintains all the provisions of the House-passed bill while incorporating a couple of changes from the Senate amendment which address concerns raised on the House floor.

The bill provides adequate funding to carry out U.S. controls on exports for national security, foreign policy, and short domestic supply reasons, and to implement our antiboycott policy. It also provides needed increases in criminal and civil penalties for violations of national security controls. The bill requires Federal agencies to share information related to enforcement of the act, with Senate-recommended protections for intelligence sources and methods and IRS return information.

The conferees retained a House restriction on the imposition of export controls on food when such controls would result in measurable malnutrition, subject to a Presidential waiver. The conferees deleted a Senate provision limiting the imposition of agricultural embargoes after January 21, 1985. Senate provisions concerning credit for corporate takeovers and the downward movement of interest rates, which are not germane in the House, were deleted.

Mr. Speaker, the version of the bill in this report is an improvement of the House-passed bill, and I urge my colleagues to adopt it.

Mr. LAGOMARSINO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report on H.R. 3567, the Export Administration Amendments Act of 1981.

The conference report preserves the essential position of the House while clarifying provisions relating to sharing of information for enforcement purposes and civil penalties.

Sharing of information has become a necessary factor in providing for stronger enforcement of national security violations of high technology export controls. The House-initiated provision recognized the need for such sharing, and by accepting the Senate amendment protecting intelligence sources and Internal Revenue tax information, we are not impeding the enforcement process.

Likewise, in raising penalties for Export Administration Act violations, we are tightening the sanctions for national security violations, while maintaining existing penalties for civil and administrative violations in other areas. I believe this action satisfies the need for stronger deterrents against violations without unduly penalizing inadvertent clerical errors.

I urge my colleagues to strongly support this legislation.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I rise in strong support of the conference report on the Export Administration Act authorizations for fiscal years 1982 and 1983. I think the conferees have done an excellent job in agreeing to provide the resources required to enforce necessary export controls.

I would like to call the attention of the House to one particular provision of this conference report which, I believe, merits their support. The provision, which I offered as an amendment when the bill was considered in the Subcommittee on International Economic Policy and Trade, would prohibit food embargoes when such an embargo would cause measurable malnutrition in the targeted country. Unless the President determines that the proposed embargo is necessary to protect the national security interests of the United States, or that arrangements are insufficient to insure that the food will reach those most in need, the embargo cannot be imposed.

In my view, this policy is both wise and humane. When there are people starving in the streets, we cannot worry about who is in the palace. If we have extra food, and there are people elsewhere in the world who are in need, we certainly should not prevent that food from being sent. This would continue a fine humanitarian American tradition, and I hope that my colleagues will join me in supporting it.

● Mr. LAGOMARSINO. Mr. Speaker, I want to commend the House and Senate conferees who drafted this proposal for restoration of the social security minimum monthly benefit, H.R. 3567.

The initial treatment of this issue was not a studied one. The Social Security Subcommittee found some abuses, and prematurely concluded that these occurred throughout. There could, of course, be no question of the shaky future of social security, and for the subcommittee to attempt to find solutions was conscientious. While the proposal to eliminate minimum payments was well-meaning, however, it was enacted in haste, without taking note of the fact that many of the 3 million current recipients had earned and were truly deserving of it.

The House majority first took action to eliminate the minimum in 1977, when it froze minimum benefit levels. Since that time, Democrats in both Houses continued to maintain the same position on the cut. President Reagan, when asked to submit social security recommendations after his election, went along with the move started by Congress, and, when elimination of the minimum was included in the omnibus budget reconciliation this past fall—with no allowance made for a separate vote—was held to blame for it. A tired Democratic Party felt it could find redemption if it pinned the mistake on Republicans. It became a political football.

The Democratic majority has conveniently forgotten that they proposed cuts in social security in their reconciliation bill including elimination of minimum benefits for future recipients, and a delay in cost-of-living increases for all recipients.

I am pleased my colleagues are now looking at social security reform in a more rational, less partisan manner. We realize that reneging on our commitments is not the way to avert bankruptcy. That would defeat our whole purpose. There are people who rely on this money, and it is unfair to take it away once they have qualified.

Even if, by some twist of logic, someone were able to assert that cutting off 3 million mostly elderly social security recipients is not wrong, it would be impossible to argue that this action is right. It would certainly not solve any funding problems. Federal budgetary savings would be negligible, since the majority of annuitants would simply be transferred to the welfare rolls.

I am pleased, too, that the final conference report does not accept the Senate amendment to penalize Government retirees by offsetting the benefits of those receiving over $300 a month. Again, this does not get to the heart of the social security crisis.

Now, congressional committees are digging deeper, and are substituting arbitrary, careless, and superficial cuts for real reform measures that might be made. A few have already been enacted. And in sending back to us the bill to restore minimum benefits, conferees have shown even greater foresight: A more flexible method of fund transfers is allowed, while some long-

standing, offensive flaws that exist in the social security system have been ferreted out and targeted.

One of these is the counterfeiting of social security cards, while another is the payment of benefits to deceased individuals. Also eliminated is a Privacy Act provision which prohibits agencies from providing identifying information on prisoners to the Department of Health and Human Services. As we all know, this statute precludes the Department from enforcing a 1980 law we enacted to terminate payments being made to incarcerated felons. As an ardent proponent and cosponsor of legislation to close these loopholes, I applaud the conferees for allowing us to consider and, hopefully, to take this important step by voting for the bill currently before us.

I strongly urge Members of the House to accept this conference agreement and retain the social security minimum benefit, while, at the same time, enacting reasonable, necessary reforms.●

Mr. BINGHAM. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

CZECHOSLOVAKIAN CLAIMS SETTLEMENT ACT

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1946), to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes, with Senate amendments to the House amendment thereto, and concur in the Senate amendments to the House amendments.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendment to the House amendment, as follows:

Page 3, line 18, of the House engrossed amendment, strike out "$500,000" and insert: "$50,000".

Page 4, line 2, of the House engrossed amendment, after "1949" insert: "; however, it is the sense of the Congress that the United States Government is entitled to a larger percentage of the total award (generally presumed to be 5 percent) and that the ex gratia payment hereinafter provided to certain claimants, who were otherwise excluded from sharing in this claims settlement under generally-accepted principles of international law and United States practice, is justified only by the extraordinary circumstances of this case and does not establish any precedent for future claims negotiations or payments."

Page 4, line 6, of the House engrossed amendment, strike out "$72,500,000" and insert: "$74,550,000".

Page 5, line 22, of the House engrossed amendment, strike out all after "power" over to and including "repudiated" in line 3 on page 6.

Mr. BINGHAM (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from New York?

Mr. FRENZEL. Mr. Speaker, I reserve the right to object.

Mr. Speaker, this bill was before us yesterday, and at that time the bill was passed with an allowance for claims of about $7 million to be awarded to claimants who, in my judgment, did not have a legitimate claim against the asset in question, the Czechoslovakian gold.

I would like to yield to the distinguished chairman at this time to tell us what he has done, or what the Senate has done, before determining whether I shall object to the bill, and I now yield to the distinguished subcommittee chairman.

Mr. BINGHAM. I thank the gentleman for yielding.

The changes made in the Senate bill are primarily the following: That the $7 million for the so-called Benes claimants which were provided for in the bill passed yesterday are reduced to the sum of $4,950,000. The amount that was reserved to reimburse the U.S. Government for administrative costs was reduced from $500,000 to $50,000, and the gentleman will observe that what this does is to reduce to a token amount reserved for the U.S. Government, to leave the amounts for the certified claimants approximately as they were in the original settlement as contemplated by the administration, and provide, to my mind, a minimum amount of less than $5 million for the so-called Benes claimants.

Mr. FRENZEL. Further reserving the right to object, Mr. Speaker, I thank the distinguished chairman for his description of the Senate amendments which he now asks us to accept. I must tell the Members of this body that I still find the bill wanting. In my judgment, further reserving the right to object, it is wrong in that it gives any money at all to people who do not have a deserving claim.

The gentleman has improved the bill to the extent that he is trying to preserve a reasonable amount of money for the claims of the two groups whom I consider deserving claimant groups. Yet what he is doing is giving undeserving claimants all the money normally reserved to the U.S. Government for the work that it has done in holding the gold, storing it, negotiating with the Czechs on its distribution, and all of its work in the Tripartite Commission.

Mr. Speaker, under any other circumstances I would demand a vote. I know the hour is late, and I know the Members are anxious to move on to other business, but I want to state again as strongly as I can that this is a miscarriage of justice, a waste of the public funds.

We are giving money to claimants that are undeserving. We have set just a grotesque precedent. We will rue the day we passed this bill. I have done my best to warn the body of its folly.

Mr. FRENZEL. Mr. Speaker, I will withdraw my reservation of objection simply out of consideration for the membership of this body.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from New York?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the matter just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

AUTHORIZING U.S. PARTICIPATION IN PEACE TREATY BETWEEN EGYPT AND ISRAEL

Mr. HAMILTON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Seante joint resolution (S.J. Res. 100) to authorize the participation of the United States in a multinational force and observers to implement the treaty of peace between Egypt and Israel, with a Senate amendment to the House amendments thereto, and concur in the Senate amendment to the House amendments.

The Clerk read the title of the Senate joint resolution.

The Clerk read the Senate amendment to the House amendments as follows:

In lieu of the matter proposed to be inserted by the House amendment to the text of the resolution, insert:

SHORT TITLE

Section 1. This joint resolution may be cited as the "Multinational Force and Observers Participation Resolution".

STATEMENT OF POLICY

SEC. 2. The Congress considers the establishment of the Multinational Force and Observers to be an essential stage in the development of a comprehensive settlement in the Middle East. The Congress enacts this resolution with the hope and expectation that establishment of the Multinational Force and Observers will assist Egypt and

Israel in fulfilling the Camp David accords and bringing about the establishment of a self-governing authority in order to provide full autonomy in the West Bank and Gaza.

PARTICIPATION OF UNITED STATES PERSONNEL IN THE MULTINATIONAL FORCE AND OBSERVERS

SEC. 3. (a)(1) Subject to the limitations contained in this resolution, the President is authorized to assign, under such terms and conditions as he may determine, members of the United States Armed Forces to participate in the Multinational Force and Observers.

(2) The Congress declares that the participation of the military personnel of other countries in the Multinational Force and Observers is essential to maintain the international character of the peacekeeping function in the Sinai. Accordingly—

(A) before the President assigns or details members of the United States Armed Forces to the Multinational Force and Observers, he shall notify the Congress of the names of the other countries that have agreed to provide military personnel for the Multinational Force and Observers, the number of military personnel to be provided by each country, and the functions to be performed by such personnel; and

(B) if a country withdraws from the Multinational Force and Observers with the result that the military personnel of less than four foreign countries remain, every possible effort must be made by the United States to find promptly a country to replace that country.

(3) Members of the United States Armed Forces, and United States civilian personnel, who are assigned, detailed, or otherwise provided to the Multinational Force and Observers may perform only those functions or responsibilities which are specified for United Nations Forces and Observers in the Treaty of Peace and in accordance with the Protocol.

(4) The number of members of the United States Armed Forces who are assigned or detailed by the United States Government to the Multinational Force and Observers may not exceed 1,200 at any one time.

(b) Subject to the limitations contained in this resolution, the President is authorized to provide, under such terms and conditions as he may determine, United States civilian personnel to participate as observers in the Multinational Force and Observers.

(c) The status of United States Government personnel assigned to the Multinational Force and Observers under subsection (a)(1) or (b) of this section shall be as provided in section 629 of the Foreign Assistance Act of 1961.

U.S. CONTRIBUTIONS TO COSTS

SEC. 4. (a) In accordance with the agreement set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981, the United States share of the costs of the Multinational Force and Observers—

(1) shall not exceed 60 percent of the budget for the expenses connected with the establishment and initial operation of the Multinational Force and Observers during the period ending September 30, 1982; and

(2) shall not exceed 33⅓ percent of the budget for the annual operating expenses of the Multinational Force and Observers for each financial year beginning after that date.

(b)(1) There are authorized to be appropriated to the President to carry out chapter 6 of part II of the Foreign Assistance Act of 1961, in addition to amounts otherwise available to carry out that chapter, $125,000,000 for the fiscal year 1982 for use in paying the United States contribution to the budget of the Multinational Force and Observers. Amounts appropriated under this subsection are authorized to remain available until expended.

(2) Expenditures made pursuant to section 138 of the joint resolution entitled "Joint Resolution making continuing appropriations for the fiscal year 1982, and for other purposes", approved October 1, 1981 (Public Law 97-51), or pursuant to any subsequent corresponding provision applicable to the fiscal year 1982, shall be charged to the appropriation authorized by this subsection.

(c) Unless required by law, reimbursements to the United States by the Multinational Force and Observers shall be on the basis of identifiable costs actually incurred as a result of requirements imposed by the Multinational Force and Observers, and shall not include administrative surcharges.

NONREIMBURSED COSTS

SEC. 5. (a) Any agency of the United States Government is authorized to provide administrative and technical support and services to the Multinational Force and Observers, without reimbursement and upon such terms and conditions as the President may direct, when the provision of such support or services would not result in significant incremental costs to the United States.

(b) The provision by the United States to the Multinational Force and Observers under the authority of this resolution or any other law of any property, support, or services, including the provision of military and civilian personnel under section 3 of this resolution, on other than a reimbursable basis shall be kept to a minimum.

(c) The President may provide military training to members of the armed forces of other countries participating in the Multinational Force and Observers.

REPORTS TO THE CONGRESS

SEC. 6. (a) Not later than April 30, 1982, the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a detailed written report with respect to the period ending two weeks prior to that date which contains the information specified in subsection (b).

(b) Not later than January 15 of each year (beginning in 1983), the President shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate, a written report which describes—

(1) the activities performed by the Multinational Force and Observers during the preceding year;

(2) the composition of the Multinational Force and Observers, including a description of the responsibilities and deployment of the military personnel of each participating country;

(3) all costs incurred by the United States Government (including both normal and incremental costs), set forth by category, which are associated with the United States relationship with the Multinational Force and Observers and which were incurred during the preceding fiscal year (whether or not the United States was reimbursed for those costs), specifically including but not limited to—

(A) the costs associated with the United States units and personnel participating in the Multinational Force and Observers (including salaries, allowances, retirement and other benefits, transportation, housing, and operation and maintenance costs), and

(B) the identifiable costs relating to property, support, and services provided by the United States to the Multinational Force and Observers;

(4) the costs which the United States Government would have incurred in maintaining in the United States those United States units and personnel participating in the Multinational Force and Observers;

(5) amounts received by the United States Government from the Multinational Force and Observers as reimbursement;

(6) the types of property, support, or services provided to the Multinational Force and Observers by the United States Government, including identification of the types of property, support, or services provided on a nonreimbursable basis; and

(7) the results of any discussions with Egypt and Israel regarding the future of the Multinational Force and Observers and its possible reduction or elimination.

(c)(1) The reports required by this section shall be as detailed as possible.

(2) The information pursuant to subsection (b)(3) shall, in the case of costs which are not identifiable, be set forth with reasonable accuracy.

(3) The information with respect to any administrative and technical support and services provided on a nonreimbursed basis under section 5(a) of this resolution shall include a description of the types of support and services which have been provided and an estimate of both the total costs of such support and services and the incremental costs incurred by the United States with respect to such support and services.

STATEMENTS OF CONGRESSIONAL INTENT

SEC. 7. (a) Nothing in this resolution is intended to signify approval by the Congress of any agreement, understanding, or commitment made by the Executive branch other than the agreement to participate in the Multinational Force and Observers as set forth in the exchanges of letters between the United States and Egypt and between the United States and Israel which were signed on August 3, 1981.

(b) The limitations contained in this resolution with respect to United States participation in the Multinational Force and Observers apply to the exercise of the authorities provided by this resolution or provided by any other provision of law. No funds appropriated by the Congress may be obligated or expended for any activity which is contrary to the limitations contained in this resolution.

(c) Nothing in this resolution shall affect the responsibilities of the President or the Congress under the War Powers Resolution (Public Law 93-148).

DEFINITIONS

SEC. 8. As used in this resolution—

(1) the term "Multinational Force and Observers" means the Multinational Force and Observers established in accordance with the Protocol between Egypt and Israel signed on August 3, 1981, relating to the implementation of the security arrangements of the Treaty of Peace; and

(2) the term "Treaty of Peace" means the Treaty of Peace between the Arab Republic of Egypt and the State of Israel signed on March 26, 1979, including the Annexes thereto.

Mr. HAMILTON (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment

to the House amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Indiana (Mr. HAMILTON).

Mr. HAMILTON. Mr. Speaker, I support final passage of Senate Joint Resolution 100, as amended, a resolution to authorize the participation of the United States in a multinational force and observers (MFO) to implement the Treaty of Peace between Egypt and Israel.

It is critical to U.S. interests in the Middle East that the MFO be established and that it be enabled to carry out its functions efficiently and effectively. The establishment of this force for the Sinai represents an important step in the implementation of the Egyptian-Israeli treaty which, in turn, is the first step toward a comprehensive peace in the Middle East.

This legislation is clearly essential for the peace process in the Middle East. Without such a multinational force, the likelihood is that the implementation of the Egyptian-Israeli Peace Treaty would collapse. In the wake of the death of President Sadat of Egypt, this resolution is vital to reinforcing the U.S. commitment to the full implementation of the Treaty of Peace and is a prerequisite for our ability to move forward to carry out the second major undertaking of the Camp David process—the attainment of an acceptable agreement for the West Bank and Gaza consistent with the Camp David accords.

In acting on the House passed language, the other body has preserved all the substantive provisions contained in House Joint Resolution 349 as agreed to by the full House during its consideration and overwhelming bipartisan vote of 368 to 13 on November 19, 1981. This includes all those provisions stressing the multinational character of the force. The principal Senate amendments modify parts of the reporting requirement of the House passed resolution in an effort to improve and facilitate executive branch compliance with the resolution's annual reporting requirement on the MFO activities and costs.

The intent of the annual reporting requirement in section 6 of the resolution as it relates to MFO costs is for the executive branch to provide Congress with an overall statement of all costs incurred in U.S. involvement in the MFO, including those costs associated with the American military units assigned to the MFO. It is our intent that this report's statement of costs be as complete and thorough as possible. We prefer that the executive branch include items which relate in part, but not in their entirety, to the MFO's activities and operations. It is, however, not our intent that the report of all costs associated with the MFO place unreasonable accounting or recordkeeping requirements on the executive branch or that the report be accurate down to the last man-hour of services provided or nut and bolt given. Congress simply wants to be provided with a full and reasonably accurate statement of all costs involved in the U.S. participation in this important peacekeeping venture.

Mr. Speaker, final passage of Senate Joint Resolution 100, as amended, underscores our understanding that U.S. policy in the Middle East is clearly directed to fostering conditions which will help strengthen peaceful ties between Egypt and Israel, and thereby contribute to the creation of conditions in which the MFO may no longer be required.

I urge the adoption of this joint resolution.

Mr. ZABLOCKI. Mr. Speaker, I rise in support of Senate Joint Resolution 100, as amended by the Senate.

As my colleagues will recall, the purpose of Senate Joint Resolution 100—formerly House Joint Resolution 349—is to provide congressional authorization to the President to allow the participation of the United States in the Multinational Force and Observers (MFO) peacekeeping force in the Sinai.

At the outset I commend our colleague, the gentleman from Indiana, LEE HAMILTON, chairman of the Subcommittee on Europe and the Middle East and the ranking Republican member of the subcommittee, Mr. FINDLEY, as well as the ranking member of the full committee, Mr. BROOMFIELD, for their efforts on this legislation. In amending Senate Joint Resolution 100, the other body has preserved all the substantive provisions contained in the House version House Joint Resolution 349, as agreed to by the full House during its consideration and overwhelming bipartisan vote of 368 to 13 on November 19, 1981. The Senate amendments simply modify some of the reporting requirements of the resolution, with the result of improving and facilitating executive branch compliance with the resolution's reporting requirement.

Mr. Speaker, the establishment of the MFO represents an important step in the implementation of the Egyptian-Israeli Treaty which, in turn, is the first step toward peace in the Middle East. The agreements leading to the establishment of this force represent a major step in our search for a just and lasting peace in that troubled region. In acting on the creation of this force, the United States remains fully committed to moving forward to carry out the second major undertaking of the Camp David process—the attainment of an acceptable agreement for the West Bank and Gaza consistent with the Camp David accords.

Final passage of Senate Joint Resolution 100, as amended, underscores our understanding that U.S. policy in the Middle East is clearly directed to fostering conditions which will help to strengthen the peaceful relations between Egypt and Israel, and thus contribute to the creation of conditions in which the MFO will no longer be required, thereby confirming the temporary and interim role of the MFO.

In conclusion, Mr. Speaker, this joint resolution is critical to the continuation and ultimate completion of the peace process in the Middle East. It embodies the necessary next step which will hopefully culminate in permanent peace in the Middle East. Accordingly, I urge favorable adoption of this joint resolution.

Mr. BROOMFIELD. Mr. Speaker, the legislation we have before us today represents an important step in the implementation of the Egyptian-Israeli Treaty which, in turn, is contributing to the search for a just and lasting peace in the Middle East. The resolution, as amended recently by the Senate, provides congressional authorization to the President to allow the participation of the United States in the Multinational Force to police the Sinai following Israel's withdrawal from that region next April. The Senate amendments simply modify some of the reporting requirements demanded of the executive branch. In short, the resolution is the culmination of months of substantive U.S. negotiations as well as the professional counsel of the Foreign Affairs and Foreign Relations Committees, which have incorporated a number of safeguards in this resolution regarding U.S. participation in the Multinational Force.

It had been my hope that some kind of U.N. peacekeeping operation involving countries other than the United States could have been arranged to police the Sinai. However, when it became clear earlier this year that the U.N. Security Council, because of Soviet opposition, would not approve a United Nations peacekeeping arrangement to monitor the Sinai, the United States had to take "those necessary steps" as initially provided in the Camp David negotiations to establish an alternative multinational peacekeeping force. In this regard, the present administration is to be commended not only for its intensive and creative diplomatic efforts with Egypt and Israel, but also with our friends in Europe, Latin America, and the South Pacific, who will join the United States in this newly arranged peacekeeping operation.

By approving this legislation today, we in the Congress have an opportunity to further the peace process in the Middle East. This opportunity, however, is not without risks to American participation, since we cannot take lightly the introduction of U.S. combat-equipped troops into such a volatile region of the world. Despite the potential risks which have been carefully and comprehensively considered by both the Foreign Affairs and Senate Foreign Relations Committees, I believe that it is necessary for the United States to remain a full partner in this endeavor and to put into place another essential building block in the structure of peace in the Middle East. As a result, I urge by colleagues to adopt the resolution before us.

Mr. FINDLEY. Mr. Speaker, I rise in support of this conference report which authorizes U.S. participation in the multinational peacekeeping force in the Sinai. I am pleased to say that the Senate accepted, with a few exceptions, the House version of the legislation. This is a tribute to the efforts of my distinguished colleagues, Chairman ZABLOCKI, Mr. BROOMFIELD, Mr. HAMILTON. I am also honored to have played a role in putting this legislation together.

As I stated when the House considered the legislation to authorize U.S. participation in the multinational peacekeeping force, I support this legislation because it will help Egypt and Israel to fulfill commitments in their treaty of peace. Israel is to withdraw from the Sinai in April 1982 and Egypt resume its full sovereignty over the Sinai which, however, is to be largely demilitarized. This is essential to consolidate the achievements already reached in the peace process and to encourage further progress toward a full and comprehensive peace in the Middle East.

There is, however, both tragedy and irony in the fact that as we authorize this U.S. peacekeeping role in the Sinai, Israel has taken steps to undermine the peace process. Only a few days ago, at the instigation of Prime Minister Begin, the Israeli Knesset voted to extend Israeli law to the Golan Heights. This act is tantamount to Israeli annexation of the Golan Heights. Such a step is dangerous and deplorable. It indicates that Israel is willing to contravene international law and to renege on its commitment to U.N. Security Council Resolution 242. This resolution which is the basis for peace and peace talks in the Middle East calls for negotiations on the basis of territorial withdrawal and security and recognition. If Israel unilaterally moves to foreclose all negotiations on the Golan Heights, then recognition of Israel will continue to be withheld and Israeli security will be impossible to attain.

I am also chagrined and deeply disturbed that at the very time the United States is involved in efforts to help Israel and Egypt reach an agreement on Palestinian autonomy in the West Bank and Gaza, Israel, without any prior notice or consultations with the United States, has taken this step to annex the Golan Heights. This act is directly contrary to the mutual cooperation and coordination of effort between the United States and Israel that will be necessary if further progress toward peace in the Middle East is to be achieved.

I hope, therefore, that other voices will join mine in calling upon Israel to rescind its action in the Golan Heights and to renew its commitment to negotiate a solution to the Middle East conflict rather than resorting to force. This is particularly important as we vote to send American men into this turbulent region.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Indiana?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAMILTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate joint resolution just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

CONFERENCE REPORT ON S. 1086, OLDER AMERICANS ACT AMENDMENTS OF 1981

Mr. ANDREWS. Mr. Speaker, I call up the conference report on the Senate bill (S. 1086) to extend and revise the Older Americans Act of 1965, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of December 10, 1981.)

The SPEAKER pro tempore. The gentleman from North Carolina (Mr. ANDREWS) will be recognized for 30 minutes, and the gentleman from Wisconsin (Mr. PETRI) will be recognized for 30 minutes.

The Chair recognizes the gentleman from North Carolina (Mr. ANDREWS).

Mr. ANDREWS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today we consider the conference report to extend and revise the Older Americans Act of 1965. This bill, the Older American Act Amendments of 1981, has received broad bipartisan support by both the House and the Senate. As you may remember, the House version, H.R. 3046, which I originally introduced and which was also referred to the Committee on Education and Labor, passed the House by a vote of 379 to 4 November 20. We have received the complete cooperation of Mr. ASHBROOK, the ranking minority member of the full committee, and Mr. PETRI, the ranking minority member of the Subcommittee on Human Resources, and I thank them for their wise and thoughtful counsel. I also extend special appreciation to Mr. CARL PERKINS, chairman of the Committee on Education and Labor and a cosponsor of this legislation, for his guidance and support.

S. 1086 would authorize the Older Americans Act for an additional 3 years and provide amendments to improve the administration of the act. It is, in my opinion, the belief of all the conferees that the measure, as presented today, will strengthen and revitalize this program designed to address the national priority and special needs of this Nation's senior citizens.

This bill provides for strong leadership and coordination of Federal programs at the national level while increasing flexibility for State and local governments in the provision of services to our older citizens. The Administration on Aging within the Department of Health and Human Services is strengthened to improve the administration of the program, nutrition services are bolstered, and part-time employment programs for the low-income elderly have been renewed.

Mr. Speaker, S. 1086 is a good bill and worthy of the support of my colleagues.

Mr. PETRI. Mr. Speaker, I yield myself as much time as I may consume.

Mr. Speaker, I would like to commend my subcommittee chairman for doing his usual good job on this bill and to thank him for the fine spirit in which he has conducted the work of the subcommittee; and also commend the majority staff as well as the minority staff for the great help that they gave all of us on the subcommittee and for their work on this bill.

Mr. Speaker, I rise in qualified support of the conference report on the Older Americans Act Amendments of 1981.

We are reauthorizing good programs and have made some modest improvements in them. For example, some flexibility has been introduced into the title III funding. The 20-percent transfer provision among congregate meals, home-delivered meals, and supportive services is a first step in the right direction, but this change may be self-defeating because such trans-

fers will require additional recordkeeping and bureaucratic redtape. To correct this flaw, I had proposed a total consolidation of these programs. Nonetheless, I am hopeful that our experience with this limited first step will encourage us to move further in this direction in the future.

I am disappointed that this bill authorizes forward funding of the title V programs, as the conferees adopted the position of the House rather than that of the other body on this point.

Finally, I am pleased to note that this legislation is consistent with the Omnibus Reconciliation Act and that it has the support of this administration.

On balance, I believe this legislation merits support and I urge that the conference report be adopted.

Mr. Speaker, I yield to the gentleman from Nebraska (Mr. DAUB).

□ 1835

Mr. DAUB. Mr. Speaker, since the enactment of the Older Americans Act in 1965, programs for America's older citizens have both been expanded and better coordinated. In these 15 years, the program has grown from a few research grants and social service grants to a network of 57 State units on aging, over 600 areawide agencies on aging, and countless organizations providing paid and volunteer services. The size of the budget has increased from $7.5 million in 1966 to $1.09 billion authorized by this bill today. The act has been amended nine times, adding major initiatives such as nutrition programs for the elderly, as well as senior employment initiatives. The 1978 amendments aimed toward providing a more efficient service delivery system and increased coordination of community resources for the aging. These amendments consolidated the State and community planning services, nutrition, and social services into one title to be funded through the area agencies on aging.

As we come into a new decade we are facing new fiscal realities and pressures. We must be both critical and creative in our approach to Federal spending. This demands that priorities be set, plans be made, and goals be developed. In an effort to assure local flexibility and control over limited financial resources, I offered an amendment to the House version of the Older Americans Act which would allow title 3B funds authorized by the Older Americans Act to be used for victim assistance and crime prevention programs. I'm pleased to see this has been included in the conference report before us today. Even in Nebraska, the fear of crime stalks the elderly. I am especially concerned about the devastating impact that crime and the fear of crime has on the lives of older Americans. This change in the law gives those charged with the responsibility to coordinate services for the elderly the opportunity to find creative uses for the Federal dollars we give them.

I'm pleased to see that this bill, in its final form, sets the stage for increased local decisionmaking and expanded control of older people in making the Older Americans Act work for them. As a matter of general philosophy it was important for the Older Americans Act to accomplish the following:

Provide more flexibility for operation of OAA programs to meet the specific needs of each community;

Remove unnecessary restrictions, cumbersome redtape, and meaningless paperwork;

Expand opportunity for older persons to manage, direct, plan, and implement the programs intended to meet their needs;

Assure that the resources under the act can be used most effectively to provide essential services to enable older people to live independently and with dignity for as long as possible;

Examine the organizational placement of the Administration on Aging and its authority to carry out the administration of the Older Americans Act; and

Foster the selection of the most effective and efficient service providers through maximum competition and the enforcement of high standards of performance.

The Older Americans Act has been a major accomplishment in serving the needs of our older citizens and I rise today to pay tribute to its fine accomplishments. I believe the changes this Congress has seen fit to make to this legislation will only better serve and more effectively resolve problems of the elderly, as well as to provide helpful services so as to maintain our older citizens' independence and dignity.

Mr. PETRI. Mr. Speaker, I yield such time as he may consume to the distinguished ranking Republican on the Select Committee on Aging, the gentleman from New Jersey (Mr. RINALDO).

Mr. RINALDO. Mr. Speaker, I rise in support of the conference report on the Older Americans Act Amendments of 1981. As ranking Republican member of the House Select Committee on Aging, I have devoted considerable attention to the Older Americans Act.

The Older Americans Act, a comprehensive program which provides an array of important transportation, nutrition, health-related, employment and social services to senior citizens nationwide, has been, and continues to be, a success.

It is a success because of the dedication and enthusiasm of the hundreds of people nationwide who are responsible for the efficient and effective delivery of services under the act.

Dedicated individuals—many of them older—at the Administration on Aging, at the State and area agencies on aging, those who serve on State and local commissions and advisory councils, and others who work with older persons—either in a paid or voluntary capacity—all deserve a special tribute as we reauthorize this important act for 3 more years.

The conference report represents a broad, bipartisan consensus of opinion.

I am particularly gratified that the conference report includes my amendment to afford boarding home residents the same protections as those offered nursing home residents through the long-term care ombudsmen.

In sum, the 1981 legislation further strengthens and refines the Older Americans Act and continues our objective of assisting our Nation's elderly to lead independent, secure, satisfying and productive lives.

I wish to extend my appreciation to the conferees for their fine work on this bill, particularly Mr. BIAGGI, an original member of the Committee on Aging.

Their efforts, combined with that of others, have wrought legislation of which we can all be proud. I urge adoption of the conference report.

Mr. PETRI. Mr. Speaker, we have no further requests for time on this side and I yield back the balance of my time.

Mr. ANDREWS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, Congressman WILLIAMS, a member of the subcommittee, was to have been here to engage in a colloquy. I believe he is not on the floor. I believe his purpose would have been to refer to title IV of the act dealing with training, research, and discretionary projects and programs. I am particularly pleased with section 421, research and development projects, and section 426, development of model projects. Authorization is provided for helping to alleviate the burden that many of our elderly citizens face regarding heating their homes. It is clear that title IV provides the authorization for funding programs which will help elderly people mitigate the cost of home heating through self-help programs and energy conservation and weatherization.

I believe Mr. WILLIAMS wanted to reiterate this for the record. I believe this would have been his statement and I totally concur in it.

I also understand that one other Member had likewise desired to engage in a colloquy, the gentleman from Arkansas (Mr. HAMMERSCHMIDT).

Mr. Speaker, I just would add one further word. I think this would be a better Christmas present and New Year's wish for elderly citizens who participate in these wonderful pro-

grams all over the country, and it is a credit to the Congress and to the administration for supporting it. I think it is a credit to this body that by such an overwhelming majority we do again reassert and demonstrate our support for these elderly citizens who have made this Nation and helped to make this Nation what it is. I commend the bill to the House and I hope that we will have overwhelming support for it.

Mr. PETRI. Mr. Speaker, will the gentleman yield?

Mr. ANDREWS. I am happy to yield to the gentleman from Wisconsin.

Mr. PETRI. Mr. Speaker, my colleague, JOHN PAUL HAMMERSCHMIDT, of Arkansas, was the original sponsor of the amendment to provide mental health projects under title IV, training, research, and discretionary projects and programs of the Older Americans Act which my colleague from New York (Mr. BIAGGI) offered as a member of the Human Resources Subcommittee for the gentleman from Arkansas (Mr. HAMMERSCHMIDT).

In this regard the gentleman from Arkansas (Mr. HAMMERSCHMIDT) has asked to seek clarification of what he believes is a technical error in the conference report from you as chairman of the Human Resources Subcommittee.

Page 9 of the conference report, line 1, reads "meet the special health care needs of the elderly."

Should this read "meet the special mental health care needs of the elderly"?

Mr. ANDREWS. I believe that to be correct. I think it is an error in printing and mental health was intended in that section within the conference report as well as in the original bill.

I appreciate the gentleman from Arkansas (Mr. HAMMERSCHMIDT) calling that to our attention through the gentleman from Wisconsin on his behalf.

Mr. PETRI. I thank my chairman for this clarification.

Mr. PERKINS. Mr. Speaker, we are bringing before the House today a landmark conference report on the continuation and revision of the Older Americans Act of 1964. This bill, if adopted, will assure the continuation of vital nutrition, supportive, and employment programs for our Nation's elderly citizens.

This conference report is the product of the efforts of many Members of Congress, but I would particularly like to acknowledge the diligent leadership of Congressman IKE ANDREWS, chairman of the Subcommittee on Human Resources, and ranking minority member, Congressman TOM PETRI.

I am pleased that the Senate-House conference committee was able to reach agreement on all of the difficult issues facing us during our course of deliberation. Because I know that IKE ANDREWS and TOM PETRI will describe in great detail the many provisions of this conference report, I would like to only briefly touch on the highlights.

This bill would extend the Older Americans Act for a 3-year period with some significant changes.

Title II of the act would add education and training programs to the list of programs which can assist in meeting the needs of the elderly, and also deletes the authority for the National Information and Resource Clearinghouse for the Aging.

Title III would maintain the current separate authorization for the nutrition programs; permit States to transfer not more than 20 percent of funds appropriated during any fiscal year between programs under part B—supportive services—and C—nutrition services—strike the requirement that 50 percent of supportive services be spent on three priority services; permit the use of contributions for meals to provide transportation and other supportive services directly related to nutrition services; and add boarding homes to the definition of long-term facility for purposes of the nursing home ombudsman program.

Title IV would be rewritten so that specific program categories are removed in favor of a more general authorization of demonstration projects including projects to meet the specific mental health care needs of the elderly; install security devices in homes; and improve transportation services for the rural elderly.

Title V, community service employment, would be amended to include "weatherization activities" as an appropriate community service activity. The conference bill requires also that title V continue to be forward funded in order to assure both older workers and local communities a consistent, uninterrupted source of labor.

Title VI would include changes regarding services to Indians, including modifying language regarding the definition of Indians to be served; changing "Indians 60 and over" to "older Indians," and making the provision of legal or ombudsman services permissive.

Mr. Speaker, there are many of us who are not satisfied with the low authorization levels agreed to in the conference. Authorization levels for fiscal year 1982 for programs under the Older Americans Act are well below the fiscal year 1981 authorization levels. At this point, I would like to include in the RECORD a chart that reflects this reduction in authorization levels.

OLDER AMERICANS ACT

[In millions of dollars]

	Fiscal year—		
	1981 authorization	1981 appropriation	1982 authorization (S. 1086)
Federal Council on Aging	[1]	0.5	0.2
Supportive services (title III–B)	480.0	274.6	306.0
Congregate meals (title III–C–1)	400.0	295.0	319.1
Home-delivered meals (title III–C–2)	120.0	55.0	60.0
Research/demonstration (title IV)	[1]	40.5	23.2
Community service employment (title V)	450.0	277.1	[2] 277.1
Indian tribes (title VI)	[1]	6.0	6.5
Total	[3] 1,450.0	948.7	992.1

[1] Such sums as may be necessary.
[2] Or "such sums as may be necessary to maintain the current number of 54,000 jobs".
[3] Plus such sums as may be necessary.

In my judgment, Mr. Speaker, we are shortchanging a segment of the population that constitutes the fastest growing segment of the U.S. population. Between 1980 and the year 2030, the elderly population will double absolutely and proportionately to total 55 million and 22 percent of the population. These individuals, more than any other group, are feeling the adverse effects of spiraling inflation and Government cutbacks, and it is questionable whether these authorization levels will be able to defray the increase in nutrition and other costs projected for 1982. I believe, however, that this is a much needed piece of legislation and that it is important that it be considered without further delay. I therefore urge my colleagues to vote overwhelmingly today in favor of this conference report.

● Mr. BIAGGI. Mr. Speaker, as a member of the House-Senate conference committee on S. 1086, the Older Americans Act Amendments of 1981, I rise in full and enthusiastic support of this landmark legislation. This conference report will mean that the Older Americans Act—one of the most successful of all Federal programs—will be extended for the next 3 years.

My involvement with this legislation has been constant not only with respect to the 1981 amendments presently before us, but throughout my 13 years in the House. I have actively participated in at least four reauthorizations and feel the final product of this year's reauthorization is perhaps the finest.

It is by no means an exaggeration to say that for the past 16 years, the Older Americans Act has been the centerpiece of this Nation's policy for providing social and human services to millions of our older citizens. S. 1086 recognizes and expands this commitment through fiscal year 1984.

My involvement with the 1981 amendments has been especially active. Since the time we last reauthorized the act in 1978, I have been engaged in regular oversight work in my capacity as chairman of the Subcommittee on Human Services of the

House Select Committee on Aging. This work has included site hearings in a variety of urban-rural and suburban settings from New York City to Long Beach, Calif. I conducted hearings on the promulgation of the regulations which implemented the 1978 amendments late last year and the beginning of this year. I conducted hearings to help shape recommendations for the 1981 amendments.

The recommendations I acquired from my hearings and overall oversight work were reflected in a bill I introduced earlier this year, H.R. 3267. As a member of the Education and Labor Committee, I was pleased to have a number of provisions of my bill adopted in H.R. 3046—the House-passed Older Americans Act reauthorization. I was an original cosponsor of the House bill and am pleased that the final conference report clearly reflects more of the House bill than the Senate bill.

At this time I would like to pay special tribute to Chairman PERKINS and subcommittee Chairman ANDREWS whose contributions to this legislation are reflective of their commitment to older Americans. In addition, I wish to note the important work of my colleagues, Mr. RATCHFORD and Mr. PETRI. Finally, although not members of the Education and Labor Committee, I would like to acknowledge an important contribution made by my colleague, Mr. RINALDO, who offered an amendment to the House-passed bill which was retained in the final conference report dealing with the rights of the elderly living in boarding homes, and I wish to salute our esteemed colleague, Mr. PEPPER, who lent his considerable influence and support to this entire effort.

Let me summarize the key elements in the conference report:

The bill provides a 3-year extension of all six titles of the Old Americans Act. Authorization levels are as follows:

	Fiscal year 1982	Fiscal year 1983	Fiscal year 1984
Title III–B, Supportive services and senior centers [1]	$306,000,000	$327,400,000	$350,300,000
Title III–C(i), Congregate meals	319,100,000	341,400,000	365,300,000
Title III–C(i), Home delivered meals	60,000,000	64,200,000	68,700,000
Commodity foods [2]	93,200,000	100,000,000	105,000,000
Title IV—Research	23,200,000	24,800,000	26,500,000
Title V—Employment	277,000,000	296,500,000	317,500,000
Title VI—Indians	6,500,000	7,000,000	7,500,000
Federal Council on Aging	200,000	214,000	228,900

[1] New name for title III–B replacing social services and senior centers.
[2] Conference report also provides for "such sums as may be necessary to avert any reduction in the reimbursement rate for meals served below that of fiscal year 1981."

The conference report contains a number of improving amendments. The most critical of them is a provision which permits State agencies to transfer funds between title III–B and III–C. The purpose of this is to provide needed flexibility to States in how they allocate their social service dollars. More specifically, the 1978 amendments to the act called for title III–B to assume funding responsibilities for the supportive service related to the nutrition program under III–C. One of the most important of these services is transportation. A basic problem developed when the funding levels for III–B did not grow at a rate sufficient to assume responsibility for services such as transportation.

Consequently, States found themselves with adequate funds for nutrition but not enough money to get the people to the meal sites. The 20-percent transfer language—which I authored—should greatly relieve this problem.

In addition, the conference report eliminates one of the more contradictory provisions in the act, which mandates that area agencies on aging allocate 50 percent of their funds under title III–B for in-home access and legal services. While no one has ever disputed the importance of these services, a number of us always had problems with Congress telling area agencies on aging how they had to spend their money. Earlier amendments to the act created the "aging network," which included area agencies as a concept. Today, there are more than 660 AAA's nationwide. They are the central focus on the local level for the development of social and human services to the elderly and are capable of assuming greater control.

The conference report eliminates the 50-percent mandate and, instead, urges that an adequate portion of funds be used. It would be my hope, as a cosponsor of this legislation, that the determination for the adequate portion will be that of the area agency.

It is important to note that the conference report clearly rejects the so-called consolidation proposal by the administration. Under this plan, authorizations for the home-delivered and congregate meals programs and the commodity foods program within the Department of Agriculture would have been merged. This consolidation would have not achieved better efficiency in terms of the delivery of nutrition services and might in fact lead to interruptions. The Committee on Education and Labor clearly went on record against a consolidation proposal, and I am glad to see that the conference report maintained this position.

I am especially pleased about this aspect of the conference report. It is critical to the program that we retain at least the 1 percent or $20,000 floor. The fact is more than 70 percent of our States are exceeding this level of commitment. However, for those who have not, this figure should provide the necessary incentive for them to do so. The addition of boarding homes to the definition of "long-term care facility" is reflective of a deep concern which we have about conditions in our boarding homes today. The Aging Committee has conducted several hearings and a major investigation into boarding homes. There is a need to extend the protections of the ombudsman program to residents of boarding homes.

An especially important action of the conference was its rejection of a proposal to impose a sliding scale of fees for contributions to nutrition programs. I was vigorously opposed to this provision as it appeared in the Senate-passed bill. We have consistently worked against the imposition of means tests in Older Americans Act programs, and sliding scale fees would have accomplished the same negative purpose, and the conferees were wise to reject this proposal.

The provision in the conference report which permits contributions made in nutrition programs to go to not only the expansion of meals but for access services including transportation and any other supportive service directly related to the provision of nutrition services is vitally important and will be a true asset to the operations of the act over the next 3 years.

A conference agreement strikes an effective compromise on the so-called grandfathering issue. The House bill would have retained existing law with respect to grandfathering, meaning that all nutrition programs which existed as of September 30, 1978, would continue as such through the life of the bill. The Senate bill eliminated the provision altogether. Under the conference agreements, grandfathering would remain in effect through this fiscal year, and beginning in fiscal year 1983 all contracts awarded for the provision of nutrition services would have to be given under a competitive process. As one who played a major role in the development of this compromise, let me state as a matter of congressional intent that we are not seeking to impose undue amounts of administrative problems in area agencies on aging across the Nation. However, we contend that competitive bidding will help to insure cost maintenance and a consistently high standard of quality in the food provided.

Finally, in the overall area of title III I support the change in the name of III–B to "Supportive Services and Senior Centers." The change is more than symbolism; it is reflective of an aspiration we have for the act; namely, that its programs can in fact be better coordinated to work for similar as compared to cross purposes.

I am pleased that the final conference report retains one existing section of law which permits title III–B funds to be used to provide arts and cultural services for older Americans. I

conducted a special hearing on the topic of arts and the elderly and hoped to develop additional amendments, perhaps expanding the scope of this commitment to funding arts and cultural services with title III-B. While my hopes were not fully realized, the basic protection in existing law for the provision of these vital services has been preserved. In the coming 3 years I hope our Nation can develop a more comprehensive national policy for linking older people to arts and cultural services. It is a fundamental aspect of our need to insure that while we extend the quantity of life for our elderly, we also work to extend the meaning in their lives.

In the House-passed bill I had successfully offered a number of amendments which would have greatly upgraded the status of the Commissioner on Aging. The final conference report retains a key element of my original amendments which restates the language of section 201(a) to bar the Secretary of HHS from delegating any of the functions of the Commissioner on Aging to any other officer not directly responsible to the Commissioner. My compromise amendment in this final report will greatly expand the functions of the Commissioner which would be subject to the protections of 201(a). This is vital if we are in fact to finally give the Commissioner on Aging the kind of autonomy and visibility the position merits.

I remain committed to seeing the Aging Administration elevated within our own Government and hopefully someday enjoy its own Cabinet-level status.

The conference report does maintain the Older Americans Act support for legal service demonstration projects, while not specifically providing the $5 million set-aside in current law. Conference report language does reiterate the support which Congress retains for legal services within the Older Americans Act, and it is my fervent hope that we can expand our efforts in this area over the life of this bill. Legal services must be considered one of the core services which our elderly need to maintain their independence.

Let me comment on two other specific provisions which are more reflected in report language. S. 1086 provides authority to expend funds for post-White House Conference on Aging activities. The conference report does clearly state that among these activities should be the mailing of a complete list of unedited recommendations to all delegates and observers. It is vital that we insure that the mandate of the White House Conference on Aging, as spelled out in the 1978 amendments, be fulfilled.

The conference report clarifies congressional intent on a number of provisions within the title V employment program. The conferees strongly reemphasize their support for the statutory formula in the 1978 OAA amendment for allocation of title V funds between States and national contractors. In addition, the report clarifies that the 55 percent of the excess over the 1978 hold-harmless level should be administered by State government and specifically the State agency on aging. It was not the intent, however, of the conferees to alter the current arrangements in some seven States where the Governor has designated other State agencies to operate the program. In those cases it is important for the State agency on aging to assist these other State agencies in administering the program effectively on behalf of older persons within the State.

An important provision which is contained in the statement of the managers of this bill warrants some special comment. A total of 23 States, including New York, California, Illinois, and Ohio, have registered an increase in the number of people age 60 and over but not enough to increase their overall percentage of elderly. The funding for the Older Americans Act is distributed on the basis of the percentage of the population 60 and over that each State has. Consequently, these 23 States, despite having more older citizens, will not receive any increase in their allotment under title III of this act and in fact could lose funds if appropriations are not increased.

As the language in the conference report reads, "The conferees are concerned that many of these 23 States may be forced to reduce services under the Older Americans Act in fiscal year 1982." The language goes on to urge that the Secretary of HHS take all possible steps to avert service reductions in any State. This should be a matter of deep concern to my colleagues, and I intend to monitor the situation closely in the coming months.

In summation, I totally support the pending conference report and commend it for my colleagues' approval. We have retained the critical elements of the House-passed bill, including my specific amendments to broaden the powers of the Commissioner on Aging and to provide greater flexibility to States to spend their title III funds. In addition, we retained the separate funding authorities for the two nutrition programs in the act as well as the commodity foods program administered by the U.S. Department of Agriculture. We have preserved our language calling on area agencies on aging to spend an adequate portion of their funds on critical priority services of transportation, home care, and legal services. We have retained the all-important provision of forward funding for the title V employment program with our far more equitable formula guaranteeing that both national contractors and State agencies on aging get their fair share of job slots. Our authorization levels that were proposed by the conferees were accepted providing modest growth in programs. Finally, we must take special notice of the fact that in this area of "block grant fever," Congress is about to give renewed approval to a highly effective categorical grant program exclusively for our older citizens.

The number of older Americans has increased by more than 20 percent since the Older Americans Act was first enacted in 1965. Our reauthorization on this act today is a most positive step and should be viewed as the cornerstone of a continued and expanded national policy to insure the quality of life for our Nation's seniors.●

GENERAL LEAVE

Mr. ANDREWS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report now under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report accompanying H.R. 3567, previously agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

ACTIVITIES OF THE FOREIGN AFFAIRS COMMITTEE DURING THE FIRST SESSION

(Mr. ZABLOCKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ZABLOCKI. Mr. Speaker, as the 1st session of the 97th Congress comes to a close, I want to take this opportunity to provide for the Congress and the public a brief summary of the many activities and accomplishments of the Committee on Foreign Affairs since this Congress convened on January 5, 1981.

A transition year, whether in the legislative or executive branch, is

always challenging. It has required adjustment to a new administration and an understanding approach to revised policies and new programs. Speaking in behalf of the committee membership, I believe we have met this challenge with responsibility and hard work.

The committee considered and reported its funding authorization measures prior to the budget deadline. We have worked very closely with the administration in meeting the President's revised budget cuts. Our foreign assistance authorizing legislation for development and security programs is now on its way to the President. In addition, the authorizations for the State Department and related agencies, Arms Control and Disarmament Agency, Export Administration, Overseas Private Investment Corporation, International Investment Survey, have all been approved by the House. With the exception of the State and Arms Control and Disarmament Amendments Act, all have been, or shortly will be, signed into law.

Further accomplishments of the committee include the legislation authorizing U.S. participation in the multinational force and observers to implement the treaty of peace between Egypt and Israel; hearings on nuclear proliferation, the Czechoslovakian claims settlement legislation, and the provisions of the foreign aid authorizing legislation to establish the Peace Corps as an independent agency.

Members and staff have undertaken a number of important study missions pursuant to the Foreign Affairs Committee's legislative and oversight responsibilities, and have issued reports which are available to the public.

Because of substantial reductions made in its funding requests for 1981, the committee was forced to curtail many of its normal activities which impact heavily on the committee's operational costs. Nevertheless, we set an impressive record during the year measured statistically as follows:

We had 62 official meetings of the full committee and 204 meetings of the subcommittees, for a grand total of 266 hearings, markups, and briefings.

We had 58 informal meetings of the full committee and 36 informal meetings of the subcommittees.

We received and held discussions with a total of 103 distinguished foreign visitors and 22 delegations, including heads of state and government, foreign ministers, and opposition leaders. A listing of these visitors and delegations follows these remarks.

We heard 585 witnesses in full or subcommittee meetings.

We had 11 bills and joint resolutions passed by the House; 20 House resolutions and concurrent resolutions passed the House.

We had four measures signed into law, with four additional measures on their way to the President.

We had 13 House reports, 35 hearings, and 40 committee prints published for the information of Congress and the public.

Another important area is the committee's participation in interparliamentary meetings with Canada and Mexico, the Conference on Security and Cooperation in Europe, the North Atlantic Assembly, and the European Parliament.

Mr. Speaker, this impressive record would not have been possible without the teamwork, diligence, and loyalty shown by all members of the committee and our very able staff. I am particularly proud of the proven ability to deal with foreign affairs issues in a bipartisan way.

DELEGATIONS RECEIVED, 1981

Atlantic Council, informal meeting with members of the full committee, July 8, 1981.

Brazil, Congressional Delegations from, informal meeting with members of full committee, February 4, 1981.

China, Delegation from the People's Consultative Conference, informal meeting with SubAPA, November 5, 1981.

El Salvador, a Delegation of Representatives from the Private Business Sector, informal meeting with Chairman Zablocki and members of SubIAA, February 4, 1981.

El Salvador, a Delegation of Trade Union Representatives, informal meeting with members of SubIAA, March 3, 1981.

European Liberal delegation, headed by Lord Banks, informal meeting with members of full committee, December 10, 1981.

European Parliament, delegation from, led by Chairman Eva Wilhelmsson Gredal of Denmark, informal meeting with members of full committee, May 19, 1981.

Finland, a Delegation from the Finnish Foreign Affairs Committee, led by Honorable Kalevi Sorsa, informal meeting with members of full committee, November 2, 1981.

Germany, members of the Subcommittee on Arms Control and Disarmament of the Federal German Parliament, informal meeting with members of full committee, September 24, 1981.

Great Britain, All-Party Group of British Members of Parliament, informal meeting with members of full committee, February 3, 1981.

Great Britain, a Delegation of members from the British Cabinet, led by Sir Ian Gilmour, Lord Privy Seal, information meeting with Chairman Zablocki and members of SubEME, June 15, 1981.

Great Britain, a Delegation from the British Parliamentary Select Committee on Foreign Affairs of the House of Commons, informal meeting with members of full committee, October 29, 1981.

Ireland, General Synod of the Church of, a Delegation from, led by the Rt. Reverend Dr. Robert Eames, informal meeting with members of full committee, April 1, 1981.

Ireland, Delegation of nine Presbyterian Clergymen from Northern Ireland, led by the Very Reverend Dr. A. J. Weir of Belfast, informal meeting with members of full committee, May 6, 1981.

Israel, a delegation from the Knesset, led by the Chairman of the Foreign Relations and Defense Committee, the Honorable Moshe Arens, informal meeting with members of SubEME, November 16, 1981.

Japanese Diet, group of dignitaries, led by Congressmen Uno and Watsanaski, informal meeting with Chairman Zablocki, June 24, 1981.

Japanese House of Representatives, delegation from, led by Honorable Haruo Okada, Vice Speaker, informal meeting with Chairman Zablocki, July 8, 1981.

Korea, a Delegation from the National Assembly, led by His Excellency Jung Nae-Hiuk, Speaker, informal meeting with members of full committee, July 22, 1981.

Morocco, a Delegation of Parliamentarians from NATO countries, informal meeting with members of SubEME and staff, August 7, 1981.

NATO, a Delegation of Parliamentarians from NATO countries, informal meeting with members of SubEME, March 24, 1981.

Nigeria, a Delegation from the Joint Agricultural Consultative Committee (UACC), informal meeting of members of SubAf, September 22, 1981.

Zambia, Republic of, Parliamentary Delegation from, informal meeting with members of SubAf, May 21, 1981.

DISTINGUISHED VISITORS RECEIVED BY COMMITTEE, 1981

Al-Sadat, His Excellency Mohamed Anwar, President of the Arab Republic of Egypt. Reception with membership of House of Representatives, Aug. 6, 1981.

Alvarez, Hon. Luis Alberto Monge, candidate of the National Liberation Party for President of Costa Rica, and former President of the Costa Rican Legislative Assembly, informal meeting with members of SubIAA, May 28, 1981.

Andrei, Mirceau, Office of the Ministry of Foreign Affairs, Romania, informal meeting with members of full committee, May 15, 1981.

Andrei, Hon. Stefan, Minister of Foreign Affairs, Romania, informal meeting with members of full committee, May 15, 1981.

Andreotti, Hon. Giulio, former Prime Minister of Italy and present Chairman of Foreign Relations Committee in Chamber of Deputies, informal meeting with members of full committee, September 11, 1981.

Arens, Hon. Moshe, Chairman of the Foreign Affairs and Defense Committee, Israeli Knesset, informal meeting with members of full committee, May 19, November 16, 1981.

Aridor, The Honorable Yoram, The Israeli Minister of Finance, informal meeting with members of full committee, September 23, 1981.

Arlow, Reverend Canon William, Canon Residentiary at Belfast Cathedral and Member of the Irish School of Ecumenics, informal meeting with members of full committee, April 1, 1981.

Banks, Lord, British Liberal Party, informal meeting with members of full committee, December 10, 1981.

Bayulken, His Excellency Haluj, Defense Minister of Turkey, informal meeting with members of SubEME, June 11, 1981.

Begin, His Excellency Menachem, Prime Minister of Israel, Reception with members of full committee and House leadership, September 10, 1981.

Belinati, Hon. Waldmire, Member, Brazilian Social Democratic Party and Chairman of the Foreign Relations Committee, informal meeting with members of full committee, February 4, 1981.

Bird, David, Member of the General Synod and a Church of Ireland representative on the Irish Council of Churches, infor-

mal meeting with members of full committee, April 1, 1981.

Bogdan, Hon. Corneliu, Director of U.S. Affairs, Ministry of Foreign Affairs, and former Ambassador to the United States, informal meeting with members of full committee, May 15, 1981.

Boucetta, His Excellency M'Hamed, Minister of Foreign Affairs, Morocco, informal meeting with members of full committee, May 11, 1981.

Bueno, Hon. Armando Sanchez, President, Venezuelan Chamber of Deputies, informal meeting with members of SubIAA, March 16, 1981.

Bustillos, His Excellency Gonzalo Garcia, Minister of the Secretariat General of the Presidency, Venezuela, informal meeting with members of full committee, May 20, 1981.

Camilion, Hon. Oscar Hector, Minister of Foreign Affairs of Argentina, informal meeting with members of full committee, September 30, 1981.

Carlos, His Majesty King Carlos I, King of Spain. Luncheon meeting with members of full committee and House and Senate leadership, October 14, 1981.

Carrington, Rt. Hon. the Lord, Foreign Minister, Great Britain, informal meeting with members of full committee and House leadership, February 26; informal meeting with Chairman Zablocki, July 17, 1981.

Cenak, His Excellency Winston, Prime Minister of Saint Lucia, informal meeting with members of SubIAA, June 24, 1981.

Charles, Her Excellency Mary Eugenia, Prime Minister of Dominica, informal meeting with members of SubIAA, June 24, 1981.

Chipwaya, Hon. S., Member of Parliament, Republic of Zambia, informal meeting with members of SubAf, May 21, 1981.

Chisuta, Heartcold, Chargé d'Affaires, Embassy of the Republic of Zambia, informal meeting with members of SubAf, May 21, 1981.

Chun, His Excellency Doo Hwan, President of the Republic of Korea, informal meeting with members of full committee, February 2, 1981.

Colombo, His Excellency Emilio, Foreign Minister of Italy, informal meeting with members of full committee, February 11, 1981.

Concannon, Hon. Don, former Assistant Government Whip and Opposition Whip; and former Parliamentary Under Secretary of State for Northern Ireland and Minister of State, Northern Ireland Office, informal meeting with members of full committee, February 3, 1981.

Debre, Hon. Michel, French Member of Parliament and Prime Minister of France from 1959-1962, informal meeting with members of full committee, January 30, 1981.

De Oca, His Excellency Rafael Montes, Minister of the Interior, Venezuela, informal meeting with members of full committee, May 20, 1981.

Der Stoel, van, Hon. Max, Member of the Dutch Parliament and Chairman of the Subcommittee on the Southern Region of the North Atlantic Assembly, informal meeting with members of SubEME, March 24, 1981.

de Mel, the Honorable Ronnie, Minister of Finance of Sri Lanka, informal meeting with members of full committee, September 28, 1981.

Duarte, President Jose Napoleon, President of El Salvador, informal meeting with members of full committee, September 22, 1981.

Eames, Rt. Reverend Dr. Robert, General Synod of the Church of Ireland, informal meeting with members of full committee, April 1, 1981.

Furtado, Hon. Hector De Alencar, Member, Brazilian Democratic Party, informal meeting with members of full committee, February 4, 1981.

Garcia, Col. Jose Guillermo Merino, Minister of Defense and Public Security of El Salvador, informal meeting with members of SubIAA, November 10, 1981.

Genscher, Hon. Hans Dietrick, Minister of Foreign Affairs, Germany, informal meeting with members of full committee, March 10, 1981.

Ghazala, Hon. Abd Al-Halim, Minister of Defense and War Production, Egypt, informal meeting with members of SubEME, April 28, 1981.

Gomez, Hon. Victor, Senator from the Dominican Republic, informal meeting with members of SubIAA, March 26, 1981.

Gontikas, Hon. Constantin, Member of the Greek Parliament, informal meeting with members of SubEME, March 24, 1981.

Gredal, Hon. Madam Eva Wilhelmsson, Chairman, European Parliamentary Delegation to the United States, informal meeting with members of full committee, March 18; May 19, 1981.

Habib, Gabriel, general secretary of Middle East Council of Churches, Lebanon, informal meeting with members of SubEME, June 25, 1981.

Hartling, Hon. Poul, former Prime Minister of Denmark, and currently U.N. High Commissioner for Refugees, informal meeting with members of SubHRIOrg, May 14, 1981.

Hopkins, Hon. Leonard, Member of the Canadian Parliament, informal meeting with members of SubEME, March 24, 1981.

Viola, His Excellency Roberto Eduardo, President-designate of Argentina, informal meeting with members of full committee, March 17, 1981.

von Seizsaecker, H. E., The Lord Mayor of Berlin, informal meeting with members of full committee, September 16, 1981.

Weir, Very Reverend Dr. A. J. of Belfast, Chairman of the Roman Catholic/Protestant Study Group and Member of the Irish Council of Churches, informal meeting with members of full committee, May 6, 1981.

ALLOWING GEORGE WASHINGTON UNIVERSITY HIGHER EDUCATION FACILITIES REVENUE BOND ACT TO TAKE IMMEDIATE EFFECT

Mr. BARNES. Mr. Speaker. I ask unanimous consent for the immediate consideration of the bill (H.R. 5273) to allow the George Washington University Higher Education Facilities Revenue Bond Act of 1981 of the District of Columbia to take effect immediately.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

Mr. PARRIS. Mr. Speaker, reserving the right to object, I reserve the right to object to inquire of the gentleman from Maryland just what this legislation does.

Mr. BARNES. Mr. Speaker, will the gentleman yield?

Mr. PARRIS. I yield to the gentleman from Maryland.

Mr. BARNES. I am delighted to see the gentleman. I have been trying to find the gentleman. I talked with the minority leadership on our committee but could not find the gentleman from Virginia to discuss this legislation.

Very briefly, the city government enacted—floated a $30 million bond issue and is loaning the money to George Washington University for the purpose of building educational facilities at George Washington University. There is no controversy with respect to this bond program but it came up already, as the gentleman knows, for 30 legislative days to give us an opportunity to review it.

There has been no controversy: no objections have been raised.

Unfortunately, tomorrow is the 30th day. If we require that it lay over 1 more day it will cost George Washington University $200,000 in extra interest and payments between now and the 25th of January when we come back.

I have checked with the minority leadership; I have checked with our leadership on this side. I have found no objection.

I did try to locate the gentleman from Virginia but he was not in his office earlier when I called. I would hope the gentleman would not object. This is going to save George Washington University $200,000 if we waive the 30-day requirement.

Mr. PARRIS. I appreciate the gentleman's explanation of the legislation.

I would say to the gentleman I am afraid his eyesight is failing. I have been in the Chamber for over 4 hours. Somehow our paths did not cross.

Further reserving the right to object, Mr. Speaker, my only serious reservation about this measure, I would say to the gentleman, is that it seems we are or may be establishing an extremely dangerous precedent in reducing the statutory layover period for this kind of request.

With that observation to the gentleman, I trust this action would not be considered a precedent in the future for these purposes. But in this holiday season and for the benefit of an institution that I once attended, I will not object and withdraw my objection.

Mr. BARNES. I want to thank the gentleman very much. Let me comment on the gentleman's statement. I share the gentleman's concern about the opportunity for Congress to review these kinds of matters.

In this instance, since there is no objection from anybody to what is sought here, the university building these buildings, I am particularly grateful to the gentleman for not objecting.

Mr. PARRIS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 602(c)(1) of the District of Columbia Self-Government and Governmental Reorganization Act shall not apply to the George Washington University Higher Education Facilities Revenue Bond Act of 1981 (District of Columbia act 4-104) passed by the Council of the District of Columbia on October 27, 1981, and signed by the Mayor of the District of Columbia on October 30, 1981, and such District of Columbia act shall become law on the date of the enactment of this Act, notwithstanding section 404(e) of the District of Columbia Self-Government and Governmental Reorganization Act and any provision to the contrary in such District of Columbia act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ELECTION OF MEMBERS TO CERTAIN STANDING COMMITTEES OF THE HOUSE

Mr. LONG of Louisiana. Mr. Speaker, as chairman of the Democratic Caucus and at the direction of that caucus, I send to the desk a privileged resolution (H. Res. 306) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 306

Resolved, That the following-named Members be, and they are hereby, elected to the following standing committees of the House of Representatives:

Committee on Agriculture: Donald Joseph Albosta, Michigan.

Committee on Merchant Marine and Fisheries: Joseph F. Smith, Pennsylvania.

Committee on Public Works and Transportation: Wayne Dowdy, Mississippi, to rank twenty-sixth thereon.

Committee on Veterans' Affairs: Wayne Dowdy, Mississippi, to rank fifteenth thereon.

The resolution was agreed to.

A motion to reconsider was laid on the table.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONFERENCE ON S. 884, AGRICULTURE AND FOOD ACT OF 1981

Mr. LONG of Louisiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 303 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 303

Resolved, That upon the adoption of this resolution it shall be in order to consider the conference report on the bill (S. 884) to revise and extend programs to provide price supports and production incentives for farmers to assure an abundance of food and fiber, and for other purposes, and all points of order against said conference report for failure to comply with the provisions of clause 3, rule XXVIII are hereby waived.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. LONG) is recognized for 1 hour.

Mr. LONG of Louisiana. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 303 provides for the consideration of the conference report on the bill S. 884, the Agriculture and Food Act of 1981. This legislation would revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

There is no special provision for debate in this rule. Conference reports are debated in the House under the "hour rule." The Committee on Rules determined that the 2 hours provided on the subject of this conference report—1 hour on the rule, and 1 hour on the conference report—would provide adequate opportunity for full discussion of the issues.

The rule would waive all points of order against the conference report for failure to comply with clause 3 of rule XXVIII (28), which limits the contents of a conference report to the scope of the differences between the two Houses. The chairman of the Committee on Agriculture, Mr. DE LA GARZA, testified in the Committee on Rules that this waiver is necessary for two principal reasons.

Section 1122 of the report concerning inspection and other standards for imported meat products falls outside the scope of the conference. The controversy surrounding this provision made it impossible for the conferees to reach agreement within the scope of the conference. Chairman DE LA GARZA informed the committee that the provision agreed to in conference differs technically from the provisions of the House and Senate bills but includes the basic intent of those provisions to fully protect the health of consumers in the United States.

The report bars any imported meat that does not meet standards for inspection, sanitary quality, species verification, and residue standards applied to products in the United States from entry into the United States. The Secretary is required to enforce this provision through (1) the imposition of random inspections, and (2) random sampling and testing at the foreign slaughterhouse. The provisions become effective 6 months after enactment.

The second area of the conference report requiring a scope waiver is title VII, the peanut program. Chairman DE LA GARZA described the conference compromise as involving numerous complex provisions, some relating to program administration and others relating to more substantive matters.

The conference report eliminates the traditional peanut acreage allotment system, allowing producers without allotments to grow peanuts without restraint, but retains the farm poundage quota system. The total national poundage quota would be reduced in 1982 and dropped further over the next 3 crop years. The Secretary would be directed to apply quota cuts, as far as practicable, to quota holders who have not produced peanuts in recent years. Price support for quota peanuts grown within the farm poundage quota would be set at a minimum of $550 per ton for 1982 through 1985, with annual increases beginning in 1983 to reflect increases in production costs, with a limit on such annual adjustments of 6 percent. Support for nonquota peanuts would be set by the Secretary on the basis of world market conditions and fixed at a rate which would avoid any net cost to the Government.

Mr. Speaker, the conference on this vital legislation was long and particularly difficult. The issues involved are confusing because both consumers and producers are suffering mightily at the hand of inflation and economic hardship.

The conference report provides for the 4-year extension of our commodity programs. It authorizes appropriations for the food stamp program for 1 fiscal year with a spending cap of $11.3 billion in fiscal year 1982. The bill also extends Farmers Home Administration authority for the economic emergency loan program for 1 year. The legislation provides support for research, extension, and teaching aimed at continued gains in agriculture productivity. It authorizes much needed aid to predominantly black land grant colleges. In addition a new program is authorized to identify geographic areas suffering special chronic erosion problems and to target financial assistance to those areas, as well as to provide matching grants to local governments for conservation. The bill also extends the food for peace program. It provides new protection for farmers against future export embargoes and new authority for an agricultural export credit revolving fund. The cost of the commodity programs during the 4 crop years covered by the conference report is estimated at $11.05 billion, a large decrease over the original House legislation which was estimated to cost $16.62 billion.

This rule on the conference report is relatively noncontroversial. Some testimony was heard in the Rules Committee about the desire to have separate votes on various aspects of the conference report—such as on the sugar program and the peanut program. But no strenuous effort to defeat past precedent and vote on separate programs was made.

Conference reports are acted on as a whole—they stand or fall as a unit. The other body last week adopted the conference report on the bill, and the conferees have therefore been discharged. It is unlikely that any new conference would result in a rapid meeting of minds. Failure to enact this 4-year authorization bill would mean that farm programs would lapse or be administered under archaic permanent authority. New legislation would have to be written under perhaps even more difficult budgetary and political constraints than those currently prevailing.

Mr. Speaker, our long-term national security will founder if we do not strengthen the health of American agriculture. Our national prosperity and economic vitality have been fostered by the efficiency of American farmers and the tremendous volume of com-

modity exports generated. The farm bill is among the most important legislation we will consider in the 97th Congress.

I urge the adoption of the rule providing for the consideration of the conference report.

□ 1900

Mr. LATTA. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. Mr. Speaker, let me begin by thanking the distinguished ranking Member for yielding me this time.

Mr. Speaker, I rise in strong opposition to the conference report on the 1981 farm bill and urge my colleagues to vote against it. Clearly, the report is an overreaction to the temporary rise in the cost of some of the commodity programs in this time of fiscal austerity.

As such, the conference report is based on budget policy rather than sound farm policy. The result is a bad bill. In fact, there are many, many things wrong with this bill. Time constraints permit me only to highlight the worst parts of the legislation.

The dairy provisions of the report are particularly bad. Actions taken earlier this year together with the cuts already made in the House version of the farm bill reduced $948 million in outlays from the dairy price support program before the bill ever got to the conference committee. That is half of the total outlays for the program in fiscal year 1981.

That was not good enough for the conferees, however. Instead of maintaining the support level at 72.5 percent and 75 percent of parity in fiscal years 1983, 1984, and 1985 as provided in H.R. 3603, the conferees chose language that will result in a support price of $13.25 in fiscal year 1983, $14 in fiscal year 1984, and $14.60 in fiscal year 1985. The current support price of $13.10 per hundredweight for 3.67 butterfat milk will be maintained during the current fiscal year.

As such, on October 1, 1982 the support price of milk will increase by only 15 cents. In simple terms, that means that from October 1, 1980 through October 1, 1983, the farmer will only get a 15 cents per hundredweight increase in the price he receives for his product. That's only a 1½-percent increase in 3 years. Yet, at the same time, his costs of production have been increasing as much as 28 percent per year.

Mr. Speaker, that's just plain unreasonable.

As you know, the House version of the farm bill provided for 75 percent of parity after the current fiscal year. The support prices contained in the conference report will result in maximum support levels of 67 percent of parity in fiscal year 1983, 64 percent of parity in fiscal year 1984, and 61 percent of parity in fiscal year 1985.

These calculations assume a rate of inflation of 9 percent. Some economic analysts who are more pessimistic about the future of our economy suggest that a support price of $14.60 in fiscal year 1985 may, in fact, result in a support level as low as 55 percent of parity.

Mr. Speaker, these figures are, of course, the measuring stick that we use here in Congress for the dairy price support program. I feel that it is important that they be translated into dollars so this body can actually see the losses the average Wisconsin dairy farmer will be facing in the upcoming fiscal years as a result of this conference report.

Dr. Robert Cropp, associate professor of economics at the University of Wisconsin-Platteville, has calculated that the average Wisconsin dairy farmer who milks 38 cows and produces about 510,000 gallons of milk annually will suffer the following losses in annual gross income resulting from the adoption of the conference report rather than the dairy provisions in the House version of the farm bill: $9,300 in fiscal year 1983, $14,300 in fiscal year 1984, and $19,900 in fiscal year 1985.

Clearly, this will be an economic death blow to many small family farms in Wisconsin. And 5 years from now when we see dairy product shortages and soaring prices, Members of this House will be taking the well to say, "Were the limited savings we achieved in the conference report really worth the economic chaos that we are now going through in the agricultural community?"

However, the dairy provisions of the conference report are not the only bad part of the 1981 farm bill. In fact, one really does not have to look too far to find another major provision that is simply misguided farm policy—the loan rates and target prices for the feed grains. Simply stated, they are too low.

Mr. Speaker, the market price for feed grains is already depressed. The conference provisions do nothing to remedy this problem. Grain farmers have their backs up against the wall and, unless something is done soon, many of them will also be forced out of business.

I was particularly moved by the last segment of the "NBC Nightly News" last night that highlighted the problems faced by a grain farmer in Alabama. Despite the fact that he is losing money on this year's crop, he is going to hang in there again next year because of his commitment to farming and "the land." When asked how long he could last, he said that he would farm until all of his ribs showed. He then remarked that he was beginning to be able to count them.

The low-loan rates and target prices not only impact on grain farmers, but on dairy farmers as well. As the USDA's Outlook and Situation Summary of December 8, 1981 for dairy so correctly pointed out, so long as the price of feed grains remains depressed, dairy farmers will continue to feed more to their cows, thus creating increased milk production. Obviously, the more milk that is produced, the more milk the Federal Government will have to purchase through the Commodity Credit Corporation unless consumption rises proportionally.

This goes to prove what I have consistently said all year—that there are factors other than the dairy price support program that have caused the current imbalance in supply and demand for dairy products. The conference report does nothing to remedy these problems and, if anything, only aggravates them.

There is little doubt that virtually every Wisconsin farmer will be caught in a price squeeze resulting from the provisions of the conference report on the various commodities. At the same time, there is little provision for limited resource farmers in terms of ownership and operation loans. Where will our young and beginning farmers turn in this price squeeze?

Mr. Speaker, I fear that many fine young and beginning farmers are going to be forced out of business as a result of this conference report. This is particularly troublesome to the Wisconsin dairy community where the average age of the dairy farmer is still in the neighborhood of 55 years old. When older farmers retire in a few years, who will replace them? If we cannot replace them at that time, what will happen to the supply and the price of dairy products? Clearly, more than the conference provisions on the commodity programs will affect the future prices that consumers will pay for agricultural products.

Finally, I am concerned about the apparent lack of support shown in the conference report for conservation programs. The report shows a 3.9-percent reduction in funding for Federal conservation efforts over the fiscal year 1981 funding levels. This is very troublesome to me.

Mr. Speaker, as you know, virtually all soil and water conservation efforts in our country are voluntary. There is little compensation paid to the wise farmer who employs sound conservation techniques. In a time of soaring costs of production, the average farmer will not be able to afford to practice conservation if he is going to come anywhere close to keeping his head above water financially.

Needless to say, this is a disasterous situation, particularly in light of the fact that 60 percent of the Nation's cropland is in need of conservation

measures. The most recent figures suggest a soil erosion rate of 5 tons of topsoil per acre per year. How long can we keep this erosion rate up and expect to keep up our current levels of production?

In short, the long-term implications of the conference report are that the structure of American agriculture, as we now know it, will be drastically changed. The family farm will be a thing of the past. America's once rich croplands will be, in large part, wastelands. Consumer prices will skyrocket as product shortfalls occur. It's not a pretty picture.

In conclusion, Mr. Speaker, I have never said that the dairy industry does not have a problem of overproduction currently. Nor have I justified expenditures on the program that exceed $1 billion. However, the solution to these problems do not have to destroy family agriculture as we have known it.

This may be the last item before us on the last day of this session. However, if we adopt the conference report before us, it will be the end for far too many family farmers—especially the young ones.

I do not know of a single Member of this body that took their oath of office last January without the concurrent commitment to make America better for the future. If this is still your goal, then I ask you to vote against this conference report. Through options such as quotas, payment limitations, and multi-tier parity we can meet the budget and production goals of the Department of Agriculture and still preserve the family farm.

Is the historical structure of our family farms and rural institutions valuable enough to us for us to try to save them? If you believe it is, vote no on the conference report and give us a chance to come back to the House next year with a proposal that meets all of the budgetary concerns and, at the same time, preserves the future of our great country.

Mr. LONG of Louisiana. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Iowa (Mr. SMITH).

Mr. SMITH of Iowa. Mr. Speaker, for 2 days now we have been rushing Christmas presents through here for about everybody, but now we come with a bummer of a bill for the farmers, the last thing on the agenda.

The farm economy in this country is in really bad shape. There is not any question about it. Tractor companies are going broke. International Harvester has to reorganize within a week and find $4½ billion to do it with and other machinery companies and suppliers have had big layoffs. Four percent of the people in this country that farm use 15 percent of the manufactured goods to produce more than two-thirds of all the new wealth.

When those 4 percent are affected the way they are right now, we cannot help but have reduced employment, more layoffs and affect their whole economy.

So this is no time to reduce protection.

Now, some are going to say, "Well, then, why do so many support the bill?" The chairman of the House committee put out a list of supporters. I want my colleagues to take a look at the list. The first two pages are people who own sugar. The other page lists such farmers as the California State florists, the California chrysanthemum growers, Colorado greenhouse growers, Florida ornamental growers, Hawaii Bankers Association. Where are the real farmers?

Now it seems to me rather strange that in this bill, they have treated the commodities in reverse order to their importance. I say that for this reason.

The sugar people seem to be about the only people who are satisfied. Do my colleagues know how many there are in the whole United States who make $2,500 or more growing beets or cane? There are 4,200 in the whole United States.

There are more candy manufacturers in the United States than there are sugar producers.

There are 307,000 feed grain growers, 195,000 soybean growers, 76,000 wheat growers. One hundred and forty-three thousand raise tobacco or make most of their money out of raising tobacco, but only 4,200 are in the sugar business.

So that is who we treated well in this, and as far as measuring importance of the crop by their value of their product, it is ever a worse comparison. The value of feed grains is $23 billion, of soybeans $14 billion, of wheat $8.2 billion, peanuts only $800 million and sugar less than $1 billion. The benefited commodities are relatively a sliver group.

There are 71 times as many feed grain growers as there are sugar growers and the value of their product is 23 times as great. As a matter of fact, I represent more farmers in the district than there are sugar growers in the whole United States.

Well now the administration tactic as Stockman said in the Atlantic article was divide and conquer and that is what they have done. They are dividing us up here and the splinter farm commodity group is satisfied and helping stick a knife in the back of principal commodities.

Now somebody is going to go up here and say, "Well, we have a clause in here that helps take care of embargoes and eveybody is worried about embargoes right now." Let me tell this. The embargo clause is a complete farce. If they embargo lead pencils at the same time or do not have a general embargo at the same time as farm commodities are embargoed, it does not apply. There is certainly going to be some kind of strategic material embargoed in the same embargo. It does not mean a thing, the embargo clause does not.

As far as embargo is concerned, just talking about it ought to encourage the Soviets, it will help them because whenever the grains are embargoed, gold prices go up and the grain price goes down, and that means then they can go on a world market and buy more than ever with the same amount of gold like they did corn during the last embargo, four times as much for their gold as they did before. Embargoes help Russia.

Food stamps have been mentioned here. Let me clear that up. In the conference report on appropriations, food stamps were both authorized and appropriated for 1982. This bill is not needed. However, it drops the authorization after 1 year and the authority will expire when the commodities do not expire. That makes food stamps vulnerable by themselves.

I have a number of subjects I would like to cover, but food stamps are covered completely in the conference report. This is not going to do a solitary thing for food stamps. This is the first time since 1962 that I have voted against a farm bill. I do it hesitatingly and only after great deliberation.

I voted against the mandatory allotment for corn and helped defeat that bill and I am glad I did. But this is a bad bill. This is a bummer of a bill. We are worse off than with no bill. We have a $2.73 loan rate, for example, on corn if we do not have a bill, and under this bill, $2.55. We need just a loan and reserve programs will help them to facilitate their marketing. That is what we need instead of target prices and deficiency payments, but this bill permits the adminstration to eliminate those programs by setting up participation set-aside requirements farmers cannot meet. This is not a market oriented bill. We need a market oriented bill. But this is not the kind of bill we should be passing at this time and I certainly urge everyone to defeat this bill.

Mr. LATTA. Mr. Speaker, I yield 5 minutes to the gentleman from South Dakota (Mr. ROBERTS).

Mr. ROBERTS of South Dakota. Mr. Speaker, I rise in opposition to the rule. Under this rule, the House will be considering the conference report on the Agriculture and Food Act of 1981. As a farmer and rancher, former State Secretary of Agriculture and member of the House Agriculture Committee, I would like to say that I am very disturbed and concerned with what we are being asked to accept as our agricultural policy for the next 4 years.

You will hear that the measure is a compromise and the best we are likely to get—that it is better than nothing. I tell you that is exactly what many farmers and ranchers will have left if we adopt this rule and the conference report in its present form—nothing.

In fact, for far too long farmers and ranchers have had to exist on less than nothing, and this Congress seems determined to have that trend continue by coming up with a farm bill which again falls far short of the costs of production for our family farmers.

For those of you who will argue that we should not be subsidizing the Nation's farmers and would support the compromise farm bill because you feel it is good for the consumer, I have brought with me today a small number of grocery items to illustrate exactly what return the producer receives for his labor. I hope that no one will object to my use of these items to make my point.

Here I have the ingredients of a typical meal for a family of four. This pound of hamburger cost $1.89 at the store. The price that the beef producer received for this meat amounted to 60 cents.

This carton of milk cost 67 cents, yet the dairy farmer received only 28 cents for the product in this carton.

These french fried potatoes cost 69 cents. The potato farmer received a mere 6 cents for his product.

And this package of hamburger buns cost 35 cents. But the wheat farmer, like myself, received only 2 cents for the wheat that was used to make these buns.

Now I ask you, who is subsidizing whom? We are not subsidizing agriculture in this farm bill. It is the farmers who subsidize us—by providing their farm products at less than the cost of production.

Now we farmers recognize that it is a long way from the land to your table, but I hope that you recognize the role that our product plays in producing many jobs across this land, from the processing, shipping and packaging to the final sacking at the checkout counter. We don't wish to take away the job opportunities that agriculture provides. However, it somehow does not seem fair that the starting wage for a checkout ckerk at your local grocery store in this area is over $5 per hour while the producer of these agrucultural products is operating at a loss.

Mr. Speaker, if we maintain the current cheap food policy, I can guarantee you, as a farmer, that we will see the destruction of the family farm. If we destroy the family farm, the abundance of reasonably priced food products that consumers now enjoy, as evidenced by these products, will soon be gone.

The only request of these family farmers is a fair return. When that fair return is gone, as it very nearly is, than those family farmers will lose the incentive and opportunity to produce. And we will all suffer as a result.

I want to stress to my colleagues just how important agriculture is to this country—not only the job opportunities I mentioned earlier, but also for how dependent main street is on a healthy agricultural economy.

If Agriculture is strong, America is strong. We are not only hurting the acricultural community with this farm bill, we are hurting America.

I urge you to vote against the rule.

Mr. ROBERTS of Kansas. Mr. Speaker, will the gentleman yield?

Mr. ROBERTS of South Dakota. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. As the gentleman knows, I am undecided on this farm bill. I want to commend the gentleman for pointing out what the share is of the disposable income dollar that the farmer receives for all of these products.

I would point out I can see that bread wrapper sticking out of the box there, and the cost of that bread wrapper cost the consumer more than the farmer receives for the bread. I think we ought to wear that as an arm band of mourning for the farmer and I commend the gentleman for his comments and wish to associate myself with his point.

Mr. LONG of Louisiana. Mr. Speaker, I yield 4 minutes to the gentleman from New York (Mr. PEYSER).

Mr. PEYSER. Mr. Speaker, this is the last but certainly not the least item that this Congress is going to take up this year and I do rise in support of the rule. But not the bill.

Even though I had requested additional time, I certainly support the rule.

But I think it is a very unusual situation we are faced with today and I wonder, Mr. Speaker, if the gentleman can remember when we have had the Consumer Federation, Congress Watch, Community Nutrition Institute on the same side of an issue as the National Farmers Grange, the National Farmers Union, and the National Federation of Milk Producers. They are all on the same side. They say defeat this bill because it is a bad bill.

From the House point of view it could not be worse. The House expressed itself on a farm bill and it expressed itself in one sense. It said, "We do not want a sugar program." The House has defeated a sugar program three times in the last 7 years. What do we have in this bill? We have a sugar program.

The House conferees fought to get it back in. What did they sacrifice? They really sacrificed a penny. It has nothing to do with the facts of the implication of what this is going to cost consumers in this country. I received figures today from the Agriculture Department. They estimate the beet sugar producers next year have increased and will be increasing their production 14 percent. The cane sugar producers, 9 percent. Does that sound like an industry in trouble? It certainly does not to me.

□ 1910

It is an industry that for the last several years has literally been cleaning up.

Now, we have got a food stamp situation. You will hear a lot about food stamps. The truth is that the net result of this bill is that we are going to have a food stamp program on this floor standing on its own feet next September and you can imagine, those who are interested in food stamps, what is going to happen to that bill on this floor and in the other body that has a particular interest in it.

Now, also you will be faced with the statement that we have no alternative. What is going to happen, you know, if you defeat the conference we will go back to the 1949 bill, and the 1949 bill is made out to be absolute disaster.

That truth is that we do not have to go back to the 1949 bill. There is a bill in right here, and if we defeat this conference report, I will seek recognition from the Chair so that H.R. 5210, which is a simple 3-month extension going to March 31 of 1982, that we can pass it by a voice vote, if you want. It has already been introduced in the Senate and we can be out of here and the Agriculture Committee will have another 3 months to do somethng that is really worthwhile in reflecting the point of view of this House better than they have in this bill.

In closing, I would just like to say this. This is a bill that the consumers and the farmers do not want. The issue is plain. The issue is that we have a bill and I am up here probably for the first time in defense of some of the farm situations.

I sat and listened in that conference, even though I was a limited conferee, and I heard what was happening. I know what happened on sugar. I know what happened on peanuts, which you will hear more about I am sure; but all the things we knocked out came right back in.

So I ask you, please defeat this bill and go with the 3 months' extension.

Mr. LATTA. Mr. Speaker, I yield 3 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Speaker, I am not going to talk against the rule, although I wish they had made it so we had 2 hours to get into more depth on a most critical bill. There is not much time really to argue on these very important issues that are in this act; but there are some things that I would like to take the time to clear up.

The gentleman before me spoke about the 1949 act, they say if we put

down this report the 1949 act will come in and this will be a disaster. That is being used as a big reason to vote for it. This is the Christmas season. We do not want to disturb the holiday, and if you do not vote for this bill, all sorts of horrors will come about. That is not true.

We have not been operating on a farm bill since October 1 of this year. We have been operating on temporary bills to prevent some of the small difficulties created by the 1949 act in the timeframe we are discussing. We can easily extend again until March 31. The food stamp bill will go through to March 31, with no problem. It is in the continuing resolution.

In fact there are not going to be any great difficulties if we do not do anything. There are not going to be any farmers out planting wheat and corn or whatever it is in January. There is no problem there. Do not be scared by that.

Why should we turn this farm bill down? I will tell you why, because it is an insult to this House. It is an insult to what this House did. We went away with a reasonable farm bill by substantial margins. In some of the areas that we worked hard on, which had big votes in favor of the bill that we thought we passed, those have been destroyed. I am talking about the dairy provisions. I am talking about the wheat and feed grain provisions. On dairy, we went out with a very modest proposal for 1981 through 1983 with 4 percent, a 1-percent increase is what we ended up with. We asked for 4 percent. We did not ask for much, but it is the difference between survivial and failure for most of our farmers.

We asked that we do not start a new program at this time, with our fiscal austerity. We have cut all the others down. The conferee's started with a sugar program which the U.S. Cane Sugar Refineries Association says will increase the price of sugar by around 20 percent immediately.

But the one that is really something is the one on peanuts, I mean, if you see what we did to peanuts. Take the House vote on doing away with the program overwhelming. We came back with the program, that is bad enough. But do you know what they get in the first 3 years? Thirty-three percent increase; 33 percent. You know, I would love to be an opponent of you that are going to vote for this thing having first voted to do away with it. Ask your consumers your housewives what they think about the price of peanut butter and say, "Well, I voted to increase that program by 33 percent."

I will tell you, I saw all those peanuts in the lobby. There are bags of them out there. They should have been gold peanuts; but let me tell you, these are unroasted peanuts. I understand they are hard to digest; but if you think these are hard to digest, wait until you try to ask your consumers to digest that peanut provision.

This report is disaster. It is an insult to this House. We went over there with a reasonable program.

You know, we did not just come back with a little something, We came back with nothing. We came back with a disaster.

If you do not believe that the House should have some role in this system, then OK, vote for this thing; but if you believe we have a duty and an obligation to do our own part and not capitulate 100 percent, then vote against it.

For my colleague's consideration, I want to describe the inequities in the bill and more fully.

The farm bill conference report has gross inequities for the various commodity programs and represents a complete capitulation to the Senate position—a position that the House refused to accept.

Consider, for example, the positions taken by the House on the farm bill and the evenutal positions that were accepted under duress:

PEANUTS

The House voted to reject the peanut support program by a vote of 250 to 159. The peanut support program is in the conference report, however, and has received an increase of 33 percent over 3 years. In 1982 alone, they will get an increase of 21 percent over the 1981 level.

SUGAR

The House rejected the sugar support program by a vote of 213 to 190. The sugar support program is in the conference report, however. The U.S. Cane Sugar Refiners' Association says that if enacted, it will force the Government to increase the price of sugar by around 20 percent immediately.

WHEAT AND FEED GRAINS

The House agreed to increase these supports in relation to cost of production increases. No increases in the years 1983-85 are required by the conference report.

DAIRY

The House twice voted to retain a reasonable dairy support program by rejecting amendments by Messrs. FRANK and FINDLEY. The conference report only provides for a 1-percent increase in 3 years. A reasonable program is needed to bring production down, but not one which will force hundreds of farmers out of business as the conference report does.

Does the defeat of the conference report mean that the 1949 act will take effect? No. Those farm programs which expire can operate on a continuing resolution—they have been since mid-October, and it can be done again. H.R. 5210 has been introduced to continue those programs through March 31, 1982. We will then have time to develop a reasonable farm bill.

A vote against the conference report is a vote for both the consumer and rural America.

Mr. LONG of Louisiana. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Speaker, again I rise in opposition to the bill.

I do so reluctantly, because I know that my distinguished chairman of the Committee on Agriculture will be supporting this bill, this conference report.

I hesitate to go against my distinguished chairman. He has provided excellent, outstanding leadership on this committee and on this bill throughout the year; however, I can do nothing else except to urge you to vote against the conference report on agriculture.

I was going to cover grains, but I believe my distinguished colleague, the gentleman from Iowa (Mr. SMITH) did that more than adequately.

I would like to talk a little bit about the milk program. Right now we have a surplus; but under the CCC charter, the Secretary of Agriculture is charged with the responsibility to sell our surplus abroad, to sell it domestically, to transfer it to other government programs, or to engage in government to government deals.

Now, in the early 1960's we also had a huge surplus of butter, cheese, and nonfat dry milk; but then Secretary of Agriculture Orville Freeman used his authority and responsibility to dispose of those in a very good fashion.

For example, in 1962, Orville Freeman donated 200 million pounds of cheese to domestic programs; 154 million pounds to the school lunch program alone.

This year, Secretary Block donated 148 million pounds of cheese to all our domestic programs, less this year than was donated to the school lunch program in 1962.

This year, we have seen the valiant people in Poland struggling for their human rights. I sent a letter to the Secretary of Agriculture in August and to the President asking that they donate 5 pounds of cheese to every man, woman, and child in Poland. That would have been about 200 million pounds of cheese that we have.

How much have they sent to Poland so far this year? Seventeen million pounds, of which less than 1 million pounds has even been shipped to Poland, when we could have shipped over 200 million pounds to help the people in Poland.

Let me point out one other difference. Speaking of disposals, Orville Freeman in 1963 disposed of butter for these various programs, government to government, selling abroad, selling domestically; in 1963 Orville Freeman

disposed of 169 million pounds of butter.

What did Secretary Block do this year? Seventy-one million pounds of butter disposed of through these channels.

In 1963 Orville Freeman disposed of 19 million pounds of cheese.

This year Secretary Block disposed of 900,000 pounds of cheese.

In 1963 Orville Freeman disposed of 771 million pounds of nonfat dry milk.

This year Secretary Block disposed of 402 million pounds.

The USDA has turned down three offers, one from the French for 150 million pounds of butter and 50 million pounds of cheese; another from the Irish Dairy Board for 80 million pounds of cheese and butter.

Right now there is an offer that will expire tomorrow for 5,000 tons.

All of these offers were solid offers, cash in hand, and they were turned down by the Secretary of Agriculture. Why? Because I believe this administration was intent this year to bring out the moldy cheese and to show the people of this country that block of moldy cheese and how bad the program is.

Let me point out that only that cheese that is over 15 months old is even going moldy. Out of the 500 million pounds of cheese that we have, we only have 2 million pounds that is over 15 months old and only about 20 percent of that is going moldy.

The SPEAKER pro tempore. The time of the gentleman from Iowa has expired.

Mr. LONG of Louisiana. Mr. Speaker, I yield 1 additional minute to the gentleman from Iowa.

Mr. HARKIN. Do not be led astray by the huge costs in this program. It cost us $1.9 billion for the program this year; but in 1961-62 it cost us $1.8 billion and in 1952-53, $1.6 billion; but we worked it out in those years because we had Secretaries of Agriculture, one under a Republican, one under a Democrat, that disposed of our cheese, our nonfat dry milk, and our butter.

All I can say is shame, shame on Secretary Block for bringing out a moldy piece of cheese to show the American people. What he should have done was have shown to the American people how well fed we are in this country and what a low cost it has been to our people. He should have shown the supermarket lines, the only lines in America we have today are people lined up at the supermarket counters to buy the produce of our American farmers at the lowst prices anywhere in the world. We are the envy of the world in agriculture.

This farm bill guts the dairy program, attacks the wheat program, and the feed grain program and the conference report ought to be defeated.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Iowa (Mr. LEACH).

Mr. LEACH of Iowa. Mr. Speaker, there has been much information and disinformation spread in recent days about the 1949 and 1938 laws governing price supports, quotas, and acreage allotments which demand clarification. Simply put, the 1949 and 1938 laws stand as permanent legislation to be triggered in the event a farm bill is not passed this year.

It is a matter of judgment whether there is a realistic possibility that the conference committee approach can be improved upon if the farm bill is defeated today. But there should be no misunderstanding of what reversion to the 1949 and 1938 laws implies.

The permanent legislation which is automatically reverted to in the event a stalement develops on a farm bill contains no food stamp authorization, no Public Law 480 authorization, no embargo protection, no emergency or disaster loan provisions, no target prices, no limitation on deficiency payments, and no meat import restraints. It contains the right of the administration to sell CCC stockpiles domestically at a lower level than under current law—15 cents a bushel lower for corn and 23 cents a bushel lower for wheat—and at its discretion the administration may sell CCC stockpiles at any price it chooses for overseas markets.

The 1938 law also contains allotment procedures anathema to midwestern agriculture. These procedures are not only of dubious value; they are out of date. The Carolinas, for example, would receive substantial wheat and cotton allotments even though the main wheat growing areas of the country are now west of the Missouri River and most of the cotton production is now in the Southwest and California.

Finally, Mr. Speaker, it should be clear that short term extensions of current law may seem reasonable to non-farm-State Members, but by early spring many crops will be in the ground in the South and most planting decisions made in the North. Few farmers will want to participate in set-aside programs unless they have advance knowledge of the benefits and confidence they won't be revised. A 3-month delay in adopting farm legislation will make a responsible set-aside program impossible for 1982 crops. At a time of enormous carryover stocks of the major feed grains, a delay strategy can only be described as irresponsible.

As a Representative from one of the great grain production and livestock feeding parts of the world, I must indicate disappointment that a more generous farm approach was not adopted in the conference. If next year's farm income weakens as much as the USDA currently projects, it may be that remedial or emergency legislation will be in order. But it is better today to adopt a firm farm program with minimum benefits that everyone can count upon than to ask farmers to rely either on the uncertainty of makeshift arrangements or the inequities implied in the 1949 and 1938 acts.

Mr. Speaker, with a great degree of reluctance, I urge passage of the Agriculture and Food Act of 1981.

Mr. LONG of Louisiana. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. LUNDINE).

□ 1920

Mr. LUNDINE. Mr. Speaker, I rise to express concern with the manner in which the House will consider the conference report for S. 884, the Food and Agriculture Act of 1981. The report is being considered in the last hours of the session with only 1 hour of debate.

This legislation should not be considered now, certainly not under such rushed and restricted circumstances. It is too complex, too controversial, and too important a measure to be rushed through the House under circumstances that do not permit careful consideration.

We are being required to act on this report under the pressure of adjournment, under the threat that if the bill is not approved, American agriculture will flounder and support programs will abruptly end. This is incorrect and all Members should understand that this is not the case. All farm programs, including the food stamp program, have operated under a continuing authorization since October 1. A resolution has been introduced, and could be considered today, that would extend this temporary authorization through March of next year.

There is certainly no justification to push through an objectionable farm bill just to have some form of authorization on the books. I must remind my colleagues that we will not have another opportunity to consider the provisions in this legislation for 4 years. During this time, many small farms will be forced out of business and consumers will have to pay billions of dollars in unnecessary costs because we acted in haste.

The conference report on S. 884 is clearly unfair and inadequate. It discriminates against certain commodities in order to provide new or increased subsidies to more favored agricultural producers. It makes major reductions in dairy supports and provides inadequate support for corn, feed grains, and other commodities.

At the same time, it provides new and unnecessary subsidies for sugar producers and continues the current peanut program with a substantial increase in supports. The report also protects commodities such as tobacco, rice, and cotton from the kinds of re-

ductions that have been made in all other domestic assistance programs.

The conference report emphasizes reducing costs to the Government at the expense of higher costs to consumers. The sugar and peanut provisions alone could cost consumers in excess of $6 billion over the life of the legislation. Had this cost been paid by Government, these programs would never have found their way into the bill.

I find it ironic that what we are attempting to save taxpayers in dairy and grain support reductions, we are requiring them to pay, as consumers, for other support programs. Not only will the same people have to pay these costs, but the burden will fall disproportionately upon the poor, the elderly, and others who are least able to pay these costs.

I am particularly concerned with the peanut provisions in the bill. The House conferees completely ignored the will of the House, which was clearly expressed in a 250-to-159 vote to end the current peanut allotment and quota systems. The conference report changes only the terminology of the current program, continuing the same restrictive and costly program provisions that now stifle peanut production and require consumers to pay unreasonably high prices for peanuts and peanut products.

The conference report provides peanut allotment holders with a support level of $550 per ton, an immediate 21-percent increase above the current support level. It provides an escalator that will increase price supports by 43 percent over the life of the bill. No other commodity is so favorably treated in this legislation. And this is a program that a overwhelming majority of the House and 47 Senators voted to eliminate and replace with a loan program that would support peanuts at a level closer to the current $250 per ton world price of peanuts.

The conference action on peanuts, as well as on sugar, represents a repudiation of the House position on these issues and should not be accepted.

The conference report does not encourage or expand American agriculture. On the contrary, it restricts production of key commodities, stifles agricultural productivity, and undermines the viability of many small family farms. I am a little surprised, therefore, that almost all the national organizations representing farmers, particularly family farmers, are strongly opposed to this legislation.

Let us not fool ourselves. This is not a farm bill. It is a corporate subsidy bill. It benefits the large corporate producers, the processors, the middlemen, and the allotment holders. It benefits a number of highly organized, well financed agricultural lobbies at the expense of both farmers and consumers.

The argument is made in support of this bill that the American people are tired of business as usual in Washington and demand change. What are we talking about, this bill is business as usual. It continues the kind of commodity deals and trade-offs that have dominated congressional action on farm legislation for the past 40 years.

I have little doubt that the rush to bring this legislation up for consideration now is to get Members to vote before they have an opportunity to talk with constituents. Before both the farmers and the consumers find out just how bad this legislation really is. The advocates for this legislation want to keep Members from hearing the strong opposition that exists to this giveaway to large agricultural producers.

I strongly oppose the conference report and believe we are doing the American people a disservice by forcing a vote on this legislation in the final hours of this session.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 1465. An act to amend the Congressional Budget Act of 1974 to require the Congressional Budget Office, for every significant bill or resolution reported in the House or the Senate, to prepare and submit an estimate of the cost which would be incurred by State and local governments in carrying out or complying with such bill or resolution; and

H.R. 3799. An act to extend the Federal tort claims provisions of title 28, United States Code, to acts or omissions of members of the National Guard, and to provide that the remedy under those provisions shall be exclusive in medical malpractice actions involving members of the National Guard.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 4717) to delay for 1 year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOLE, Mr. PACKWOOD, Mr. WALLOP, Mr. LONG, and Mr. BYRD of Virginia to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendment of the House to the amendment of the Senate to a bill of the House of the following title:

H.R. 3210. An act to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes.

The message also announced that the Senate agrees to the amendment of the House with an amendment to a bill of the Senate of the following title:

S. 831. An act to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes.

The message also announced that a committee of two Senators be appointed by the Presiding Officer to join a similar committee of the House of Representatives to notify the President of the United States that the two Houses have completed their business of the session and are ready to adjourn unless he has some further communication to make to them.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONFERENCE REPORT ON S. 884, AGRICULTURE AND FOOD ACT OF 1981

The SPEAKER pro tempore. The Chair will advise the gentleman from Louisiana (Mr. LONG) that he has 11 minutes remaining and the gentleman from Ohio (Mr. LATTA) has 17 minutes remaining.

Mr. LATTA. Mr. Speaker, I yield 3 minutes to the gentlewoman from Massachusetts (Mrs. HECKLER).

Mrs. HECKLER. Mr. Speaker, the Christmas spirit is upon us. The Christmas spirit, however, in terms of the legislation we are about to produce, might well be serving our largesse of spirit to the wrong recipients.

I am embarassed to have to come to this podium once again today. I am embarassed to take up the valuable time of this body once again to argue against the billion dollar giveaway that is before us under the title: The Food and Agriculture Act of 1981.

The folly of approving this so called "compromise" package is apparent. It is inflationary, unneeded and unnecessary, and, fiscally irresponsible at a time when more deserving programs are being cut to a minimum.

Why, indeed, should we endow the peanut farmer, who already has a monopoly on the market, with an even greater profit, as this bill does?

In the 4 years in which the bill will be effective, the increase in the peanut support price will go from $455 per ton in the first year to $550 per ton. And it goes on, for year after year, for 4 more years.

And who will be allowed to grow peanuts in America, the land of the free? Only those who obtained the allotment at the time the system was introduced, or those who purchased that original allotment.

The fact of the matter is, the peanut section is only one part of this giveaway. The second is the great sugar robbery. What has happened on sugar? I would just ask my colleagues,

in this House that represents the people, what the will of the people on the sugar subsidy is and has been, and how has this House expressed it?

This is the same sugar proposal that we defeated October 15 by a vote of 213 to 190. On that same day we defeated the peanut price supports by 250 to 159.

The conference report before us is a slap in the face. The conferees are telling us to accept a package that we already have rejected.

This sugar program, as you know is the sole legislative innovation of this year. And what will we achieve through this legislative innovation? We will achieve higher inflation, the very thing that the administration and that we in the House have been dedicated to fight and to remove. So this will be a phase of inflation that we, the Congress, have imposed on the American consumer, the American taxpayer,

This "sweetener" will add approximately $2 billion to the consumer food costs in 1982 alone with additional inflationary increases in 1983, 1984, and 1985.

Establishing a loan rate of 17 cents per pound of processed sugar would effectively raise the price of domestic sugar to between 20 and 21 cents per pound at a time when the world price is 12.8 cents per pound.

Every 1-cent increase in the price per pound of raw sugar translates into a $300 million annual increase in the cost of sweeteners and foods containing sugar.

Mr. Speaker, a vote against the compromise will not means chaos for the agricultural sector of our economy. It will not mean a return to the burdensome and expensive 1949 authority. Legislation has been introduced which provides for an extension of the existing provisions of farm law from December 31 of this year to March 31, 1982. There is identical legislation in the other body.

There are times when we have to take the bitter with the sweet. But in this case, the bitter is so great that I say it is time to think, and not vote yes; to think and to come back another day at another time, under the extension that will be granted: to think about the people's interest, and vote against the sugar and peanut giveaways that this conference report encompasses. I suggest that the interests of the people are served by a vote against the conference report.

Mr. LONG of Louisiana. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, in considering the adoption of the 1981 farm bill, I think it represents much of what we have been through all this year. It represents a weakening of the legislative process. This does not represent a compromise based on what the House presented and what the Senate presented.

The House gained nothing in terms of the conference. This is 90 percent what the Senate had in its bill and essentially what the administration wanted. It does not make use of the resources of those people who know agriculture, who have been a part of agricultural legislation in the past.

Second, it makes use of and represents the divisive tactics that have destroyed coalitions that are so important to a farm bill. It has pitted North against South. It has pitted commodity versus commodity. And I think it is destroying the basic coalition that is so important to farm legislation in this House. And why? For what? Why are we asking the farmers to make that sacrifice? To reduce the deficit when we are facing massive deficits? Is it to stimulate growth when we are facing a serious recession? Is it to produce jobs when we are facing high unemployment?

The economic policy of this country continues to be placed on the backs of those who are least able to carry that burden.

I realize that we face a difficult choice here, a choice between a rock and a hard place. If we vote for it, we implement the inequities. If we vote against it, we face the problem of chaos in reverting back to the terms of the 1949 bill.

Let me make very clear that this bill before us is the administration's bill, and it is those who support the administration who are going to have to lead the way, and perhaps they may get a recalcitrant and reluctant following if they lead the way; but if they do not, they ought not to look to others to bail them out of what I think is a bad bill—bad for farmers and bad for the Nation.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Wisconsin (Mr. ROTH).

Mr. ROTH. Mr. Speaker, I thank the gentleman from Ohio for yielding me this time.

I would hope that we would vote against this rule, because I think basically this bill is unfair, and I believe that everything we do in this House should have an element of fairness. But I do not find the element of fairness in this legislation.

I know that our dairy farmers have to take some cuts, but do they have to take all the cuts? Where are the cuts for tobacco, peanuts, and sugar, so that we can have a fairness doctrine? I do not find them and, therefore, I think this bill is unfair. And in truth, the onus, the burden, comes down to the shoulders of the dairy farmers.

Our young dairy farmers are going to be decimated. Our young dairy farmers are going to be forced off the farm. And I ask you: What producing sector of the American economy has taken a cut as our dairy farmers have taken up to now? Our dairy farmers in the last 10 months have taken a 10-percent reduction in support levels. I do not find any other sector in our producing economy taking similar cuts, not one.

Now, this House is asking the farmer, especially the dairy farmer, not to take an increase for the next 4 years. At the same time, Government economists telling us that the dairy farmer's overhead is going to increase between 15 and 30 percent.

□ 1930

I ask you, is that fair?

Mr. PETRI. Mr. Speaker, will the gentleman yield?

Mr. ROTH. I yield to the gentleman from Wisconsin.

Mr. PETRI. Mr. Speaker, I just want to congratulate the gentleman for his very fine statement and associate myself with his remarks.

Mr. ROTH. I thank the gentleman.

The dairy farmer has done a terrific job for the consumer. In 1970 it took 10 minutes of work to buy a half gallon of milk. Today, it takes 8 minutes to buy a half gallon of milk.

Mr. OBEY. Mr. Speaker, will the gentleman yield?

Mr. ROTH. I yield to my colleague from Wisconsin.

Mr. OBEY. Mr. Speaker, I agree with the gentleman and would like to associate myself with his remarks.

Mr. ROTH. The reason we do not have Russian tanks running through Poland today, in my opinion, is not because we spent $200 billion yesterday on our defense, but because of our farmers. The Soviets do not even have enough food to take care of their own people, much less help the Polish people. That is why they are not going into Poland, because they know that if they do they are not going to receive American food stocks, something that they absolutely need.

So, I think it is about time that we appreciate our farmer.

Mr. LONG of Louisiana. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Speaker, before I start, I would like to commend Mr. PANETTA, the gentleman from California. I think he put his finger on exactly what we face today as we look at this particular bill. When this bill came before us, some 399 of you joined me in voting for an amendment which would bring this bill down to where it met the budget requirements. I think we came out with a pretty good bill from the House. Then, we went to conference, and what did we come out with? We came out with a bill which the administration admits will cut $9 billion of farm income from just the feed grain producers in our country,

which will result in $1 billion less in 1985 of return for our exports of corn alone, and almost as much for wheat.

I have talked to a lot of people in the last day or two. I have not found one person that says this is a good bill. Mr. Speaker, I did not come here to vote for bad legislation. I did not come here to support bad legislation because we say we will do worse if we do not do this. I believe we are here to pass good legislation, Mr. Speaker.

I know that some of the farm organizations have also said, "pass this because we will do worse if we do not." I can tell you what my farmers think. I have already polled them, and 10 to 1 they are opposed to passing this particular legislation.

We also hear all sorts of scare tactics, what is going to happen if we do not pass it. Mr. Speaker, I did not come here to determine what I am going to do by the scare tactics that were thrown at me. I did not come here to pass bad legislation because people said we will do worse if we do not do this.

Mr. Speaker, I came here to pass good legislation that will keep this country and our farmers healthy. I hope the Members of this body will have the courage to say that we are going to stand tight until we pass some decent legislation that will help to preserve our farm economy and preserve the economy of this great Nation of ours.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Speaker, I rise in opposition to the rule on the conference report on S. 884, the Agriculture and Food Act of 1981.

Two months ago, the House debated the 1981 farm bill and voted overwhelmingly 250 to 159 in favor of the Lundine amendment to terminate the peanut acreage allotment and production control program. The Senate only narrowly voted 51 to 47 to continue this agricultural program. Despite the House and Senate votes, the conference report increases the United States guaranteed price support on peanuts from the current $445 per ton to $550 per ton in 1982. This represents an increase of approximately 21 percent.

I am dismayed that the House conferees not only abandoned the House position on peanut subsidies but also voted to put back in the 1981 farm legislation provisions pertaining to several subjects which were completely rejected by both the House and the Senate. The inclusion of this language is against the expressed wishes of the House and is contrary to normal House procedures. The rule before us serves to legitimize the action of the conferees by waiving points of order against provisions of the agreement which exceed the scope of the conference. This rule is an affront to us in the House and to the American consumer.

The conferees clearly exceeded their authority and the House should be given the opportunity to again state its position on the peanut provisions of the 1981 farm act. If this is done, I think that the Senate will then accept the House provisions as it came very close to doing during its consideration of the 1981 farm bill in the fall.

At a time when we are trying to reduce Government spending, I find it hard to imagine that some in this body will vote to grant this huge windfall benefit to the current peanut acreage allotment holders. A Government-dictated increase of up to 44 percent by 1985 in peanut price supports just does not make sense. I urge my colleagues to defeat this rule.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Speaker, I rise in opposition to the conference report on the farm bill. As a peanut butter lover, I am tired of having to pay caviar prices for this commodity. Earlier this year this House overwhelmingly adopted an amendment to end the feudalistic and archaic peanut land allotment system. Yet the conferees, ignoring the will of the House wanted to keep "business as usual." Oh sure, they disguised the language some, but in reality it is the same antiproduction provisions which we have had for years. This business as usual peanut language means that the Federal Government will continue to say who can grow peanuts and where and how much farmers can grow for domestic consumption. It means that 44 percent of the peanuts for domestic consumption will be produced in one State, and 94 percent will be produced in six States. It means that consumers will have to pay more and more for peanut butter and peanut products. This legislation will help pave the way for candy manufacturers to have to charge 50 cents for that 5 cent candy bar we used to know.

The irony of the matter is that the Soviet Union which imported about $22 million in peanuts from the United States over the past 3 years will almost certainly be able to buy American peanuts for a cheaper price than our American consumers, since there will be no restrictions on peanut production for exports but there will be for domestic consumption. We all remember the Soviet wheat deal; well this is not much different.

The antipeanut production provision coupled with the sugar price support program will cost consumers $6 billion over the next 4 years. I say "nuts" to this antipeanut production bill.

Mr. LONG of Louisiana. Mr. Speaker, I yield 2 minutes to the gentleman from South Dakota (Mr. DASCHLE).

Mr. DASCHLE. Mr. Speaker, I rise in reluctant opposition of the rule—reluctant because I believe that we need more time to discuss the great peril that besets the farmers and ranchers throughout our Nation.

There has been a great deal of concern expressed tonight on the floor as we debate this rule about that peril, and indeed there should be. The administration has called those who express this concern over the plight of the family farmer as nothing but "chicken littles." Perhaps. But you cannot blame those who claim the sky is falling in when farm income has declined more than 39 percent over the last 2 years, with a projected decline of an additional 25 percent in 1982. You cannot blame them for feeling that the sky is falling in when farm debt was $12 billion in 1950, and this year it is expected to be $180 billion, eight times higher than net farm income. You cannot blame them for being concerned when the interest payment on that debt in 1977 was $8.3 billion, and now this year we see that figure rise to $18.8 billion. The sky has fallen in on many of these farmers already.

It has fallen in on more than 450,000 farm residents just since 1978, and I can assure the Members of this body that the sky will come crashing down on many more in the years ahead if we pass the legislation before us tonight.

Mr. LONG of Louisiana. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Speaker, I do not rise in opposition to this particular rule on this particular conference committee report, but I certainly want to speak out against the conference committee report itself. I do not believe that you can win down here unless you divide, then you conquer. Some of my colleagues on this side of the aisle just a few minutes ago complained about other sections of the bill because they were from the dairy State of Wisconsin.

Unfortunately many of these people voted earlier to delete the sugar program from the farm bill. Pitting commodity against commodity will not produce good farm policy.

The sugar program is extremely important to my own State of Michigan. We must have a program whether or not Congress approves a 1981 farm bill. I hope the conference report we are about to vote on will be defeated so that a fairer program, one that Congress can be proud of, will be passed.

Mr. LONG of Louisiana. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Speaker, for dairy farmers this bill is an economic Dunkirk. Already in my district and

elsewhere in Minnesota, farm foreclosures are up fourfold over the last year.

This bill will hand the dairy farmers over to the bankruptcy courts. The test in the conference committee has been can we get a bill that the President will sign. The test instead should have been is this bill good for the country; is this bill good for farming; is this bill good for consumers. On all tests this bill fails. The conference report fails and it ought to be defeated. It ought to be sent back to committee, in the interest of both farmers and consumers. It ought to be reworked and a new bill brought back, one that will meet the test of being good for the American economy.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

At the outset, Mr. Speaker, let me commend the conferees on this legislation. My colleagues all know that they put in many, many hours in bringing us a conference report today. I especially want to commend them for their hard work, even though we do not agree with every single part of their product.

Certainly we have listened to the arguments here on this rule and my colleagues might wonder why on our side of the aisle all of our speakers were speaking in opposition. They came to me and they said they did not have any time under the bill and they wanted to speak on the rule. So I thought it only fair to let them speak under the rule so that they could state their positions.

But let me say there is a lot of support in this House for this piece of legislation. There is about a $5 billion difference between this bill and the bill that left the House of Representatives insofar as the taxpayers are concerned.

Let me repeat that. There is about $5 billion difference in the cost to the taxpayer between the bill that we have now before us and the bill that left the House.

Let me call particular attention to those Members representing consumer interests in this country to that fact, $5 billion. It cannot be disputed.

As I said earlier, I do not like all of the features of this bill. If I were writing it, naturally, I would write it differently. But we only have one vote and we have one total product before us with many parts.

Since we only have one vote, we cast that vote either for or against the product that was developed in conference.

What happens to this country if the conference report is defeated? The Secretary of Agriculture has sent me this statement:

> We will revert to the permanent legislation. The legislation which was enacted in 1938 and 1949 would run counter to the Members' philosophy of a more market-oriented agriculture and would be extremely costly to consumers and would be highly disruptive of the agriculture economy.

In other words, both consumers and the producers would suffer.

Let us talk a little bit about the most costly part of this bill: Dairy. Dairy has received the most attention in the press but very little has been said about the cost here on the floor today in discussing this rule.

In the fiscal year, CCC costs for the dairy program have reached nearly $2 billion. It accounts for almost 60 percent, I repeat, 60 percent of the total Federal cost of all farm programs. Yet, we have people down here talking in the best interests of the dairy farmer and saying nothing about the cost of the present program. Are these people not taxpayers? Are these people oblivious of the fact that the cost of this program and the mounting surpluses could bring the whole program down in defeat?

Currently the milk production and dairy cow production are on the increase. November milk production is up 2.5 percent from a year ago. The interest costs on the $2.3 billion of CCC dairy inventories which we have today comes to $1 million a day. That is $365 million a year, more than a third of a billion. This is what we are talking about. It is not a small amount.

I am sure that all of you have read the stories written about the attempted giveaways of dairy products. Here is an article which appeared in the paper on December 7:

> U.S. considers giveaway of huge cheese supply. The government is considering giving away 225 million pounds of surplus American cheese, a pound apiece for every man, woman, and child in the country.

But due to the regulations passed by this House, they cannot do it. We all read about the sale to New Zealand, 220 million pounds of butter at a time when we had 430 million pounds in storage. What was the cost? It was sold at 70.1 cents per pound, shipping costs to be paid by New Zealand.

The American taxpayers picked up half of the cost of that sale. Do my colleagues know what the costs were? The gentleman knows what the costs were the same as I do. The CCC paid approximately $1.43 a pound for that butter which we sold for 70.1 cents. We had to get rid of it because we had so much butter we had difficulty storing and preserving it. We could not get rid of it at the world price and it had to go at any price in order to dispose of it. Do you mean we should not correct this intolerable situation?

All we have to do is come up with a dairy program which will not give us these huge surpluses and we will support it. However, they have not come up with it.

These are taxpayers' costs we are talking about and we have $1 trillion debt now. Sure, we would like a better program. But what are you going to do with the dairy surpluses? That is the question confronting this administration as it confronted the last administration.

Let us take a look at some of these other programs. We have heard that this program does nothing for the wheat grower. This bill does more for the wheat farmer than the present law. The bill sets wheat target prices at not less than $4.05 per bushel for the 1982 crop compared with $3.81 for 1981. Then it is $4.30 for 1983, $4.45 for 1984, and $4.65 for 1985.

The support loan prices in 1982 to 1985 would be not less than $3.55 per bushel compared with $3.20 in 1981.

Feed grains, the bill sets corn target prices at not less than $2.70 a bushel on the 1982 crop, compared with $2.40 for 1981. Then it goes to $2.86 for 1983, $3.03 for 1984, $3.18 for 1985.

Price support loan rates for corn would be not less than $2.55 per bushel in 1982 and 1985, compared with $2.40 in 1981. None of these target or loan prices are as high as I would have liked but they are higher than the present prices.

So I want to say to those who say that the loan prices are lower, your figures are in error.

□ 1950

Let me also say that we do have a provision or two in this bill, as I indicated earlier, that I did not like. The conference report does have a peanut provision in it. It does have a sugar provision in it which I prefer to no program at all, because I can well recall what happened when they killed the sugar program a few years ago. And I just happen to have the figure before me as to what happened then.

In June 1974, at the time the Sugar Act was killed in this House, in November of that year the price of sugar was 56 cents a bushel, and the high for the month of November 1974 was 63 cents a pound.

In this bill, we also have a 1-year extension of the food stamp program costing $11.3 billion, a stronger Public Law 480 program; the authorization for most of the agricultural research and extension and teaching activities which the Department funds.

A separate title authorizing two new soil conservation programs which will help redirect USDA's resources toward those areas experiencing the greatest soil erosion problems. A separate export title which includes authorization for a revolving fund for agricultural export development program.

We have heard about the cost of the dairy program. How much do my colleagues think it is going to cost the taxpayers for the sugar program and the peanut program combined. Both of these programs together would add

less than $10 million, $10 million to the cost of this bill.

So, Mr. Speaker, notwithstanding the fact that there are some objectionable features in this bill, I urge the passage of the rule and the pasage of the bill.

Mr. LATTA. Mr. Speaker, I yield such time as he may consume to the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. Mr. Speaker, I rise today to express my opposition to the dairy provisions in the conference report to the farm bill. First, let me point out that dairy farmers recognize the need to reduce the cost of their program to the Government. The dairy farmers were the first segment of the American population to accept their share of the burden to restore our economic health. In April of this year, the dairy industry forewent the automatic, semiannual adjustment on dairy price supports which amounted to close to a $1 increase. The farmers sacrificed a total of $87 million which had been promised by the Government. In addition, dairy farmers did not receive their October 1 adjustment because the farm bill was not completed. It is now apparent that this segment of agriculture will make further sacrifices.

The last farm bill provided dairy farmers with 80 percent parity. Our job was to determine what price support level would alleviate the current problems of overproduction, excessive Government costs, and rising inventories. We all know that the 80 percent level over the past 4 years was too high, and I indicated my concern over this level of parity in today's market by supporting the President in April. However, the conference report dairy provisions represent an over-reaction.

The dairy price support program has functioned effectively to assure an adequate supply of dairy products at a reasonable cost throughout the history of the program. Prior to the 1978–79 marketing year, the average cost of the program was less than $250 million annually. The price support program has brought stability to an industry which is subject to annual fluctuations in both production and consumer demand. While we have seen the problems from having the program set too high, it is abvious the conferees gave little consideration to the effects on the dairy farmer, the industry as a whole, and the American consumer if the level is set too low.

The current price of $13.10 per hundredweight represents about 71 to 72 of parity. The conference report on the farm bill will keep the support price at $13.10 for the current year and, thereafter, 70 percent of parity, except if the Secretary of Agriculture decides the Government is going to purchase more than $1 billion in dairy products in the upcoming year. In this event, the price support level will drop below 70 percent as long as the support price does not dip below $13.25 in fiscal year 1983, $14 in fiscal year 1984, or $14.60 in fiscal year 1985. We already know that the CCC will purchase at least $1 billion in dairy products next year. Consequently, the support level will fall below 70 percent of parity.

Until recently, dairy farmers have never received less than 75 percent of parity. A price support level of 70 percent of parity or less is not only unprecedented, but an insult to the Nation's efficient and industrious dairy farmers. Such a program does not merit any support from dairy farmers.

The results of such a substantial decrease in price supports will be devastating to the American consumer and the dairy industry. Past history has shown that keeping prices too low has caused huge market price swings, as were experienced in 1973 and 1974 when prices were relatively higher than the CPI. The dairy farmer is already suffering from a cost-price squeeze. This is particulary true for those young farmers who entered the industry when interest rates were extremely high. These young farmers are barely making ends meet, as is, and the inadequate supports provided in the conference report will put them out of business.

As I have mentioned, the purpose of the dairy price support program is to assure adequate supply for consumers at a relatively stable price with a fair return for the farmer. Farmers have depended on price stability to make sound and productive management decisions. Milk plants have benefited in that the supply of milk has not fluctuated to the extremes as have other agriculture products. Consumers have benefited through the availability of high quality dairy products at reasonable prices. In other words, the dairy price support program has worked. It has only been over the past few years that we have seen large increases in Government purchases and CCC stocks. In an effort to curtail overproduction and reduce Government spending, we eliminated the April increase.

The price support program as passed by the conferees will mean the wholesale bankruptcy of many of our dairy farmers. Anything less than 75 percent of parity is a radical departure from the parity concept under which the program has operated effectively since it was established. Such a token increase as 15 cents (from $13.10 to $13.25 in fiscal year 1983) represents only a 1-percent increase, whereas other commodity supports will increase between 6 and 8 percent. This is commensurate with a 20-percent increase in the costs of production for dairy farmers.

The dairy industry is not being unreasonable to expect a fair return on their investment while providing this country a dependable supply of milk and milk products. The industry has already sacrificed by forgoing the April increase and missing their October adjustment. They will undoubtedly suffer further setbacks by this reduction in the support level.

We must reduce Federal spending and dairy farmers are willing to do their share, but, must they be expected to take the entire brunt of these cuts. An arbitrary decision that dairy farmers can now absorb a larger share of inflation and continue to produce adequate quantities of milk could prove to be disastrous, both for American consumers and the dairy industry.

Mr. LONG of Louisiana. Mr. Speaker, I yield such time as he may consume to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, the year 1981 is drawing to a close and it has been a disaster for the American farmer. That disaster has been provided by record low farm prices at a time of record high production costs. Net farm income has dropped for the last 2 years, when adjusted for inflation, to a level not seen since the Great Depression of the 1930's. The 1981 farm bill does nothing to alleviate the situation.

The 1980 disaster can be attributed to drought—it was nothing that could have been avoided. What is the outlook for 1982? The bad news is that USDA economists predict net farm income will stay depressed and farmers will continue to amass huge debts.

The only good news, and it must be qualified, is that adequate credit exists for farmers to again plant in 1982. Few farmers will be denied production credit loans and even the Farmers Home Administration has indicated that it too will exercise forbearance regarding the massive indebtedness of U.S. farmers.

However, a day of reckoning is coming. Our farmers cannot continue to operate year after year at a loss. They cannot continue to borrow to live. It was only the appreciation in the value of their land that allowed them to borrow and produce for the past few years. That increase in land values ended in 1980 and farmland values may now be in a period of decline under the pressures of the current economic situation.

In regard to the issue of farm credit, on December 4, I contacted the Governor of the Farm Credit Administration, the Secretary of Agriculture, and the Administrator of the Small Business Administration to ask that they do everything possible to ease the current debt loads of American farmers in view of the difficulties they face.

I have just received a response from Governor Donald Wilkinson of the Farm Credit Administration to my letter. I have been assured by Governor Wilkinson that they will stand by farm borrowers again in 1982, despite the disasters of the past 2 years. He committed the farm credit system to a reasonable, compassionate position regarding the huge farm debt situtation. For this, I thank the Governor and I know our farmers appreciate it as well.

FARM CREDIT ADMINISTRATION,
Washington, D.C., December 16, 1981.

Hon. BILL ALEXANDER,
House of Representatives,
Washington, D.C.

DEAR MR. ALEXANDER: This is in response to your letter of December 4, 1981, expressing your concerns regarding the economic plight of American farmers and specifically the farmers in Arkansas. As you have correctly pointed out, farmers are facing unprecedented problems in many areas of the country due to combinations of extreme, adverse weather and, more recently, severely depressed agricultural prices. In the face of these conditions, most of the farmers have faced significant increases in input cost. As would be expected, many of them are or will be experiencing difficulty meeting their debt repayments.

This issue was discussed at length last week in an annual meeting of production credit association directors and presidents in the State of Arkansas. This meeting was attended by senior staff members from the Federal Intermediate Credit Bank of St. Louis and members of the St. Louis District board. At each level represented, the participants reiterated their intentions to stand by borrowers so long as there was any reasonable chance that the borrowers could recover from their present circumstances. It is the policy of the St. Louis District and the Farm Credit System in total to use all tools available to a lender to assist borrowers who are having temporary difficulties until it is evident that liquidation of farm assets is the only alternative remaining. Based on our participation in the meeting last week in Arkansas, we believe that the associations in Arkansas and the district bank are committed to this policy. While all of the meeting's participants were concerned, their approach to the present circumstances is a responsible, compassionate position in keeping with Congress' mandate to the System.

As always, we appreciate your sharing with us your concerns regarding conditions existing in agriculture. The aggressiveness with which you have pursued agricultural interests and those of the Farm Credit System in past years is very much appreciated in these difficult circumstances.

Sincerely,

DONALD E. WILKINSON,
Governor.

Mr. LONG of Louisiana. Mr. Speaker, I yield such time as he may consume to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Speaker, I rise in opposition to the rule and the bill.

Mr. LONG of Louisiana. Mr. Speaker, I yield 1 minute to the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, as the Members know, I have had a personal problem in reaching a conclusion on what to do on this conference report. I have reached the conclusion that this is the best conference report that can now be passed, that there is no alternative other than the 1949 act, which is not desirable for the farm community, and not desirable for consumers.

Accordingly, I rise in support of the rule and in support of the conference report. I will speak later on the conference report.

But at this time, I urge Members to vote for this conference report. It is not a happy occasion for many of us from the agriculture districts to support the conference report. We wish it could be better. But we are faced with a reality that effective January 1 an antiquated bill, one that is out of tune with present concerns in agriculture, and with the spirit of American agricultural policy, will come into effect unless this conference report is adopted.

Accordingly, I support the conference report.

Mr. LONG of Louisiana. Mr. Speaker, I yield such time as he may consume to the gentleman from Hawaii (Mr. HEFTEL).

Mr. HEFTEL. Mr. Speaker, the farm compromise now before us is admittedly an imperfect measure, but it nevertheless deserves our support. To those of my colleagues who feel that this bill is inadequate, I would respond that this is the best we can hope for in these times of budget austerity. To those of my colleagues who are traditionally opposed to any farm legislation, I would urge you to reconsider and support this austere, barebones package. To all of my distinguished friends and colleagues, I would ask for your support of this conference report because there is simply no better alternative available.

It is unfortunate that our farm programs must bear such a large portion of the budget-slashing burden. The Reagan economic program of $750 billion in tax cuts and $1.5 trillion in military spending has left very little of the budget pie for our vital agricultural sector. I am afraid that we can neglect our Nation's farms only at our peril. The farm bill before us now, while certainly inadequate, must be supported because it is better than no bill at all. It is a bill that we can live with, and that our farmers can live with—if we all tighten up our belts.

Farmers, like the rest of us, are facing tough times. Coming from Hawaii, one of the biggest cane-sugar-producing States, I have some first-hand experience. The Hawaii sugar industry stands to lose $110 million this year.

Alexander & Baldwin, Inc., a firm in my district, estimates that it will lose $25 million from its sugar operations this year. Amfac, another major agricultural company, is losing $5 million a month from sugar, and is close to liquidating two of its five sugar subsidiaries, Oahu Sugar Co., and Puna Sugar Co. Thousands of jobs and hundreds of millions of dollars are endangered in Hawaii as a result of this catastrophic decline of the sugar industry.

The 17-cents-per-pound, nonrecourse loan program for sugar included in the conference report is absolutely critical to the survival of our domestic sugar industry. In fact, at this relatively low support level, I must confess serious doubts as to whether our industry can be saved, but we must certainly try.

Hopefully, this minimal sugar program, which costs the Government nothing, will keep our industry alive by reducing the dumping of foreign sugar on the American market. Only by eliminating such predatory trade practices of foreign sugar producers can we expect our domestic industry to regain its former health and competitiveness. I strongly urge all of my colleagues to cast a vote for American sugar by voting for this conference report.

Few, if any of us here, are fully satisfied with the farm bill as agreed upon by the conferees. Many of us would like to see a more generous bill, providing more for dairy, wheat, and other commodities.

Some of us would prefer an even smaller measure, in the hope of reducing consumer costs. Nevertheless, in spite of our differences, I believe that most of us here are willing to support the hard-fought conference report now before us. We should not allow this fragile compromise to be defeated because of narrow disagreements over specific provisions of the bill.

Mr. Speaker, I say that we should pass this conference bill because it is the only farm legislation we have and are likely to have. We can live with this bill—our farmers can live with this bill; we do not have to be happy with it to vote for it. The question that must be addressed is: What is the alternative? Regrettably, there is no viable alternative, so let us all bite the bullet and pass this legislation.

Mr. LONG of Louisiana. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WATKINS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 284, nays 116, not voting 33, as follows:

[Roll No. 368]

□ 2010

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo for, with Mr. Santini against.

Until further notice:

Mr. Vento with Mr. Young of Florida.
Mr. Moffett with Mr. Whitehurst.
Mr. Russo with Mr. Moorhead.
Mr. McDonald with Mr. Quillen.
Mr. Roe with Mr. Trible.
Mr. Beilenson with Mr. Craig.
Mr. AuCoin with Mr. Burgener.
Mr. Holland with Mr. Conte.
Mr. Ford of Michigan with Mr. Badham.
Mr. Dwyer with Mr. Williams of Ohio.
Mr. Hawkins with Mr. Erlenborn.
Mr. John L. Burton with Mr. Hagedorn.
Mr. Blanchard with Mr. Broomfield.
Mr. Jacobs with Mr. Carman.

Mr. LUNGREN and Mr. ROUSSELOT changed their votes from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a bill, a joint resolution, and a concurrent resolution of the House of the following titles:

H.R. 2241. An act to provide for the establishment of the Bandon Marsh National Wildlife Refuge, Coos County, State of Oregon, and for other purposes;

H.J. Res. 377. Joint resolution providing for the convening of the 2d session of the 97th Congress; and

H. Con. Res. 231. Concurrent resolution to authorize the erection of certain structures at the west front of the Capitol in connection with a rally to be held on January 15, 1982, in commemoration of the birth of Dr. Martin Luther King, Jr.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4559) entitled "An act making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House of Representatives to the amendments of the Senate numbered 22, 23, 24, 25, 38, 62, 63, 89, and 138 of the above-entitled bill.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1493. An act to deauthorize several projects within the jurisdiction of the Army Corps of Engineers.

The message also announced that the Senate had passed a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. Con. Res. 57. Concurrent resolution providing for the sine die adjournment of the 97th Congress, 1st session.

ACTION ON SOCIAL SECURITY RINGS HOLLOW

(Mr. SAVAGE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAVAGE. Mr. Speaker, today the House did an about-face of sorts by voting to restore the $122 social security minimum benefit. However, the action we took today respecting this matter rings a bit hollow, for we only restored this benefit to current beneficiaries and to those who become eligible prior to January 1, 1982. While I supported passage of the conference report on H.R. 4331, the social security minimum benefit, I want to let it be known that I am not satisfied with this legislation. As far as I am concerned, it does not go far enough.

I regret the fact that the House conferees apparently capitulated to the Senate in this matter and did not insist upon full restoration of this benefit not only to current beneficiaries but to prospective ones as well.

Further, I want to state for the record that but for the intransigence of Republican members in league with the boll weevils, we could have had the opportunity to vote separately on this issue when the budget reconciliation bill was before us. Unfortunately, the motion to have a separate vote on the question of retention of the minimum benefit was defeated, and as a result millions of beneficiaries were needlessly troubled by the prospect of losing this benefit.

Nevertheless, I do see a glimmer of light in the action we took today. This legislation had the blessings of the administration and the Republican-dominated Senate. Apparently both have looked at recent polls showing a steady erosion in the President's popularity and in his programs. On other occasions and in other forums I have repeatedly stated that time would show the President's programs to be antipeople, and that the poor and working poor would realize this down the road.

Well, it seems that more and more people are peering down that road and are not liking what they see. Today's mixed blessing should further alert them to the danger our Nation still faces in the attempt of the Reagan administration and its congressional supporters to drag us back into the 19th century.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2451

Mr. EMERY. Mr. Speaker, I ask unanimous consent to withdraw my name as a cosponsor of H.R. 2451.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maine?

There was no objection.

CONFERENCE REPORT ON S. 884, AGRICULTURE AND FOOD ACT OF 1981

Mr. DE LA GARZA. Mr. Speaker, I call up the conference report on the Senate bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of December 9, 1981.)

The SPEAKER pro tempore. The gentleman from Texas (Mr. DE LA GARZA) will be recognized for 30 minutes, and the gentleman from Virginia (Mr. WAMPLER) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Texas (Mr. DE LA GARZA).

Mr. DE LA GARZA. Mr. Speaker, this is perhaps one of the most difficult moments I have had in my legislative career, which is some 28 years. As we bring this conference report, which is the culmination of some 9 months of work by the Committee on Agriculture, through the subcommittee hearings, through the full committee hearings, through the House, through the conference, perhaps one of the longest conference periods, some 27 days in conference, this is not the perfect bill. It is not the bill that I would write if I was doing the writing and had the authority to do what I would like to do; but, I must tell the Members of the House that as you listen this evening to specific commodities and specific programs dealing with specific areas, this is an omnibus farm bill and let us not forget that.

□ 2020

It contains a food stamp provision that will be discussed later.

It contains some very important segments for conservation in rural America. It contains some very important areas for credit and rural development. It contains some exceedingly important authorization for research, which is the base where the food cycle begins.

It contains some assistance to the floral industry.

It contains authorization for more input by farmers into the Department of Agriculture decisions.

It contains added authorization to be able to control pests like the Medfly or the Mexican fruitfly.

It contains more authorization for assistance to the black land-grant colleges, bringing them to the forefront.

It contains emergency help for poultrymen.

It contains discretionary authority to assist the sunflower seed production.

It contains a very important meat inspection provision, to put our meat industry on a par with the foreign meat that is imported.

It contains a very important embargo provision.

It is sad that all of the debate has centered on a few commodities. They are all my friends. I wish I were able to help them more, but I will have more to say on that later, Mr. Speaker.

We need a farm bill. We have a chance to get one today. We should not miss that chance.

Frankly, this is not an easy bill to support. It falls far short of what I personally believe would be fair and reasonable. But, in order to reach agreement on this conference report, as the House knows, we had to make major concessions to the Senate and the administration—more than I and many others wanted to make.

The commodity programs in the original House farm bill—according to administration estimates—had a cost figure of $6 billion above the Senate bill over the life of the bill. The conference report—again according to administration estimates—is about $5.6 billion below the House and only about $400 million above the Senate.

I personally take those numbers with a large grain of salt. Nobody can accurately estimate what farm programs will cost in future years when they cannot estimate how big crops will be and what world economic conditions will be like. But these figures at least give you an idea of how far House conferees had to go in order to get a bill.

The problems many of us have with parts of the bill are particularly serious at a time when our farm economy is in deep economic trouble.

Net realized farm income went down from $27 billion in 1979 to $22 billion in 1980. It is expected to be about $19 billion in 1981. And as far as the administration can tell us, net farm income may well go down again for a third straight year in 1982. At a time like this, we should have a more effective safety net for farmers. If we allow the farmer to slide further into the red, the big loser in the long run will be the entire national economy.

As I said, this bill does not go as far as it should toward protecting the farm economy and the national economy. But we should adopt this conference report for three basic reasons.

First, this legislation continues the basic framework of our agricultural programs and keeps these programs in operation for the next 4 years. The conference report continues the basic price support loan programs; it also continues the target price system for those crops which use it, and improves the very important farmer-owned grain reserve program. The minimum price support loan rates and target prices for major crops will be up from this year's level in most cases. This package will provide some degree of assistance for farmers, especially if the administration uses the authority we provided to operate above the low minimum levels included in the law. In the case of dairy products, we were forced to provide minimums that are clearly below what I regard as fair. At least, however, the report permits supports to return to 70 or even 75 percent of parity in the future if surpluses can be reduced.

My second point is that in addition to the commodity programs, the report includes many other very important provisions which must be

adopted in the overall national interest. Some of these I discussed earlier in my remarks.

With respect to agricultural research, extension, and teaching, the report extends by 4 years the congressional authorization aimed at continued gains in the productivity of the agricultural sector. It strengthens the research and extension partnership between the Federal Government and the States through cooperative agreements designed to improve the coordination and planning of agricultural research, extension and teaching programs. This will assure that the results of agricultural research are effectively communicated and demonstrated to farmers, processors, consumers, and all other users in an effort to provide the United States with the most productive and efficient food and agricultural system in the world. It also expands the scope of these activities to include aquaculture, rangeland management, and an International Dairy Goat Research Center to serve our domestic needs and aid Third World countries.

The report provides added assistance to black colleges. The bill guarantees that the predominantly black land-grant institutions created under an 1890 law will get an increased share of Federal funds appropriated for cooperative extension work. In addition, the bill authorizes appropriations of $50 million over a 5-year period to the 1890 colleges to enable them to expand their currently inadequate research facilities so they can join as full partners with other institutions in serving State research needs.

In the credit field, although we reluctantly gave the Secretary of Agriculture discretion over whether to make economic emergency loans to farmers in the coming year, the authority for the program is extended for a year and the statement of managers emphasizes our intent that the Secretary use the authority in cases of economic emergency.

Finally, a third point. The conference report before us today represents the most we can realistically hope that the President will be willing to sign into law. The administration has made that abundantly clear.

I believe these are reasons enough to adopt this report at this time. In the future we can come back and try to improve it, but for today, the issue is S. 884.

The question is not whether we would like a better farm bill. The question is whether this farm bill—considering the alternatives—should be adopted at this time.

I think the answer is "yes." Looking at the alternatives, I have to come to the conclusion that the wise course is for the House to adopt this bill.

This legislation will be far less costly to taxpayers than the 1949 act programs which automatically come back to life if we do not adopt a new farm bill. For example, a failure to pass new legislation would raise dairy supports immediately to 75 percent of parity. It would set a substantially higher level of supports for peanuts and it would revive the acreage allotment and marketing quota program under which production would be limited to holders of allotments. Also, reversion to the 1949 act would bring to life a number of other farm program provisions which are not suited to today's problems and would not be in the best long-run interests of either farmers or consumers.

There may be some who think that if the House defeats this conference report, we could write a better bill early in the next session. I wish I could believe that. I am very much afraid, however, that a course of that kind would be too great a risk.

The Senate has already adopted the report by a vote of 68 to 31. It is my hope that the House will do the same.

This legislation is the product of almost a full year of hard work by many Members and others. We spent 3 months in subcommittee and full committee work from March through May. We spent 7 days debating the bill on the House floor during 3 weeks from October 2 to October 22, and the conferees spent 5 weeks from November 4 to December 8 in hammering out the agreement you have before you. Every farm, consumer, and industry group interested in these issues has made its case before the Members, the administration, and the public. Few bills have been as thoroughly examined and debated as this one.

I want, at this point, to commend the members of the conference committee who worked so patiently and dil- igently to produce our report, whether or not they agreed with specific issues. Our ranking minority member, Congressman BILL WAMPLER of Virginia, took a leading role in our work as did our Agriculture Committee vice chairman, Congressman TOM FOLEY of Washington. Indeed, all of the 20 members who served as conferees on the agricultural portions of the bill, and the Foreign Affairs Committee members who served as conferees on part of the bill, deserve praise for their contributions.

I want also to publicly thank the Senate conferees, particularly Chairman JESSE HELMS of North Carolina and the ranking Democrat, Senator DEE HUDDLESTON of Kentucky, for their hard and conscientious work in a long and difficult negotiating process.

It has been asserted that passage of the 1981 farm bill is not necessary for carrying out the food stamp program through the 1982 fiscal year. That simply is not the case. The level of funding authorized for the food stamp program by the farm bill for the 1982 fiscal year is $11.3 billion. That figure was arrived at on a bipartisan basis with the approval of the administration. The continuing resolution would fund the program only through August 15 at a level of $10.3 billion. A reauthorization and supplemental appropriation would be required to fund the program for the balance of the year. In the current climate, with unemployment rising and continued suggestions emanating from the administration for further cuts in the program, those who believe in an effective food stamp program would be ill advised to rely on the continuing resolution and then some further possible action by Congress as an adequate safeguard for the program. The farm bill guarantess the program against further cuts for the balance of the year and protects energy assistance benefits for those located in cold weather areas of the country. Further, the farm bill contains a series of provisions fashioned on a bipartisan basis to protect the program from fraud and abuse, particularly on the part of organized crime and through other large-scale illegal activities, which go well beyond recipient fraud.

The farm bill will go far toward protecting the program from those who would rob it while insuring continued food assistance for those who truly need it. The continuing resolution would, of course, not achieve these worthy objectives.

Some have criticized our conference report because it includes two programs which were not contained in the House bill which went to conference—sugar and peanuts. Let me deal very briefly with these issues.

On sugar, we have brought the House a package which offers some price support loan protection to farmers—but at a substantial reduction below the rate which passed the Senate and narrowly lost in the House. The Senate bill provided an 18-cent support, rising to 20 cents by 1985. The compromise conference report provides a 16.75-cent support, rising to only 18 cents by 1985. This program will have a zero cost to taxpayers and will help protect consumers against wide swings in prices.

On peanuts, we have a similar compromise which substantially modifies the Senate bill. Our conference report eliminates all acreage allotments and reduces poundage quotas. The bill makes it possible for any farmer to grow peanuts and to participate in the growth of the market for domestic edible peanut foods. Price support loans will be held below the level proposed by the Senate—$46 per ton below for the 1982 crop. This is a compromise which the House can and should support, and which should have little or no cost to taxpayers.

At this time, I would like to discuss briefly the principal features of the report.

DAIRY PRODUCTS

The bill sets milk price supports at not less than $13.10 per hundred pounds for fiscal 1982. For fiscal years 1983, 1984, and 1985, the minimums would be $13.25, $14, and $14.60 if surplus purchases during the year are projected at more than $1 billion. For any year in which purchases are projected at less than $1 billion, the minimum would be 70 percent of parity. The support floor would rise to 75 percent of parity if projected surplus purchases are less than 4 billion pounds of milk in fiscal 1983, 3.5 billion in fiscal 1984, and 2.69 billion for fiscal 1985. The bill also directs the Secretary of Agriculture to report on the strengths and weaknesses of existing and possible new programs for controlling milk surpluses, including a review of the impact of Government programs on regional supplies. Also the conference committee, in a report accompanying the bill, expressed the view that casein imports are interfering with the dairy price support program and recommended that the President establish a limit on imports.

WOOL AND MOHAIR

The bill extends for 4 years the existing wool and mohair support program. The support level would be 77.5 percent of the rate determined under a formula contained in the basic wool-mohair law.

WHEAT

The bill sets wheat target prices at not less than $4.05 per bushel for the 1982 crop compared with $3.81 for 1981, and then at $4.30 for 1983, $4.45 for 1984, and $4.65 for 1985. Price support loan rates for the 1982–85 crops would be not less than $3.55 per bushel, compared with $3.20 for 1981. The bill authorizes the Secretary of Agriculture, in years when he determines that excessive surpluses are likely, to rule that farmers who want price support would have to comply with either cropland set-aside or direct wheat acreage reduction programs. The Secretary would also be authorized to operate a paid acreage diversion program, but farmers could not be required to enter this program as a condition of eligibility for price support. Beginning with 1982 crops, disaster payments would be mandatory only for producers who do not have Federal crop insurance available; but the Secretary would have discretion to make disaster payments to any wheat grower if disaster losses create an economic emergency which cannot be alleviated by crop insurance and other Federal assistance. The conferees, in a report accompanying the bill, urged the Secretary to consider offering an increased loan rate to farmers who enroll in any future set-aside or direct acreage reduction program.

FEED GRAINS

The bill sets corn target prices at not less than $2.70 per bushel on the 1982 crop compared with $2.40 for 1981, and then at $2.86 for 1983, $3.03 for 1984, and $3.18 for 1985. Price support loan rates for corn would be not less than $2.55 per bushel in 1982–85, compared with $2.40 in 1981. Regulations on set-aside or direct acreage limitation as a condition of price support, on use of paid diversion programs, on disaster payments and on similar provisions would be the same as those for wheat. The Secretary would be required to provide target price protection for grain sorghum and oats. Price support loans for grain sorghum, barley, and oats would be set at fair and reasonable levels tied to the level for corn. Conferees urged the Secretary to consider, as in the case of wheat, offering an increased loan rate to any producer who enrolls in a future set-aside or direct acreage reduction program.

GRAIN RESERVES

The bill requires the Secretary of Agriculture to continue the existing farmer-owned reserve program for wheat and feed grains, and requires him to set price support loans for grains placed in the 3-year reserve at not less than standard support rates in effect at the time the grain goes into reserve. The Secretary is given discretion to set terms under which grain may be withdrawn from the reserve by farmers without penalty, or under which he could encourage withdrawals by halting storage payments or raising interest rates. The Secretary is authorized to limit the size of the reserve, but the ceiling cannot be less than 700 million bushels of wheat and 1 billion bushels of feed grains. Whenever a reserve is in effect, USDA cannot sell any Government-owned grain for less than 110 percent of the current release price level applying to farmer-owned reserves. Interest rates on price support loans for reserve grain must not be less than USDA's cost of borrowing from the Treasury, but the Secretary is given authority to waive or adjust interest.

COTTON

The bill continues the current program through the 1985 crop, with loan rates based on a percentage of open market prices and a loan floor of 55 cents a pound. Target prices will be the higher of, first, 120 percent of the loan rate, or second, 71 cents a pound in 1982, 76 cents in 1983, 81 cents in 1984, and 86 cents in 1985. Rules authorizing the Secretary to require compliance with normal crop acreage planting limits would be dropped from the program. The Secretary would be authorized to require a reduction in cotton acreage as a condition of eligibility for price support. Also, the support program for Extra Long Staple cotton would be revised to eliminate direct payments to growers. Paid diversion programs would be authorized, but could not be made a condition of eligibility for price support. Disaster payments would be authorized under the same conditions as for wheat, feed grains, and rice.

RICE

The bill continues a program of price support loans and target prices for the 1982–85 crops, but it eliminates use of acreage allotments so that program benefits become available to all producers. The rice loan rate will continue to be 75 percent of the target. The Secretary will continue to have authority to reduce the loan rate if it threatens to interfere with exports, but he could not go below $8 per hundred pounds. Target prices will be not less than $10.85 per hundred pounds for 1982, $11.40 for 1983, $11.90 for 1984, and $12.40 for 1985. The Secretary would be authorized to require a reduction in rice acreage as a condition of eligibility for price support. Cross-compliance with other commodity programs as a condition of eligibility for rice support would not be permitted. Paid acreage diversion programs would be authorized, but could not be made a condition of eligibility for support. Disaster payments would be authorized under the same conditions laid out for wheat, feed grains, and cotton.

PEANUTS

The bill eliminates the traditional peanut acreage allotment system, allowing producers without allotments to grow peanuts without restraint, but retains the farm poundage quota system. The total national poundage quota would be reduced in 1982 to a minimum of 1.2 million tons, and would be dropped further to 1.1673 million tons in 1983, 1.1347 million tons in 1984, and a final floor of 1.100 million tons for the 1985 crop. The Secretary would be directed to apply quota cuts, as far as practicable, to quota holders who have not produced peanuts in recent years. Price support for quota peanuts grown within the farm poundage quota would be set at a minimum of $550 per ton for 1982–85, with annual increases beginning in 1983 to reflect increases in production costs but with a 6-percent limit on each annual adjustment. Support for nonquota peanuts would be set by the Secretary, based generally on world market conditions and fixed at a rate which would avoid any net cost to the Government.

SOYBEANS

Price support loan rates for the 1982–85 crops will be set at 75 percent of the 5-year national average price received by farmers with a floor of $5.02 a bushel. No production adjustment, cross-compliance requirements or reserve programs would be permitted.

SUGAR

The bill sets up a 4-year support program with support loan rates of 17 cents a pound on raw sugar for the 1982 crop, 17.50 cents a pound for 1983, 17.75 cents a pound for 1984, and 18 cents a pound for 1985. Program terms are designed to result in operation of the system without any cost to the Treasury. Between the date of enactment of the bill and October 1, 1982, when price support loans will go into effect, the Agriculture Department will support the market by announcing an offer to purchase sugar processed between the enactment date and March 30, 1982, at a rate of 16.75 cents a pound. No actual purchases are considered likely, however, because the Government would be seeking, by use of import fees, to keep market prices above the level at which producers could sell to the Government.

EXPORT AND EMBARGO PROTECTION—PUBLIC LAW 480

The bill requires the Secretary of Agriculture to compensate farmers whose products are affected by any future selective embargo on exports of agricultural products. The new protection would be activated in a selective embargo, which does not cover all U.S. exports to the affected country, and where the embargoed county purchases more than 3 percent of total U.S. exports of the affected commodity. Compensation to farmers would be provided by either or both of: First, direct payments covering the gap between postembargo market prices and 100 percent of parity, or second, an increase in the price support loan rate for the affected commodity to 100 percent of parity. The bill also creates an Agricultural Export Credit Revolving Fund. Loans from the fund, made on commercial-style terms by the USDA, would be designed to expand farm exports. The bill requires only a one-time appropriation since principal and interest repayments to the fund would generate money for future loans, and conferees said they hoped the plan could be funded for fiscal 1983. The bill also gives USDA discretionary power to formulate a standby export subsidy program which could be used, if found necessary by the President, to offset subsidies paid by other countries. Another section encourages the President to consult with appropriate congressional committees before entering into bilateral agreements on exports of farm products.

The administration is encouraged to consult with other major grain exporting nations on promoting more orderly marketing and higher prices. Additionally, the bill extends for 4 years authority for Public Law 480, the food for peace program, adding provisions designed to further encourage self-help steps by nations receiving aid.

NEW MEAT SAFETY PROTECTION

The bill contains a provision setting inspection and testing requirements designed to make sure that imported meat and meat products meet U.S. standards. Under the legislation, the Secretary of Agriculture is directed to enforce compliance with U.S. standards by: First, random inspections of imported meat and meat products to check for residues and to verify the species, beef, pork, and so forth, of the product; second, random sampling and testing of internal organs and fat—carried out at the foreign slaughterhouse by the exporting country under methods approved by the U.S. Secretary of Agriculture—to check for chemical residues. The legislation states that all imported meat and meat foods from cattle, sheep, swine, goats, horses, mules, or other equines which are capable of use for human food shall be subject to the inspection, sanitary, quality, species verification and residue standards applied to products produced in the United States. The new provisions would become effective 6 months after enactment of the law.

EMERGENCY HELP FOR POULTRYMEN

The bill provides discretionary authority to the Secretary of Agriculture to provide emergency feed aid to poultry producers hit by natural disaster. Existing law requires similar treatment for foundation herds of livestock, but the new bill gives the Secretary discretion over whether to provide aid for livestock, matching the new poultry provision.

SUNFLOWER

Although the bill does not mandate a price support loan program for sunflower, conferees will say in their report that in cases where this crop encounters disruptive market conditions, the Secretary of Agriculture should seriously consider adopting a loan program under existing discretionary authority.

TOBACCO: A ZERO-COST PROGRAM AND A CHANGE FOR MARYLAND TOBACCO

The bill expresses the intent of Congress that the tobacco support program be operated without cost to the taxpayer outside of incidental administrative expenses. The Secretary of Agriculture is directed to take whatever steps toward this goal are possible within existing law by January 1982 and to advise Congress by January 1982 of any legislative changes he recommends for reaching the goal. Also, the bill revises a portion of the law dealing with the production of types of tobacco which are not subject to marketing quotas. The effect of the change is to provide that Maryland-type tobacco will be charged against farm quotas when grown in areas where quotas for types like Flue-cured and burley are in effect.

MORE AID TO BLACK COLLEGES

The bill provides that the predominantly black land-grant institutions created under an 1890 law will get 5.5 percent of Federal funds appropriated for cooperative extension work with all land-grant colleges in fiscal 1982 instead of the 4-percent share they get under current law. In fiscal years 1983, 1984, and 1985, the 1890 college share will be 6 percent. In addition, the bill authorizes appropriations of $50 million over a 5-year period to the 1890 colleges to enable them to expand their currently inadequate research facilities so they can join as full partners with other institutions in serving State research needs.

SWIFT PEST CONTROL IN EMERGENCIES

The Secretary is given new powers to act swiftly to meet extraordinary emergency outbreaks of plant pests if he finds that actions taken by a State are not adequate. In such cases, the Secretary would have discretion to pay compensation for losses incurred as a result of Federal pest control action.

STATE GRAIN INSPECTION BROADENED

USDA would be authorized to allow some State grain inspection and weighing of export grain. The only States affected, however, would be those where grain exports are less than 5 percent of the national total. A few States currently operate export grain inspection; the new law deals with those States which have not been eligible to handle this function.

FARMERS TO ADVISE ON COST ESTIMATES

The bill creates an 11-member board, including 7 agricultural producers, to review USDA methods of estimating farm production costs and to make recommendations about these estimates to the Secretary. In a separate action, conferees agreed to draft a letter to the President urging him to hold a White House Conference to explore new solutions to national farm problems.

SELF-HELP FOR FLORAL INDUSTRY

The bill creates a program under which members of the floral industry, working through an industry floral board, can voluntarily assess themselves to raise funds for promotion and research. The program applies only to cut flowers, potted flowering plants, and foliage plants.

NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT AMENDMENTS OF 1981

This title extends by 4 years the congressional authorization to provide adequate support to funding for research, extension, and teaching aimed at continued gains in the productivity of the agricultural sector. The legislation also provides for strengthening the research and extension partnership between the U.S. Department of Agriculture and the Nation's land-grant colleges and universities. It also

expands the scope of activities to include aquaculture, rangeland management, and an International Dairy Goat Research Center. The center will serve a growing domestic industry and will aid Third World countries in developing a dairy and meat industry readily adaptable to arid and semiarid lands. Other provisions include authorization for a research-extension program concentrating on rural development and small farm problems; establishment of a Soybean Research Advisory Institute within USDA; a requirement that the Secretary of Agriculture include, in a regular annual report due January 1, 1984, a long-term need assessment for food, fiber, and forest products; and a directive to the Secretaries of Agriculture and Health and Human Services to report within 180 days on plans for a human nutrition research and information management system.

CREDIT, RURAL DEVELOPMENT, AND FAMILY FARMS

The bill extends for 1 year authority for conducting the Farmers Home Administration's existing economic emergency loan program with a $600 million limit on guaranteed and insured loans during the extension. In a report accompanying the legislation, however, the conference noted that actual use of the program is discretionary for the Secretary of Agriculture, but added that the conferees intend the Secretary to use the authority in the act to cope with economic emergencies. The bill also continues for 10 years an authorization for Federal stock purchases in the Rural Telephone Bank. The bill authorizes FmHA to make operating and ownership loans to small farm production co-ops, and removes obstacles to FmHA loans to unmarried persons. Also, the bill requires the Secretary to make farm storage facility loans available in storage-deficient areas. Further, it contains a policy statement supporting the family farm system and requiring an annual USDA report on family farm operations.

CONSERVATION

The bill authorizes a new special areas conservation program to identify geographic areas which suffer special, chronic erosion problems and to focus financial assistance on those areas. Also, the bill authorizes matching Federal grants to local governments for conservation; authorizes, subject to separate, later action on appropriation bills, USDA loans to farmers for conservation work; and authorizes a test of the feasibility of reducing excessive sedimentation in existing reservoirs. Also, the legislation gives the Secretary authority to accept volunteers in USDA conservation, resource, and other programs; authority to use Soil Conservation Service personnel and equipment to help local authorities in search and rescue operations in emergencies; and authority for experimental projects to improve water quality in surface-mined areas. The bill further establishes a Farmland Protection Policy Act aimed at minimizing the impact of Federal actions on conversion of agricultural land to other uses. Finally, the bill provides a legislative base for the resource conservation and development program to aid States, localities, and nonprofit agencies in dealing with local resource problems.

FOOD STAMP AND COMMODITY DISTRIBUTION

The bill extends appropriation authority for the food stamp program for 1 fiscal year with a spending cap of $11.3 billion in fiscal 1982. To further cut costs, a scheduled April 1, 1982, cost-of-living adjustment in food stamp allotments would be postponed to October 1, 1982. Other provisions include: Approval of some law enforcement powers for a limited number of designated USDA investigators who are responsible for food stamp felony violation cases; approval of additional penalties for food stamp fraud and increased incentives to States to reduce errors; agreement that some local and State energy assistance payments to the needy—those which are not clearly paid for energy assistance on a seasonal basis—will in the future be counted as income, thus reducing the recipients eligibility for food stamps—under present law all such State and local energy payments are excluded from income; permission for localities nationwide to adopt, if they wish to do so, workfare programs under which some able-bodied food stamp recipients are required to perform public service work in return for their stamps; approval of pilot projects for monitoring the nutritional status of needy people. The bill also provides that surplus commodities such as dairy products acquired by the Government under price support programs, beyond amounts needed for sales and other donations, will be donated to nutrition programs for the elderly and children and to local food bank projects which were authorized by a 1980 law to aid needy people.

Mr. Speaker, I yield 1 minute to the gentleman from New York, Mr. PEYSER.

Mr. PEYSER. Mr. Speaker, first of all I want to thank the chairman of the committee for the courtesies he has shown me throughout this long process on the conference and on the floor.

I want to say, for those who may not have been here during this last 1 hour of the rule, which incidentally I voted for and supported, as many did who oppose this conference, there were nearly 15 Members who spoke on the floor from many States, mostly the farm States; 13 of them 15 spoke against this bill. Every major consumer group, the major farm groups, are all opposing this bill, and for good reason.

From our own personal reasons in the House, it has really violated everything we did in the House. The sugar program is back in the bill. The peanut program is back in the bill. Cutting and making changes in the other farm programs that frankly are unreasonable. And most of all, for those interested in food stamps, you will be exposing the food stamps next year to elimination.

Mr. WAMPLER. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, today marks the culmination of nearly 1 year that Chairman DE LA GARZA, myself, and other members of the committee have been working on the 1981 farm bill.

Informal meetings were held in early February, and committee hearings were scheduled for late February 1981. Since that time, we have held thorough hearings, had extensive markups, taken the bill to the floor, and completed a long and arduous conference. Our most recent action came yesterday when we appeared before the Rules Committee to obtain a rule for the consideration of this conference report.

Last week the Senate adopted the conference report by the impressive bipartisan vote of 68 to 31.

In musical circles they say "the opera ain't over til the fat lady sings." Final action on the farm bill will not be over until the final vote goes up on the board today. Among others, a large number of farmers, producers, farm processors, agricultural exporters, foreign importers, farm machinery manufacturers, country and city bankers, and indeed our President will be interested observers of what takes place on this floor today.

I am not going to stand here today and tell you that this omnibus farm bill conference report which you will vote on today is the best farm bill that we could possibly provide for farmers and producers. I will say that it is my opinion that it is the best farm bill that we could present to you given the budget constraints we have had to wrestle with, the conflicting interests of producers and consumers we have had to resolve, and indeed given the conflicting interests of the various commodity programs where we have tried to be fair and equitable in the treatment of all commodities.

There will be some who still will say that farmers and producers have been asked to take an unfair share of the budget cuts which have had to be distributed throughout all sectors of the economy in this Congress. On the other hand, there are certain consumer groups who say we have been too generous to the farmers and producers.

I want to tell you that the farm bill conference which we just concluded was very nearly deadlocked toward the end. The administration claimed some $3 billion in costs had been added to the farm bill that was introduced on its behalf last spring. This was done when the administration agreed to accept the farm commodity programs contained in the Senate-passed version of the farm bill. As between the House and Senate versions in the conference, the administration favored the Senate version.

Yet by December 1, 1981, the House conferees and the Senate conferees, and the administration were some $700 million apart in costs of the conference report.

At that point, Senator LUGAR suggested that the chairman of the conference, Senator HELMS, the chairman of the House conferees, Chairman DE LA GARZA, Senator DOLE, Senator HUDDLESTON, and I meet with Secretary Block and see if we could come up with a compromise that all could agree upon. On Wednesday, December 2, 1981, we met for nearly 4 hours. We did come up with a compromise for which the Secretary obtained administration approval, and that broke the deadlock. What this meant is that of the roughly $700 million in difference, the administration absorbed more than $400 million and the House conferees came down some $250 million.

I might add that these costs do not mean that there is not considerably more U.S. Treasury exposure in this conference report than the so-called $11 billion, 4-year costs attributed to the farm commodity costs. Those $11 billion are what the administration can reasonably estimate at this time.

In April of this year, the administration and the Congressional Budget Office were estimating no deficiency payment costs for the 1981 crops. Yet, it is now safe to say that deficiency payments for wheat, rice, sorghum, and barley will cost nearly three-quarters of a billion dollars for the 1981 crop—fiscal year 1982.

I have said repeatedly since we embarked on the process of putting a 1981, 4 year farm bill together that the best farm program that Congress and the administration could provide farmers and producers is one that would see inflation cut to a reasonable level and a sharp reduction in interest rates. I believe that President Reagan's economic recovery program will provide that inflation and interest reduction for which we all are looking if it is given time to work.

Even now we have seen some deflation psychology abroad in the land as we have reduced Federal budgets and cut Federal regulations. Prime interest rates are being reduced, and I hope this continues. However, we must continue to fight inflation and mammoth Federal deficits so that we can help reduce farmers' expenses and production costs through lower interest rates and lower planting and harvesting costs.

Perhaps those who are claiming this will be the last 4 year farm bill that Congress will enact are right. However, farmers and producers want and I believe need a 4-year bill. A 4-year bill which aids farm planning tied to the mechanism of the Commodity Credit Corporation, that provides commodity loans and target price safety nets among other things, is good for farmers and farming.

We can argue among ourselves whether dairy, wheat, or other farm commodities could have been treated better in this bill. But no one—I repeat, no one—in the farming community—or the public interest generally—will be served by the failure to adopt this conference report. Congress can look again at a bill it adopts today, but it will be much more difficult to pick up the pieces if this conference report is defeated.

The Congressional Budget Office told us that after the first of next year the numbers we have been using since August in putting this bill together will change and that its cost estimates no doubt will go up. I would paraphrase our former chairman, Bob Poage, by saying, "You can get something of what you want by voting for this conference report or a whole lot of nothing by insisting on its defeat."

Those who are calling for the defeat of this conference report are in my opinion trying to upset a fragile bipartisan compromise that has been worked out with farm groups, certain public interest groups, the Senate, the administration and the House conferees among others.

To those who hear the arguments of those who say we can do better with reversion to the 1949 and 1938 Farm Acts or those who promise quick extension legislative solutions, I urge you to weigh these arguments carefully against the history of the nearly 1 year's work on this measure.

Are we suddenly going to have unanimity on some amorphous new farm bill when the measure before you was snatched from the jaws of a deadlocked conference? Are farmers, consumers, and others willing to live with 1949 and 1938 Farm Acts that were passsed for a farm environment 30 and 40 years ago when allotment and quota concepts do not at all reflect shifts in planting from one section of the country to another?

Or, are we going to tell farmers and producers that they can live for a year or two or possibly more on 3-month extensions of the 1977 Farm Act or some other hastily drafted substitute?

Are we going to tell farmers and producers and others that we can pass a foreign aid bill, but we cannot pass a farm bill? I hope not.

Are we going to tell farmers and producers we are going to put our narrow interest ahead of their total and balanced interests for a 4-year bill that they want? Are we going to tell farmers we are going to stretch them out on a rack of 3-month extensions that makes largely ineffective any planning for the future and which would paralyze the Commodity Credit Corporation as a mechanism and a system to aid farmers?

I strongly urge my colleagues to support this omnibus farm bill conference report. If the history of the 1977 Farm Act is any standard, that act was amended each year after its passage. Certainly, legislative oversight over the 1981 farm bill will be continuing and comprehensive in future years.

Farmers and consumers are not ill-treated in this measure. It is a balanced, reasonable compromise that does not give one or another group all it wants, but the general welfare and public interest will be served by its adoption.

At this point let me review for you briefly certain of the titles of this conference report and what each contains.

Turning to the specifics of the conference agreement, I will comment on some of the major provisions.

TITLE I—DAIRY

The dairy provisions establish minimum support prices for milk. For fiscal year 1982, the minimum level is set at $13.10 per hundredweight. For fiscal years 1983–85, the minimum levels are set at $13.25, $14, and $14.60, respectively. While these levels are low in terms of parity, producers can receive a minimum support level of 70 percent of parity if estimated net purchases are less than $1 billion for the last 3 fiscal years. In addition, if the volume levels of anticipated purchases of milk or milk products are less than 4 billion pounds in fiscal year 1983, 3.5 billion in fiscal year 1984, and 2.69 billion pounds in fiscal year 1985, dairy producers can receive a minimum price support of 75 percent of parity.

It is clear that the parameters of these provisions will require the industry to make the appropriate decisions in order to bring the cost of this program down and reduce CCC inventories of dairy products to manageable levels. If they accomplish these goals, producers can expect to receive a parity price support which will be fair and at the same time provide stability to the delicate supply-demand balance of this important industry.

The conference report contains provisions which extend the authority for seasonal base dairy plans and the pricing criteria used in Federal milk marketing orders.

Several provisions were included to provide the Secretary with additional authorities to use outlets to reduce the

inventories of CCC-owned dairy products. The conferees also agreed to express their views that a limitation should be placed on casein imports and will formally propose them to the International Trade Commission.

Finally, the Secretary is directed to provide an assessment of the existing programs in terms of dealing with surpluses of milk and to determine the regional impact of proposed pricing mechanisms and the resulting social costs and benefits of these programs.

TITLE II—WOOL AND MOHAIR

The price support for wool and mohair was extended for 4 years in the 1981 farm bill. The support price for shorn wool will be set at 77.5 percent of the formula rate, a compromise between the tentative agreement reached in conference.

The bill retains the payment provision setting the total amount of wool payments to 70 percent of the total gross receipts of duties collected from wool and mohair imports. It also extended the reimbursement provision limiting the amount of appropriations for reimbursement to 70 percent of annual gross receipts from customs duties on imported wool in the preceding calendar year.

These provisions should assure an adequate supply of wool and mohair and provide stability in wool income to our producers and encourage domestic production.

TITLES III AND IV—WHEAT AND FEED GRAINS

Titles III and IV relate to wheat and feed grains, respectively. The basic provisions for wheat and feed grains are the same. We preserved the target price concept, price support loans, and authorities for crop land set-asides and paid diversions.

We set the minimum price support loan level at $3.55 per bushel for wheat, and at $2.55 per bushel for corn. Loan levels for other feed grains—grain sorghum, barely, rye, and oats—would be set by the Secretary of Agriculture based on his determination of a fair and reasonable relationship to corn.

Minimum wheat target price levels were set at $4.05 per bushel in 1982, $4.30 in 1983, $4.45 in 1984, and $4.65 in 1985. Similarly, corn target prices were set at not less than $2.70 in 1982, $2.86 in 1983, $3.03 in 1984, and $3.18 in 1985. As was the case for price support loans, target prices for grain sorghum, oats, and, if designated by the Secretary, barley, were to be set by the Secretary at levels deemed to be fair and reasonable with respect to corn.

The oats target price was mandated this time, because of our concern over potential shortages of the high quality oats used in some food processes. We felt that a mandatory oats target price would provide a signal to farmers that this administration considers oats to be an important crop. While we intend for the Secretary to maintain a target price that will encourage farmers to produce enough oats, we do not intend for the Secretary to stimulate overproduction.

We retained basic set-aside and paid diversion authorities contained in the 1977 act. These provisions were drafted to insure that the Secretary would have the flexibility he needs to properly administer the program. We rejected the House language requiring minimum set-asides when domestic supplies exceed trigger levels, because we felt that this provision would be too restrictive.

Our feeling was this: If the Secretary does not properly use the tools we have given him under these titles, we will have to come back with legislation compelling him to do so. This is not new in our committee. We have made needed adjustments in the 1977 act every year since it was passed.

These titles do not satisfy many Members from wheat and feed grain producing areas. The target price and price support loan provisions represent modest increases in current levels, but they fall far short of corresponding increases in production costs. This is not the bill that we would offer to you, if there were not such stringent restrictions on the budget this year.

TITLES V AND VI—COTTON AND RICE

Title V of the conference report contains provisions for both Upland and Extra Long Staple cotton. The provisions on Upland cotton continue most of the current program provisions through the 1985 crop. Loan rates would continue, too, based on a percentage of the market price with a floor of 55 cents a pound. Target prices were retained with a compromise reached so that target prices would be the higher of either 120 percent of the loan level or 71 cents a pound in 1982, 70 cents a pound in 1983, 81 cents a pound in 1984, and 86 cents a pound in 1985.

Additionally the Senate receded to the House regarding provisions relating to ELS cotton. These provisions revised the price support for ELS cotton so that no direct payments would be made to growers.

Title VI of the conference report deals with the rice program. Price support loans and target prices would be continued for the 1982-85 crops. The conference agreed to mandated target prices for each year as follows: $10.85 per hundred pounds in 1982; $11.40 in 1983; $11.90 in 1984; and $12.40 in 1985. A major change in the rice program is the elimination of allotments so that all producers will be eligible for program benefits.

TITLE VII—PEANUTS

Title VII of the conference report pertains to the peanut price support and marketing programs. While the House-passed farm bill contained a limited peanut program, the Senate-passed bill basically extended the 1977 law, with higher price supports. The conferees accepted a compromise that contains a diminishing national poundage quota and price support levels beginning at $550 per ton for quota peanuts in 1982, with increases for the remaining years capped at 6 percent. Additional peanuts are to be supported at levels that will result in no losses to the Commodity Credit Corporation. The conferees decided that the abrupt elimination of the peanut program that has operated to the benefit of consumers and farmers alike was unwise. This scaled-down version attempts to continue to provide our consumers with adequate supplies of high-quality protein peanuts while giving American peanut farmers minimum assurances of a fair return on their investments of labor and money.

What I consider was the most controversial component of the peanut program, the acreage allotment system, has been eliminated, and I hope my colleagues can accept the peanut provisions of this conference report.

TITLE VIII—SOYBEANS

On title VIII, soybeans, the House receded to the Senate. This was because the price series we adopted as the basis for the soybean price support loan is no longer reported by the Department of Agriculture. Thus, the Senate language represents a minor change, more in the nature or a technical amendment, that will enable our formula to function.

TITLE IX—SUGAR

Title IX provides for a price support loan program for sugar beets and sugarcane. As the House-passed bill contained no provision for sugar, the House conferees receded to the Senate and agreed to support sugar beets and sugar cane at the following levels: From date of enactment to March 31, 1982, sugar would be supported with a purchase program at 16 to 75 cents per pound. Beginning October 1, 1982, a loan program would be implemented at 17 cents per pound for the 1982 crop; 17.50 cents per pound for the 1983 crop and 17.75 cents per pound for the 1984 crop; and 18 cents per pound for the 1985 crop.

TITLE X—GRAIN RESERVES AND NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD

On title X—grain reserves and the National Agricultural Cost of Production Standards Review Board—we receded to the Senate. There was a notable exception: We retained the House provision regarding forgiveness of violations, as offered by Mr. Evans, our distinguished colleague from the State of Iowa.

The reason we adopted much of the Senate language on grain reserves is that, like the set-aside and paid diver-

sion provisions under titles III and IV, we felt that the Secretary should have discretionary authority to deal with the changing situation. The House receded on this point only after we received assurances from the administration that the program would continue to be operated as it is now.

Similarly, on the National Agricultural Cost of Production Standards Review Board offered on this side by our distinguished colleague from Kansas (Mr. ROBERTS), we receded to the Senate. This is because the Senate language had been modified to include a number of technical amendments to make this provision acceptable to the administration.

TITLE XI—MISCELLANEOUS

Section 320 of the Agricultural Adjustment Act of 1938 provides that nonquota tobacco produced in any area of the Nation where marketing quotas for any kind of tobacco are in effect will be subject to the quota for the kind of quota tobacco traditionally produced in that area, except tobacco that the Secretary determines is readily and distinguishably different from any other tobacco produced under quota. The House amendment would make the "readily and distinguishably different" exception inapplicable to Maryland (type 32) tobacco, when not under quota, to marketing quotas when such tobacco was produced outside the State of Maryland in any quota area.

The conference also adopted language concerning inspection, sanitation, quality, species verification, and residue standards for all meat products imported into the United States.

The provisions essentially require that exporting countries shall be subject to the standards that are applied to domestically produced products.

The Secretary is required to enforce these provisions through random inspections for species verification and for residues. In addition, random samples will be made of internal organs and fat of the carcasses for residues at the point of slaughter of the exporting country.

In light of the recent problems we have incurred with adulterated meat entering this country, this language will improve existing statutes and provide consumers a safe and reliable product before it enters our food distribution channels.

TITLE XII—AGRICULTURAL EXPORTS AND PUBLIC LAW 480

Let me say a few words about title XII of this farm bill, which deals with agricultural exports and Public Law 480. We all know of the important role our farm exports play. Agriculture's contribution to our balance of payments problem is very great. A large portion of our imported oil bill is paid for in this way. We have long recognized that we must find more markets overseas, and over the last few years we have been setting new records both in volume and in dollar sales, but we must do even more work in this area. A strong farm export marketing program means that producers can maintain a high level of production at a profit. With such profitable production there is an assurance to our foreign customers that they will be able to get our quality products in such quantities that are sufficient and dependable year after year. I have long felt that we must provide for a direct export credit program. It is something offered by our competitors and expected by our customers. This type of program was phased out by the Carter administration and supplanted with a loan guarantee program whereby the foreign customer must arrange private financing, with our Government guaranteeing the credit in the event of default. This action was taken for budgetary reasons and has been carried over by the Reagan administration for the same reasons. This farm bill creates an agricultural export credit revolving fund which requires a one-time appropriation, since principal and interest repayments to the fund would generate money for future loans. The conferees to this farm bill indicated a confidence that such a one-time investment would return its value many times over and hoped that this provision could be funded in fiscal year 1983.

Another item in this farm bill that has generated much discussion in farm communities is that dealing with embargo protection. Since the last embargo, the so-called Russian embargo, the farmers of this Nation have felt that they were called upon to carry more of a load than was absolutely necessary under the circumstances. This bill addresses this problem by requiring the Secretary of Agriculture to compensate farmers whose products are affected by any future "selective" embargo on exports of agricultural products. Farmers will know that they will not in the future be singled out when an embargo is contemplated.

Another important feature of this farm bill is the extension of Public Law 480, the food for peace program, for 4 years, until 1985. I think all of us are in agreement that this program has proven to be very worthwhile and should be continued. Many countries originally helped when this program was initiated in 1954 are now our most important agricultural trading partners.

I support the food stamp portion of this conference report. I believe that you will find that the food stamp section is substantially the same as was contained in the farm bill passed by the House. There is one major difference—because there was one area in which the conferees could not agree—they reauthorized the food stamp program for 1982 only. However, the conferees did agree to review the program early in 1982 both to reauthorize the program for future years and to address other measures.

The provisions contained in the conference report will be a step toward tightening the administration of the food stamp program and eliminating fraud and abuse in the program. Additionally, the conference report allows any political subdivision that wishes to, to apply for a workfare project.

Some of you may know that the board of supervisors in one county in my district applied for one of the pilot projects for workfare. They are now operating a workfare project. I believe that all governing bodies in political jurisdictions should be able to have this choice. The conference report on the 1981 farm bill will enable them to do so.

The food stamp program is reauthorized for fiscal year 1982 and the "cap" is set at $11.3 billion, the estimate to fully fund the program for 1982. Please remember that the cost for the remaining portions of the farm bill over the 4-year period is about $11 billion and most of that money will be repaid. As you can see, the conference report contains funding for the food stamp program for 1 year that exceeds the cost of the farm bill for all 4 years. I believe that the conferees made sound decisions in their consideration of the food stamp program. I urge you to support this conference report.

TITLE XIV—NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT AMENDMENTS OF 1981

On the opening day of the 97th Congress, I introduced the National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1981, H.R. 23. This bill was subsequently modified and was introduced jointly by myself and Mr. BROWN of California on March 13, 1981, as H.R. 2561. The bill remained relatively intact through the legislative process, and was incorporated as title XIV in the 1981 farm bill. These provisions of this title will extend and improve upon title XIV of the Food and Agricultural Act of 1977 over the next 4 years. The most important features of the title XIV amendments, are:

First, they provide for a new Assistant Secretary of Agriculture to manage and speak for agricultural research and education in the Department of Agriculture itself, and throughout the Federal budget, research and education system, a task that has not been accomplished for several decades; second, they improve upon existing arrangements and establish in the statutes a lasting basis for Federal-State cooperative partnership in research, extension, and teaching in the food and agricultural sciences at the State land-grant colleges and universities; third, they increase the

membership of traditional agricultural advisory bodies under the title and change the submission dates of reports by these advisory bodies, thus making the receipt of this data more timely and practical; fourth, they place added emphasis on animal disease and health programs; fifth, new initiatives to establish aquacultural and rangeland research, and extension programs within USDA and among the States are authorized; sixth, funding authorizations for research, extension, and teaching programs in the food and agricultural sciences are reestablished and extended for another 4 years; seventh, they include authorization for a research and extension program for rural development and small farm problems; and eighth, they include provisions to increase the funding for research and extension at the 16 so-called 1890 black land grant colleges plus Tuskegee Institute based on a revised formula funding system.

TITLE XV—RESOURCE CONSERVATION

One of the most serious problems this country faces today is the permanent loss of productivity from our land due to improper management and erosion. Rising demands on American agricultural productivity, the conversion of cropland to urban use, and extreme drought conditions throughout the country have caused severe damage and loss to our agricultural land base. It is imperative that we take appropriate action on this critical problem.

Title 15 of the farm bill, the Resource Conservation Act, seeks to address our critical soil and water conservation problems in a rational and comprehensive approach. The resource conservation title authorizes a new "special areas conservation program" to identify geographic areas which suffer special, chronic erosion problems and to focus financial assistance on conservation in these areas; authorizes, subject to separate, later action on appropriation bills, USDA loans to farmers for conservation work; and authorizes a test of the feasibility of reducing excessive sedimentation in existing reservoirs. The legislation gives the Secretary authority to accept volunteers in USDA conservation, resource and other programs; authority to use Soil Conservation Service personnel and equipment to help local authorities in search and rescue operations in emergencies; and authority for experimental projects to improve water quality in surface-mined areas.

Title 15 further establishes a Farmland Protection Policy Act aimed at minimizing the impact of Federal actions on conversion of agricultural land to other uses. Finally, this title provides a legislative base for the resource conservation and development program to aid States, localities and nonprofit agencies in dealing with local resource problems.

I would also like to point out, Mr. Chairman, that the recently announced RCA program which outlines the Secretary of Agriculture's recommendations for a comprehensive soil and water conservation program, contains many of the ideas and strategies contained in the resource conservation title of the farm bill. The Department has pledged to work closely with the Agriculture Committee and Congress in incorporating title XV into the implementation of the RCA program.

TITLE XVI—CREDIT, RURAL DEVELOPMENT AND FAMILY FARMS

The credit, rural development and family farms title of the farm bill, title XVI, contains several provisions which should serve to benefit rural America while improving the efficiency of several Federal rural development programs. The economic emergency loan program of the Farmers Home Administration is extended for 1 year with a $600 million limit on guaranteed and insured loans made during the extension. The Secretary of Agriculture will have discretionary authority to use this program so that its resources can be targeted to persons and areas most in need of economic emergency loan funds.

Title XVI also extends for another 10 years the authorization for Federal stock purchases in the rural telephone bank, and removes obstacles to FmHA loans for unmarried persons. The Farmers Home Administration also is authorized under title XVI to make operating and ownership loans to small farm production cooperatives, and the statement of manager's language seeks to clarify congressional intent in regard to the administration of the FmHA water and waste disposal loan program as revised under the Omnibus Budget Reconciliation Act of 1981.

In order to cope with regional storage problems, the credit and rural development title of the farm bill requires the Secretary of Agriculture to make farm storage facility loans available in areas experiencing storage deficiencies. Finally, title XVI contains a policy statement supporting the family farm system, and requires an annual USDA report on family farm operations.

TITLE XVII—FLORAL RESEARCH AND CONSUMER INFORMATION

This title of the bill creates a program under which members of the floral industry, working through an industry floral board, can voluntarily assess themselves to raise funds for promotion and research. The program applies only to cut flowers, potted flowering plants and foliage plants.

REVERSION TO PERMANENT LAW

In conclusion, I want to remind my colleagues in the House that if this conference report should fail and the provisions of permanent law should go into effect for the commodities, a whole new set of problems would be created, not the least of which would be cost. Federal outlays would rise substantially to pay for commodity programs that have little relevance to the agricultural situation today. The following explanation of the effects of reversion to basic legislation, prepared by the U.S. Department of Agriculture, outlines some of the problems that would arise from such a turn of events.

REVERSION TO BASIC LEGISLATION

Without passage of new legislation, price support and production adjustment provisions of the 1977 act for the major commodities will revert to permanent legislation—1949 act for price support and 1938 act for marketing quotas and acreage allotments.

DAIRY

Beginning January 1, support would range between 75 and 90 percent of parity, adjusted annually, with support above 75 percent at the Secretary's discretion. On January 1, support would rise to $13.49 per hundredweight, costing an estimated $379 million more in fiscal year 1982 than if the support remained at $13.10 per hundredweight.

WHEAT

Per recent legislation, a referendum would be conducted not later than December 31 to determine whether wheat producers are in favor of a marketing quota for the 1982 crop. Farm allotments must be determined regardless of the outcome of the referendum. If quotas are disapproved, the support loan rate is at 50 percent of parity (about $3.77 per bushel) for allotment wheat. If quotas are approved by at least two-thirds of the producers voting, price support would be at 65 to 90 percent of parity ($4.90 to $6.79 per bushel). If the support loan is less than the total support level as proclaimed by the Secretary (65–90 percent of parity), the difference is made up with certificate payments, which would impact directly on consumer prices. The cost of the wheat program for fiscal year 1983 would be about $491 to $1,106 million higher than the conference provisions. A basic loan rate of $3.55 per bushel is currently assumed for 1982 crop wheat.

An additional problem is that no data base exists for allocating the national allotment down to the farm level.

FEED GRAINS

Price support through loans and purchases would be at 50 to 90 percent of parity ($2.73 to $4.91 per bushel, corn) beginning with the 1982 crop. If there is an acreage diversion in effect, the minimum price support is 65 percent of parity. No allotments or marketing quotas are applicable. A basic loan rate of $2.55 per bushel is currently assumed for 1982 crop corn.

The cost of the feed grain program in fiscal year 1983 under the reversion would exceed the cost of the conference provisions by $208 million.

UPLAND COTTON

A national marketing quota was proclaimed on October 15. A referendum must be held prior to December 31, per recent legislation. The minimum allotment is 16 million acres—less than is expected to be planted in 1982. However, two major problems exist with the cotton allotment: (1) no data base exists to allocate it to the farm level and (2) cotton production has shifted away from the States where the allotments are presently held. Allotments cannot be transferred across State lines.

Price support must be between 65 and 90 percent of parity (82.6 to 114.3 cents per pound) is the quota is approved in the referendum. If it is not approved, support is at 50 percent of parity (63.5 cents). A loan rate of 57.1 cents is currently assumed for 1982-crop cotton. For fiscal year 1983, the cotton program would cost $28 million more under reversion than under the conference bill.

RICE

Acreage allotment and marketing quota authority would be applicable to remain in place. A referendum must be held within 30 days of an announcement of the quota (not later than January 30). The quota is in effect unless rejected by at least one-third of rice producers voting.

When a quota is in effect, price support is between 65 and 90 percent of parity ($14.61 to $20.23 per cwt). Export subsidies could be paid. If the quota is not in effect, price support is at 65 percent of parity. A loan rate of $8.14 per cwt is currently assumed for 1982-crop rice. The cost of the rice program is projected $52 million higher under reversion than under the conference provisions. Over $500 million for export subsidies could also be paid.

PEANUTS

Marketing quota was announced on December 1. A referendum must be held by December 15, which would establish the quota for 3 years unless rejected by at least one-third of the peanut producers voting. Price support would be at 75 to 90 percent of parity ($701 to $841 per ton) if quotas are in effect. If quotas are not in effect, support would be at 50 percent of parity ($467 per ton). The differentiation between "quota" and "additional" peanuts would not exist. A loan rate of $550 per ton is currently assumed for 1982-crop quota peanuts in accordance with the conference provisions. The cost of the peanut program in fiscal year 1983 is projected $189 million higher under reversion.

SOYBEANS

Mandatory price support for soybeans would end with the 1981 crop. For the 1982 and subsequent crops, if support were provided for soybeans it must also be provided for cottonseed. Currently, the loan rate for the 1982 crop is assumed at $5.02 for soybeans.

WOOL AND MOHAIR

The current program of support at 85 percent of the formula price will expire on December 31. Discretionary authority for price support beyond this date is contained in the 1949 act. Price support through loans, purchases, or other operations may be provided at 75 to 90 percent of parity. If there were a wool program for the 1982-83 marketing year, support for shorn wool would be at $1.49 to $1.79 per pound. The support rate currently assumed for the 1982-83 season is $1.37 per pound.

SUGAR

No program required under basic law.

GRAIN RESERVE

Authority to operate the reserve would continue. If a reserve is in effect, resale prices would be at 105 percent of the call prices.

COMMODITY COST OF REVERSION

For fiscal year 1982, reversion would cost $0.7 to $1.6 billion more than the conference provisions. For fiscal year 1983, the cost of reversion exceeds that of the conference provisions by $2.1 to $2.9 billion.

P.L. 480

Authority to implement the Agricultural Trade Development and Assistance Act of 1954, (P.L. 480) presently expires December 31, 1981. No other authority is available which would permit CCC to extend concessional financing on the same terms as now permitted in titles I and III or to make foreign donations as presently authorized by title II.

FOOD STAMP PROGRAM

If the omnibus farm bill is not enacted, there would be no authorization for appropriations to conduct the food stamp program for fiscal year 1982.

TITLE XIV—AGRICULTURAL RESEARCH, EXTENSION AND TEACHING

In general, the authorizations for appropriations for the agricultural research, extension, and teaching programs expire on September 30, 1982. An exception is the authorization for appropriations for title V of the Rural Development Act of 1972, as amended (7 U.S.C. 2651 et seq.), which expired on September 30, 1981.

Also, the terms of the Joint Council on Food and Agricultural Sciences, the National Agricultural Research and Extension Users Advisory Board and the Animal Health Science Research Advisory Board expire on September 30, 1982.

[1] Referendum required. Analysis done with both "Yes" and "No" vote for wheat and cotton.

Mr. Speaker, at this time I yield 2 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. I thank the gentleman for yielding.

Mr. Speaker, I have worked long and hard on this bill. I have served on the conference committee. All of that I have gone through I must sum up in a mere 2 minutes. This will not be easy to do.

What I would like to do is to use this chart here, because I think it says it all.

What we have done to what the House did is unbelievable. I could go on with what we did to the grains, the fact that we put a sugar bill in when we did not have one, and all those things, and the House voted it out.

Let me point out those two things we voted so overwhelmingly on and what we did to them. We voted for a reasonable dairy bill, 255 to 153. We voted to do away with the peanut program, 250 to 159. What did we come back with? We went out with a reasonable dairy program of a 4-percent increase over the 3 years here—down to 1 percent.

Peanuts for that 3-year period, we went up 33 percent. The House said do away with it. We said increase it.

□ 2030

The House said, do away with it. We said, increase it. We said do a reasonable dairy program. The conference committee says cut it almost out.

The rest of my time I am just going to stand here and ask you to focus on that farmer, and I am just going to stand here in silence for the thousands of young farmers—for the thousands of young farmers that are going to die economically unnecessarily because of this bill, and for the billions of dollars that the consumers are going to pay unnecessarily because of this act.

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from South Dakota (Mr. DASCHLE).

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Speaker, I intend to oppose the conference report on the farm bill. I cannot, in good conscience, support legislation that will likely cost far more than the administration's estimations, while at the same time undermine America's agricultural foundation. The bill threatens the future of Kansas farming, the very underpinning of the State's economy. Other farm areas, as well, will not be spared the bill's negative effect.

I oppose the bill for three reasons:

First, the bill is costly because it lacks the creative, cost-effective provisions of the House-passed version and, instead, relies on payments from the Treasury. For instance, the set-aside provision in the House bill would have saved the taxpayers $1.7 billion, according to the Department of Agriculture estimates. The provision would have bolstered farm income. The administration opted for a more costly and less certain discretionary approach that entails no savings. The administration has been saying publicly that the bill will cost $11 billion, but USDA sources indicate that it will reach closer to $15 billion. I am afraid they are using mirrors in trying to show that this bill is less costly than other versions.

Second, the bill contains no price strengthening mechanism to avoid the deficiency payments that are paid to producers whenever prices are below certain targeted levels. These payments come directly from the Treasury. Because no end to low prices is in sight, expensive payments will likely result. Farmers don't want Government intervention. They want markets that work. But, by encouraging fence row to fence row production and low prices in the bill, the Government will still have to make these payments. The bill maintains an expensive program that, for all its cost, does nothing to shore up a weakened farm economy.

Third, the bill helps out a range of less significant commodities, such as peanuts and tobacco, but allows inadequate support to our most basic crops—wheat and feed grains. While all agriculture needs to be revitalized, the bill's priorities are misdirected when overriding political considerations permit smaller commodities to have precedence over those which are the basis of American agriculture.

Not everything in the conference report is bad. Certain provisions, such as embargo protection, expansion of export credit, and a cost of production board would help the agricultural economy. They are not, however, by themselves enough to persuade me to vote for the bill when wheat and feed grains are treated so shabbily.

The people of my district fully understand that a failing agricultural economy contributes to a failing total economy. They fully understand that the issue is not only economic but strategic, as well. Our national defense is enhanced when there is strong agricultural production; it is weakened when there is not. Surely we can come up with a farm bill that does not undermine the farmer. This legislation is irresponsible and unrealistic. It would set up a disastrous economic future for farmers and for our total economy.

Mr. DASCHLE. Mr. Speaker, this has been a long, very hard fight, one that so many Members have participated in from both sides of the aisle; one in which we have put a great deal of effort in to bring about some equity. The fact is that the doom on this bill was sealed when we passed the budget resolution last spring. Now, we come before this body under that very austere budget resolution and expect our producers to swallow—to swallow the fact that they are going to have to absorb one-third of their cost of production for the next 4 years, one-third of their cost of production when they spend 66 percent of their income on interest alone, when they have lost net farm income of some 69 percent since 1979.

So, indeed we are seeing what I think is the most austere of austere budgets when we look at the farm program this year, and indeed it is probably the most inequitable piece of legislation on which this Congress is going to have to act this year, as we close out this congressional session.

Mr. WAMPLER. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Missouri (Mr. COLEMAN).

Mr. COLEMAN. Mr. Speaker, we have heard people speak this evening on the farm bill. They are going to vote against it because is has something to do with peanuts. Some are going to vote against it because it has something to do with sugar. Others are going to vote against it because it has food stamps in it. Other Members are not happy with the target and loan prices because they are too low. Others, believe it or not, think they are too high.

The question is, What are we going to do? There is very little we can do. I was a conferee, and frankly, I wish we had a little bit more generous bill that we could bring to the floor this evening, but that was not in the works. I feel the administration was too unyielding, but the fact of the matter is, Mr. Speaker, we are now at the point when we have to make tough decisions.

I am not wildly enthusiastic about this farm bill. We have just three options available to us this evening. The first one is, do not approve the conference report; send it back to conference to get better target and low price figures for farmers. Mr. Speaker, the President has said that he has drawn the line. This is the best deal we could come out of conference with. He will veto anything above these figures. If we go back to conference we are not going to gain anything by it. We cannot override a veto.

We have a second alternative. The second option we have this evening is to extend the current 1977 farm bill by a year, but that begs the question. How can we do that without getting right back down to the dollars and cents budget issue—how much for this subsidy, how much for that price support?

If we cannot work it out in this bill, we cannot work it out in a 1-year extension.

Finally, we could throw up our hands and go home and do nothing. Then we would revert back to the 1949 act. Mr. Speaker, under the 1949 act in 2 short years we will have $4.5 billion more in expenditure on farm programs than what we are bringing to the floor this evening. That is a budget buster. That is going to raise interest rates or keep them high for the American farmer, which is the last thing that any of us who are concerned about the farmer want to see happen.

Mr. Speaker, I do not know anybody who endorses this bill enthusiastically, but I can enthusiastically endorse passage of it this afternoon because it is the only viable alternative we have left at this late hour. There have been statements that this bill has a 1-year food stamp proposal in it, that somehow we are going to ax the food stamps for next year. We will talk about that later on, but I want the Members to know that this bill does have food stamps in it—$11.3 billion worth.

People have said, "Well, if we do nothing on this bill the food stamp program just keeps rolling right along." That is in error because the food stamp authorization is contained in this bill, not any other piece of legislation on the books. We are short $1

billion for the food stamp program for next year. If we do not pass this bill tonight, we are going to be short $1 billion for the food stamp program for 1982.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, we have heard a lot of discussion in the debate on the rule on the point the gentleman just made, that we would revert to the 1949 act, is not true. Is that correct or not?

Mr. COLEMAN. If we come up with no bill this year, tonight, this session, we will go back to the 1949 act, and it will cost $4.5 billion more than the $11 billion that this bill has in it for farm programs.

Mr. ROUSSELOT. Well, but the statement is, "Oh, no, we will get some kind of a simple extension for 30 days, 90 days." Is that true?

Mr. COLEMAN. I do not think that there is a consensus to go out and try to get a 90-day continuation of the present farm bill because we cannot decide on target and loan prices. We cannot decide on the budget figure. That is why we are having the big discussion this evening. Just extending it 3 or 4 months or for 1 year is not going to solve the question.

Mr. ROUSSELOT. There are some of my colleagues on the Democratic side that want to revert to the 1949 act.

Mr. DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. LUNDINE).

Mr. LUNDINE. Mr. Speaker, I rise in opposition to the conference report on S. 884, the Food and Agriculture Act of 1981.

The conference report is clearly inadequate and should not be accepted. It is unfair in its treatment of various commodities, requiring major sacrifices from some producers in order to finance new or increased subsidies for other, more favored producers. The legislation reduces dairy support prices to an historic low and provides inadequate support for such key commodities as wheat and feed grains.

At the same time, it provides new and costly subsidies for sugar producers and continues the current peanut program with a sizable increase in support prices. The report also protects commodities such as tobacco, cotton, and rice from the kind or program reductions that have been made in all other domestic programs.

The major share of sacrifice in this legislation will come from the Nation's dairy farmers, who will see the dairy support price drop below 60 percent of parity by 1985. The bill would permit higher milk support levels, but only under circumstances in which a large number of dairy producers would be driven from the market. Let me emphasize that this is exactly what this legislation will do—it will undermine the viability of the small dairy farm and force many dairy producers out of business.

Equally important, the conference report does not encourage or facilitate the expansion of American agricultural production. If anything, it continues to restrict production of key commodities, stifles agricultural productivity, and inhibits the increased sale of American agricultural products abroad. This is clearly not a producer's bill. It is a corporate subsidy bill. It provides sizable benefits to the largest agricultural producers and processors at the expense of both farmers and consumers.

For the first time, certainly in my memory, we are seeing a major farm bill opposed not only by the major national organizations representing consumers, but also most of the national associations representing farmers. It comes as no surprise that the major source of support for this bill comes from the large corporate producers, the processors, the middlemen, and the allotment holders. Thanks to well-organized, well-financed lobbies, these groups alone will benefit from this legislation.

I have heard the argument made in support of this legislation that the American people are tired of "business as usual" in Washington. Let us not fool ourselves. This bill is business as usual. It represents the kind of commodity deals and tradeoffs between agricultural lobbies that have dominated congressional actions on farm legislation for the past 40 years.

I am particularly concerned with the peanut provisions in the bill. The House conferees completely ignored a 250 to 159 House vote to end the current peanut allotment and quota systems. Instead, the House conferees accepted Senate language that continues almost unchanged the current program. It substitutes "poundage quotas" for acreage allotments and uses the quotas to restrict all domestic production and Government subsidies to current allotment holders.

Instead of acreage allotments, the poundage quotas will now dictate where peanuts will be grown, who can grow them, and how much will be produced for domestic consumption. Peanut farmers will still be required to pay unnecessary and costly lease payments to current allotment "lords" for the right to plant peanuts and sell them on the domestic market. Last year, at a $455 per ton support price, these allotment leases added more than $200 million to the cost consumers paid for peanuts and peanut products.

The conference report increases this cost to consumers by raising the peanut support price to $550 per ton, an immediate 21-percent increase. It also provides an escalator that will increase price supports by 43 percent over the life of the bill.

No other commodity is so favorably treated in this legislation. And this, I must point out, is a commodity support program that was opposed by 250 Members of the House and 47 Members of the Senate. The provision overwhelmingly supported by the House would have provided a straight loan support program for peanuts at a price support level closer to the $250 per ton world price for peanuts rather than the outrageous $550 per ton price in the legislation.

Let me also point out that the conference committee accepted new peanut restrictions that were not subject to conference and require a special waiver for consideration. It eliminated provisions in the Senate bill that would have made it easier to transfer production quotas to actual farmers and would have permitted the transfer of quotas anywhere within a State. These and other changes made by the conferees provide for tighter control over peanut production than envisioned even in the Senate bill.

The conference action on peanuts represents a repudiation of the House position on the issue and a capitulation to both the Senate and the Reagan administration.

Legislation which raises peanut price supports by 43 percent while reducing dairy supports from 80 percent to 58 percent of parity is clearly inequitable. Legislation that adds $6 million to consumer costs for peanuts and sugar alone is unacceptable. Such legislation should not be approved.

I urge the House to defeat the conference report and send it back to conference.

Mr. DE LA GARZA. Mr. Speaker, I yield 2 minutes to the gentleman from North Carolina (Mr. ROSE).

Mr. ROSE. Mr. Speaker and my colleagues in the House, you may not like this bill for any number of reasons, but for Lord's sake, let us get a few things straight about the peanut program.

I cannot believe the chart that my good friend from Vermont just showed the Members here on the floor. The peanut program, by all USDA's estimates, is going to cost zero. Has anybody in this place told the Members that the dairy program is going to cost zero, JIM? When you compare the peanut program with the zero cost in the budget to the dairy program—now, I am for the dairy program. I used to be chairman of that subcommittee, and I continue to support it despite charts like that that misled the Members of this House. That is just simply not the facts.

We have opened up peanut production to anybody that wants to grow peanuts. That has not been stated in

this body accurately. The Skippy Peanut Butter Co. says the sales of Skippy, the largest selling peanut butter in the United States, increased in 1980 despite the U.S. peanut crop shortage. Peter Pan, S Mark, profits up. Planters say, "We succeeded in increasing the market share and positioned ourselves well for 1981." That is from the annual reports of the companies that make peanut butter.

□ 2040

We have trimmed to the bone in the conference the peanut program. We have removed all the costs from it. We have reduced from 1.44 million tons down to 1.1 million tons, the national quota, and said anybody can grow the others.

I even got PAUL FINDLEY happy with the peanut program. PAUL FINDLEY, the man who has been against this program, is going to support it, and I urge my colleagues to do the same.

Mr. WAMPLER. Mr. Speaker, I yield 3 minutes to the gentleman from Montana (Mr. MARLENEE).

Mr. MARLENEE. Mr. Speaker, as a member of the Agriculture Committee, as a member of the conference committee, let me make it clear that I rise in adamant unequivocal opposition to this conference report.

The 1981 agriculture bill is a tragedy, a tragedy that occurred because this administration had a mind set to write a bill that had no exposure, and no risk. And that is exactly what they have. A bill that is like an insurance policy that has no cost, no premium, and tragically, no coverage.

The bill is a tragedy because using USDA's own projections and estimates we could have written a measure that had little exposure and little risk and yet gave grain producers a higher market price. Not from the Treasury but from the marketplace.

The bill is a tragedy because it turns its back on $3 billion in increased revenues from the export market, $3 billion more over the life of the bill with no additional exposure to the Treasury.

I offered that formula to the conference with unanimous support on the House side—yet it was rejected by the Secretary of Agriculture and a Senate vote of 5 to 3.

For those of you who may be leaning toward voting for this measure, I would urge you to ask yourself what would $3 billion of foreign capital infused into the economy of this country do for renewed vigor and economic activity; $3 billion extra of foreign capital would create approximately $21 billion worth of economic activity. But tragically instead we wrote a farm bill that turned its back on that, turned its back on the farmers of America and gave them instead a bill that allows the relative parity position of the grain producer to slip $1.10 during the life of the bill, when this producer is now selling his product at less than 50 percent of parity. That is tragic.

Yes, I have heard the dire predictions of what would happen if we did not pass this report. Well, I do not buy that line either. The Secretary has stated they will come back with budget figures that are lower. I might ask if he cannot sell this bill, how could he sell one that is worse?

Predictions that reverting to the 1949 act would be a disaster are not true for the grain producer. At least under that act, the grain producer is covered by tying the loan to the parity level or cost of production.

There are options open if this report is defeated:

First. The chairman can request a new conference.

Second. He can request a new conference and ask the House for instructions.

Third. We can let the bill die and write a 2-year proposal.

Fourth. We can extend the 1977 act 2 years.

When the Members of this body vote, I ask you to keep these facts in mind.

The market price of wheat is now $3.20 f.o.b. Montana. Last year it was $4.70.

The cost of producing that bushel is now $6.51. Parity is $7.13.

This bill turns its back on $3 billion in additional export revenues.

This bill turns its back on the producers.

This bill steals tariff revenues that rightfully belong to the wool producers.

This bill deserves to die.

I urge you to defeat the conference report.

Mr DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Speaker, instead of this extremely bad bill, this conference report, what we should be doing is putting this provision, getting the farmer a higher price for our foreign export sales. Now we bankrupt the farmer, we bankrupt the Treasury, we bankrupt the consumer.

Instead, we should defeat this bill and bring back a bill that sets higher prices for our foreign sales and get the billions of dollars more from countries like the Soviet Union, Japan, and Germany that can afford to pay it. Our farmers cannot.

Mr. DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. FITHIAN).

Mr. FITHIAN. Mr. Speaker, I thank the chairman for yielding. I compliment him and the gentleman from Virginia (Mr. WAMPLER) for their work on this bill.

But I have to tell my colleagues in the next 24 months we will have more farm bankruptcies in the United States than at any time since the Great Depression. If my colleagues take a careful look not at the commodity section, that is bad enough, but if they look at the credit section in this bill and then go on over and look at the conservation section in this bill, I think they just might agree with me if this bill becomes the law of the land and governs our agriculture for the next 4 years we will plow under 10 percent of the American farmers.

I really do not think that is what my colleagues want to do, but that is what this bill is going to do. Mark my word.

Mr. DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from Kentucky (Mr. HUBBARD).

Mr. HUBBARD. Mr. Speaker, I rise to speak in opposition to passage of this bill.

Most of the farmers in my district are opposed to this measure.

With the adjusted farm income at the lowest level since the Depression, this bill will only contribute to the economic disaster that we now have in rural America.

During the past several weeks, as I have traveled through the agriculture-rich First Congressional District of Kentucky, I have talked to many farmers who have told me that they are on the brink of financial ruin. The financial destruction of the family farm has a ripple effect throughout the economy, hurting the storekeeper, banker, homebuilder, and many, many others.

I believe passage of this bill will lead to serious dislocations in farming areas, and to the financial ruin of many young, beginning and highly leveraged farmers in my district.

I owe it to the farmers of my district, yes, all the people that I serve in western Kentucky, to oppose this bill.

Mr. WAMPLER. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. Mr. Speaker, in 1977 for the first time I supported a general farm bill. I did it with misgivings. Today I support this bill enthusiastically. But my own experience of the prior 20 years in dealing with farm legislation makes me understand the feelings of those who almost automatically want to vote no when a farm bill comes up. I can understand the feelings of those who tried to strike out the sugar provisions of this bill because in 1965 I began an effort to do away with the sugar program, which then was involved with country quotas, to the great embarrassment of our country and this institution.

So I can understand those who were very elated when the Peyser amendment prevailed.

I have also had a longstanding desire to see the peanut title of this legislation reformed because it seems to me really against our traditions as a

nation to limit the franchise to grow peanuts to certain people who owned lands, 30, 40 years ago. That really is out of tune with our traditions.

I have also felt that we ought to do some reform on tobacco. I suspect that many in this Chamber and others who will be tuned in on television might share in the same feelings that I have just expressed.

In each case those who share these feelings can vote for this bill with enthusiasm. Those who supported the Peyser amendment can rejoice because the effect of their missionary work brought down the beginning support price for sugar from 18 cents to 16.5 cents, and in the field of sugar that is a big reduction.

Those who supported the Lundine amendment can rejoice in the fact that their hard work to bring about a reform in the peanut program did result in a substantial reduction of about 10 percent in the price support for peanuts as contrasted with the Senate version, and about an 18-percent reduction in the poundage quota over the lifetime of the bill, opening up the right to grow peanuts to anyone in this land. That is a big reform.

□ 2050

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I know the gentleman has for years worked in this committee to try to reduce subsidies in many of these areas.

Now, we have had the statements and all kinds of charts, trying to indicate that there is some kind of a vast increase in peanut subsidies.

What will it cost the Government under this program for peanuts?

Mr. FINDLEY. The forecast for Government cost for peanuts is zero.

Mr. ROUSSELOT. Is what?

Mr. FINDLEY. In fact, the zero would have occurred at a higher level of price support.

The net cost to the Treasury is zero. That is quite in contrast to dairy.

Mr. ROUSSELOT. How would that cost the consumer more?

Mr. FINDLEY. Frankly, we are in a progression of reduction of poundage quotas which will reduce the price of peanuts to consumers.

Mr. ROUSSELOT. Reduce the price to consumers?

Mr. FINDLEY. Not as rapidly as the gentleman from New York (Mr. LUNDINE) would like but, nevertheless, progress in the right direction.

Mr. ROUSSELOT. Reduce the price to consumers

Mr. FINDLEY. Indeed. No doubt about it. And there will be no cost to the U.S. Treasury.

Mr. ROUSSELOT. So this is a consumer bill then?

Mr. FINDLEY. Indeed it is. Especially in regard to dairy.

Mr. ROUSSELOT. Well, we get confused when we hear from some of our colleagues who claim to represent the consumer all the time. And I know the gentleman has always fought hard to make sure that we are not subsidizing farm products so that it adds to the cost of the consumer.

Now, the gentleman can assure us that on the peanut program, the consumer is going to gain; is that correct?

Mr. FINDLEY. The gentleman is making the point beautifully.

And I want to make one further point, and that relates to dairy, in which the gentleman from Iowa (Mr. HARKIN) is very interested.

Dairy has been an enormous problem to the Treasury and to the consumer, and this bill brings about a very fundamental reform that will benefit all Americans.

I urge support for the bill.

Mr. Speaker, I think it would be a good idea to remind my colleagues of how far we have come with this bill since it was passed by the House.

True, we partially restored the sugar and peanut programs. I am not a fan of these programs. I voted against the sugar program and I joined my friend, the gentleman from New York (Mr. LUNDINE) in leading the fight for reforms in the peanut program.

But I support the sugar program reported by the conference committee. Today, the European Economic Community is supporting sugar at 27 cents per pound. That is almost double the support level contained in this bill. They were taking that sugar that they were paying 27 cents per pound to produce and they were selling their surplus—and, at 27 cents a pound, there is plenty of surplus—dumping it on the world market at 12 cents per pound.

This is hurting sugar producers in this country. It is hurting sugar producers in other countries—particularly in the Latin American countries. And, it is hurting corn farmers in this country, because corn sweeteners compete with sugar.

The Reagan administration is committed to taking on the EEC through the GATT mechanism, but this takes time. Meanwhile, our producers are taking it on the chin through artificially depressed prices. I have never been one who advocated protectionism. I think our domestic industries must meet fair competition on their own, with Government intervention only to the extent necessary for orderly economic transitions. This is clearly a case of unfair competition and I think we should meet it.

I support the 1981 farm bill agreed to by the House-Senate conferees, including its peanut provisions. They represent, in my judgment, a significant improvement over the peanut provisions of the Senate bill. They move toward eliminating an outmoded system of acreage allotments and marketing quotas.

Before discussing where we are going, let me capsule where we have been. The bill reported by the Agriculture Committee, which was roundly defeated in the House, perpetuated the historic allotment system for peanuts. The Senate bill contained some distinct departures from the rigid scheme of the past. For example, it permitted anyone to produce peanuts. It maintained, however, various vestiges of the old scheme of things which discriminated against the new grower. We have now made real progress from that point.

Perhaps most significantly, the conference bill places new producers of additional peanuts on equal footing with old producers of additional peanuts. I would note that additional peanuts, are peanuts produced by quota holders in excess of their poundage quotas, and all peanuts produced by new growers, who would have no quotas. Poundage quotas, which were first put in place by the 1977 farm bill to replace marketing quotas based exclusively on the production of specific acreages, represent the portion of a quota holder's production which may be sold for domestic food purposes or placed under price support at the quota loan rate. Additional peanuts may be sold by producers only for crushing for oil, or for export, but additional peanuts placed under loan may be sold by grower cooperative for domestic food use. Several provisions of the Senate bill disadvantaged new growers of peanuts as contrasted with the quota holders. With respect to production of quota holders, the Senate bill made a distinction between additional peanuts produced above the quota but within what was referred to as the farm base production poundage. This term has its roots in the old allotment system and is computed by multiplying the farm acreage allotment by the per acre peanut yield for the farm. It is deleted entirely in the conference compromise.

The Senate bill in this regard provided as follows:

(1) Handlers could contract with producers for the purchase of additional peanuts produced within the farm base production poundage for domestic edible purposes; the same privilege was not extended to additional peanuts produced by new growers;

(2) Additional peanuts produced by new growers and placed under price support loan could not be sold for domestic food purposes until all additional peanuts produced by quota holders within their farm base production poundage were sold for such purposes;

(3) Price support was mandatory for additional peanuts grown by quota holders within their farm base production poundage, but price support was only discretion-

ary with the Secretary for additional peanuts produced by new growers; and

(4) Pools of loan peanuts maintained by grower cooperatives were to be maintained on a separate and distinct basis for additional peanuts grown by quota holders within their farm base production poundage and additional peanuts produced by new growers.

One of the fundamental reforms of the conference compromise was to remove all of these provisions which discriminated against new growers.

Second, the national poundage quota—that is, the quantity of peanuts which may be marketed by producers for domestic food purposes or placed under price support at the quota loan level—has been substantially reduced. In 1981 that quota was 1,440,000 tons. The Senate bill set the quota at a minimum of 1,240,000 tons, a figure therefore subject to increase. The conference bill reduces that figure to 1,200,000 tons for 1982—a reduction of over 18 percent from 1981—with no possibility of increase, and in successive steps further reduces the figure to 1,100,000 tons for 1985.

Let me illustrate the significance of these changes. It is anticipated that the demand for peanuts for edible purposes in the United States in 1982 will be in the area of 1,200,000 tons. Therefore, the reduced quota will approach this demand. Consequently, few if any quota peanuts will come under Government loan. In following years, domestic edible demand is expected to increase, while the poundage quota will decrease. Thus, there will be a need to use additional peanuts for edible purposes. Under the conference compromise, both new and old growers of additional peanuts will have an equal opportunity to share in this market. And consumers will be assured an adequate supply of peanuts for food purposes.

Another aspect of the compromise agreement deserves emphasis. The reductions in the national poundage quota required by the bill are to be achieved by reducing quotas of holders who have not produced peanuts. Under this provision, quota holders whose farms do not have adequate tillable cropland to produce the quota, whose quota was not produced for other reasons, or whose quota was produced on a farm to which the quota was leased, will have their quotas reduced. On the other hand, farmers who produce peanuts on their own farms will suffer no reduction in their quotas under this provison, except in the unlikely case that reductions from the quotas of nonproducers are insufficient to achieve the required reduction in the national quota. This change from the Senate bill mitigates what I consider to be a serious defect under the present system—the control of production by those who do not produce.

I have not at this point highlighted cost and budget implications of the conference bill. But they too are material. The Senate bill set the minimum support price for quota peanuts at $596 per ton for the 1982 crop. The compromise sets this price at $550 per ton—a reduction of nearly 8 percent. While the conference bill contains an escalator in the price for later crops to reflect increases in production costs—as did the Senate bill—it caps such increase at 6 percent. The Senate bill contained no caps. This change not only insures that the program will be operated at little or no cost to the Government; it represents a material savings for consumers since the quota loan price tends to establish the market price for unprocessed peanuts.

Further, as indicated above, the compromise requires a support program for additional peanuts at a level to be set by the Secretary to insure that it results in no cost to the Government. While the Senate bill required a support program for additional peanuts grown by old producers it made support for additional peanuts grown by new producers discretionary with the Secretary.

I would personally have preferred a bill that more nearly approached the version adopted by the House. But I am convinced that the conference substitute is a real improvement over the Senate bill.

A number of my colleagues are concerned that the sugar and peanut provisions in this conference report represent unreasonable costs to consumers. We are talking about a few cents a pound for these products.

Now, let us look at the savings we are offering consumers. The dairy savings, alone, will run millions of dollars. Government outlays for dairy programs are cut by several hundred million dollars from what they would have been under the House bill.

We cut price supports for wheat and feed grains and rice. We cut wool supports. We cut almost $6 billion out of the farm bill passed by the House. And, that figure represents only estimated Government outlays. The consumer savings are significantly greater.

This bill is not perfect. There are a number of farm State Congressmen who feel they have to vote against this bill because we cut too much.

What we have is a bill that provides basic supports for agricultural commodities, authorizations for food stamps and commodity distributions, reauthorization for the Public Law 480 food aid programs, stronger laws to assure the safety of imported meat, the beginning of the end for tobacco subsidies, and peanut privileges, authorization for a wealth of research and teaching activities, and authorities for credit relief in the agricultural sector.

I am not entirely happy with this bill. About every other week I have to go home to Illinois to face farmers who have seen their incomes decimated by rising production costs and high interest rates. Some will lose their farms this year and this knowledge troubles me deeply.

However, I am convinced that a large majority of the farmers in my district support President Reagan's efforts to bring Federal spending and inflation under control. They are willing to take their fair share of the cuts. They are not happy about them, but they will take them.

Like many of my farmers, I am not entirely happy with this bill, but I will take it. I will take it because I spent over a month in hot, crowded conference committee meetings working hard for what I believed would be the best farm bill I could get, given our budget constraints.

Mr. Speaker, this bill is it. It is a bill that will have farmers producing for the market, rather than the Government. It is a bill that will help bring Federal spending and inflation under control. It is a bill that will reduce Government involvement in agriculture, while giving the Secretary the tools he needs to provide help when it is needed. It is not perfect, but it is certainly better than the alternative, which is the 1949 act. I urge my colleagues to support passage of this conference report.

Mr. DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Speaker, we have heard a great many arguments for this bill, and the main argument seems to be that this is the best we can do for our farmers.

I would ask you: Why is this the best we can possibly do for our consumers?

I will tell you why. The reason it is the best we can do for our consumers is that we have already given away so many big tax loopholes to big corporations and wealthy individuals that we do not have any money with which we can pass a decent farm bill for our farmers.

I ask you: Where are our priorities here in this country?

I am here to tell you that our farmers are in trouble. Our small business people are in trouble. I guess we feel that the best we can do for them, with the trouble they have, is to give them this turkey for the holiday season. I am not here to support that type of legislation, and I hope you are not either. I hope that you will feel that those small farmers indeed are of concern to us. I hope we will vote down this bill. I hope we will come forth with a decent bill so that small farmers can continue to live in this great land of ours.

Mr. Speaker, it is difficult for me, as a member of the Committee on Agriculture, to vote against the farm bill, but it would be exceedingly more difficult for me to endorse a measure which I feel falls far short of providing agriculture—our No. 1 industry—with the protection it needs.

The overwhelming number of farmers from my northwest Iowa congressional district with whom I spoke over the last couple of weeks have urged me to vote against the farm bill if it reflects commodity price support levels similar to those contained in this conference report. In fact, more than 90 percent of those who expressed an opinion stated that the farm bill before us today should be defeated. A far smaller number of farmers or farm group representatives have asked me to support this farm bill, not because it provides the farm program needed by agriculture today, but because of concern about the consequences of Congress rejecting this conference report and reverting back to the 1949 act for farm program authority.

Mr. Speaker, I fully agree that it would be less than desirable to rely on the 1949 act for our farm program authority. I also realize that the rejection of this conference report today would further disrupt farmers' planning for next year by casting considerable doubt over the type of farm bill that Congress might eventually approve, and when.

However, I do not believe that the Congress, and particularly this House, can be held responsible for the difficult position in which we find ourselves. In October, the House approved an adequate farm bill that was within the President's 1982 budget, but because of the incessant demands by the administration, and the willingness of the Senate to agree to these demands, the House was forced, after weeks of unilateral concessions to the administration's position, to accept the insufficient price support levels which were narrowly approved by the conference committee.

It is because of the administration's unwillingness to compromise and negotiate in a fair and reasonable way that we find ourselves faced with less than desirable options for upholding our responsibility to provide farmers with a farm program.

Although I do not think it would be desirable simply to reject this conference report and go back to the 1949 act, I think it would be even more distasteful if the House, in effect, abdicated its responsibility to fashion a sound farm program by accepting the administration's farm bill today.

Many have argued, in urging support for this farm bill, that farmers in any case should not look to a farm bill to assure their prosperity. They have contended that only by expanding their markets can farmers hope to increase their income, and that the farm bill should merely be looked upon as insurance protection against disastrously low farm prices.

On these general points I would agree.

However, until agriculture has put the era of chronic surpluses behind it, and a growing world population and a healthy world economy has created a sustained demand for our agricultural exports, we must continue to rely on occasional crop land set-asides or diversion programs to keep supply more in balance with demand. And if our future set-asides or diversion programs are to be successful in curbing production, then it is absolutely essential that we have commodity price support levels sufficient to induce farmers to participate in a farm program.

Mr. Speaker, my basic problem with the price support levels provided for farmers in this bill is the fact that they will provide an insufficient inducement for participation in any type of acreage reduction program. With the elimination of low-yield disaster payments and their replacement by the expanded Federal crop insurance program, the only incentive for farmers to participate in an acreage reduction program is eligibility for loans, target price payments, and access to the farmer held reserve. If the loan and target price levels are too low—and they are in this bill—then few farmers, especially tenant farmers and those who purchased land within the last several years could be expected to participate in a set-aside.

Indeed, during the recent series of meetings that I held with my farm advisory committees, when I asked how many farmers could be expected to participate in a set-aside given the loan and target price levels in this farm bill, 119 said that they believed participation would be less than 30 percent; just 16 said that participation would be from 30 to 50 percent; and none thought that more than 50 percent of all farmers would participate in a set-aside program.

This point is crucial because the bill provides that farmers who do not participate in any set-aside requirements under the farm program, are ineligible for loans or target price payments, and they cannot place their corn in the farmer-held reserve.

Clearly, if a set-aside program was announced under the provisions of the farm bill before us, there is a very good possibility that participation would be extremely low, resulting in many producers being ineligible for any type of price support protection, and a failure to reduce production.

Also, I think it is important to point out that the lower the price support levels, the less incentive there is for this administration, or any administration, to implement an effective crop reduction program.

Rural America is in serious trouble today. Real farm income in 1981 is expected to be at the lowest level since the 1930's—for the second year in a row. In addition, initial farm income projections by USDA for 1982 point to a 30-percent reduction in net farm income for 1982 compared to this year's disastrous level.

In urging my colleagues to reject this farm bill and proceed with the consideration early next year of a stronger one, I want to reiterate my reasons for asking your support for agriculture.

First, agriculture is the Nation's No. 1 industry. In 1979, the agricultural production and marketing system employed 25 percent of the working people in this country, and accounted for 20 percent of GNP. The livelihood of many other businesses is dependent on the continued healthy state of our agricultural sector. In 1980, net U.S. agricultural trade contributed $23 billion toward paying for the cost of our oil imports.

Also, higher farm prices do not mean correspondingly higher food prices this year, as in 4 of the past 5 years, food price increases were lower than the general rate of inflation. In fact, in the period from October 1980 to October 1981, food prices increased just 4.7 percent, compared to an overall inflation rate of 10.2 percent. Also, fully 80 percent of this year's food price increase is due to higher processing and marketing costs, not higher prices for farmers. Today, despite vastly higher farm production costs, farmers receive less than one-third of every dollar spent on food. And, U.S. consumers spend just 16.2 percent of their income on food—a level lower than the 20 percent they spent in 1960 and the second lowest level in the world today.

Finally, in looking at our Federal budget—which we do need to balance—I hope that you will keep in mind the relative amount of assistance which we provide for our basic commodity support programs. Even under the farm bill that was initially passed by the House, farm program expenditures would have been held to less than 1 percent of the Federal budget. And most of these expenditures would have been in the form of loans made to farmers, loans which in almost all cases are paid back, with interest.

Yet, the administration has contended that the farm bill originally passed by the House is too expensive, despite the fact that the House bill, by USDA's own admission, would have increased the income of feed grain producers alone by $9 billion over the 4-year life of the bill, compared to the administration's 4-year bill before us. USDA also admitted that the House

farm bill would have increased corn export income by $1 billion over the bill supported by the administration. USDA even agreed that if we approved the original House-passed bill, corn prices in 1985 would be 35 cents per bushel higher than the level projected under the bill we are to vote on.

Clearly, Mr. Speaker, if indeed we are concerned about balancing the budget, then it would seem to me that we would want to approve a strong farm bill that, as acknowledged by USDA, would substantially increase farm income and bring needed revenue to the U.S. Treasury.

Mr. Speaker, I strongly believe that we can have a farm bill that reflects a responsible fiscal policy while offering a sound agricultural program. But first of all, the House must demonstrate its resolve on this issue by rejecting the inadequate farm bill before us.

I urge my colleagues to vote down this farm bill and proceed with the immediate consideration of a more responsible measure.

Mr. DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from North Dakota (Mr. DORGAN).

Mr. DORGAN of North Dakota. Mr. Speaker, earlier this year the President said he was going to prepare a new economic dinner table for the country, and he wanted to try to put America on a diet, he said. And it is just an incredible diet, when you think about it.

Let us analyze where that dinner platter has traveled. It came past the oil companies earlier this year. They took off $50 billion in tax breaks. It came past the Defense Department. They took off $200 billion. It came past foreign aid interests. They took off $11 billion. Then it gets to the farmer, and the President says, "You know, we just don't have anything left. We cannot spare much for the family farmer."

I just want to say that I think short-changing the American family farmer is going to be one of the most expensive economic mistakes President Reagan ever made.

Regardless of whether I vote for or against this bill, I want to say that I intend to continue to fight every month that I am in Congress to see that the President begins to care as much about the family farmer as he does about the oil companies and the foreign aid bill.

Mr. DE LA GARZA. Mr. Speaker, I yield 2 minutes to the gentleman from Tennessee (Mr. JONES).

Mr. JONES of Tennessee. Mr. Speaker, I regret having to rise in opposition to the conference report. Putting this bill together has been a frustrating and disappointing experience for my friend, Chairman DE LA GARZA, and the House Agriculture Committee.

My reason for opposing this conference report is that circumstances in 1981 did not permit Congress to address the serious problems facing American agriculture in a meaningful way. I believe that we should start all over again in 1982 and write a farm bill which will meet the needs of agriculture in the eighties.

Mr. Speaker, we must face the coming decade with a clear understanding of what has happened to farmers in recent years: A devastating drought in 1979 and 1980; a crippling trade embargo; skyrocketing production costs due largely to runaway energy prices, and; interest rates which have wrecked the farm sector.

These calamities, along with continuing and day-to-day pressure on farmers to expand their individual production have resulted in a very poor net farm income picture.

It has dropped steadily from over $27 billion in 1979 to $19 billion in 1981. On top of that, net farm income is projected to fall as low as $16 billion in 1982.

That is a 45-percent drop in only 4 years. No industry can survive a condition like that and neither can our farmers.

For the past several weeks, I have spent a lot of time with farmers in my district. Many are facing foreclosure by the Farmers Home Administration and the Small Business Administration. Bankruptcies have doubled since last year and many of these are farmers. Of course, most farmers simply sell out rather than declare bankruptcy, so they never show up in our statistics.

Farmers in my district feel strongly that this bill is inadequate. They support my decision to vote against it and to try again early next year.

Nationally, thousands of farmers feel this same way. The conference report is being opposed by: the National Farmers Union; the National Farmers Organization; the National Grange; the National Milk Producers Federation; and the American Agriculture Movement.

I certainly regret being out of step with my chairman, but I am in good company with these organizations.

In closing, let me say that if this conference report is rejected, I pledge my all-out energy and support for a renewed effort early next year.

□ 2100

Mr. DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Speaker, today is a sad day in the life of American agriculture. The American family farmer today has, as the gentleman from Tennessee has stated, more foreclosures than since the depression. Prices are down.

I would like to relate to my colleagues, 1 year ago today, in my hometown, at our terminal, corn was 333; today it is 229. Wheat was 450; today it is 362. Soybeans, 738; today 606. And they are continuing down, not up, and this bill is not going to help them go up.

These are below the cost of production. My farmers today are losing money every day that they are farming. This administration says we cannot give you any additional money. As the gentleman from Iowa has said, and the others have said, there has been largesse given to the oil companies and oil producers. Just the leasing arrangement that was made in the tax bill this year alone, in the short time of this tax year, is $4 billion.

Mr. WAMPLER. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. HAGEDORN).

Mr. HAGEDORN. Mr. Speaker, I rise in support of passage of the Agriculture and Food Act of 1981. The development of this bill from its report out of committee to completion of the conference report has been a long and difficult task. There are several of my colleagues who are less than satisfied with the results. I too, share in some of that disappointment. However, it was a bill that had to be developed under the strictest of budget constraints. As a result, some commodity programs underwent several modifications; all were cut back from levels in the past.

Agreement on the dairy provisions were among the most difficult to achieve. They constituted a large portion of the total outlays that exceeded the budget target. As they are established, they still could exceed the budget levels by $151 million over the next 4-year period.

The provisions mandate minimum support prices of $13.10, $13.25, $14, and $14.60 per hundredweight for fiscal years 1982 through 1985, respectively. These levels translate into 72.5, 65.9, 63.4, and 58.8 percent of parity. However, if net estimated purchases of milk and milk products by the Commodity Credit Corporation are less than $1 billion in fiscal years 1983, 1985, the Secretary may then set the minimum support price at 70 percent of parity. In addition, if net estimated purchases are less than 4, 3.5, and 2.69 billion pounds in fiscal years 1983 through 1985, the Secretary can set the minimum price support at 75 percent of parity.

These provisions provide both distinct incentives and disincentives to the dairy industry. If dairy farmers can reduce production during this fiscal year, they will be rewarded with a minimum price support of 70 percent of parity and in the extreme case, 75 percent. However, if they choose not to cull cows from their herds and

reduce production they will be forced to accept an absolute increase of only 15 cents and an unprecedented level of 66 percent of parity in fiscal year 1983.

The end result is that these provisions send a strong signal to the dairy industry. Currently, milk production continues to expand. October was the 30th straight month that production exceeded preceding year levels. Current projections suggest milk production will continue to expand in 1982. Record crop production, low grain prices coupled with severely depressed cull cow prices will only exacerbate the overproduction problem. Thus, it is apparent that dairy producers may have to balance culling herds at low prices against receiving only 66 percent of parity if production is not restrained in this current fiscal year. August estimates of CCC net purchases are less than $1 billion. However, it is obvious that a more recent estimate of purchases would likely exceed the $1 billion trigger level. That in itself will put tremendous pressure on the industry to reduce production and dairy product inventory to manageable levels.

Failure to pass this farm bill would set the price support at 75 percent of parity, the historical level. With the severe supply-demand imbalance we have been facing, it would do both producers and consumers a disservice in coming to grips with this problem.

The farm bill will continue to provide loan programs for wheat, feed grains, cotton, and rice. Again, agreeing on the level of the loan rates was very difficult at best. With the current depressed level of grain prices, it is easy to fall into the trap of setting high loan rates with the hope of providing a quick solution to the problem. However, in the long run setting high loan rates will result in an artificial economy that will serve only to aggravate the current supply demand situation and result in excessive costs.

The target price concept was also retained in the farm bill. But target prices were capped in the out years in an effort to reduce budget exposure. This has been a problem in the past. This year alone, the Government will be making deficiency payments on grains and cotton which will result in outlays totaling $1.2 billion.

If we fail to pass this farm bill today, we will be faced with implementing legislation for wheat and feed grains from the 1938 and 1949 Farm Acts. Product referendums would be required, marketing quotas could be implemented and price support would be raised to extremely high levels. The legislation is not in tune with current supply demand and economic conditions and would result in a serious drain of the U.S. Treasury.

The farmer-held grain reserve program established under the 1977 farm bill is retained in the 1981 act. In fact, several changes were made which will provide the Secretary the necessary tools to provide farmers an outlet for their grain when prices are depressed. It is a necessary adjunct to the price support programs.

Unfortunately, provisions designed to deal with the problems associated with farm produce storage facility bankruptcies were deleted from the farm bill. Serious inadequacies in the bankruptcy code have resulted in farmers having their crops tied up in bankruptcy courts because of grain elevators that become defunct. However, the Senate recently passed farm storage facility bankruptcy legislation. Hopefully, it will receive immediate consideration and passage by the House.

Farmers continue to struggle under a siege of high interest and inflation rates and low commodity prices. Production costs continue to rise. The end result is a severely restricted cash flow which is pushing producers beyond their financial limits.

Nonetheless, in order to achieve tolerable interest and inflation rates, Federal spending must be reduced to reasonable levels. If this bill is not passed, costs of implementing these farm programs could be as much as $22 billion over the next 4 years, double the present $11 billion package.

This legislation will assist in meeting the goals of President Reagan's economic recovery program. It will also provide farmers a safety net to provide some measure of income protection and stability. Passage of this legislation is imperative if we are to preserve the viability and efficiency of agriculture, this Nation's most important industry.

Mr. WAMPLER. Mr Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. STANGELAND).

Mr. STANGELAND. Mr. Speaker, I want to attach myself to the gentleman's remarks and I would like to say this. I commend the chairman of the House Agriculture Committee for the tremendous job that he has done in trying to bring to this floor a conference report that is well balanced.

I would also like to commend the ranking Republican member, the gentleman from Virginia (Mr. WAMPLER), for an excellent job, and I would like to pay tribute to the ranking Democrat, the gentleman from Washington, who really fought a fight that I agreed with wholeheartedly, but he lost and he came back and today says that he thinks we ought to pass this report.

I think we ought to listen to that gentleman because he is the distinguished agriculturist of this House. There is a lot of rhetoric that can be dealt with on this bill.

We can play all kinds of games. But as we look at this bill, it is a balanced bill. It is not everything that I would like. I would like to see more. There is a lot to be said about sugar, but let me say that every commodity started from 1981. Sugar goes back to 1979.

Mr. DE LA GARZA. Mr. Speaker, I yield 1 minute to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, the Reagan administration's 1981 agriculture bill is a neither-nor farm bill. It neither provides for acreage controls permitting demand to catch up with supply, nor does it provide adequate protection for farmers against record high production costs and record low market prices. It does neither. Most Arkansas farmers want one or the other—acreage controls or price supports. It is a very bad bill that could provide a prescription for a third successive disaster.

If I vote for this bill I am not voting for a farm program I am voting to avert a disaster in the rice industry. If the 1977 law expires without having been superseded by another law, the 1949 permanent law would take effect. The permanent law would reduce rice acreage in Arkansas from 1,520,000 acres planted in rice in 1981 to less than 400,000 in 1982. Wheat acreage in 1982 would be reduced from 1,725,000 acres to less than 170,000.

Therefore, approximately 3 million acres would either lie fallow or be planted in soybeans, milo, or cotton which would increase the surplus. As if a gun is pointed to my head I must reluctantly vote for the conference report.

The following letter from USDA clearly states the dilemma, to wit:

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., December 16, 1981.

Hon. WILLIAM ALEXANDER,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN ALEXANDER: This is in reference to your request for an evaluation by the Department of Agriculture of the authorities and impacts on rice and cotton producers in Arkansas of reverting to permanent legislation in the Agricultural Adjustment Act of 1938 (1938 Act) and the Agricultural Act of 1949 (1949 Act). This matter has been reviewed by the Office of the General Counsel and the Agricultural Stabilization and Conservation Service and our response is as follows.

Section 352 of the 1938 Act provides that the Secretary shall proclaim a national acreage allotment for rice. The size of the national acreage allotment is determined based upon the availability of supply of rice which, together with the estimated carryover, is not less than the normal supply. For the 1982 crop, normal supply is defined by the 1938 Act as the total of estimated domestic consumption for the 1980-81 marketing year, estimated exports for the 1981-82 marketing year, and an allowance for carryover equal to 10 percent of the estimated domestic and export use.

Section 353(c)(6) of the 1938 Act provides that notwithstanding any other provisions of the 1938 Act, the national acreage allotment of rice for 1957 and subsequent years shall not be less than the national acreage

allotment for 1956 and shall be apportioned among the states in the same proportion that such states shared in the total acreage allotted in 1956. The national acreage allotment in 1956 was 1,652,596 acres and assuming this level for 1982, the 1982 Arkansas allotment would be approximately 400,000 acres.

The 1981 acreage planted to rice in Arkansas was 1,520,000 acres. Therefore, if no new legislation is enacted and the rice authorities revert to the basic legislation and rice producers vote in favor of marketing quotas in the referendum, rice acreage in Arkansas in 1982 would be reduced by about 75 percent from 1981.

With respect to cotton, Section 606 of the Food and Agriculture Act of 1977 provides that "Notwithstanding any other provision of law, the permanent State, county, and farm base acreage allotments for the 1977 crop of upland cotton, adjusted for any underplantings in 1977 and reconstituted as provided in Section 379 of the Agricultural Adjustment Act of 1938, as amended, shall again become effective as preliminary allotments for the 1982 crop." Thus, cotton acreage planted for the 1978 through 1981 crops will have no effect on 1982 allotments. The 1982 cotton allotment for Arkansas would be about 1,356,000 acres, based on a national allotment of 16 million acres plus a national reserve of 200,000 acres for establishing minimum farm allotments. The 1981 acreage planted to cotton in Arkansas was 650,000 acres. Thus, in 1982, Arkansas cotton producers could more than double their 1981 cotton acreage if legislation reverts to the 1938 Act. On the other hand, cotton acreage in states like California and Arizona, where cotton acreage has greatly increased in recent years, would be reduced about 50 percent. The situation in these states would be similar to that for rice in Arkansas.

If legislation reverts to the permanent authorities in the 1949 Act, loan levels for both rice and cotton would be required to be established at not less than 65 percent of parity if producers approve marketing quotas or at a level 50 percent of parity if producers disapprove quotas. Loans made at such levels would seriously jeopardize our ability to export both of these commodities. Furthermore, cotton's ability to compete with synthetic fibers in domestic markets would be severely impaired. Huge surpluses could accumulate and the government could again acquire large inventories which would overshadow the market.

Enclosed, for your information, is a comparison of the estimated 1982 allotments and 1981 planted acreages, by states, for both rice and cotton.

Sincerely,

WILLIAM G. LESHER,
Assistant Secretary for Economics.

UPLAND COTTON: DISTRIBUTION OF NATIONAL ACREAGE ALLOTMENT UNDER REVERSION TO BASIC LEGISLATION COMPARED TO 1981 PLANTED ACREAGE

[In thousands of acres]

State	1981 planted	1982 allotment
Alabama	330	941
Arizona	600	337
Arkansas	650	1,356
California	1,500	751
Florida	13	29
Georgia	170	820
Illinois	0	3
Kentucky	0	7

UPLAND COTTON: DISTRIBUTION OF NATIONAL ACREAGE ALLOTMENT UNDER REVERSION TO BASIC LEGISLATION COMPARED TO 1981 PLANTED ACREAGE—Continued

[In thousands of acres]

State	1981 planted	1982 allotment
Louisiana	700	566
Mississippi	1,280	1,551
Missouri	240	365
Nevada	1.1	3
New Mexico	140	175
North Carolina	79	433
Oklahoma	670	754
South Carolina	120	660
Tennessee	350	538
Texas	7,400	6,897
Virginia	.4	15
U.S. total	14,243.5	[1] 16,200

[1] Statutory minimum of 16 million acres plus 200,000 national reserve for establishing minimum farm allotments.

RICE: DISTRIBUTION OF NATIONAL ACREAGE ALLOTMENT UNDER REVERSION TO BASIC LEGISLATION COMPARED TO 1981 PLANTED ACREAGE

State	1981 planted acres	1982 allotment acres
Arkansas	1,520,000	399,092
California	595,000	299,821
Louisiana	665,000	475,093
Mississippi	340,000	46,683
Missouri	77,000	4,760
Texas	575,000	422,390
Minor States		4,757
U.S. total	3,772,000	[1] 1,652,596

[1] Statutory minimum. This level of allotment could be proclaimed in view of high level of price support resulting in lowering of exports and resultant stock buildup.

Mr. DE LA GARZA. Mr. Speaker, I yield 2 minutes to the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Speaker, corn and wheat this last year bought one-third of the imported oil in this country; $20 to $25 billion of our corn and wheat brought into this country, not flowers, not peanuts, and not sugar, but corn and wheat, and yet yesterday the closing price of corn in Iowa was about $2.11 a bushel.

Last year at this time the closing price on corn was $3.09 a bushel. That is 68 percent of what we had last year.

Yet in this bill peanuts get a 21-percent increase in their loan rate, corn gets a 6-percent increase. For sugar we have a new program and yet for wheat we get a 6-percent increase. This is not a farm bill. This is the family farm liquidation act of 1981.

There are three reasons why we have to live with this: the budget bill, the tax bill, and the defense bill. Those are the three reasons why we are having a raid on the farmers of this country to pay for a spending spree defense bill, a phoney budget, and a rich man's tax bill.

Those are the three reasons. The leasing provision alone in the tax bill, $27 billion over 4 years and yet, the administration would not even agree with $181 million. That is all that divided us in the conference, $181 million over 4 years. They would not agree on that.

So go back to the corn farmers, my friends, and go back to our wheat farmers and tell them that we voted for $27 billion so IBM would not have to pay any taxes this year, but we cannot even support $181 million over the next 4 years. Go back and tell your farmers that.

Mr. OBERSTAR. Mr. Speaker, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Speaker, I thank the gentleman for yielding.

I join with my colleague in his splendid statement. He has really condensed the issues. The gentleman has stated the case well.

Mr. Speaker, I rise in opposition to the conference report on S. 884, the Agriculture and Food Act of 1981.

The Reagan administration, in a letter from Agriculture Secretary Block, claims that "this legislation will create a healthy environment for our farmers and economy." Well, I would like the administration to hand-carry that message to the thousands of young and small family farmers in my State who are facing bankruptcy. They have had a 19-percent rise in production costs over the past year. Prices for all crops were down an average of 20 percent, cash receipts were down $1.1 billion last year. That is not what I would call a healthy environment, in fact, it is downright dangerous to farmers' health—their economic health.

The provisions of the conference agreement, unfortunately, give Minnesota's farmers little reason for optimism. The cold reality is that the new farm program, if approved, would be an economic Dunkirk for rural America.

The radical changes in the farm program proposed in this bill will lead to the financial ruin of small family farmers who are already bearing the brunt of the downturn of the farm economy and who will face increasing pressures with the worsening of the national economy. Farm support levels simply do not meet even the minimum needs of our farmers. The wheat support levels are nearly $1.50 below the cost of production. In fact, loan and target price levels for all commodities are just plain too low.

The worst provisions in this bill are those dealing with the Federal dairy program. Under this bill, dairy farmers will get only a 1-percent increase in price supports over the next 3 years. Compare that to inflation, which is running at an annual rate of more than 10 percent. Dairy farm foreclosures are now running four times the rate of last year. The dairy provisions in this bill will mean more family dairy farms lost in Minnesota and elsewhere. Fewer dairy farms means less competition in dairy farming, and, ul-

timately, higher milk, butter, and cheese prices for the consumer.

Contrary to popular and erroneous myths about price supports, dairy producers have been losing money, not reaping profits. Although prices farmers have been getting for their produce have increased 40 percent over the last 5 years, production costs have increased 80 percent. Last year, all farm income, in uninflated dollars, fell by one-third. According to a University of Wisconsin study, the income of dairy farmers will again fall by one-third this year, because Congress and the Reagan administration eliminated the April 1 price adjustment earlier this year.

Many marginal farmers will be forced out of production because of the debts they are carrying as a result of inflation and high interest rates. In the long run, the number of family-owned dairy farms in this country will decline sharply. As dairy farmers are forced out of business, consumers will see a drop in production, higher prices for dairy products, more imitations, artificial substitutes, and more imports.

The cost of dairy products is not unreasonably forced up by the price support system. Prices for dairy products have been continually lower in relation to the cost of living generally and the cost of food. From 1967 to 1980, all consumer prices rose an average of 150 percent; food prices are expected to increase by only about 10.7 percent. Making these changes in the dairy price support system will bring back years of "boom-and-bust" for dairy farmers and unreliable prices and supplies for consumers.

I urge my colleagues to vote against the conference report. The House-Senate conferees, in the hopes of producing a bill the President will sign, have instead written a measure that disregards the realities of economic hardship on the farm. This is an appeasement bill which, under the guise of winning Presidential support, would surrender the family farm to the bankruptcy courts. To approve this bill, will be approving the destruction of the family dairy farm as we know it today.

The test applied all through the conference was: Is this a bill the President will sign? The test should have been: Is this bill good for American agriculture; is it good for consumers; is it good for the country. The conference report fails all those tests; it should be defeated and replaced with legislation that will truly enhance the well-being of that man-in-the-middle, the family farmer.

Mr. DE LA GARZA. Mr. Speaker, I yield 2 minutes to the gentleman from Mississippi (Mr. BOWEN).

Mr. BOWEN. Mr. Speaker, I rise in very strong support of this conference report.

Mr. AKAKA. Mr. Speaker, will the gentleman yield?

Mr. BOWEN. I yield to the gentleman from Hawaii.

Mr. AKAKA. Mr. Speaker, I rise in strong support for the farm bill conference report, and urge my colleagues to join me in voting for this important legislation.

As many of the members who have spoken before me have indicated, the bill does not satisfy the interests of every element of the farm community. I realize that the farm bill is not "warmly embraced" by every commodity. Nonetheless, it is the best bill that could be achieved under the circumstances. I followed the month-long deliberations of the conference committee very closely and can say that the commodity support levels in the conference report are already at the limit of what Congress will accept, and the administration will tolerate.

What disturbs me is that opponents of the sugar loan program are attempting to restrict the debate on the farm bill to debate on sugar. This is an injustice to the other commodities that have a vital interest in the farm bill. A close examination of the farm bill will reveal that the sugar loan program is modest by any measure.

Mr. Speaker, my message on sugar is a simple one. The domestic sugar industry is good for the American consumer, good for the American worker, and good for American agriculture. For the American consumer, the sugar loan program offers the one thing he or she desires most—long-term insulation from rapid and dramatic price fluctuations.

Every American housewife recalls the recent history of sugar prices. In 1974, the year in which the Sugar Act expired, the price of sugar increased from 8 cents to 60 cents per pound. By 1977, the price had declined to 7 cents per pound. In 1980, due to the absence of a domestic sugar program, the price rose to 40 cents per pound before dropping to a low of 11 cents per pound in August of this year.

Our Nation is dependent upon supplies of foreign sugar to satisfy roughly half of our needs, and this demand can only be met by buying sugar on the so-called world free market. The world free market is in reality the market for homeless sugar, sugar which is in excess of a producing nation's needs in a particular year. This sugar market amounts to only 10 percent of the nearly 90 million tons of sugar produced around the world. The small amount of sugar traded in world commerce puts extreme leverage on prices for that portion of the world supply. In years of production shortfall, prices skyrocket. When there is an excess of production, prices plummet. The effect of these price changes is transmitted directly to the supermarket shelf. The loan program for sugar will insulate the American consumer from production shortfalls and help assure adequate supplies of sugar at stable prices.

The sugar loan program is of vital importance to the Nation's sugarcane and sugar beet farmers. Beet and cane sugar are major agricultural crops that are produced in 17 States. The domestic industry employs over 100,000 Americans and contributes over $3 billion annually to the gross national product. In spite of the fact that sugar is a major agricultural crop, the United States is the only major sugar producing nation in the world that is without a domestic sugar policy. The 7 years since the expiration of the Sugar Act have been years of uncertainty and frustration for our Nation's sugar growers. In the absence of domestic sugar legislation, the ability of cane and beet growers to survive has been seriously threatened. The loan program will allow cane and beet farmers to stay in farming, thus maintaining a viable domestic sugar industry and preventing the United States from becoming wholly dependent on foreign supplies of sugar.

Mr. Speaker, the domestic sugar industry offers a better deal for consumers of the Nation and the more than 100,000 workers who are employed in farming, refining, and processing sugar. The sugar loan program is an important part of the farm bill.

I urge you to join me in supporting this bill.

[From the Honolulu Star Bulletin, Dec. 12, 1981]

AROUSING SUPPORT FOR ISLE SUGAR

(By A. A. Smyser)

No one who has ever driven around any of Hawaii's four major islands can doubt that the fate of our sugar industry is important to more than the sugar industry.

The green fields of cane are part of Hawaii's beauty.

They make life more attractive for permanent residents. They are part of the experience that causes visitors to give Hawaii high ratings.

The plantation communities that maintain this industry are a treasured way of life for a significant portion of our population.

Where plantations have closed down—as at Waianae, Kahuku and Waimanalo on Oahu—there have been significant dislocations. Unemployment has replaced the pride many people found in their jobs. Delinquency has risen. Subdivisions and scrubby fields replace much of the greenery.

Former state Rep. Robert Oshiro now has undertaken the task of helping the sugar industry to arouse the community to the danger that Island sugar is threatened as never before by world market conditions and U.S. policies.

The arousal goes beyond that to asking the community how much it is willing to do to save sugar.

Would the legislature consider a Mini-Sugar Act to put price supports under Island sugar?

Can Waipahu—and perhaps other communities on other islands—find a way to help give sugar growers a better return by devel-

oping H-POWER-type plants to process refuse into electricity in conjunction with sugar milling operations?

There probably couldn't be a better choice for this job than Oshiro.

It is hard to imagine a politician who is more community-spirited and less self-interested. He is in the tradition of persons and families who put community concerns above personal concerns—and the perception of this quality makes him extremely effective when he embraces a cause.

In the past he turned these efforts to chairing the Democratic Party because he saw it as an instrument for needed change in the community, and to boosting the gubernatorial campaigns of John A. Burns and George R. Ariyoshi for the same reason.

Their election successes attest to his political savvy.

Yesterday morning he went before a breakfast of businessmen to try to enlist their support on sugar.

Hawaii is going to be a disaster state if sugar goes down, he said. Saving the industry is a problem for all of Hawaii, he argued, because sugar IS Hawaii.

The first task he undertook is to persuade the community at Waipahu to reconsider its opposition to H-POWER. He is convinced that the feared nuisances—mostly of bad odors from the plant or truck noises from deliveries to it—can be overcome to the community's satisfaction.

But he also is convinced that democracy must prevail and that the community must be convinced of this. If the community will accept the plan, he said, then election officials are ready to support it, too.

Oshiro also is working with the ILWU, the labor union that has organized the sugar workers, and with elected officials on all islands to seek even broader help for sugar.

The national and international problems for sugar goes to factors like these:

World sugar price—less than 20 percent of the sugar produced in the world, about 15 million tons a year, constitutes the "world market." The rest of the world's sugar is sold in protected markets. Even small surpluses and shortages make world market prices roller coaster up and down. This year a 3 million ton overproduction in the European Economic Community was dumped on the world market and dropped prices by 50 percent.

U.S. policy—for 40 years, from 1934 to 1974, the U.S. protected its sugar under a Sugar Act and kept domestic prices stable at levels that gave U.S. beet and cane growers steady but not excessive profits. Since then, U.S. policy has been erratic and consumers have faced excessively high prices in some years while the growers in others have faced excessively low ones.

Hawaii's largest sugar grower, Amfac, now is absorbing sugar losses of $5 million a month and its directors have threatened to close down Oahu Sugar Co., and possibly more of their five plantations.

A U.S. support price of 17 cents a pound is now before Congress in the farm bill but may be killed in the House of Representatives. If the bill dies, the United States will revert to a 1949 Farm Act as a basic policy. It contains no support for sugar. Even the 17 cent price in the farm bill being considered by Congress is well below the local industry's production costs of around 20 cents a pound.

Another aspect of the support price situation is the development of a substitute sweetener made from corn. Higher support prices will work to give the corn substitute a higher market share, since it can sell for less.

A Mini-Sugar Act for Hawaii would have the advantage of not helping corn competition because it wouldn't raise national sugar prices.

But it could be expensive in any form—subsidy, loan, tax concession or whatever.

Our production is 1 million tons a year or about 2 billion pounds of refined cane sugar.

Even a 1-cent-a-pound support plan would cost $20 million when needed and a single penny is not about to do the job in years like this.

We may be in for some serious thinking in the months ahead of how much saving the sugar industry is worth to all us. For myself, it's quite a lot.

[From the Honolulu Advertiser, Dec. 12, 1981]

AMERICAN SUGAR NEEDS SUPPORT TO COMPETE

(By Dr. Thomas K. Hitch)

The United States has not had an affirmative sugar policy since 1974 when the 1934 Sugar Act expired. Our sugar policy from 1934 to 1974 (40 years) was to have sugar prices stabilized in the American market by assigning marketing quotas, based on U.S. requirements, to domestic and foreign producers so that prices found a level that would be fair to both the American consumer and the American sugar producer.

Since 1974—with no sugar policy—the price of raw sugar in the American market has been on a roller coaster—as high as 65 cents in 1974, as low as 9 cents in 1976, as high as 44 cents in 1980 and now at about 16 cents.

The U.S. beet and cane sugar producers cannot remain in business on a permanent basis with this kind of wildly fluctuating price level—with two of the last eight years being boom years ('74 and '80), one being barely profitable (1975), and the other five being deeply depressed years with tremendous losses.

Even during these years the American consumer has not benefited, because while there have been more years of cheap sugar than of dear sugar, the price of sugar rose to such astronomical heights that it probably hurt the consumer more in those years than he has helped in the cheap years. Also, when very high sugar prices push the price of candies, ice cream, soft drinks, and baked goods up, they tend to stay up after the price of sugar falls so that the American consumer to a certain extent lives with high sweetening prices even when sugar becomes cheap again.

To understand the world sugar market, one has to realize that some 80 percent of the sugar produced in the world has a guaranteed home at a guaranteed price; that prices in these countries do not fluctuate up and down with world under- and over-production; and that the so-called "world price" for sugar is set by demand and supply forces that affect only that 18 percent of the world's sugar production that is uncommitted—and therefore very cheap when world production is surplus and very dear when world production is short.

To put it another way, all the major sugar exporting countries of the world have a government guaranteed set price for sugar consumed in that country with the price set at a level that will make it profitable to grow sugar in such large quantities that it is a major export item. This is true for Cuba, Brazil, Australia, Philippines, South Africa, Argentina, India, Mexico, and the EEC as well as the rest of the smaller sugar exporting countries.

Take the EEC. Through its Common Agricultural Policy (CAP) European growers are not only guaranteed 27 cents a pound, but are encouraged to produce excess sugar for export, and in the last decade the EEC has become a major exporter of subsidized sugar in contrast to having traditionally been a net importer of sugar. European sugar is now being sold in large quantities in the U.S. market when the price for raws is about 15 cents after paying shipping and insurance, while the price in Europe is 27 cents.

This situation is demonstrated by the fact that when the "world sugar market" price skyrocketed from about 10 cents a pound in 1973 to 65 cents a pound in 1974, there was no change in the domestic price of refined sugar in the countries that produced 60 percent of the world's export sugar and only a modest change upward in the other exporting countries—while the price in the U.S. more than doubled. The same thing happened when "world" sugar prices fell.

Furthermore, most of the world's sugar importing countries are buffered against fluctuations in this small but highly volatile world market—buffered generally by long-term agreements with sugar exporting countries to provide them with a normal supply at a normal price. This is shown by the fact that in that same period of rapid price rise (1973-1974) the countries that consumed 22 percent of all world sugar imports had no change in the domestic price of sugar, those accounting for 12 percent of world imports only a 1 to 15 percent rise, and with only a handful of countries (with the U.S. being far and away the major one) suffering from the full inflation of prices.

The so-called world sugar market, being only a small fraction of world sugar production, is a market where in periods of world sugar shortage the buyer pays exorbitant prices and where in periods of world surplus all homeless sugar is dumped. If the U.S. does not adopt a constructive sugar policy it will ultimately lose its domestic sugar industry—which will be a considerable economic loss since among agricultural products sugar ranks tenth in terms of acreage, fifth in terms of tonnage, and sixth or seventh in terms of dollars to the farmer.

The U.S. sugar industry will not be killed by cheap foreign sugar that is produced more efficiently than ours: it will be killed by foreign sugar that is dumped into our market at either a loss to the producer or at a profit that is provided by subsidies from the government of origin. U.S. sugar production is probably among the most efficient in the world—just like our production of wheat, corn, rice, soybeans, and many other agricultural products. But it cannot live on a 12 cents, or 15 cents, or even 17 cents per pound price—a price which incidentally is about the same as good top soil at your corner garden shop. In short, if the U.S. were to require that foreign sugar not be allowed to be sold in the American market at a lesser price than it is sold for in the country of origin, the U.S. sugar industry would be profitable and have a long and successful life.

Furthermore, if we lost our domestic sugar industry, the nation and its consumers would have to live with the roller coaster of the "world" sugar market, and could even find itself facing an OPEC-like foreign sugar cartel since the top 13 sugar exporting

nations ship about 80 percent of the sugar entering world trade—numbers much like those in the oil cartel.

Finally, if the U.S. lost its domestic sugar industry it would face catastrophe in the event of war or major shipping interruptions. Let us remember that in such times, sugar has always been about the first commodity to be rationed, that Napoleon developed the beet sugar industry when the British blockade stopped the flow of essential foreign sugar to Europe, and that all the countries of the world that protect their domestic sugar industries do so primarily because of these strategic considerations.

Let's get an affirmative U.S. sugar policy before it is too late.

Mr. BOWEN. I thank my friend.

I would like to remind all of my colleagues that tonight we have only two choices before us. I wish we had more. I spent over 1 month on the conference committee trying to develop the best bill we could get and this is in my judgment the best we can have, but we now have only two choices.

We accept this conference report or we revert to the Farm Act of 1949. There is really no other choice before us. The bicameral system which we have would require the other body's unanimous consent to take up any further legislation tonight, and there are clear indications that this will not occur.

Therefore, we will go back to the 1949 act. What will that do? The 1949 act will kill Public Law 480 if we are to revert to it and defeat the conference report. The 1949 act will destroy the antiembargo legislation we have in the conference report. It will kill the revolving export credit program which we have authorized in this legislation. It will cut food stamps by $1 billion during the next year.

Some have said that it has very little support of the farmers. It has the support of 700,000 soybean growers, 30,000 rice growers, 200,000 cotton growers, about 18,000 sugar producers and about 60,000 peanut producers in the country, and that is a lot of farmers.

It would devastate this land if we have to go back to the act of 1949. Take one State, the largest State in our country, California. It would cut out one-half of the rice, one-half of the cotton, 70 percent of the wheat in that State. My own State would lose 75 percent of its rice production if we passed this legislation.

If we go back to the 1949 act it would result in a loss to the gross national product in this country of over $1 billion and a loss of over 20,000 jobs. It would cost us $2 billion more in the budget in the next year. This conference report, Mr. Speaker, is absolutely necessary to avert I think the greatest tragedy of all, which is a return to the 1949 act, bad for producers, for consumers, and for all Americans.

I urge passage of this conference report.

□ 2110

Mr. DE LA GARZA. Mr. Speaker, I yield 30 seconds to the gentleman from Texas (Mr. HIGHTOWER).

Mr. HIGHTOWER. Mr. Speaker, it is with great reluctance that I rise in opposition to this farm bill. I am reluctant to oppose it because of the leadership that has been demonstrated by the chairman of our Committee on Agriculture, the gentleman from Texas (Mr. DE LA GARZA). I am reluctant to oppose it because of the number of farmers that I represent.

I hate to ever be on record as being opposed to a farm bill, but this is a completely inadequate farm bill. The ideal farm bill that we should have passed would not have cost the Treasury anything, for those who have that as their first consideration, but it would have made possible for the farmers in my part of the country to stay in business.

Mr. DE LA GARZA. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. RICHMOND).

Mr. RICHMOND. Mr. Speaker, where are we? First of all, I rise in support of this bill.

The food stamp provisions of this conference report are contained in title XIII. Title XIII is primarily a product of this House, coming back from conference with relatively few changes in its contents from the form in which it passed the House this October.

From the House point of view, title XIII, the food stamp and commodity distribution amendments, constitute an excellent result. By my count, there were 50 separate provisions or portions thereof set forth in the statement of differences between the House and the Senate, which had purposefully decided not to include its special package of food stamp amendments in the farm bill it approved in September and, thus, came to the bargaining table with nothing to offer. Of the 50 differences, 34 or 68 percent were resolved after considerable back and forth in favor of accepting the precise words of the House, while 12 or another 24 percent went our way, with very minor changes in language or format. Only four of the original House provisions, involving limitations on participation by certain retail food stores, restrictions on eligibility for expedited service, a requirement that certified mail be allowed to be used in the issuance of food stamps, and a study on the combined effects of retrospective accounting and monthly reporting systems, were entirely deleted.

The conference did, however, approve a foreshortened food stamp bill 1 year and not 4 years in duration. The reason for this was the tyranny of the caps set for fiscal years 1983, 1984, and 1985 in light of the rules limiting the scope of what the conferees were able to consider. The House bill, because of the unfortunately offhand way in which the savings were originally calculated by simply adding $825 million to each of the caps contained in the House bill as reported from committee, adopted a cap for those 3 fiscal years, respectively, at $11.170, $11.115, and $11.305 billion. The Senate, with no food stamp amendments in conference, had no authorization for those 3 fiscal years. Accordingly, by virtue of House Rule XXVIII, clause 3, the House conferees were restricted either to accepting their own figures or decreasing them and could not increase them.

The administration, in the person of Agriculture Secretary John Block, had, by letter of October 21, 1981, informed us that their revised ceiling estimates of the House bill for fiscal year 1983, 1984, and 1985 costs, given the changes encompassed in the Omnibus Reconciliation Act of 1981—Public Law 97-35—including the effects of changes in other income assistance programs on the food stamp program and the administration's admittedly already inaccurate July 15 economic assumptions for those fiscal years, were $12.5, $12.8, and $13.5 billion, respectively. That meant that the House bill was already $1.330, $1.685, and $2.185 billion under the administration's presumably low version of the funds that will be needed to run the program as envisioned by the House. It would have been ridiculous for the House conferees to lower these already minimal figures—and that was our only choice besides sticking by the earlier levels. Accordingly, the House conferees thought that it was better not to adopt any caps at all than to reinforce meaningless dollar ceilings.

The only way to achieve this objective was to drop the last 3 fiscal years from the bill, leaving the program either to be reauthorized in 1982 for an additional 3 years or to be continued, in operation, as it is today, by virtue of appropriations acts, continuing or general. As part of the reauthor- ization process, we agreed to consider the manner in which the thrifty food plan should be adjusted. This bill would adjust it effective October 1, 1982, and every October 1 thereafter, based on food prices effective on the preceding June 30, with the 1982 adjustment reflecting changes in food prices for the 21 months prior to June 30, 1982 that would not have been accounted for in the plan at that juncture and all subsequent adjustments reflecting changes in food prices for the intervening 12-month periods. We may change those adjustment bases for fiscal year 1983, 1984, and 1985 in reauthorizing next year, but, until we do so, projections of program costs for budget purposes will have to be predi-

cated upon the adjustment dates we enact into law now.

The conferees, in postponing definitive handling of the funding question for fiscal years 1983 through 1985, recognized that they had not fully solved the funding problem for 1982. The $11.3 billion cap was the highest we could legally agree to. That figure is more than likely to prove inadequate to allow full funding of benefits through September 30. The administration's own estimate for full funding in September, prior to our agreement to delay from April 1, 1982 to October 1, 1982, the upward adjustment of benefits, was $12.1 billion. That estimate—as well as the somewhat later October one of $11.3 billion—was based upon the already inaccurate and outdated economic assumptions developed by the administration as of July 15 for its midyear budget review. The administration assumed a fourth-quarter 1982 unemployment rate of 7.7 percent subsiding to 7 percent in late 1982. That assumption alone will be off by 1 percent or more. Every extra percentage on the unemployment rate adds $680 million onto the cost of the food stamp program. While the rate of food price inflation might be modestly lower than projected, that would by no means offset the rapid rise in unemployment. The Congressional Budget Office, relying upon its own inadequate forecast of unemployment rate at between 7.1 and 7.6 percent over the year, as of September 1982, revised its estimate for fiscal year 1982 program costs to approximately $11.6 billion, although that was before we agreed to reduce benefits by approximately $700 million by delaying the benefit adjustment for 6 more months. Another factor that is beyond anyone's direct control is the rate of implementation at the State level of the cuts already made in the program, which is likely to be slower by several months than the administration originally anticipated.

The conferees, therefore, agreed—and the statement of managers reflects that agreement—that the $11.3 cap funding level contained in this conference report is not likely to be enough. Thus, the $11.3 billion figure should not be treated as a final one. The conference report on the agriculture appropriations bill for fiscal year 1982, House Report No. 97-313 (97th Congress, 1st session), page 21, provides an appropriation for food stamps in the amount of $10,293,384,000—part of which is to be held in reserve—for a period of 10½ months only, ending August 15, 1982. Those conferees were "in agreement that such additional funds as may be required to carry out the food stamp program, as authorized by Congress, will be provided upon receipt of an official budget request from the Office of Management and Budget."

The conferees on the 1982 authorization share the same agreement. We recognize that there is likely to be a need for a significant raise in the cap as well as a supplemental appropriation later in fiscal year 1982, if the program's full benefits are to be received by every eligible participant in August and September of next year. Section 18 of the Food Stamp Act directs the Secretary how to handle the question of a likely shortfall of funding as opposed to program needs. As part of his monthly report to the relevant authorizing committees under section 18(a)(1), he is to state "whether there is reason to believe that reductions in the value of allotments * * * will be necessary under subsection (b) of this section."

Given the fact that the conferees on this bill understand that more funds may be necessary and have specifically sought an "opportunity to consider legislation to amend the authorization ceiling based upon revised cost estimates" and, further, that the appropriations' conference report also suggests the desire of those committees to review and revise the funding upward for the last 6 unfunded weeks of fiscal year 1982 in light of later-revealed funding requirements, it is hard to see how the Secretary would have any reason whatever to believe under section 18(a)(1) that reductions will be necessary until such time as the authorizing and appropriating committees have given clear and convincing evidence that they will not provide the requisite additional authorization and appropriation contrary to the express declaration of their respective conference report documents.

Until such time, there exists not only no reason to believe that the committees and the Congress will not respond, but rather the distinct likelihood, as they have expressly stated, that they will consider and act promptly upon requests for or authoritative indications of need for additional funds to complete the fiscal year. That, after all, is the unequivocal history of the last 3 fiscal years when the issue of breaching the cap has been raised. Each time, often before the Secretary expressed concern, the Congress acted with dispatch to provide the requisite revised cap and, thereafter, the vital appropriations. For fiscal year 1979, we moved the cap to $6,778,900,000 in Public Law 96-58, enacted on August 14, 1979—the appropriations had been furnished on a contingent basis in Public Law 96-38. For fiscal year 1980, we moved the cap to $9,739,276,000 in Public Law 96-249, enacted on May 26, 1980. Finally, this year, we increased the fiscal year 1981 cap to $11,480,000,000 in Public Law 97-18 on June 30, 1981. At no time, was there any serious doubt that we would allow the program to continue at full funding.

That is why the conferees have further instructed the Secretary not to take any requisite action under section 18(b) to reduce allotments until after the full 60 days referred to in section 18(d) have elapsed from the date upon which he has informed us in a section 18(a) report of his intention to reduce benefits. Thus, the Secretary, under current circumstances, has no basis for issuing a section 18(a) report informing us of any reason to believe that a funding inadequacy exists just because his projection of unemployment, inflation and the impact of the reconciliation legislation as of February or March 1982 suggests a possible shortfall. Such a projection of inadequate funding would be hypothetical because it would assume that we would do nothing to raise the ceiling when we have specifically stated that our intent is to consider and act upon any supplemental he requests. Nor should he seek to evade our intent by respectfully declining, for budgetary reasons, to seek the needed authorization increase and supplemental appropriation. We have the will and the power to entertain such increases sua sponte should he refuse to cooperate and seek to compel a cap crisis. We, however, do not expect that he will behave in such a fashion and anticipated that, as part of the authorizing budgeting and appropriating hearing process this coming spring he will acquaint us with a realistic, updated appraisal of full year funding needs and then permit us to work our will to amend the ceiling fully, partially, or not at all, as the case may be.

That is the proper way for the executive and legislative branches to interact in handling this problem. It would be unseemly for the Secretary to precipitate an unnecessary crisis in the face of the clear desire of the four committees most directly involved in the process to confront the funding issue openly and with sufficient time to deliberate fairly and fully to a conclusion prior to any action by the Secretary under 18(b) to order the implementation of allotment reductions—with the requisite leadtime of approximately 45 days—or of allotment termination—after 15 days.

Thus, the way the conferees envision the procedures under section 18 of the act working is that, in the course of any fiscal year, on and after December 15—and not before the commencement of any such year before the initial appropriations figure will have become law and accurate projections of program need for the fiscal year will have become available—the Secretary will make his monthly reports covering that fiscal year.

These reports, scheduled for the 15th of each month, will describe the second preceding month's expenditure, according to the Secretary's best

estimate—for example the December 15 report covers October, the first month of the fiscal year—and cumulative costs. The reports will also contain a statement of the Secretary's reason to believe that allotment reductions will be necessasry, but only if there is clear and convincing evidence to support such a statement, based upon the evidence of the intent of the authorizing and appropriating committees of the House and Senate not to provide the funds that will be needed to continue providing full program benefits. Once the Secretary formally makes the "reason to believe" statement, he then has to wait 60 days to give Congress time to change the cap. If Congress, after the lapse of 60 days, has not changed the law sufficiently to obviate the need for benefit reductions, the Secretary can then, and only then, commence the administrative steps to proceed to reduce benefits in line with available levels of funds. No benefit reduction orders could be issued until after the full 60-day period for congressional action is completed.

The House may not yet realize what it has done to alter the food stamp program in the last year and one-half. The food stamp program has, through a series of substantial changes wrought in May 1980, August 1981, and now, been retrenched and revised more than any other major social program in an effort to make sure that it operates effectively to provide benefits directly to impoverished individuals and households. Before now, it was possible for critics of the program to assert that the program was defective because it fed strikers or college students or persons with incomes substantially above the poverty level or raised benefits in a way that overcompensated for changes in the cost of living. Today, any such contentions are factually false. After the 1980 amendments, the 1981 reconciliation provisions, and what we may accomplish today:

No strikers remain eligible for the program because of the loss of income brought about by their strike.

The only students that remain are either elderly, disabled, have dependents to support, or work almost full time.

The absolute income eligibility cutoff for a family of four is below $11,000 or 130 percent of poverty, while three-quarters of all participant households have gross incomes below $4,800 a year or $13 a day, which is hardly enough to sustain life in these inflationary times.

There will be no cost-of-living benefit increases for 21 months from January 1, 1981, until October 1, 1982; there will not be any of the deduction increases this Congress awarded in 1980; all deductions will be frozen from January 1, 1981 through July 1, 1983, at which point any cost-of-living adjustments will no longer take account of the unusually high and, for food stamp recipients' purposes, irrelevant increases in homeownership costs based upon mortgage interest rates and the price of new homes; and the earned income deduction to which every worker is entitled to compensate for social security taxes, Federal and State taxes, transportation and other work-related expenses, has been dropped from 20 to 18 percent of gross earnings.

The old standby criticisms of this program have been repeated for years by all of those who like to take aim at the food stamp program because only the weak and the politically powerless enjoy its meager benefits of less than 50 cents per person per meal are no longer valid. They should not be repeated any more. The strikers, the students, and the greedy are gone forever so long as this administration properly policies the program. No one is going to get fat on the food stamp rolls.

By virtue of these and other changes in the shape of the program, the food stamp portion of the budget has been significantly diminished. The food stamp program has been one of the primary targets of both the Office of Management and Budget and our budget process. The Agriculture Committee has responded swiftly and in the best of faith to meet the budgetary challenge by trimming expenditures beyond what the Congress mandated. The first concurrent budget resolution called for slicing $1.458 billion from the program for fiscal year 1982. We have replied with program changes worth nearly $2.4 billion or $900 million more than what was required. Similarly, for fiscal years 1983 and 1984 this committee, through the Reconciliation Act of August that it helped shape, has curtailed the program by another $2.046—$75 million on top of the resolution—and $2.334 billion—$7 million more—respectively, for an overall total of $6.75 billion in program retrenchment for this and the next 2 fiscal years.

As a result of these massive contractions we have ordered for the food stamp program, appoximately 1 million persons have been or shortly will be dropped from the program rolls, while nearly all of the 22 million persons remaining on the program, well over 90 percent of them from families below the poverty line, will receive lower benefits than they expected under the law as it was in effect in July. The only households that will not be adversely affected by what we have done will be those, primarily elderly, that are eligible to receive the statutory minimum benefits of $10 per month or 11 cents a meal.

That is a record of program reductions that I am not particularly proud of. But I have labored to do what had to be done politically to assure that the food stamp program would survive. The program is critical to all of those we have determined deserve its benefits. We cannot afford to lose it or to jeopardize its continuation in any significant way. One particular part of the program that I deem to be critical in light of the incredible increase in energy costs during the past few years that has hurt the poor more than others, has been the provision contained in section 5(d)(11) that excludes from income, for the purposes of calculating food stamp eligibility and benefits, "any payments or allowances under any Federal, State or local laws for the purpose of providing energy assistance." That provision was added by Public Law 96-249 on May 26, 1980. It was a product of the House Agriculture Committee, which specified its intent on the meaning of this subsection in House Report No. 96-788 (96th Cong., 2d sess.) at page 123 as follows:

> The Committee's intent is that all energy assistance provided households through the use of Federal, State, or local funds flowing from Federal, State, or local laws that focus on the problem of energy assistance would be entirely excluded from food stamp income regardless of the form which it takes and, of course, from food stamp resources as well regardless of the period of time such assistance is designed to cover. Where energy assistance provided households through the use, in part or in total, of Federal, State, or local funds flowing from Federal, State, or local laws not specifically dealing with energy assistance is concerned, such as Aid to Families with Dependent Children or General Assistance, the Committee also intends to guarantee excludability provided that the Department is satisfied that the increase in benefits awarded by the State or local government (either on a matching basis with the Federal Government or on its own) is, in fact, an energy assistance-related increase and not simply a general welfare increase that would have occurred even were energy costs not a factor and that, therefore, should be viewed as income for food stamp program purposes. Only where energy costs are a but—for cause of the increased payment should the payment be excluded from income and, then, only to the extent that the increase is attributable to high heating costs rather than general inflationary conditions. The Committee obviously expects that State legislatures and local councils will operate in good faith and not take advantage of this exclusion by labeling every annual or other regular welfare allotment adjustment an energy assistance increase in order to take advantage of this exclusion on behalf of food stamp recipients within its jurisdiction.

The above statement represents the state of current law. The revision we made in conference does not significantly change its status. All Federal payments for the purpose of providing energy assistance would continue to be excluded as income, whether or not specifically designated for energy assistance. It is the purpose for which

they are given and not their label that governs.

With respect to State or local payments, the purpose test of May 1980 continues to govern as well, but, in addition, we have inserted two further prerequisites that such payments must meet before they qualify for exclusion from income. The term "payments or allowances" refers, of course, not only to direct cash grants, additions to existing grants, or vendor payments, but also, in the same fashion as the term "payments" is utilized in companion section 5(d)(8), to income tax refunds, rebates, or credits, including income tax credits that take the form of refundable credits as well as offsets against taxes due.

The two new prerequisites are, first, that the "payment" or "allowance" be designated by the legislative body that authorizes it as being for energy assistance. Federal payments do not have to meet this label test; State and local payments do. Second, the Secretary has to review the "payment" or "allowance" to determine that its method of calculation comports with the "energy assistance" label applied to it in the sense that the actual sum of assistance provided is determined by reference to a period of energy need not longer than 6 months—the heating season or the cooling season or some aggregate combination of both.

Thus, the State or local government would have to demonstrate by reference to studies, reports, and the like that it made a good faith effort to evaluate a typical household's increased energy utility needs during a period or periods of 6 months or less in the calendar year and developed the energy assistance "payment" or "allowance" in light of such analysis. The State or local government would not be required to pay out the "payment" or "allowance" over 6 months or less, since that might lead either to an administrative impossibility—a tax credit applied once a year at taxpayment time could not feasibly be handled in this fashion—or to a costly administrative nightmare—the State or local government might have to reprogram the computers twice a year or revise benefits manually the same way in order to limit the delivery of the payment to a 6-month timeframe, which might well make administrative costs either commensurate with or a substantial portion of the benefit delivered. The State or local government would be expected to justify the annual or more than 6-month payout by describing for the Secretary the nature of the administrative difficulties involved that make it infeasible or impracticable for it to adhere to the 6-month payout limitation. Calculation of the payment on a 6-month-or-less basis would still be required.

The conferees recognized that State and local government that are now making energy assistance payments or allowances, all of which qualify for exclusion from income solely on the basis of their purpose, will need a reasonable period of time to change their laws in order to satisfy the new label and calculation requirements. Accordingly, we have indicated that this should be done by the close of the next legislative session—special or otherwise—following the promulgation of final—not merely proposed—regulations implementing this subsection or 6 months after such promulgation, whichever occurs first. Thus, if final regulations emerged on June 15, 1982, the States would have until December 15, 1982, at the latest, to complete this task or, if earlier, the end of any legislative session commencing—not continuing—after June 15.

The fact that we have clarified the manner in which the State or local "energy assistance" payment or allowance exclusion will operate in the future should not be construed as affecting the exclusion in its current form until the requisite time period for compliance has elapsed. Thus, New York, Oregon, Washington, and similar States who already make such payments or allowances through the AFDC program or other mechanisms should be permitted to continue to exclude such payments or allowances from income until the appropriate legislative session has ended or the 6 months have passed—whichever is sooner—and they have, in that time, either failed to apply the appropriate label to the payment or allowance or to calculate it for a 6-month period or less, as we now will require.

The conferees deleted entirely provisions added in response to the administration's desire to limit expedited service pursuant to section 11(e)(9) of the act and current regulations implementing that section. Accordingly, the current state of the law with respect to eligibility for expedited service as described in 7 CFR 273.10(e)(3) should remain intact, without administrative revision, unless and until Congress takes further action to change the situation. The administration tried to change the status quo and failed. It is bound by that failure.

Under current law, food stamp applicants must be screened for emergency issuance by the local office at the time the household submits its application. If the household is eligible for expedited consideration, it must be able to receive its authorization or stamps no later than the beginning of the third working day from the date of application.

The administration wanted to modify this to exclude coverage of women with children who are suddenly abandoned, laid-off workers who will not receive unemployment compensation for several weeks, and migrant farm workers who are beginning a new job and will not get paid until the end of the month. Without expedited service, these families would go hungry.

There are many protections in the law against abuse of this provision, including requirements for an interview and completed application, verification of household identity and residence—and verification of other factors if processing time permits—and work registration. But there is no documentation of abuse in connection with expedited service. Indeed, a study of expedited service in Texas conducted by the Department of Agriculture and the Texas Department of Human Resources concluded that errors because of ineligibility or overissuance amounted to only 8.7 percent of the total coupon allotments issued, which is less than the national average error rate for service on a regular basis.

If the administration develops more evidence of abuse in this area, the Congress will consider making responsive revisions. Until then, the law stands in its current form.

On behalf of the conferees I would like to note that, even though guaranteed expedited service, certain destitute migrant households may encounter hardships as a result of other provisions already enacted which require the initial month's benefits be prorated from the date of application. Current interim final regulations issued by the Department on September 4, 1981, provide destitute migrants applying late in a month only a few days' benefits on an expedited basis; the next month's allotment will not be issued until the first month's circumstances are verified. Where migrants must seek such verification from outside the State, the issuance of the second month's benefits may be unreasonably delayed. The conferees, therefore, direct the Department, when issuing final regulations on this matter, to assure that, when verification must be acquired from outside the State, destitute migrant households applying for expedited service in the second half of the month be provided with a reasonable opportunity to obtain such verification without a loss or delay in benefits.

The conferees determined to limit restoration of benefits improperly denied by a State agency to a period 1 year prior to the receipt of a request for their restoration or discovery of their improper denial by the State, whichever occurs earlier. This provision, like all others in the bill where no other express provision contravenes, is to take effect upon such dates as the Secretary shall prescribe. This means that the provision will take effect in the future and will not operate to cut off or curtail any claims for improperly denied benefits that have already been made and are in the

process either of administrative determination or litigation. The rights of households whose claims are in process of being resolved should be determined under current law and regulations. The 1-year cutoff would not apply to them.

The conferees adopted the House provisions on work requirements and workfare. One portion of the House amendment exempts from the work registration requirement that a job offer be accepted household members who are charged with the care of children age 6 through 11, if they cannot secure adequate child care for the children. The inadequacy of the care that is available or the nonavailability of any such care would be the basis for a good cause refusal to turn down an offer of unemployment. Since the purpose of this amendment was to make the food stamp program comparable to AFDC-WIN provisions, and, since section 6(d)(3) of the act further mandates that food stamp regulations "be patterned to the maximum extent practicable on the work incentive program requirements" of AFDC, the standard for adequacy of child care services should be the standard applied to WIN under 45 C.F.R. section 224.30(c).

Finally, under workfare, although the limitations of scope at conference prevented us from permitting private nonprofit employers directly to make job offers in addition to or instead of political subdivisions, I would like to reiterate the conferees' intent that private nonprofit employers be able to achieve that same objective and become workfare employers indirectly by virtue of contractual arrangements with willing political subdivisions. Part-time job opportunities are numerous in the private nonprofit sector of the economy. That sector would benefit greatly from aid from workfare participants. The mutual needs of each group should be enhanced in the process.

While the conferees have expressed their intent that compliance with an AFDC workfare program shall be treated as compliance with food stamp workfare requirements, we do not intend conversely that noncompliance by a food stamp recipient household with an AFDC workfare requirement operate as noncompliance by that household with its food stamp workfare requirement so as to disqualify that household from the food stamp program. Such disqualification should not be permitted since some AFDC workfare provisions are significantly more stringent than food stamp ones—for example, AFDC mothers with 3-, 4-, and 5-year-olds have to submit to workfare, and two household members may each have to work off in full the household's AFDC benefits rather than each having to work off half of the household's food stamp benefits or some combination amounting to the full amount of such benefits, but not twice that amount.

Finally, under our cash-out pilot projects, we have indicated that we expect that the average value of food stamp allotments that households of a given size would obtain would be used to determine the average level of cash payments that would go to households of the same size, but other factors, such as income, would be taken into account in determining the level of cash-out payments going to individual households in lieu of food stamps.

Mr. COLEMAN. Mr. Speaker, will the gentleman yield?

Mr. RICHMOND. I yield to the gentleman from Missouri.

Mr. COLEMAN. Mr. Speaker, I thank the gentleman for his positive statement about the food stamp program that is in this package tonight. The gentleman is absolutely right. If we vote no, we are voting down another billion dollars of unanticipated cuts in the food stamp program that have not been asked for by the President, by the gentleman in the well, by myself, or by anybody else, but because we would defeat this bill tonight. That is what we have got to recognize as we vote here. All the interests and all the coalitions over the years that have been put together to pass this bill and the gentleman has put together, have helped this program, and I thank the gentleman.

Mr. WAMPLER. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. THOMAS).

Mr. THOMAS. Mr. Speaker, I would first like to compliment the chairman of the the Agriculture Committee, Mr. KIKA DE LA GARZA of Texas, and the ranking member, Mr. BILL WAMPLER of Virginia. Both of whose steady presence over the almost 5-week period of this conference was much in evidence. My compliments to all conferees in this House and the other Chamber. It was trying, difficult work, and the product of that labor is before us today.

This conference report is being damned by some as too much; by others as too little. First, to those who believe it is too much. This farm bill reflects more so than any previous bill a greater reliance on the marketplace as the source of the American farmers' income and it defines that marketplace as the world. If this bill should fail because some of you feel it is too much, let me warn you that any other alternative will cost more, whether it be a reversion to the Agriculture Acts of 1938 and 1949, or the extension of the current program, or attempts to generate a new program. Because we are shooting at a moving target, any attempt to redo this bill would require figures generated from more recent information, and the more recent information clearly indicates that a second-time-around bill must be a higher priced bill. So if you want a more market-oriented farm bill, at the least cost, your vote is aye. As for my colleagues who would vote no because it is too little, I understand your desire to support your constitutents' interests. But to you I must stress that the reapportionment revolution that started in the 1960's has come almost full circle, and that this House, whose membership reflects population distribution throughout these United States, will support only reasonable protection for our Nation's farmers, and the reasonableness will be defined by a majority of this House. Billions upon billions paid out of the Treasury for agriculture commodities we cannot sell can no longer be a way of life. The votes just are not there. We have to convince our colleagues on this floor of the soundness and purposefulness of any farm program. To vote no in hopes of defeating this conference report for something better is a futile gesture at attempting to turn back the clock. Those days are gone forever; and if those of us who represent agricultural areas want reasonable programs, we can ill afford to push our colleagues to an up-or-down vote on the very existence of a dairy or wheat or feed grain or what-have-you program.

As evidence that the conference report on the Food and Agriculture Act of 1981 (S. 884) will continue to reflect a greater reliance on the marketplace for income rather than dependence on federally regulated programs, let me present you with three examples: cotton, rice, and sugar—the subcommittee on which I have the privilege of serving as the ranking member. The cotton provisions adopted by the conferees would continue to base the loan rate on a percentage of the marketplace. Target prices would be continued at the higher of either 120 percent of the loan or at mandated levels for each of the 1982-85 crops. Acreage allotments and marketing quotas would be suspended through the 1985 crop.

Title IX of the conference report provides for a price support program for sugar beets and sugarcane. From the effective date of this act through March 31, 1982, sugar processed during that time would be eligible for a purchase program at a level of 16.75 cents per pound raw value. Beginning on October 1, 1982, price support loans for the 1982 crop would be available at 17 cents per pound. For the 1983-85 crops, loans would be available at 17.50 cents per pound; 17.75 cents per pound and 18 cents per pound respectively. By requiring that all loans be made and repaid within the same fiscal year, it is unlikely that this program will result in any costs to the Government.

Title VI of the conference report contains provisions for a rice program. Acreage allotments and marketing quotas are repealed, thus providing program benefits to all rice producers who comply with program requirements. Price support loans as well as minimum target prices would be continued. In an effort to make the rice program even more market oriented, the legislation requires the Secretary of Agriculture to study the use of either the future price or the price received by farmers as a basis for determining the loan rate.

In my opinion, Mr. Speaker, this bill fits today's times, for both those who want a market-oriented program, and those who believe it is in the best interest of both the American farmers and the consumers to have a Federal farm program.

I urge an aye vote on this conference report.

Mr. PEYSER. Mr. Speaker, will the gentleman yield for a question?

Mr. THOMAS. Certainly, I yield to the gentleman from New York.

Mr. PEYSER. I thank the gentleman. I just would like to clarify one thing for the House. Is it true that the 16½ cents that people keep quoting for the sugar program is not the loan price that is included in the bill and that there is also an escalator in there to move the sugar price up; is that correct?

Mr. THOMAS. The price in the conference report is not 16½ cents. It is 16.75 cents. That is a purchase program. That purchase program can run through 1982 and clear up until the last 2 months approximately of 1983, so that in fact it is over 1½ years of 16.75 cents. At that time in the second year a loan program triggers which goes up a quarter of a cent a year over the next 4 years; but the maximum rate over the 4 years for that sugar program goes from 16.75 cents to 18 cents.

Mr. PEYSER. I thank the gentleman.

Mr. DE LA GARZA. Mr. Speaker, I yield 2 minutes to the distinguished majority whip, the gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, the decision that I have come to on this conference report has been a very difficult one for me. As the conferees know, I was one who opposed its acceptance by the conference and refused to sign the report because I truly believed its provisions to be inadequate. As a consequence, it is with a great deal of sympathy that I listen to respected colleagues on both sides of the aisle as they suggest that we reject this conference report tonight in the hope of providing America's farmers and ranchers with a better bill in the coming months.

While I respect that view, I do not share it. As I see it, I think the decision we must make tonight is quite simply whether we do as much as we can now to provide a safety net of income and price support for American farmers or conversely, place the agriculture community at great risk hoping we will be able to do something better in the months ahead.

The fact of the matter is that in 1977 we passed the last omnibus farm bill but since then, we have modified it every year. Through this process, we improved the 1977 farm bill.

While I profoundly hope that the provisions before us are not the last statements on the future of American farmers and ranchers to be made by this Congress between now and 1985, I am convinced tonight it is the best bill that we can produce for now. Otherwise we face the possibility of a 1949 act coming back into effect on January 1. The 1949 act is not a good law for dairy farmers, for rice farmers, or for wheat farmers. It is out of date and out of tune with American agriculture today. It would be a disaster if that law were in effect for American agriculture for any length of time.

It is for these reasons that I urge my colleagues who share my concerns over the needs of American agriculture to join me here tonight in approving this conference report. Then we will have a chance to work from this day forward to improve the basic bill.

I urge Members on both sides of the aisle to join together in supporting this conference report so that we will at least have provided this minimum level of support for American farmers and ranchers.

Mr. WAMPLER. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri (Mr. COLEMAN).

Mr. COLEMAN. Mr. Speaker, as the ranking Republican on the subcommittee responsible for the food stamp program I can assure you that the conference report represents substantially the same provisions that were contained in the food stamp section of the 1981 farm bill, as it was passed by the House of Representatives. The conference was prolonged and discussions took place over a 6-week period. Despite this, agreement was reached on the food stamp issues and this agreement is supported by a majority of the conferees, including the chairman of the subcommittee, the gentleman from New York.

There were over 40 provisions that were considered that pertained to the food stamp program. The House conferees receded on only four of these. The conferees from the other body receded on the remainder, either totally or with amendments worked out among the conferees.

There was one provision that was difficult for the conferees to agree upon—the adjustment of the thrifty food plan. This provision, offered by the gentleman from New York and by me, delays the adjustment of the thrifty food plan until October 1982 and represents a savings of $700 million during fiscal year 1982. Because of the difficulties in resolving this issue the conferees agreed that the food stamp program would be reauthorized for 1 year, including the delay in the adjustment of the thrifty food plan, at a spending level of $11.3 billion. I might mention that this figure does represent the estimate of the cost to fully fund the program for fiscal year 1982. It was also agreed that early in 1982 both the thrifty food plan and the reauthorization of the food stamp program for future years will be discussed.

Therefore, you can see that the food stamp section of the conference report on the 1981 farm bill represents substantially the same provisions that were presented to you in October, with the exception of the length of the reauthorization of the program. This limited reauthorization on a compromise that was agreed to by the conferees. Those Members who supported the food stamp program and voted for the provisions contained in the 1981 farm bill can support this conference report. Their interests were protected. I urge you to support this conference report and work with me and with the gentleman from New York next year when we will consider future reauthorization of the food stamp program.

I would like to take this opportunity to remind you of the provisions that are contained in the food stamp portion of the 1981 farm bill and the conference report. As you will recall the Omnibus Reconciliation Act contained many items pertaining to the food stamp program and represented a major reform of that program. Over $1.65 billion was saved for fiscal year 1982 during the reconciliation process. There is an additional $700 million savings in the conference report. A total savings of $2.35 billion for fiscal year 1982 will occur once this conference report is adopted. The provisions that are contained in the 1981 farm bill and in the conference report represent measures aimed at tightening the administration of the program, eliminating fraud and abuse and providing all political subdivisions with the opportunity to operate a workfare program.

I urge you to support the conference report on the 1981 farm bill.

Mr. WAMPLER. Mr. Speaker, I yield my remaining time to the distinguished Republican leader, the gentleman from Illinois (Mr. MICHEL).

□ 2120

Mr. MICHEL. Mr. Speaker, my colleagues, may I preface my remarks by saying that the President still wants all the Members to come down to his

house tonight, or the "People's House," and has extended his party for 2 hours beyond the expiration of the vote on this bill.

Mr. Speaker, I rise in support of this conference report.

We are really voting on one of two farm bills tonight. One was written in the 1930's and the 1940's and later years. It is called the permanent law that will go back into effect at midnight, December 31, 1981. The other was laboriously written by this Congress over the past year. It is called the conference report on S. 884.

We can enact either bill tonight. By defeating the conference report, we will cause all those old antiquated laws to go back into effect. If we were to do so we would add to consumer costs, increase farm program costs and throw American farmers and ranchers into a fit of confusion and helplessness for the indefinite future.

On the other hand if we adopt this conference report which is the result of the hard work and good faith of dozens of Members of this House from both sides of that carpeted passage that separates the parties in this chamber we will be moving ahead, not backward.

We all recognize there is considerable opposition to this bill. It is by no means perfect; I do not like some aspects of it and I would be surprised if any Member of this House found perfection in what, by nature, is an omnibus compromise of various points of view, parochial, economic, and geographic.

But let me identify the opposition. This bill's chief adversaries are the big dairy cooperatives. They seek to kill the entire conference report because they object to its dairy price support provisions. They would even kill other dairy improvements such as continuing donations of dairy products to veterans hospitals and the military, dairy indemnities, and marketing order changes, in this blind effort to keep an outrageously expensive and wasteful dairy price support program on the books.

By killing this bill tonight the House would be voting to spend another $379 million in fiscal year 1982 on a dairy program that is bursting at its seams with surplus butter, cheese, and nonfat dry milk.

Another group opposing this conference report is composed of some of those businesses using peanuts in the manufacture of food and confections.

Let me emphasize the word "some."

Some of these people think they will get a new peanut bill.

Others, like CPC North America manufacturers of Skippy peanut butter understand that is most unlikely and know that reverting to the old peanut law which sets minimum peanut price supports at $701 a ton is worse for their businesses than this bill which sets the 1982 level at $550 a ton.

Farm legislation can be complicated, but you do not have to hold an MBA to understand that $701 is more than $550.

That is why the people who make Skippy peanut butter wrote to me as follows:

> The Conference Report on that legislation contains important improvements in the peanut subsidy program, and we urge your support for the conference report when it is considered by the House. As you know, all affected interests have been asked to accept substantial compromises, but we believe that, while we may have wanted additional amendments to specific sections of the bill, the public interest will be best served by this comprehensive approach to farm legislation.

Now there are others who say we should kill this entire bill because the sugar title is too generous to American sugar growers but what is the alternative?

First, the Secretary of Agriculture can set sugar supports at exactly the same level under permanent law.

Second, its an unpleasant but true economic fact that our U.S. sugar industry simply cannot survive without some form of Government help and it has been this way for over 200 years.

And third, this conference substitute is written to give the Secretary considerable latitude in administering the new program. There will be full and ample opportunity later for consumer groups to have their day in court under the Administrative Procedure Act.

There are others who say the grain supports are too low or too high; and we hear from this special interest or that one which is not fully satisfied.

But what do they offer as an alternative?

I will tell you what they offer: They offer costly chaos.

If we leave here tonight without a farm bill, taxpayers will be immediately saddled with adding from $674 million to $1.6 billion to the billion fiscal year 1982 deficit. Under the old law expenditures will be more in 2 years than in 5 years under this bill. What kind of a signal will that be to a nervous investment community already worried over high interest rates and the ability of our Government to get its fiscal house in order?

What will it do to farmers and ranchers who wonder what kind of a program they will have next spring? Wheat farmers for example would be placed in the impossible position of voting in a wheat referendum sometime in March 1982, some 6 months after they have planted their winter wheat.

What about the thousands of poor people here at home and overseas who depend on the food stamp program and Public Law 480 for their daily sustenance?

Sure, the continuing resolution will carry funding for these programs until March 31, but the basic authorities and needed statutory changes would not be in place unless this bill becomes law.

The same is true in regard to dozens of other programs in this bill favorable to American agriculture and the public health and safety.

I cannot believe that this House will ignore the urging of our President, the overwhelming approval by the other Body, the support of major farm organizations and commodity groups, and the backing of business and public organizations simply for the fatuous notion that something better might be produced later.

There is no later.

We have to ask ourselves, if not now, when are we going to vote for a comprehensive farm and food program.

If not us, who?

The answers are obvious—a vote for this conference report is a vote for a stronger, better American food and fibre policy.

A vote against it is a vote for utter chaos and confusion.

Let me say one word to those who think we can get by with a 3-month extension. The other body will never buy that, and we will not have anything. We will go back to that old law. Now, the President has told us all that he is willing to sign this bill that is the product of this conference report. I urge my colleagues to support it enthusiastically.

The SPEAKER pro tempore. All time of the gentleman from Virginia (Mr. WAMPLER) has expired.

The gentleman from Texas (Mr. DE LA GARZA) has 5½ minutes remaining.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the gentleman from Kentucky (Mr. HOPKINS).

Mr. HOPKINS. Mr. Speaker, I thank the chairman for yielding.

Mr. Speaker, I rise in strong support of the conference report.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. ALBOSTA.).

Mr. ALBOSTA. Mr. Speaker, rural America is facing a catastrophe and the administration is trying to push farmers over the brink. The 1981 farm bill that the House is considering today is a disaster for farmers and consumers. Unlike some of the suffering and hardship that occurred in rural areas as farms were foreclosed on and farmers could hardly even feed their own families.

As a lifelong farmer, I know firsthand the importance of strong farm programs.

If the House passes the farm bill before us today, we will be leading American agriculture down the same

road of ruin. How long can we expect farmers to produce commodities at below the cost of production? How long can we expect farmers to continue to borrow money to finance their farming operations and eat away at their equity?

While I would have preferred to see target prices eliminated for wheat and feed grains and loan rates tied to 70 percent of parity, I could have accepted the House-passed farm bill that allowed for cost of production increases in the loan rates from year to year. The bill we have before use today contains low loan rates and target prices. No cost of production adjustment will be permitted during the 4-year life of the bill. The loan rates in this bill for wheat and feed grains will bankrupt farmers unless they are changed.

I have many farmers growing Soft White wheat. To have the section on wheat do no better than to provide less than what a minimum should be for a loan rate is less than I can accept. The problem with the section on wheat is that it sets a minimum loan rate for the 1982 to 1985 crop years at not less than $3.55 per bushel which means the Secretary of Agriculture can, if he wants, in 1984, have a loan rate as low and disastrous as $3.55 without any good incentive in the program to pay for acreage diversion.

The price support loan rate for corn that would be established at $2.55 per bushel for crop years 1982 through 1985 seems to me to again be a disaster.

Farmers need something more than disaster protection. What they need is a decent loan rate tied to parity or some other system of indexing based on the cost of production. I see the feed grain section of this bill bringing disaster to the 10th Congressional District of Michigan.

Mr. Speaker, I cannot support what I believe to be a devastating program for farmers who now are just able to keep their heads above water.

I consider the soybean section to be another problem in this bill. There is no real protection associated with this legislation which will help the soybean growers in my area. Mr. Speaker, $5.02 is the floor established for a loan rate in this bill for crop years 1982 through 1985. This shows how little knowledge the conference committee had on the cost of producing a bushel of soybeans.

The dairy provision is a complete disaster. It is true we have a surplus of dairy products in the United States that are now owned by the Commodity Credit Corporation. But why is the Department of Agriculture not trying to sell these dairy products? Why is the U.S. Government not using these dairy supplies to help support our foreign policy goals and win allies for the United States? The administration is more than willing to fight hard for a foreign aid bill of over $11 billion that Congress has just passed, but will not help the American farmer. We should take care of our people first and make sure our economy in both the urban and rural areas is strong before we give $11 billion to other countries.

I have many dairy farmers throughout my district who, I am sure, would not want me to support a dairy program that would reduce the minimum support below 70 percent of parity.

I think the dairy industry is willing to compromise, but this legislation is not a compromise. It is a mandate from Budget Director David Stockman to the Congress and to the Secretary of Agriculture to bring disaster and devastation to the dairy industry of this country.

The dairy program must be at 70 percent of parity. I believe we will see surplus production drop dramatically in the next several years. Dairy production would drop even further if other parts of agriculture were strong so that farmers would not be shifting out of wheat and feed grain production.

This farm bill does contain one good feature that is particularly important to Michigan—a sugar loan program. I have fought for the past 3 years to get sugar legislation passed establishing a sugar loan program. Unless such a program is started again I believe we will see the domestic sugar industry further reduced. The Secretary of Agriculture under the 1949 Agriculture Act has the authority to establish a loan program for sugar producers very similar to the one in this farm bill. I urge and hope that Secretary Block will act quickly to implement a sugar loan program or once again the United States will be hostage to foreign sugar production.

I believe the sugar section of this bill could have helped save the sugar industry in Michigan, but it would be my hope that if this bill is defeated, the Secretary of Agriculture will use discretionary powers under the Agricultural Act of 1949 to immediately place a loan rate of at least 17 cents a pound for sugar production in Michigan. If he does not do this, I believe we would be allowing our domestic sugar industry in this country to die. We would become totally dependent on foreign sources for sugar supplies.

The Members of this body who have consistently been against a Federal sugar program will be the ones to eventually shoulder the responsibility for the disastrous situation that will occur in this country by us not having a domestic sugar industry.

The section on embargo protection has some value. Mr. Speaker, I am sure this body will have to go back to the drawing boards and come up with an acceptable alternative to this piece of legislation, and I want those Members who worked on this legislation to know that the embargo section is acceptable. However, we must come up with a more acceptable bill to the American farmer.

Before concluding, I would like to point out one further fact. High interest rates have been plaguing American farmers for the last several years. Now is no time to further squeeze farmers by depressing the prices they receive for their commodities. Farming is a unique business. Unlike a manufacturer of cars or machines, farmers must make their production decisions far in advance of planting time. The crop must be nurtured through to harvest. Once harvested, the crops must be orderly marketed. Farm programs are therefore unique and we must assist and not destroy this orderly marketing. We must pass a farm bill that will help American agriculture. I therefore must vote against the farm bill.

Mr. DE LA GARZA. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, I had the honor and privilege of leading the House delegation on this conference. Let me tell you very sincerely and very truthfully, as I said in the beginning, I wish we could have brought something more for those specific commodities—dairy, feedgrains, wheat—but I have been down in the valley of the shadow of death, Mr. Speaker, and I see what is ahead.

We faced the other side. They would not give. We stayed 27 days. This is the only thing we could bring back.

If this bill does not pass, we will go to the 1949 act. Some argue that it will not happen; I do not agree.

I tell you we will lose $1 billion for food stamps. I cannot wake up in the morning with that on my conscience.

I am in a little different position than most of my colleagues, having the responsibility of being chairman. I can tell you very sincerely it is not an easy task. I am telling my colleagues that there would be utter chaos—or achieve a more favorable result. They are not going to undo Gramm-Latta. We will have the 1949 act. It will be a disaster. The added costs alone will be $2 billion to $4 billion above the conference report.

I wish I could think that we could come back. I would be the first one to come back. But I have seen the other side. I have been to the White House. I have been to the executive office building. I can see no alternative to the conference report.

Granted, we are dealing with a patient who is sick. What they say about the American farmer is true. This is not anything but maybe a blood transfusion, and at that it may be the wrong type blood. But we are going to have a dead patient if we do not pass this tonight. We are going to have chaos in the food stamps. We are going to have chaos in the lending in-

stitutions. We are going to have chaos as far as the budget is concerned. And I do not want to be here 60 or 90 days from now when we cannot get more than we could tonight and say, "Gee, I wish they would have heard me that other night; I wish they would have heard me that other night." I do not want to say that.

If I were to fight this bill for the consumer, I would not be doing it on sugar. That is the least thing that can affect the consumer. A package of cigarettes would cost more than the extra cost of sugar over an entire year. And then, Mr. Speaker, peanuts is something that we have worked at diligently to bring a compromise.

□ 2130

The House did bring back a good compromise, contrary to what many of the Members say. An individual Member may disagree if he is from a wheat area and he thinks he can get more. I am not quarreling with that.

All that I am saying is that what we have tonight—what they call a turkey and make fun of in the Christmas season—is that we are not forgetting the American farmer. This gives him a safety net. Granted, it may not be what they want, but it is the best we can do under the circumstances.

Finally, Mr. Speaker, let me say in the spirit of the season that I have had nothing but cooperation and good will from the Members who oppose this very strongly and very vehemently. I have meticulously guarded and protected their interests. How do the Members think I felt here giving more time to those who oppose this bill than to those who support it? But then, I wanted to protect their interests. It is a long, long way from the banks of the Rio Grande for a poor Mexican boy to be chairman of the great Committee on Agriculture, Mr. Speaker. Because of this country, our system of government, the grace of God, and the people who have touched my life along the way, I am here. I think that I owe it to those people. I also have the obligation to warn my colleagues that I have seen the crystal ball. A better bill is not there. I wish that it were, but it is not.

● Mr. BROWN of California. Mr. Speaker, I rise in support of the conference report on S. 884, the 1981 farm bill. As a conferee on this legislation, I have participated in, and at times endured, the efforts that went into achieving a compromise on this complex bill. I would like for my colleagues to be aware of the excellent job that the chairman of the House Committee on Agriculture, Mr. DE LA GARZA, performed in moving this conference report through the many weeks of meetings and negotiations. It was no easy task, given the unrelenting refusal of the Administrator to accept what I considered to be much fairer language whan the conference report currently contains.

I support this conference report because it is the best compromise that we could secure at this time. I support it because these programs are preferable to the chaos which could result from having no farm bill. Our distressed farm sector has enough problems without the uncertainty which would result from not enacting this bill. I support this legislation out of respect for Mr. DE LA GARZA and the rest of the conferees who have devoted so much effort to crafting this compromise, however imperfect it may appear to some.

But let me clearly state that this is the administration's farm bill. More worried about numbers than farmers and consumers, the administration refused to accept compromises offered to them. And when spring's thaw reveals what the administration has done this winter, it is the administration who will have to answer to America's farmers and consumers.

We are entering times which require innovation and creativity, not dogma. Seeing the Federal Government as the source of all of this Nation's problems is just as bad as viewing the Federal Government as the final solution to all of our ills. My voting record over the last 17 years shows my opposition to farm programs which I consider misdirected or wasteful. But I have been motivated by a desire to seek what was best for the American farmer and consumer. I am not convinced that these same motivations are the basis for the administration's position on the farm bill.

But I support this conference report and I urge my colleagues to do the same. Next year's farm decisions are being made now and America's farmers need some steady point from which to make their plans. To continue their uncertainty when the administration leaves us no possibility of an alternative, is not a path I choose to take.●

● Mr. EVANS of Iowa. Mr. Speaker, I thank the gentleman for yielding me time to support the conference report on the farm bill.

I want to talk for just a moment about some of the very peculiar and damaging things that will happen in the area of agricultural exports if we reject the conference committee report and revert to the 1949 act.

First, there is no protection in the 1949 act against embargoes on exports of farm commodities—embargoes such as the disastrous prohibition against grain exports to the U.S.S.R. imposed in 1980. The new farm bill contains provisions that virtually guarantee that such an embargo can never happen again. Having such provisions in the law is vitally important at this time of great unrest in Poland and Eastern Europe.

Second, the 1949 act contains none of the provisions of Public Law 480—the food-for-peace program. And Public Law 480 has been used with great effect over the years not only to assist nations in great need, but also as a powerful tool to develop our own commercial export markets.

Third, and potentially most damaging, are the strange things that the 1949 act has to say about how the Commodity Credit Corporation can dispose of the surplus stocks that it acquires from time to time. Both present law and the new farm bill severely restrict the conditions under which the Commodity Credit Corporation can dispose of surpluses and insure that such surpluses must be sold at prices sufficiently high to avoid disrupting the commercial price structure for farm products.

But the 1949 act contains few such assurances. The 1949 act says the Commodity Credit Corporation may sell its surpluses at 105 percent of the support price—or loan rate. And sales at 105 percent of the loan rates which will be established under the 1949 act would mean miserably low prices to farmers.

But the problem does not stop there. The 1949 act also says that there shall be no restrictions—and I repeat, no restrictions—on the price at which the Commodity Credit Corporation can dispose of its surpluses if those stocks are sold on the export market.

If it sells for overseas delivery, the corporation can dispose of stocks at any price it wishes to accept—even at prices below the loan rate. It seems to me that we would be extremely unwise to allow the law to revert to this situation, which provides absolutely no protection to the farmer. This is particularly dangerous at a time of large farm surpluses and great financial pressures on the Federal Government to avoid the substantial costs of keeping these surpluses in Government storage. There will certainly be a strong temptation to the Federal Government to dump its stocks at most any available price in order to avoid the carrying charges.

The provisions of the 1949 act I have described certainly will not help us develop profitable overseas markets for our farm products. This House would be well advised to adopt the conference report and avoid these pitfalls. I strongly urge my colleagues to support the bill.●

● Mr. RAILSBACK. Mr. Speaker, there is probably not one among us here today who is completely satisfied with the conference report on the 1981 farm bill (S. 844). I, too, have serious reservations about certain provisions agreed to by the conferees.

But these reservations are outweighed by my concern about the harm that could come to our country's

farmers and farm policy if we do not act quickly to pass this important legislation. I urge my colleagues to put aside their individual objections and vote today to pass a 4-year farm bill which, under difficult circumstances, represents the best balance of farm, consumer, and budget interest.

We all know about the vital agriculture programs this legislation reauthor- izes: producers and consumers depend upon the commodity price support, food stamp, agriculture research and extension, Food for Peace (Public Law 480) and soil conservation programs contained in this omnibus legislation.

These are the types of programs essential to encourage market oriented production by our farmers—allowing for maximum producer freedom with minimum of Government interference—and thereby provide farmers and ranchers with higher net incomes. This would at the same time assure consumers of reasonable prices and stable food supplies.

This bill not only extends these important programs, but it also contains provisions that improve farm policy. Reasonable target prices and price support loans will provide farmers with the basic income and price protection so crucial to farms who must contend with fluctuating economic and marketing conditions. It includes an improved farmer-held reserve program which should be more responsive to changing market conditions. The bill also provides protection for farmers against export embargoes, export expansion measures such as authority for a revolving export credit program, new inspection rules for imported meat and authority for a streamlined food stamp program so vital to many Americans.

Unfortunately, the bill also contains peanut and sugar provisions which run against my earlier votes to strike a new and costly sugar support program and end acreage allotments and production quotas for peanuts. While the conference report reduces these programs' costs somewhat, I have serious reservations about the potential costs these programs will add to sugar and peanut-based consumer products. I am also concerned about the burden of budget cuts this legislation places on the dairy farmer.

But these concerns are secondary to the importance of passing farm legislation before Christmas. In my conversations with farms in my district, many of whom are members of the Illinois Farm Bureau, I have been told repeatedly about the immediate need to set farm policy for the next 4 years so that they can get on with the business of farming. This farm legislation, while not perfect by any means, gives farmers the basis from which to make clear production decisions for the 1982 crop year and beyond.

Without passage of new legislation, price support and production adjustment provisions of the 1977 act for the major commodities will revert to permanent legislation—the Agriculture Act of 1949 for price support and Agriculture Adjustment Act of 1938 for marketing quotas and acreage allotments. This would not be in the best interest of agriculture or this country. There would be no embargo protection, no target prices, lower loan rates, and no import restrictions on meat with laws that were enacted for an entirely different farm environment, as they begin making plans for the 1982 crop season. According to USDA figures the cost of reversion for commodity programs in fiscal 1982 would cost $0.7 to $1.6 billion more than the conference provisions. For fiscal 1983, the cost of reversion exceeds that of the conference provisions by $2.1 to $2.8 billion. Conducting commodity referendums and establishing acreage allotment would be an administrative nightmare for both farmers and the Department of Agriculture.

I do not believe farmers want to heap additional cost on an already strained Federal budget. Farmers are now having to contend with sagging income due to rising production costs and low commodity prices. What they expect from Washington is prudent Federal spending and policy. All Americans including farmers will benefit from our efforts to bring inflation under control and reduce interest rates by passing reasonable legislation such as this bill.

This farm bill is consistent with the President's budget guidelines for reducing Government expenditures and restoring growth to our economy. Secretary Block has told me this bill gives him the needed flexibility to operate agriculture programs effectively. The Illinois Farm Bureau feels it is the best available measure of support to the agriculture sector, given the budget constraints. I urge my colleagues to act quickly and pass this important farm legislation.●

● Mr. MOORE. Mr. Speaker, I voted today for the conference report on the general farm bill, but I did so with mixed emotions. This conference report is in balance an acceptable commodity price support network although it is far less than sought by certain agricultural segments. It receives the support of the Louisiana Farm Bureau, as well as our sugar, cotton, soybean, and rice associations. It is good really for all of Louisiana's commodities except possibly one—dairy products.

I am especially aware of critical market conditions impacting dairy farmers and their disappointment in dairy provisions in this bill. I represent the largest dairy producing district in the South and have always supported, during my tenure in office and while on the Committee on Agriculture, dairy price supports. I believe our dairy farmers recognize that we do have a problem of overproduction. It has required the Government to buy massive quantities of surplus production. As a result, the dairy program is the most expensive provided any single commodity. Dairy farmers I have talked with know these stark economic conditions and understand that reduction of herd size and milk production will ultimately prove to be the wise course to follow for the future of the dairy industry. This bill will move us in that direction.

I am also convinced that the defeat of this conference report will provide no better price support for dairy products. Instead temporary authority for farm programs under the continuing resolution passed recently would be given until early next year. Farmers who need to budget now for 1982 and beyond, will have no certainty of how much reliance can be placed upon Federal farm commodity programs. In addition, events during House-Senate conference work on the farm bill made known the likelihood that the administration would, upon this measure's defeat, seek more restrictive terms for dairy price supports in its replacement. In other words, the next bill will be worse.

It is with these reasons fully in mind that I conclude taxpayers and agriculture alike will do better with this bill than without it.●

● Mr. TRAXLER. Mr. Speaker, for the first time in the history of farm price support programs, an administration has succeeded in dividing the farmers of America in a fight for too few dollars under an unrealistic budget ceiling. The grand design of David Stockman has come to pass: Give the farmers too little and they will destroy each other scrambling for the few crumbs that are thrown to them. The next step is to eliminate all commodity support programs.

The House passed a responsible farm bill. We provided a program that met the needs of the American farmer and the American consumer. We need to provide our farmers with assurances that they will receive a decent price for their commodities. We held down the spending levels in order to meet budgetary goals.

But this was not enough for the administration. Regardless of all of the cuts that were made, regardless of all of the efforts that were made to demonstrate that agriculture is in a depressed condition, the administration for the first time since the thirties insisted on the theory that by cutting back everyone will be better off. The farmers I represent tell me that this just is not so. You cannot tell a farmer who is facing high interest rates, low prices for his crops, and high inflation

that he will solve his problems by having lower price support programs.

I think there is a very vital point that needs to be made with respect to the budgetary impact of this bill: If the economy improves as the President's economic advisers predict that it will, then farmers will get a decent price for their crops and there will be no need for farm price supports. As a result, regardless of which support level is chosen, supports will not be used and there will be no budget exposure.

But if the economy does not improve, then we must make the policy choice of providing the American farmer with a realistic support program that will keep him in business growing food for all of us and for export or we say to the farmer as the administration has that the Government will help only to a certain minimal point. The American consumer must realize that it is in the consumer's best interest to have a healthy agriculture. They complain about food prices now. What will they be if farmers go out of business as a result of the attrociously low support levels provided by this bill?

Our conferees met with the Senate more than 20 times. They kept giving up more and more of the House farm bill in order to satisfy the concerns of the President and his supporters in the Senate so that we could develop an emasculated farm bill which would have little impact on our budget, and probably even less impact on our farmers.

Our conferees got to the point where the only difference between the two bills was about $600 million—the price of two B-1 bombers. The President's men said that we could not afford this figure. But this administration just pushed through a defense bill which will provide nearly $30 billion more than was available in fiscal 1981. We cannot spend $600 million on farmers over 4 years, but we can spend 50 times as much more on weapons systems in 1 year.

Many of our colleagues on the conference balked on principle. They were not going to give away the land, the barn, the tractor, and the last slab of bacon in the refrigerator. But, unfortunately, the House conferees gave in to the Senate compromise.

Mr. Speaker, I could not in good conscience support this agreement. It provides only one decent provision for the American farmer, and that is the sugar loan program which has been reduced several times since the conference began. I have supported efforts to reestablish a domestic sugar support program throughout my years in the Congress, and I want to continue those efforts. I represent many sugar beet growers in Michigan, and I know that they are interested in this provision of the bill. I wish there was some way that we could separate this provision so that we could approve just the sugar provisions of the conference agreement, but I know that is not possible.

I am confident that Secretary Block will have the commonsense to provide a sugar loan program under the discretionary authority given to him by the Agricultural Act of 1949, as Secretary Bergland did on several occasions. The administration must decide if it is truly interested in supporting American agriculture. If it is, then it will use every means at its disposal, including this discretionary authority, to helping our sugar beet growers.

I still find that I could not in good conscience support this measure because I am not willing to bankrupt the bulk of the farmers of Michigan's Eighth Congressional District in order to get this program, as worthwhile as it is. Individual farmers are calling me, urging me to vote against this bill because the overall support structure in it does not bear a reasonable relationship to the problems that other dairy and crop farmers face.

Our dairy farmers face higher costs. They are told that they have been bad people because their ability to produce has led to a surplus. For this reason, they should be punished with the lowest dairy price supports since before 1949. I hope that my colleagues who believe that this reduction is warranted remember their position when in 2 years they find that they can no longer afford basic dairy products because our dairy farmers will have gone out of business as a result of their compassioned foresight.

Our wheat and feed grain producers face higher costs and surpluses which continue to depress the market. Yet because there are surplus stocks, they are told that they deserve a lower amount than might be reasonable compared to their costs.

Our farmers who have provided us with the best food supply in the world and who have provided Americans with food at the lowest percentage of income of any nation in the world are being told by this bill that they have done too well. This agreement says that the administration believes that we can afford to turn our back on farmers because we have enough food in storage.

This agricultural policy is telling our farmers that they are getting too rich as a result of Government price supports at the same time as the Department of Agriculture reports in this month's edition of FarmLine that "U.S. farmers face lean economic prospects through 1982 * * * the overall farm income outlook isn't very promising." It also reports that changes in U.S. agriculture have "left farmers more vulnerable to unexpected change."

Mr. Speaker, enough is enough. There comes a point when we have to tell the administration that it is wrong—dead wrong. We need to have some foresight in this Nation, and this conference agreement simply does not offer the type of program that we need to maintain a strong agricultural base in our Nation.

I oppose this conference report, Mr. Speaker. I know that this may create some turmoil while we work out a better solution, but we cannot give into this plowing under of basic agricultural supports for the sake of administrative convenience. We simply need a better farm bill than the one before us today and I will continue to work to that end.●

● Mr. DERWINSKI. Mr. Speaker, it is with great reluctance that I support the conference report on the farm bill.

I am most upset that our House conferees failed to uphold the votes expressing the clear position of the House on a number of sections of this omnibus bill, but in particular I want to cite the peanut and sugar provisions.

The peanut provisions of the conference report reverse, in effect, what the House approved on this commodity, continuing the current program with an increase in the support price.

I am very distressed the conference version has restored the sugar program rejected by the House. Although the House defeated an 18-cent sugar loan section, the conferees agreed to a 17-cent program.

These provisions are not in the interest of American consumers, but I recognize that if the bill fails, the programs for these commodities would revert to the permanent law, thus bringing about huge costs, with authority for other programs expiring.

Therefore, I am going to vote for the conference report as the lesser of evils with which we are confronted.●

● Mr. KASTENMEIER. Mr. Speaker, it is often the case at the end of the session that the House is forced to accept less than ideal legislation because of serious time constraints. Each of us, at one time or another, has swallowed his or her doubts about a particular measure, because sometimes even a disagreeable bill is better than no bill at all.

However, this is clearly not the case with the conference report on S. 884, the 1981 farm bill. The legislation reported by the conference committee would have disastrous consequences for American farmers and consumers, and I urge my colleagues to vote against the bill.

It is with regret that I take this position. I certainly recognize that the chairman of the Committee on Agriculture (Mr. DE LA GARZA), and the ranking minority member (Mr. WAMPLER), as well as the other members of

the committee, labored long and hard to produce a bill. I commend them for their efforts under exceedingly difficult circumstances.

Nevertheless, S. 884, as it emerged from the conference with the Senate, provides virtually no relief for American farmers who have seen their net income drop sharply in the last 2 years, with no improvement in sight.

I am particularly concerned about the dairy price-support program. It is ironic that the American dairy farmer, who has increased his productivity dramatically in the past three decades and has kept the cost of his product low in comparison to other foods, has seen his program cut more than almost any other segment of society.

We began this year with an 80 percent of parity floor on dairy price supports. However, since that time, dairy farmers have foregone two legally mandated adjustments in the support price. The administration and Senate now are asking dairy farmers to accept a program which, acording to industry sources, will drive the parity level down to 58 percent by 1985.

The complex formula which the Senate and President are advocating can hardly be considered a compromise with the House position. The House voted to accept 70-percent of parity as the absolute minimum support price. The conference report not only abandons the 70 percent floor, but for all practical purposes abandons the concept of parity.

Under the conference agreement, any year for which the Agriculture Secretary predicts that Federal outlays for the dairy program will exceed $1 billion, parity ceases to be a factor. The support price is increased by small, monetary increments.

Advocates of this approach argue that when projected outlays are under $1 billion, then the price floor will be 70 or 75 percent of parity, depending on the projected surplus levels. But who are we kidding? Does anyone truly believe that a Secretary of Agriculture in this administration will project outlays below $1 billion? And who is in a position to effectively challenge his predictions?

The simple fact is that the President and Senate are asking us not only to abandon our bottom line on the dairy program, but also to give up the very concept of parity. It is time for the House of Representatives to say "no."

Mr. Speaker, we have about 44,000 dairy farms in Wisconsin, most of them family operations. I wonder how many we would have in 1985 with 58 percent of parity.

The conference report also provides inadequate levels of support for wheat and feed grains. How can we expect these farmers to continue to feed us and much of the world when they are losing money on every bushel they produce?

These cuts are being made in the name of fiscal restraint. However, fiscal restraint went out the window for sugar. Sugar producers receive a potentially costly new price support program. There is something wrong with our priorities when major farm legislation puts dairy, wheat, and grain farmers out of business while providing windfalls to sugar.

I am particularly disturbed by the fact that the administration agreed to accept the sugar provisions only after certain Members from sugar-producing areas promised to support the President's economic program. It is a sad commentary on our times when public policy is decided in this manner.

Mr. Speaker, we hear much today about the need to straighten out our economy. But the economy will not recover as long as American agriculture remains in a state of depression. The bill before us will not bring farmers out of that depression, but in fact, will make the situation worse. I urge my colleagues to reject the conference report.●

● Mr. OXLEY. Mr. Speaker, I wish to express my satisfaction with the farm bill conferees' deletion from the conference substitute of the Senate-passed provision expressing the sense of Congress that imports of casein are interfering with the operation of the dairy price support program and urging that limitations be placed on casein imports. I am displeased, however, that the conferees chose to include a similar provision in the conference report, specifically providing that this view be presented to the Chairman of the International Trade Commission to be made part of the record of the investigation of the issue which is currently underway.

While I appreciate the important role compromise plays in any conference of this sort, I do not believe that this particular provision should have been included in the conference report. I say this because I do not feel that the statement necessarily reflects the feeling of a majority of my colleagues.

At any rate, I again question the propriety of Congress attempting to prejudge the issue. We should allow the ITC to make an independent, unbiased decision before attempting to solve what may very likely not even be a problem.●

● Mr. BEREUTER. Mr. Speaker, I intend to vote against the conference report of the farm bill which is before the House. This measure is a formula for disaster on the farm. The loan rates for wheat and feed grains are a full dollar below the cost of production, with no real-dollar increase over the 4-year life of the bill. We would be insuring farm families and the related agribusiness sectors of continuing losses for the next 4 years. I cannot be a part of this action, and I urge my colleagues to reject this measure.

The bill which had earlier passed the House, in contrast to this conference report, would have at least assured our agricultural producers of a fair return in the marketplace. Because of the actions of the conferees, however, the House is now faced with the option of accepting a bill which is totally inadequate or rejecting the measure and returning next year to attempt to strike a better deal. I strongly urge the latter approach. The administration will be forced to return to the negotiating table if it wants to avoid reverting to the more costly permanent legislation, and we can then formulate a program which will be of actual assistance to the Nation's farmers and agribusiness.

There is clearly some misunderstanding as to the consequences of failing to pass this conference report which I believe must be clarified. Technically, farm programs would revert to the permanent 1949 law. Under that law, a referendum would be held on the wheat program, and a wheat allotment program could be required. The loan rate for wheat would be between 50 and 90 percent of parity if a quota was approved and between 65 and 90 percent if not approved. The loan rate on corn would be between 50 and 90 percent of parity, or between 65 and 90 percent of parity if an acreage diversion is in effect. The minimum support level for corn under the permanent law would be $2.73, as opposed to $2.55 contained in the conference report; for wheat, levels under permanent law would be $3.77, as opposed to $3.55 in the conference report. Efforts would be made to introduce substitute legislation when Congress reconvenes so as to avoid reverting to permanent law. In that instance the House would be in a stronger position from which to negotiate a fair and workable farm program.

Mr. Speaker, it is especially distressing to me to see the efforts of the past year result in this conference report. Before the committee began work on the farm bill, I consulted with farmers and ranchers from throughout my district to receive their views on what they wanted in the next 4-year bill. I met with representatives of the major commodity groups and the general farm organizations in Nebraska. I spoke with corn, wheat, sorghum, and soybean farmers; dairy, livestock, and poultry producers; and rural bankers, implement dealers, seed and fertilizer suppliers, and other agribusinessmen and women. I appeared before the committee during the hearings which were held to convey those views and to express my support for strong farm legislation. The committee, to its credit, ultimately came forth with a good bill which would have served our

agricultural producers well and which would have provided the consumers of this Nation with a reliable and reasonably priced supply of food and fiber for the next 4 years. The House passed that measure generally intact, again to its credit. But the House conferees then succumbed to pressures exerted on the conference committee; the resultant bill offers little hope of improvement to the agricultural community and rural America.

There are provisions of this bill which will be of minor assistance to the grain farmer, even though the most important aspects, the loan rates and target prices, fall far short of what is needed. The farmer-held reserve is continued, and the operating procedures of the program have been improved. The embargo protections are an important addition to any comprehensive farm legislation and would have been useful 2 years ago to alleviate the costly burden of the Carter grain embargo. Although the farmers' production cost figures seem to be of little interest to this and past administrations, the cost of production board which this bill creates will help to establish accurate cost figures, so that the farmer will at least know how much he is losing as he produces our food. The conservation programs contained in the bill, if adequately funded, are small steps to alleviate the serious loss of the Nation's soil and water resources. We succeeded in establishing a revolving fund for export promotion, and the importance of agricultural research is appropriately recognized in the conference report. But as I said, even these aspects of the bill cannot justify the treatment which this conference report offers to the most productive segment of our economy, the agricultural sector.

During our consideration of the farm bill this year, I pointed out to my colleagues in the House the dire economic condition of our farm sector. Net farm income for 1981 is projected to be the lowest since 1934, and estimates for next year are even worse. Grain and livestock prices are disasterously low, with no relief in sight. The cost of credit continues at unacceptably high levels. And this conference report will do nothing to ease the financial crunch which our farm families are now facing. I must say that the treatment which the American farmer is receiving at the hands of this Congress and this administration is unjustifiable, and I cannot support this action.

Mr. Speaker, let us send this conference report back to the Senate and the administration with a message that it is finally time to be fair with those who produce our food, and invite them to sit down with us to try again. We can compromise, we can negotiate, and we can provide the protection which our farmers need and deserve. To pass this measure and lock in these disasterously inadequate farm prices for another 4 years is unfair and unnecessary and would only contribute to further financial failures throughout our agricultural and agribusiness sectors. We can do better, we must do better, and I urge my colleagues to defeat this conference report.●

● Mr. FRENZEL. Mr. Speaker, I will vote for the House-Senate bipartisan compromise Food and Agricultural Act of 1981.

The conference committee has done an extraordinarily difficult job pretty well. It has tailored a bloated, pork barrel bill into a form that fits the budget resolution and the Presidential request to reduce spending.

I am pleased the conference committee has taken out the original, extremely restrictive House language on meat imports and replaced it with a restatement of policy. At a time when we are struggling to open up the world markets to our products, it is most important that we not erect our own trade barriers.

I am disappointed, however, that the farm bill continues to include and expand the support program for peanuts even though it is expressly contrary to the wishes of the House, which overwhelmingly rejected the peanut quota and allotment systems by a vote of 250 to 159.

To be a true compromise, the conference committee should have at least reduced these systems. Instead, the conference version not only retains the quota system, it even went beyond the Senate wishes and expanded it to keep the production of peanuts in the hands of the very few and the price of the commodity artificially high for consumers. Since nearly all other Government-funded programs are expected to take a cut, it seems irresponsible to me that this particular one should be increased—especially by the conference committee when an increase had been specificially rejected by both the House and Senate.

I would also have liked to have seen other archaic—and unnecessary—programs, such as tobacco, removed from the bill. The conferees did delete the sunflower seed support program that the House added this year, while provisions for other commodities in the bill such as sugar, corn, rice, wheat, wool, and cotton, as well as the dairy program, seem to reflect a true compromise between the House and Senate versions.

Although I would have much preferred the House to follow the lead of the Senate and treat food stamps as a separate issue from the farm bill, I am pleased that the conference committee adopted tighter rules of eligibility for food stamp recipients as well as agreed to a provision that allows local governments discretionary authority in setting up their own workfare programs for eligibility.

Other areas that the conferees did a good job of addressing were the Public Law 480 programs, farmer-held grain reserves, and provisions for resource conservation.

Overall, I think the conference committee should be commended for tackling this very difficult and awesome task and coming up with a bill that satisfies the budgetary restrictions Congress has put on itself—and the administration and the taxpayers expect. This bill is not perfect, and in certain instances it is even undesirable to me, but I believe it is much preferable to no bill at all.●

● Mr. MARKS. Mr. Speaker, the new farm program we are debating today will have my vote even though I am not completely satisfied with it. I may be wrong, but I do not think anyone is satisfied with it. Perhaps this indicates that a true compromise has been reached.

I think it important to keep in mind that this conference bill is the culmination of a full year's work. It has been developed during a most difficult time for agriculture and our economy as a whole. We cannot afford to let farm policy revert to the permanent legislative authorities of the 1938 and 1949 Agriculture Acts. This could cost us anywhere from $22 to $40 billion. Merely extending current farm legislation for 3 months might cost less, but it carries no promise of a farm program that is better than the one before us today. In fact, farmers might do a lot worse after Congress takes a look at the President's budget message in January. This measure, at least, offers some level of stability and predictability and the President has indicated that he will sign it into law.

Many Members of the House know Pennsylvania is the agricultural leader of the Northeast. There are over 61,000 family farms in my home State and milk is our leading agricultural product. Over 50 percent of the farmers in my district are in the dairy business. Many have urged me to support this conference report. They are responsible, very hard-working Americans who believe in the President's economic recovery plan. Of equal import, they are willing to do their fair share to make it a success.

This farm bill mandates increases in the minimum level of support for milk each year and, in that respect, it is an improvement over the Senate-passed bill. I am concerned that it may not guarantee 70 percent of parity but Pennsylvania farmers tell me that they can live with the dairy market response program contained in this bill. Dairy farmers consume as well as produce dairy products. They also have tremendous faith in our free enterprise system. It is still important

that our agriculture programs provide farmers with some measure of income protection and I believe the bill before us meets that test. If changes in this farm program prove necessary before the 4-year authority expires, I will urge Congress to take responsible action.

I have a similar commitment to the American consumer. During earlier House action on the farm bill, I voted against a new sugar program and for the elimination of peanut acreage and poundage controls. I am not pleased with the conference outcome on these two items even though both programs are to operate at no Government cost. I still believe their inflationary impact may be felt by the American consumer. However, we can not lose sight of the overall economic context of this legislation. It is an intricate part of the administration's plan to get inflation under control and to bring interest rates down. Congress wants this for everyone. For these reasons, I plan to vote for the Agriculture and Food Act of 1981.●

● Mr. ROTH. Mr. Speaker, today we are debating legislation that will have far-reaching and enduring consequences for farm families across the Nation. One such group, dairy farmers, have been targeted for the severest reductions in the history of American agricultural policy. I urge my colleagues to reject the conference report on the 1981 farm bill because it will pull the economic rug out from under the dairy farmer.

Right this minute, the 7,200 dairy farms in my congresssional district are facing record interest rates and inflation. On top of severe economic burdens we are contemplating freezing dairy farmers' incomes for the next 4 years. I ask my colleagues to add to this scenario the very real prospect that the cost of production for dariy farming will rise from 15 to 30 percent during this time. Put these factors together and you have the decline of the family dairy farm in America.

The administration wants to let free market forces loose in dairy farming. In truth, countless factors other than supply and demand influence farmers' incomes. Growing exports, foreign aid, the prices of feed, land, and farm equipment, commercial development, Federal programs such as school lunches—these are but a few of the components that decide how profitable and productive the American farmer will be.

The cost of our agricultural policy, per person, is the lowest in the world. Agriculture remains the strongest economic force in America. Indeed, agriculture provides the foundation upon which our global posture rests; the United States is the breadbasket and food merchant to the world. We spend little of our total annual budget on agriculture, yet we experience, year after year, record production levels, bumper harvests, low consumer food prices, and rapidly expanding export markets.

Those who seek to severely decrease Federal expenditures for the dairy program forget that it remains one of the most successful, in terms of cost to the consumer, of all the commodity support programs.

Parity of under 70 percent will hasten the demise of young dairy farmers. Thus, we will see production concentrated in large operations and the further destruction of the family farm in America.

Budget cuts in this conference report were made selectively, and with scant regard for fairness and commonsense. Under its provisions, dairy farmers will get a 1-percent increase in their support price over the next 3 years. Other commodities will enjoy a 6-percent increase each year. I think those figures speak for themselves. The dairy farmer is bearing the brunt of efforts

1980 to balance the Federal budget.

Throughout 1981, the dairy farmer has withstood measures to lessen the support program. In April 1981, the price support adjustment was eliminated. In October 1981, price supports were again held to April levels. No other commodity support program has been subject to such budget cuts without benefit of legitimate agricultural legislation. No other farming sector has been required to make similar sacrifices in the name of a balanced budget.

This conference report guts the dairy program while leaving the feudal acreage allotment systems of the peanut and tobacco price support programs virtually intact. In addition, it creates a new sugar subsidy.

Each individual dairy farmer in this Nation provides enough food to feed 1,288 people. The conference report punishes efficiency by abondoning its commitment to provide fair prices for producers of dairy products.

If this conference report is passed, the average dairy farmer stands to lose at least $3,800 in 1983 income with parity below 70 percent. And I remind my colleagues that the average Wisconsin dairy farmer has only 40 cows and an income of $20,000 to $25,000.

Mr. Speaker, the dairy farmer has been willing to bear his fair share of budget cutting. This most industrious, effective segment of American agriculture has been subject to persistent efforts to destroy a program that has been successful for the farmer and the consumer. I predict disaster for the Nation's farm economy if this conference report is passed.

I urge my colleagues to recommit this conference report so that equity can be restored to the budget-cutting process.

It is disillusioning to see the dairy farmer make sacrifice upon sacrifice while other support programs are given funds necessary to insure that they get fair prices for their products.●

● Mr. LONG of Louisiana. Mr. Speaker, as we approach the vote on the 1981 farm bill, we must keep in mind that the conference agreement represents a tenuous solution for a very difficult problem. I do not know of anyone who sees this particular bill as an example of government at its best. But it does, at least, attempt to produce a balance between the need to protect American agriculture from uncertain markets, and American consumers from uncertain supplies of food.

Mr. Speaker, I personally hope that the next time we take up the matter of national agricultural policy we will be able to do so in an atmosphere of reasonable calm, with a better understanding by all Members of the unique difficulties faced by American farmers. It is simply not appropriate to assume that the normal market conditions which characterize other goods and services in our economy apply to agriculture.

The American farmer is especially hard hit by high interest rates since his entire crop year is one of advance planning and borrowing, followed by prayers for sufficient cash flow to cover his outstanding debts. He must face unknown weather conditions and foreign commodity cartels as well as the often harsh demands of the financial markets.

This dilemma is especially true of sugar, where a steady, reliable policy toward this important crop has never existed. Sugar farmers and processors throughout this country deserve some assurance from us that, if they choose to face these risks for yet another year, they will not be risking the total loss of their land and family incomes.

Unlike most other farm commodities, sugar has no permanent loan program to fall back upon in the event the sugar provisions in this bill are eliminated. Basic equity demands that sugar producers be treated on the same basis as other American farmers, and that a realistic loan support program be available to them in the event of natural disaster or market collapse.

Mr. Speaker, I urge all of my colleagues to support the conference report, which includes some hard compromises in the face of strong administration opposition, and to send a signal to American agriculture that we will not force unfair economic burdens on our most important economic sector.●

● Mrs. COLLINS of Illinois. Mr. Speaker, I rise in opposition to the conference report on the Agriculture Act of 1981. Although I supported H.R. 3603, the Food and Agriculture

Act, when it passed the House on October 22, this conference report is an entirely different piece of legislation. Our conferees must have been asleep when they agreed to accept the Senate provisions on peanut and sugar price support that will wreak havoc with prices throughout the food processing chain. While I recognize that this bill contains authorization for the food stamp program, which I strongly support, the food stamp program has already been authorized at fiscal year 1981 levels through at least March 31, 1982, under the continuing resolution passed last week. Moreover, I firmly reject an approach which in reducing all consumers' purchasing power through inflating the prices of basic commodities, reduces the value of food stamps along with the dollars and cents into which they are transferred.

I supported H.R. 3603 precisely because it wisely rejected the proposals to establish a new sugar price support program and to continue the anachronistic poundage quota support system for peanuts. These are two basic commodities that are found on every pantry shelf, and, in the form of peanut butter and jelly, in the lunchbox of every school child whose parents can no longer afford the hot lunch programs for which this administration has reduced its support.

This bill, by keeping the price of sugar artificially high through higher duties and fees on imports and by artificially limiting the amount of peanuts that can be grown per acre for domestic use, will significantly increase the prices of this produce on our grocery shelves. To find these programs resurrected in the conference report being debated under the pressure of adjournment is simply unacceptable.●

Mr. DE LA GARZA. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

Mr. VOLKMER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 205, nays 203, answered "present" 1, not voting 24, as follows:

□ 2140

The Clerk announced the following pairs:

On this vote:

Mr. John L. Burton for, with Mr. Dwyer against.

Mr. Quillen for, with Mr. Santini against.

Mr. Burgener for, with Mr. Russo against.

Mr. Young of Florida for, with Mr. Broomfield against.

Mr. DREIER changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT OF THE SPEAKER

The SPEAKER (during the vote). The Chair has been informed by some of the Members that the Chair has not been adhering to the customs and traditions of the House, one being that Members should not be on the floor with outer garments, with overcoats. So, they will kindly remove themselves and remove the garments.

□ 2150

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING AND DIRECTING THE SECRETARY OF THE SENATE TO MAKE CORRECTIONS IN ENROLLMENT OF S. 884, AGRICULTURE AND FOOD ACT OF 1981

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 55) authorizing and directing the Secretary of the Senate to make corrections in the enrollment of S. 884, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

SENATE CONCURRENT RESOLUTION 55

Resolved by the Senate (the House of Representatives concurring), That the Secretary of the Senate, in the enrollment of the bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes, is hereby authorized and directed to make the following corrections:

(1) In the introductory text of section 101(a) of the bill, insert a comma after "1937".

(2) In clause (1) of the matter proposed to be inserted by section 103(1) of the bill, strike out "provision" and insert in lieu thereof "sentence".

(3) In section 107B(b)(1)(D) of the Agricultural Act of 1949, as proposed to be added by section 301 of the bill, strike out "section 1015" and insert in lieu thereof "section 1101".

(4) In section 105B(b)(1)(D) of the Agricultural Act of 1949, as proposed to be added by section 401 of the bill, strike out "section 1015" and insert in lieu thereof "section 1101".

(5) In section 105B(e)(3) of the Agricultural Act of 1949, as proposed to be added by section 401 of the bill, strike out "wheat" the first 2 times it appears and insert in lieu thereof "feed grains", and strike out "wheat-producing" and insert in lieu thereof "feed grain-producing".

(6) In subsection (g)(3)(A) of section 103 of the Agricultural Act of 1949, as proposed to be added by section 502 of the bill, insert "or paragraph (9)(A)" after "paragraph (7)".

(7) In subsection (g)(9)(A) of section 103 of the Agricultural Act of 1949, as proposed to be added by section 502 of the bill, strike out "wheat" in the fifth sentence and insert in lieu thereof "cotton".

(8) In subsection (i)(1) of section 101 of the Agricultural Act of 1949, as proposed to be added by section 602 of the bill, strike out "the preceding sentence" in the proviso and insert in lieu thereof "this sentence".

(9) In subsection (l)(3) of section 359 of the Agricultural Adjustment Act of 1938, as proposed to be added by section 704 of the bill, insert a comma after "interest".

(10) In subsection (l)(4) of section 359 of the Agricultural Adjustment Act of 1938, as proposed to be added by section 704 of the bill, strike out "office or agency of the Government or any court of law" and insert in lieu thereof "officer or agency of the Government".

(11) In section 1005 of the bill, strike out "hereinafter" and insert in lieu thereof "hereafter".

(12) In section 1305 of the bill, strike out the first period following the word "reimbursement".

(13) In subsection (b) of section 14 of the Food Stamp Act of 1977, as proposed to be added by section 1320(b) of the bill, insert a comma after "Act".

(14) In section 1402 of the bill, strike out clause (1) and insert in lieu thereof "(1) striking out 'and' at the end of paragraph (8) and changing the period at the end of paragraph (9) to a semicolon; and".

(15) In paragraph (10) of section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be added by section 1402 of the bill, strike out the period at the end thereof and insert in lieu thereof "; and".

(16) In paragraph (11) of section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be added by section 1402 of the bill, strike out "Long-range" and insert in lieu thereof "long-range".

(17) In subsection (b)(3) of section 1411 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be amended by section 1412(4) of the bill, insert a comma after "agencies".

(18) In subsection (a)(1) of section 1412 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be amended by section 1413 of the bill, strike out "cochairperson" and insert in lieu thereof "cochairpersons".

(19) In section 1476(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as proposed to be added by section 1440(a) of the bill, strike out "sections 5701 and 5707" and insert in lieu thereof "sections 5701 through 5707".

(20) In section 1447 of the bill, insert "the" immediately before "Interior".

(21) In section 1546 of the bill, strike out "section 1544(a)" and insert in lieu thereof "section 1542(a)".

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

COAST GUARD AUTHORIZATION ACT OF 1982

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 831) to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes, with a Senate amendment to the House amendment thereto, and concur in the Senate amendment to the House amendment.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendment to the House amendment, as follows:

In lieu of the matter proposed to be inserted by the House engrossed amendment, insert:

That funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal year 1982 as follows:

(1) For the operation and maintenance of the Coast Guard, including expenses related to the Capehart housing debt reduction, $1,404,800,000.

(2) For the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $537,200,000.

(3) For the alteration or removal of bridges over navigable waters of the United States, constituting obstructions to navigation, $17,500,000.

(4) For research, development, test, and evaluation, $29,730,000 of which sufficient funds shall be made available to continue in operation a Coast Guard research and development center through the end of the 1982 fiscal year: *Provided,* That the Coast Guard submits its research, development, test, and evaluation program plan, including the continuation or operation of a research and development center, for fiscal year 1982 to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate for approval before implementation.

SEC. 2. For fiscal year 1982, the Coast Guard is authorized an end-of-year strength for active duty personnel of 42,224. This end-of-year strength shall not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States code.

SEC. 3. For fiscal year 1982, the Coast Guard is authorized average military training student loads as follows:

(1) For recruit and special training, 3,660 student-years.

(2) For flight training, 118 student-years.

(3) For professional training in military and civilian institutions, 655 student-years.

(4) For officer acquisition, 1,038 student-years.

SEC. 4. Notwithstanding any other provision of law, the fiscal 1982 end-of-year civilian personnel strength of the Coast Guard shall be at least 5,484.

SEC. 5. The Act of October 3, 1980 (Public Law 96-376; 94 Stat. 1509), is amended—

(1) in paragraph (1) of the first section; by striking out "$1,248,367,000" and substituting "$1,337,207,000"; and

(2) in section 2, by striking out "39,600" and substituting "39,819".

SEC. 6. (a)(1) Subsection (a) of section 41a of title 14, United States Code, is amended to read as follows:

"(a) The Secretary shall maintain a single active duty promotion list of officers of the Coast Guard on active duty in the grades of ensign and above. Reserve officers on active duty, other than pursuant to an active duty agreement executed under section 679 of title 10, retired officers, and officers of the permanent commissioned teaching staff of the Coast Guard Academy shall not be included on the active duty promotion list.".

(2) Subsection (b) of such section is amended by striking out the period at the end of the second sentence and substituting ", except that the rear admiral serving as Chief of Staff shall be the senior rear admiral for all purposes other than pay.".

(3) Subsection (d) of such section is amended by striking out "extended".

(b) Section 290(a) of such title is amended by inserting "or in the position of Chief of Staff" in the second sentence after "vice admiral".

(c)(1) Section 711 of such title is amended by striking out the first sentence.

(2) The heading of such section is amended to read as follows:

"§711. Exclusiveness of service".

(3) The item relating to section 711 in the analysis of chapter 21 is amended to read as follows:

"711. Exclusiveness of service.".

(d) Section 93(p) of such title is amended by inserting "including telephones in residences leased or owned by the Government of the United States when appropriate to assure efficient response to extraordinary operational contingencies of a limited duration," after "of such lines and cables,".

SEC. 7. Section 475(a) of title 14, United States Code, is amended by inserting after the first sentence there of the following new sentences: "The Secretary is also authorized to lease housing facilities for assignment as public quarters, without rental charge, to military personnel who are on sea duty or duty at remote offshore Coast Guard stations and who do not have dependents. Such authority shall be effective in any fiscal year only to such extent or in such amounts as are provided in appropriation Acts."

SEC. 8. (a) The third sentence of section 707(a) of title 14, United States Code, is amended to read as follows: "For benefit computation, regardless of pay or pay status, the member is considered to have had monthly pay of the monthly equivalent of the minimum rate of basic pay in effect for grade GS-9 of the General Schedule on the date the injury is incurred.".

(b) The amendment made by subsection (a) shall apply only with respect to payments for benefits under section 707(a) of title 14, United States Code, for months beginning on or after the date of the enactment of this Act.

SEC. 9. The Act of July 5, 1884 (46 U.S.C. 2 et seq.), is amended by adding at the end thereof the following new section:

SEC. 8. (a) The original and periodic inspections or examinations of a vessel documented or to be documented as a vessel of the United States, both in the United States and in foreign countries, may be delegated to the maximum extent practicable by the Secretary of the department in which the Coast Guard is operating to the American Bureau of Shipping, or similar American classification society, or agent thereof, who may issue certificates of inspection, attesting to compliance with existing Coast Guard regulations, and such other certificates as are essential to documentation.

"(b) The Secretary of the department in which the Coast Guard is operating may also contract or enter into agreements with or utilize the American Bureau of Shipping, or similar American classification society for the review and approval of vessel hull, machinery, piping, and electrical plans.

"(c) The Secretary of the department in which the Coast Guard is operating shall report to the Congress on the implementation of subsections (a) and (b) within 6 months of the date of the enactment of this section, and annually thereafter for 3 years. Such report shall include the views of the affected industry on the implementation of those subsections.".

SEC. 10. Paragraphs (1) and (2) of section 104 of the Vessel Documentation Act (Public Law 96-594; 94 Stat. 3453) are amended to read as follows:

"(1) an individual who is a citizen of the United States, or an association, trust, joint venture, or other entity capable of holding title to a vessel, under the law of the United States, of any State, territory, or possession of the United States, of the District of Columbia, or of the Commonwealth of Puerto Rico, all of the members of which are citizens of the United States;

"(2) a partnership whose general partners are citizens of the United States, and the controlling interest in the partnership is owned by citizens of the United States;".

SEC. 11. Section 7 of the Act of May 21, 1920 (31 U.S.C. 686), is amended by inserting "Coast Guard," in the first proviso of subsection (a) after "Federal Aviation Agency,".

SEC. 12. Nothing in this Act shall be construed to authorize or provide funds for removing facilities of Coast Guard Group Port Angeles from Ediz Hook.

SEC. 13. (a) The Congress, in recognition of the heroic efforts that resulted in the saving, under extremely adverse conditions, of the lives of all 510 passengers aboard the motor vessel Prinsendam which caught fire off the coast of Alaska on October 4, 1980, hereby honors and expresses its thanks to the members of the Coast Guard, the individuals of the United States and Canadian Air Forces, and the crew of the tanker Williamsburg and all others who participated directly in this valiant undertaking, as well as the crew of the Prinsendam.

(b) The Commandant of the Coast Guard shall determine the names and addresses of those individuals honored under subsection (a), and provide the names and addresses to the Clerk of the House of Representatives who shall convey in appropriate language the appreciation of Congress to each such individual for his or her actions in connection with the Prinsendam rescue.

SEC. 14. The Coast Guard shall deploy at least one helicopter for search and rescue, as well as other missions of the Coast Guard, at each of the following sites: Newport, Oregon; Cordova, Alaska; and Charleston, South Carolina.

SEC. 15. The Rogue River station in Oregon operated by the Coast Guard shall remain in operation until at least October 31 of each year.

Mr. JONES of North Carolina (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment to the House amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mr. YOUNG of Alaska. Mr. Speaker, reserving the right to object, and I shall not object, I rise in support of the Senate amendment to the House amendment contained in S. 831 which authorizes appropriations for the Coast Guard for fiscal year 1982 and contains certain provisions and amendments pertaining to the functions and management of the Coast Guard. The funding contained in this bill is needed to allow the Coast Guard to perform the tasks and missions which are so essential to the seafarers of this Nation. Thus I urge and recommend that we concur in the Senate amendment.

My understanding, and I believe it is the understanding of the gentleman from Massachusetts, that the Secretary of Transportation will recommend to the President that he sign the bill before us at this time.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The SPEAKER. Is there objection to the initial request of the gentleman from North Carolina?

There was no objection.

A motion to reconsider was laid on the table.

APPOINTMENT OF COMMITTEE OF TWO MEMBERS TO INFORM PRESIDENT THAT THE TWO HOUSES HAVE COMPLETED THEIR BUSINESS OF THE SESSION AND ARE READY TO ADJOURN

Mr. WRIGHT. Mr. Speaker, I send to the desk House Resolution 307, appointing a committee of two Members to inform the President that the two Houses have completed their business of the session and are ready to adjourn, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 307

Resolved, That a committee of two Members be appointed by the House to join a

similar committee appointed by the Senate, to wait upon the President of the United States and inform him that the two Houses have completed their business of the session and are ready to adjourn, unless the President has some other communication to make to them.

The resolution was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. The Chair appoints as Members on the part of the House to notify the President the gentleman from Texas (Mr. WRIGHT) and the gentleman from Illinois (Mr. MICHEL).

PROVIDING FOR ADJOURNMENT SINE DIE OF THE CONGRESS ON WEDNESDAY, DECEMBER 16, 1981

The SPEAKER laid before the House the Senate privileged concurrent resolution (S. Con. Res. 57) providing for adjournment of the two Houses of Congress sine die.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 57

Resolved by the Senate (the House of Representatives concurring), That the two Houses of Congress shall adjourn on Wednesday, December 16, 1981, and that when they adjourn on said day, they stand adjourned sine die.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

ELECTION OF HON. JIM WRIGHT AS SPEAKER PRO TEMPORE DURING THE ABSENCE OF THE SPEAKER

Mr. FOLEY. Mr. Speaker, I send to the desk a privileged resolution (H. Res. 308) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 308

Resolved, That Honorable Jim Wright, a Representative from the State of Texas, be, and he is hereby, elected Speaker pro tempore during any absence of the Speaker, such authority to continue not later than December 22, 1981.

Resolved, That the President and the Senate be notified by the Clerk of the election of the Honorable Jim Wright as Speaker pro tempore during the absence of the Speaker.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SWEARING IN OF HON. JIM WRIGHT AS SPEAKER PRO TEMPORE IN ABSENCE OF THE SPEAKER

Mr. WRIGHT assumed the chair and took the oath of office administered to him by the Speaker of the House of Representatives, the gentleman from Massachusetts (Mr. O'NEILL).

PROVIDING FOR CONGRESSIONAL EVALUATION OF ENERGY POLICY

Mr. DINGELL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 5274) to provide for congressional evaluation of energy policy by improving a moratorium on certain acquisitions involving major energy concerns and domestic petroleum companies until June 30, 1982.

The Clerk read as follows:

H.R. 5274

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. For the purposes of this Act—

"(1) The term 'major energy concern' means (A) any person which is engaged in or affecting commerce in the United States and which had (or is a successor to a person which had) an average net production of crude oil from sources within the United States for calendar year 1979 that exceeded 300,000 barrels per day, or (B) the government of any foreign country which had an average net production of crude oil from sources within such country for calendar year 1979 that exceeded 300,000 barrels per day.

"(2) The term 'domestic petroleum company' means any person which is engaged in or affecting commerce in the United States and which had (or is a successor to a person which had) an average net production of crude oil from sources within the United States for calendar year 1979 that exceeded 11,000 barrels per day.

"(3) The term 'affiliate', when used with respect to any major energy concern or domestic petroleum company means any person which controls, is controlled by, or is under common control with that energy concern or company.

"(4) The term 'person' includes (A) any individual, (B) any corporation, company, association, firm, partnership, society, trust, joint venture, or joint stock company, and (C) any foreign government or any political subdivision or agency thereof.

"(5) The term 'control' means the power, directly or indirectly, to direct or cause the direction of the management and policies of a person through ownership of voting securities or otherwise.

"(6) The term 'acquire' means to directly or indirectly (A) purchase, lease, or otherwise obtain, or (B) agree to or obtain a right to purchase, lease, or otherwise obtain.

"(7) The term 'voting securities' means any securities which at present or upon conversion enable the owner or holder thereof to vote in the election of directors of the issuer or of any affiliate of the issuer, or with respect to unincorporated issuers, persons exercising similar functions.

"(8) The term 'crude oil' means crude oil, condensate, and natural gas liquids.

"(9) The term 'United States' means each of the 50 States, the District of Columbia, Puerto Rico, the territories and possessions of the United States, and the Outer Continental Shelf.

"(10) The term 'evaluation period' means the period beginning December 1, 1981, and ending June 30, 1982.

SEC. 2. During the evaluation period, it shall be unlawful—

(1) For any major energy concern, or any affiliate thereof, to acquire any voting securities of any other major energy concern or any other domestic petroleum company, or any affiliate thereof, if as a result of the acquisition the acquiring person will directly or indirectly own or control more than 5 percent of the outstanding voting securities (or any class of such securities) of the other major energy concern or other domestic petroleum company (or any affiliate thereof) involved; or

(2) For any domestic petroleum company, or any affiliate thereof, to acquire any voting securities of any other major energy concern, or affiliate thereof, if as a result of the acquisition the acquiring person will directly or indirectly own or control more than 5 percent of the outstanding voting securities (or any class of such securities) of the major energy concern.

SEC. 3. During the evaluation period, it shall be unlawful for any major energy concern, or any affiliate thereof, to acquire assets which were held, as of the date of enactment of this Act, by any other major energy concern, any other domestic petroleum company, or any affiliates thereof, in any case in which the fair market value of such assets at the time of acquisition, if aggregated with the total fair market value of any other of such assets acquired during the evaluation period from such person (or any affiliate thereof), determined as of the date of the respective acquisitions, exceeds $500,000,000.

SEC. 4. Whenever it appears to any aggrieved person that a major energy concern, domestic petroleum company, affiliate, or any agent thereof, has engaged, is engaged, or is about to engage in any acts or practices constituting a violation of section 3, such person may bring an action in the appropriate district court of the United States to enjoin such acts or practices, and upon a proper showing a temporary restraining order or a preliminary or permanent injunction shall be granted. Any such permanent injunctive relief may provide for restitution of moneys, reasonable attorney fees, and such other relief as the court may deem appropriate.

SEC. 5. The Attorney General, in his discretion, or the Federal Trade Commission, in its discretion, is authorized to suspend the application of this Act with respect to any particular acquisition otherwise proscribed by this Act.

The SPEAKER. Is a second demanded?

Mr. BROWN of Ohio. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

Mr. LIVINGSTON. Mr. Speaker, I object. And on that I demand tellers.

Tellers were ordered, and the Speaker appointed as tellers Mr. DINGELL and Mr. LIVINGSTON.

□ 2200

The House divided, and the tellers reported that there were—yeas 139, nays 55.

PARLIAMENTARY INQUIRIES

Mr. ARCHER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. ARCHER. Is it now in order to ask for a recorded vote on the teller vote just taken?

The SPEAKER. The Chair will answer in the negative.

Mr. ARCHER. It is my understanding that under the rule a record vote can be asked for. I was on my feet before the Speaker had announced the vote.

The SPEAKER. The Chair will advise that under the precedents the gentleman can only object on the ground that a quorum is not present.

Mr. ARCHER. Can I not demand the yeas and nays?

The SPEAKER. Not on that question, under the precedents.

Mr. ARCHER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum did not pass through the tellers.

Mr. ARCHER. Mr. Speaker, is it not true that if a negative vote wins this vote that this bill will not be considered tonight?

The SPEAKER. The Chair will advise the gentleman a second is necessray to consider the motion.

Mr. ARCHER. So if the majority is on the negative side this issue will be disposed of as far as tonight is concerned?

The SPEAKER. The gentleman has stated the situation correctly.

Mr. ARCHER. However, if a positive vote occurs, then there will be 20 minutes of debate on each side?

Mr. DINGELL. Regular order, Mr. Speaker.

The SPEAKER. Unless the gentleman is going to ask unanimuous consent to withdraw the point of no quorum.

Mr. ARCHER. No, I do not.

The SPEAKER. The Chair will count.

Mr. ARCHER. Was not the teller vote evidence of the fact that a quorum is not present?

The SPEAKER. The Chair would advise that there could be a quorum in the chamber. It is not necessarily shown that every Member present went through the tellers.

Mr. BROWN of Ohio. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. BROWN of Ohio. If the Speaker counts a quorum, may we not go ahead and have the consideration of it and 5 minutes on either side to speak on the issue and a vote so that we can get over this?

The SPEAKER. If the Chair counts a quorum, a second is ordered and the House would proceed.

Two hundred and forty-nine Members are present, a quorum.

A second is ordered.

PARLIAMENTARY INQUIRY

Mr. ARCHER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. ARCHER. Does the gentleman from Ohio (Mr. BROWN) qualify? Is the gentleman opposed to the legislation?

The SPEAKER. The Chair will advise the gentleman that it is too late for his inquiry.

Mr. ARCHER. Mr. Speaker, if more than one gentleman is on his feet at the time a second is demanded and the one who asked for the second does not qualify, is it not appropriate for the one who does qualify to get the second?

The SPEAKER. Under the precedent (Deschler's chapter 21, section 14.6) the Member demanding the second and not the Member objecting to the unanimous-consent request that a second be considered as ordered is entitled to recognition for debate against the motion to suspend the rules.

The gentleman from Ohio (Mr. BROWN) demanded the second and was not challenged at that time.

The gentleman from Michigan (Mr. DINGELL) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. BROWN) will be recognized for 20 minutes.

REPORT OF THE COMMITTEE TO NOTIFY THE PRESIDENT

The SPEAKER. The Chair will receive a report.

Mr. WRIGHT. Mr. Speaker, your committee appointed to join a committee of the Senate to inform the President that the Congress is ready to adjourn, and to ask him if he has any further communications to make to the Congress, has performed that duty. The President has directed us to say that he has no further communications to make to the Congress, beyond saying that he has thrown another log on the fire and is ready to welcome all those who wish to come and join him in welcoming the Christmas season.

□ 2210

The SPEAKER. Did he send any special message to the Speaker?

Mr. WRIGHT. To tell you the truth, Mr. Speaker, I told him that I was the Speaker. I said that I had just been elected to that position.

He thought there was some kind of a palace coup that had taken place up here. He did not seem particularly pleased with that, either, Mr. Speaker.

The SPEAKER. The Chair recognizes the minority leader to report.

Mr. MICHEL. Mr. Speaker, I just want to say that the President reaffirmed his invitation to everybody to come down and for those who could not make it that he wished them all a very Merry Christmas and a Happy New Year and that we all deserved an extended stay away from this place because we had done such a good job.

The SPEAKER. The Chair thanks the committee for the expeditious manner in which they have handled their duties.

PREFERENTIAL MOTION OFFERED BY MR. LIVINGSTON

Mr. LIVINGSTON. Mr. Speaker, I offer a preferential motion.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. LIVINGSTON moves that the House do now adjourn.

The SPEAKER. The question is on the motion.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. LIVINGSTON. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER. The Chair wants the House to know that this was scheduled at the request of the minority leader, just so Members will be aware of what is taking place, the Members on that side of the aisle. The leadership had no knowledge of this bill earlier in the evening. At the request of those on that side, the Chair is recognizing for this motion to suspend the rules.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 73, nays 249, not voting 111, as follows:

[Roll No. 370]

□ 2220

Messrs. PARRIS, BENEDICT, ALEXANDER, LEVITAS, JENKINS, HUGHES, and EMERSON changed their votes from "yea" to "nay."

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The Chair recognizes the gentleman from Michigan (Mr. DINGELL) for 20 minutes.

(Mr. DINGELL asked and was given permission to revise and extend his remarks.)

Mr. DINGELL. Mr. Speaker, I yield 30 seconds to the majority leader.

Mr. JOHNSTON. Mr. Speaker, I object.

Mr. DINGELL. Mr. Speaker, I yield to the distinguished majority leader.

Mr. JOHNSTON. Mr. Speaker, I object.

The SPEAKER. The Members will be seated. All Members will be seated except the gentleman who has been recognized.

Now, the gentleman has yielded to the gentleman from Texas. No objection can take place at this instant.

The Chair recognizes the gentleman from Texas (Mr. WRIGHT).

REQUEST TO AUTHORIZE SPEAKER TO ACCEPT RESIGNATIONS AND TO APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING SINE DIE ADJOURNMENT

Mr. WRIGHT. Mr. Speaker, I have 3 unanimous-consent requests, all of which must be approved prior to a sine die adjournment, all of them routine.

First, Mr. Speaker, I ask unanimous consent that notwithstanding the sine die adjournment of the 1st session of the 97th Congress, the Speaker be authorized to accept resignations and to appoint commissions, boards, and committees authorized by law or by the House.

□ 2230

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. ARCHER. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that——

Mr. ARCHER. To save time, Mr. Speaker, I object.

The SPEAKER. Will the gentleman from Texas kindly withhold his request?

The Chair recognizes the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I yield 3 minutes to the gentleman from Indiana (Mr. SHARP), the chairman of the subcommittee that has handled the predecessor legislation.

Mr. SHARP. Mr. Speaker, I thank the gentleman for yielding.

I regret the manner in which we are operating here, but I just want to indicate that the Subcommittee on Fossil and Synthetic Fuels on Monday morning passed out a much more stringent moratorium of 18 months in order to buy time for the American public, the Congress, the executive branch to determine what structural changes are occurring among the giant oil companies, and what the impact is that might have on competition. The bill before us is only for 6 months, and allows the Attorney General or the FTC to vacate the moratorium for a particular acquisition if it is willing to do so in the public interest.

Mr. DINGELL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I strongly support H.R. 5274.

H.R. 5274 would impose a 6-month moratorium upon certain mergers between oil companies. During this 6-month moratorium:

The top 9 oil-producing companies (1979 API data) are prohibited from acquiring more than 5 percent of the voting stock in any company in the top 40 oil-producing companies (1979 API data).

Foreign governments, or companies acting on their behalf, are prohibited from acquiring more than 5 percent of the voting stock in any company in the top 40 oil-producing companies.

The top 9 oil-producing companies are prohibited from acquiring more than $500 million in assets from any company in the top 40 oil-producing companies.

Oil-producing companies ranked 10 through 40 (1979 API data) are prohibited from acquiring more than 5 percent of the voting stock of the top 9 oil-producing companies.

Oil-producing companies ranked 10 through 40 are not prohibited from merging with each other.

Oil-producing companies ranked 10 through 40 are not prohibited from acquiring assets from any other company.

The Attorney General or the FTC, in their discretion, are authorized to suspend the application of this act with respect to any particular acquisition otherwise prohibited by this act.

Mr. LIVINGSTON. Mr. Speaker, will the gentleman yield for a question?

Mr. DINGELL. I cannot at this time. I would reserve the balance of my time.

Mr. BROWN of Ohio. Mr. Speaker, this piece of legislation essentially prohibits 9 major oil companies from acquiring those in the top 40. I think

everybody understands what the purpose is. It is to stop the Mobil-Marathon merger so that we can have a chance to look at it until June 30. It also prohibits what has been a threat, and that is the possibility that corporate Kuwait or Saudi Arabia companies can come over and buy, not the small companies, but Exxon if they want to buy it. We think that may be adverse to the national interests, and if you do, I would presume you would vote for this bill.

That is the only argument we intend to present. I would hope we can go to the President's party and enjoy it.

Mr. Speaker, we have taken 2½ minutes. If the gentleman from Louisiana wants 2½ minutes, I will be glad to yield to him, but no more.

Mr. LIVINGSTON. Mr. Speaker, I thank the gentleman for yielding.

First of all, would this bill prevent the 41st, 42d, and 43d largest oil companies from forming a consortium, funded 49 percent by say, Kuwait or Saudi money, to buy a big independent like Louisiana Land & Exploration Co.?

Mr. BROWN of Ohio. The bill would because if the 41st, 42d, and 43d companies combined, they would automatically come into the higher range and be prohibited.

Mr. LIVINGSTON. No; I beg to differ. Mr. Speaker, I think that that points out my position here. This bill has come before this body at the last minute at the last hour. There are tons of questions that need to be asked about this bill. It affects the biggest industry in this country, the oil industry.

Mr. BROWN of Ohio. That is right.

Mr. LIVINGSTON. Ties it up. The gentleman yielded me 2½ minutes.

Mr. BROWN of Ohio. That is right.

Mr. LIVINGSTON. Ties it up 6 months, meaning those top oil companies cannot buy or sell each other or any other oil company; meaning that independents can be bought and sold by Kuwait oil or Saudi oil companies.

Frankly, Mr. Speaker, I think it is outrageous that the leadership of the other side and the leadership of this side would seek to deprive this body of some adequate information about a bill that affects something so monumental as this major industry.

Mr. BROWN of Ohio. Mr. Speaker, I have 1 minute left and I will be happy to yield to anybody who wants to speak on the issue, opposed to it or in favor of it.

Mr. THOMAS. Mr. Speaker, will the gentleman yield briefly for a question?

Mr. BROWN of Ohio. I yield.

Mr. THOMAS. Based upon the fact that you have a stipulation that certain entities cannot buy 5 percent of the voting stock of the top 40 oil-producing companies, does not the gentleman see that what this does is in fact produce a greater consolidation of those below 40 oil companies, since that is the only area in which buying and selling can participate, and is in fact a bill which will promote the consolidation of the oil companies rather than prohibit it?

Mr. BROWN. of Ohio. To answer the gentleman's question, the bill is a moratorium until June 30, and my feeling is that will not be the case in that period of time.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. BROWN of Ohio. I yield.

Mr. LUJAN. I have some sympathy for this bill because I do not like to see these big acquisitions, but I have one problem. This would not stop, in the case of Seagram's, for example, which is a foreign company, trying to acquire Conoco, so any foreign company could come in and acquire any domestic company. I would vote for the bill if we had that particular provision in it.

Mr. BROWN of Ohio. I appreciate the gentleman's support of the principle. If Seagram's were a major oil company it would be prohibited. If it does not have oil interests, it would not be prohibited.

● Mr. CONTE. Mr. Speaker, I rise in support of H.R. 5274.

To impose a moratorium on acquisitions and mergers among the large companies in the oil industry.

This effort arises out of the ongoing attempt by Mobil, the 2d largest oil company, to take over Marathon Oil, the 17th largest. As a result of this attempt, we have learned that there are a whole slew of so-called second-tier companies vulnerable to takeovers, for the same reason as Marathon was vulnerable. These companies have names familiar to us all—Getty, Sun, Union, Citgo, Pennzoil, and Kerr-McGee. Unless something is done now, these companies could be gone in the bat of an eyelash, and the industry changed forever into a conglomeration of supergiants.

Since decontrol, the marketplace is in control of oil and petroleum product prices and supplies. What a mistake it would be for us to sit passively by and let that private market become the province of a few superlarge companies. Let us make sure the safeguards to prevent excessive concentration are in place. And let us make sure these merger trends in the industry are beneficial.

This rider would enact a moratorium on such mergers, and would at least give us the time to get to the bottom of these trends in the oil industry to make sure what is happening is what should be happening. I support this moratorium because the rationale behind it is compelling: act now or we may be sorry later.●

● Mrs. COLLINS of Illinois. Mr. Speaker, I rise in support of H.R. 5274, energy acquisition moratorium, that would place a moratorium until June 30, 1982, on mergers between large oil companies, pending the outcome of a congressional evaluation of the economic, energy policy and national security impact of such proposed takeovers.

The problem that needs to be addressed by this Congress is not confined to the Mobil-Marathon battle that has occupied the attention of the media during the past month or so. Nor is it limited to the larger question of oil company mergers in general which this legislation seeks to address. The real issue in my view, Mr. Speaker, is the diversion of scarce capital from labor-intensive industries like steel and manufacturing to capital-intensive industries such as oil, at a time when our Nation's jobless rate is rising from recession to depression era levels. In fact, minority unemployment is already at depression era levels and is getting even worse, due to cutbacks in CETA and other training programs.

The anticompetitive consequences of oil company mergers is indeed a matter of great concern to me. In my home State of Illinois, Marathon supplies about one-third of the gasoline sold by nonmajor retailers and accounts for 13 percent of all the gasoline sold statewide. Marathon's prices are lower than Mobil's and Marathon's presence keeps Mobil's prices from going even higher than they already are. In order to compete with Marathon and other independents, Mobil not only has to practice some degree of price restraint, but has to offer customer services that companies like Marathon cannot afford to maintain. Should competition between the two companies be eliminated, not only would gasoline prices rise, but services will very likely be cut as well.

Should the Mobil-Marathon merger be allowed to proceed, it would very likely precipitate an industry-wide rash of takeovers, the likes of which we have not seen since the 19th century. The cumulative effects of such a trend could be extremely costly in terms of our Nation's economy and energy security as we become increasingly dependent on companies with international loyalties that often conflict with the public interest. These effects should be considered before any such mergers are authorized not after it is too late, and we find that our natural resources are firmly in the grip of OPEC.

But in addition to the antitrust issues, I believe that we have an even more serious problem on our hands, one that is unfortunately beyond the scope of legislation before us today. With or without Mobil Oil, the so-called diversification of assets by a company like United States Steel, which is laying off thousands of workers, some of whom live in my district, represents a truly pernicious trend.

Following hard on legislation that I have supported to lighten the tax burden on the steel industry so that it could modernize its plants and remain competitive with foreign producers, the latest move by United States Steel to invest in the oil business is betrayal of the public trust. Few industries utilize as small a ratio of labor to capital as the oil industry. Therefore, every $1 million invested in oil reserves—particularly reserves already discovered and producing—means hundreds of jobs lost.

Once again, we have a trend that is not limited to a single proposed merger, or even a single industry. As was documented in a recent staff report of the Energy and Commerce Subcommittee on Oversight and Investigations, and titled, "The Changing Distribution of Industrial Profits," the years since the 1973 Arab oil embargo have seen the redirection of our Nation's economic strength into one industry—energy—at the expense of the rest of our industrial base. Between 1978 and 1980, 98 percent of the increased net income of the Fortune 500 companies went into the oil and gas industries. This shift into energy expolitation at the expense of manufacturing and services has reduced the United States to the status of a lesser developed country—a net exporter of food and raw materials, and a net importer of value-added products. Perhaps my colleagues who advocate reducing our contributions to the World Bank and the International Development Association would think twice if they realized that by the next decade our Nation may be a recipient of rather than a donor to these development institutions.

I urge my colleagues to support this legislation today as a step in the direction of taking a closer look at the abuse of capital resources that is ruining our economy and tearing at our social fabric.●

● Mr. LIVINGSTON. Mr. Speaker, while I am sure that the advocates of H.R. 5274 have only the best of intentions, I must protest in the strongest terms the manner in which an issue of this magnitude has been handled in this body. I, too, have concerns over concentrations of economic and political power, whether they be in the form of big business, big labor, or big government. But a bill which essentially freezes billions of dollars in capital assets in one of the world's most important industries deserves more consideration than that afforded by secretive cloakroom conferences and substantive changes penciled in on an ad hoc basis in the late hours of the 1st session of the 97th Congress.

I find myself in sympathy with many of the concepts embodied in the original legislation. I do not even preclude the possibility that I may vote in favor of a bill establishing some type of limited moratorium on acquisitions at certain levels of the energy industry. But positions on legislation addressing such complex issues should only be reached upon analysis of all the facts. Even the few minutes which were available to review H.R. 5274 were sufficient to highlight numerous problem areas, areas which deserve more than hurried, simplistic debate:

First. Do we really want to ban friendly mergers as well as hostile takeovers? Most economists agree that where the boards of directors and the stockholders of two firms agree to pool their assets after full consultation and arm's-length negotiation, the results are usually higher productivity and long-range benefits to the economy and the consumers. Such is the case in most industries, at any rate. Is the energy industry any different?

Second. What will the effect of the moratorium be on stock prices? I suspect that stocks of energy companies, particularly in the lower tier, may become even more depressed and undervalued. This makes them even more likely targets for hostile takeovers. Thus, H.R. 5274 may have exactly the opposite effect from that which its sponsors intend.

Third. If in fact stocks do become even more undervalued, does the bill protect American assets and petroleum reserves from predatory foreign interests? A close reading of H.R. 5274 raises serious questions about whether its protections extend to takeovers initiated by, say, Elf Aquitaine—the big French energy firm, or Seagrams—the Canadian company that made a play for Conoco and caused such consternation among many of the same people who now support this bill. Or what about a consortium of smaller companies, backed by foreign interests, whose total "size" does not meet the parameters of section 1(2) but whose access to capital might threaten even the largest of American companies?

Fourth. Does Congress really wish to freeze existing petroleum reserves in place, as section 3 requires? Independent petroleum companies often depend on sales of such assets to finance further exploration. Will a freeze then effect wildcat drilling by these independents? Will there be a drop in the value of their assets which would make it harder to borrow funds?

Fifth. Section 3 would even prevent Exxon or Texaco, or one of the larger companies from selling portions of its reserves to a smaller company. While such a scenario may be unlikely, recent years have seen sales of reserves by larger oil companies; that is, Ashland, and I would like to hear testimony on this issue.

Sixth. I am afraid that the sponsors may have overlooked a serious constitutional problem with section 5 of the bill. While I realize that language written at the late hours in the House and Senate cloakrooms may not receive the closest scrutiny, it is clear to me that Congress should not be granting the Attorney General or any executive agency the power to completely waive the provisions of a law of this United States in this complex area. What would be the standards for such a waiver? Would there be congressional review? This is, I believe, an unwise and probably unconstitutional grant of legislative power to the executive branch. It is obvious that it is a blatant violation of the equal protection clause. If, as I suspect, this was attempt to allow friendly mergers to go forward, I will be happy to suggest language which accomplishes that goal in a constitutional manner.

Finally, I must again stress that I have come to no final decision on this issue per se. I have no financial interests in the energy industry and I have often found myself in disagreement, on various issues, with the big oil companies. But this legislation has not received full committee attention in the House Energy and Commerce Committee. It has not been addressed at all by the Judiciary Committee We need to hear testimony from the independents themselves. We need to hear testimony from the investment banking community and the securities industry. There is no reason for this unseemly haste. The Mobil-Marathon issue is before the courts and the Federal Trade Commission. Congress has the time to conduct an orderly analysis. Our track record on "panic" legislation, I submit, is not good. I therefore urge that this issue receive a more professional treatment in the 2d session of the 97th Congress.●

Mr. BROWN of Ohio. The time has now been yielded to the other side of the question as far as I am concerned, on that basis, we have each had time to deal with the issues. I have no further desire for time or to delay the proceedings.

Mr. LUJAN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER at this point the gentleman from Ohio who has the floor has to yield for a parliamentary inquiry.

Does the gentleman from Ohio yield for a parliamentary inquiry?

The gentleman has asked a parliamentary inquiry. Does the gentleman yield for a parliamentary inquiry?

Mr. BROWN of Ohio. I did not understand the Speaker.

The SPEAKER. The gentleman from New Mexico has asked for a parliamentary inquiry. Under the rules, he cannot ask that unless the gentleman from Ohio yields to him.

Mr. BROWN of Ohio. I would be happy to yield.

PARLIAMENTARY INQUIRY

Mr. LUJAN. Mr. Speaker, it is my understanding that each side has more than 2½ minutes, and that if someone has a request for some time from either the chairman or the ranking member, is it within the rules that they cut off debate after only 2 or 2½ minutes without granting the time to those who requested it?

The SPEAKER. The gentleman has well stated it. They may yield back their time. They have 20 minutes apiece and they may yield it back if they do desire.

Mr. DINGELL. Mr. Speaker, I am going to yield 1 minute to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Speaker, I think it is important that we note that the largest oil company in America controls 7.8 percent of the production. If Mobil and Marathon merge, they would control a whopping 4.9 percent of the producing market. We are talking about a last minute bill that infringes on the basic right of Americans to buy and sell property, where there can by no stretch of the imagination be made an argument that this in any way endangers the economy toward to the creation of a monopoly.

This is poorly thought out and in my opinion, does not protect the consumer, but could protect poor management from companies that can buy out poor management.

Mr. DINGELL. I think we should yield back the balance of our time.

I yield back the balance of my time. Does the gentleman from Ohio yield back the balance of his time?

Mr. BROWN of Ohio. Mr. Speaker, I have no objection to the issue being debated. As I understood the argument of those who were opposed to it, it was that they wanted to go to the President's party and did not want to delay it. That was a couple of votes ago, and as far as I am concerned, the issues have been presented. The gentleman who are opposed to the legislation have in fact had more time than those who support the legislation. I think everybody knows what is in the legislation. As far as I am concerned, Mr. Speaker, we can go right ahead with the vote.

□ 2240

The SPEAKER. The Chair understands the gentleman from Michigan (Mr. DINGELL) has yielded back his time. Has the gentleman from Ohio yielded his time?

Mr. BROWN of Ohio. Mr. Speaker, in view of the fact that the gentleman from Michigan gave one of the other opponents on that side an additional minute I would be happy to give an additional minute to one of the gentleman on this side.

Mr. Speaker, I yield 1 minute to the gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Take the time and shove it.

The SPEAKER. The Chair did not hear the gentleman from Louisiana. Perhaps the Chair should be glad he did not.

Mr. BROWN of Ohio. Mr. Speaker, I yield back the balance of my time in a more gentle spirit than the gentleman from Louisiana.

The SPEAKER. The question is on the motion offered by the gentleman from Michigan (Mr. DINGELL) that the House suspend the rules and pass the bill, H.R. 5274.

The question was taken.

Mr. LIVINGSTON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 223, nays 107, answered "present" 4, not voting 99, as follows:

[Roll No. 371]

□ 2250

Mr. DOWDY and Mr. ROEMER changed their votes from "yea" to "nay."

Mr. CORCORAN, Mrs. ROUKEMA, and Mr. EMERSON changed their votes from "nay" to "yea."

Mr. LEVITAS and Mr. CARNEY changed their votes from "present" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. SENSENBRENNER. Mr. Speaker, I have voted "present" on the last rollcall since any holdings of Santa Fe International Corp., stock could constitute a conflict of interest since the Santa Fe merger with the Kuwait Petroleum Corp., consummated on December 4, 1981, falls under the "evaluation period" defined in this bill.

PERSONAL EXPLANATION

Mr. CLINGER. Mr. Speaker, on the vote on H.R. 5274 I voted "present" because I own shares of Mobil Corp., stock and felt that a vote either in favor of or against the resolution could be perceived as a conflict of interest.

TIME FOR A CHANGE OF RULES

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, for some time I have been trying to get the rules of the House changed so that in fact we would have a true minority seeking a second, that we would not have the kind of setup that we had with people on both sides of the aisle holding the same positions, in fact controlling and monopolizing the time during serious debate. Because that has not been adopted as a rule of the House, the procedure, the process by which we went through on that vote was such a violation of normal parliamentary processes that I could not in good conscience vote for the legislation, the resolution which was at stake.

□ 2300

PARLIAMENTARY INQUIRY

Mr. LIVINGSTON. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. LIVINGSTON. Did the vote constitute two-thirds of all present and voting?

The SPEAKER. Two-thirds of those voting yea or nay.

Mr. LIVINGSTON. Of those voting? How were the present counted?

The SPEAKER. They do not count in the two-thirds as to whether or not it is two-thirds of the House. The Chair only counts those who actually vote yea or nay, and those indicating their presence only count to establish a quorum.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 2494. An act to designate the John Archibald Campbell U.S. Courthouse;

H.R. 4353. To amend the act entitled "An act to establish a uniform Law on the Subject of Bankruptcies," approved November 6, 1978; and

H.R. 4506. An act to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Ill., as "Melvin Price Lock and Dam."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1211) entitled "An act to extend the Toxic Substances Control Act for 1 year."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4503) entitled "An act to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes."

The message also announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 58. Concurrent resolution expressing the sense of the Congress with respect to the continued internal exile and treatment by the Government of the Soviet Union of Andrei Sakharov and his wife, Yelena Bonner.

PERMISSION FOR MEMBERS TO EXTEND AND REVISE REMARKS UNTIL PUBLICATION OF LAST AUTHORIZED EDITION OF CONGRESSIONAL RECORD

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that all Members of the House shall have the privilege, until the last edition authorized by the Joint Committee on Printing is published, to extend and revise their own remarks in the CONGRESSIONAL RECORD on more than one subject, if they so desire, and may also include therein such short quotations as may be necessary to explain or complete such extensions of remarks; but this order shall not apply to any subject matter which may have occurred, or to any speech delivered subsequent to the adjournment of Congress.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING SPEAKER TO ACCEPT RESIGNATIONS AND TO APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING SINE DIE ADJOURNMENT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that notwithstanding the sine die adjournment of the 1st session of the 97th Congress, the Speaker be authorized to accept resignations and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR CHAIRMAN AND RANKING MINORITY MEMBERS OF EACH STANDING COMMITTEE AND EACH SUBCOMMITTEE THEREOF TO EXTEND THEIR REMARKS IN THE RECORD

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the chairman and ranking minority member of each standing committee and each subcommittee thereof be permitted to extend their remarks in the RECORD, up to and including the last publication thereof, and to include therewith a summary of the work of that committee or subcommittee.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ANDREI AND YELENA BONNER SAKHAROV

Mr. WIRTH. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 58) expressing the sense of Congress for release of Andrei and Yelena Bonner Sakharov and ask for its immediate consideration in the House.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, and I shall not object, I have examined the resolution. I think it makes good sense. I think the House should pass this resolution.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 58

Whereas Article 12 of the International Covenant of Civil and Political Rights explicitly states that "Everyone lawfully within the territory of a state shall, within that territory, have the right to liberty of movement and freedom to choose his residence";

Whereas Article 13 of the Universal Declaration of Human Rights explicitly states that "Everyone has the right to freedom of movement and residence within the borders of each state";

Whereas the Government of the Soviet Union has signed the Final Act of the Conference on Security and Cooperation in Europe, is a party to the Universal Declaration of Human Rights, and has ratified the International Covenant on Civil and Political Rights;

Whereas Nobel Laureate Andrei Dimitriyevich Sakharov has been an undaunted leader of the human rights movement in the Union of Soviet Socialist Republics and has courageously spearheaded efforts to secure the most basic of human rights for the citizens of the Soviet Union;

Whereas Andrei Sakharov was forcibly and without trial exiled to the city of Gorki in the Soviet Union last year for his outspoken and eloquent dissent against the systematic violation of basic human rights by the Government of the Soviet Union;

Whereas Andrei Sakharov and his wife, Yelena Bonner, recently ended a 17-day hunger strike after the Government of the Soviet Union decided to allow Yelizaveta Alekseyeva to join her husband, Alexey Semyonov, in the United States; and

Whereas Andrei Sakharov's internal exile is a clear and flagrant violation of the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the Final Act of the Conference on Security and Cooperation in Europe: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that in accordance with the Final Act of the Conference on Security and Cooperation in Europe, the Universal Declaration of Human Rights, and the International Covenant on Civil and Political Rights, the Government of the Union of Soviet Socialist Republics should release Andrei Sakharov from internal exile immediately and should allow him and his wife, Yelena Bonner, to freely choose their place of residence.

SEC. 2. The Congress, commending the President for his past efforts in behalf of the Sakharovs, urges the President, acting directly or through the Secretary of State—

(1) to protest, in the strongest possible terms and at the highest levels of government, the continued internal exile of Andrei Sakharov,

(2) to call upon all other signatory nations of the Final Act of the Conference on Security and Cooperation in Europe to join in such protests, and

(3) to inform the Government of the Soviet Union, that the Government of the United States, in evaluating its relations with other countries, will take into account the extent to which such countries honor their commitments under international law, including commitments with respect to the protection of human rights.

SEC. 3. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President with the request that he further transmit such copy to the Ambassador of the Union of the Soviet Socialist Republics to the United States.

Mr. WIRTH. Mr. Speaker, as the sponsor of House Concurrent Resolution 241, the House version of Senate Concurrent Resolution 58, I rise in strong support of the resolution before us.

This resolution expresses the sense of Congress protesting the continued internal exile of Andrei Sakharov and his wife, Yelena Bonner, and their treatment by the Government of the Soviet Union.

Last week, we were witness to a singular event—Liza Alekseyeva was granted permission to leave the Soviet Union, and Sakharov and Bonner ended the hunger strike they had undertaken in her behalf. Andrei Sakharov, Nobel Prize winner and renowned physicist, risked his life so that this young woman could be reunited with her husband.

Just before the Soviet Government gave in to Sakharov's demands, the House passed House Resolution 286, a resolution I introduced that declared Congress association with the aims of the hunger strike. That we spoke out on this urgent human rights matter during an extremely busy time for Congress does us credit as a body.

However, Mr. Speaker, we must now take the time to speak out again. There is reason to believe that Andrei Sakharov, victorious in his protest, will be returned to the status of internal exile in the Soviet Union. Such a possibility clouds the good news of Liza Alekseyeva's release.

This resolution states unequivocally that the U.S. Congress will not stand by in silence at such treatment of the Soviet Union's foremost advocate of human rights. It is inconsistent with the positive steps the Soviet Union has taken in allowing the emigration of Liza Alekseyeva, and it runs counter to the expectations of a grateful world.

I urge my colleagues' support of Senate Concurrent Resolution 58.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WIRTH. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on Senate Concurrent Resolution 58.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. For the benefit of the Members, the House has completed all legislative business and the Chair wants to wish all of the Members a Merry Christmas and a Happy New Year and to extend his appreciation to my leadership and my Members and particularly on the opposite side for the cooperation from the minority leader and whip.

So, to all of you, a Merry Christmas and a Happy New Year.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 4498

Mr. GINN. Mr. Speaker, I ask unanimous consent that my name be withdrawn as a cosponsor of H.R. 4498.

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

TWELFTH ANNUAL REPORT OF NATIONAL SCIENCE BOARD, 1979, AND THIRTEENTH ANNUAL REPORT OF NATIONAL SCIENCE BOARD, 1980—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Science and Technology.

To the Congress of the United States:

In accordance with the requirements of Section 4(j) of the National Science Foundation Act, as amended, I hereby transmit the Twelfth Annual Report of the National Science Board for calendar year 1979 and the Thirteenth Annual Report of the National Science Board for calendar year 1980. Both reports cover the period prior to my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *December 16, 1981.*

□ 2310

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would like to thank and extend to all the help, all the people on the Parliamentarian's staff, the pages, and the employees, for the marvelous job they have done. We wish them a Merry Christmas and a Happy New Year.

GENERAL LEAVE

Mr. SWIFT. Mr. Speaker, I ask unanimous consent that all Members

be permitted to extend their remarks and to include therein extraneous material on the subject of the special order speech today by the gentleman from Texas (Mr. BROOKS).

The SPEAKER pro tempore (Mr. COELHO). Is there objection to the request of the gentleman from Washington?

There was no objection.

SOCIAL SECURITY PAYMENTS TO DECEASED RECIPIENTS

(Mr. LIVINGSTON asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. LIVINGSTON. Mr. Speaker, I would simply point out that section 7 of the Social Security Amendments of 1981 conference report addressed this morning relates to social security benefits being paid to people who are deceased, and I would point out that my bill, H.R. 5076, relates to that matter by giving the Social Security Administration access to State death records so that they can be compared with social security benefit rolls.

PERSONAL EXPLANATION

Mr. DOUGHERTY. Mr. Speaker, I was unavoidably detained this morning in Philadelphia and could not be present to vote on H.R. 4331, the conference committee report on the social security minimum payments.

Had I been here I would have voted "aye."

Mr. Speaker, I ask unanimous consent that this statement appear in the permanent RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

STATEMENT ON HOUSE RESOLUTION 305

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 20 minutes.

● Mr. FRENZEL. Mr. Speaker, the passage by unanimous consent yesterday of a resolution allowing Members of the House to receive outside earned income up to 30 percent of their salary instead of 15 percent was an unseemly performance.

Any time the Congress does anything without debate or vote, especially when the action applies to the Members themselves, the worst suspicions of the people are confirmed. Yesterday's House action was more than a minor slip. It looked bad because it was bad.

But while the procedure was intolerable, the substance of the resolution was not. It was not a pay raise. It was not a backdoor pay raise. It was not an increase in allowances or perks. It cost the taxpayers nothing.

It allowed Members of the Houe to have more outside earnings. The Senate has no limit on such earnings. There should be no limit on such earnings.

At the time the limit of 15 percent was imposed, I opposed it. It made no sense then, and makes none today. Wealthy Members can receive unlimited unearned income—rents, dividends, interest—but no Member can have earned income of more than about $9,000 per year—since yesterday, about $18,000.

Under the restriction, lawyers cannot continue to handle old business, nor can people continue to manage family businesses. The restrictions also apply to writing and speaking engagements, even if a Member made his or her living that way before coming to Congress.

The restrictions reflect a mean spirit within the Congress and are as degrading to the institution as the procedure that changed them yesterday.

All outside earned income and its source is reported annually so the world can see and judge whether any of the sources or amounts are improper.

Therefore, in my judgment, there was nothing wrong with yesterday's resolution from a substantive standpoint. In fact, the Republic would have been better served if the limit had been completely removed.

But the fact remains that the way it was done was offensive. I must sadly agree with anyone who feels that is why the people have decreasing confidence in the Congress. While I approve of the result, I cannot condone the way it was done.

A vote of sorts on this matter did occur today. Opponents of Resolution 305 tried to make a vote on approving the Journal a referendum on 305. They lost, but since the issue was not really defined, the vote cannot be considered definitive.

That vote and other discussions in this body have helped to let a little light shine on our process. That has been a redeeming aspect of an otherwise dismal affair.●

SUMMARY OF CONGRESSIONAL ACTIVITIES DURING FIRST SESSION OF 97TH CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. MICHEL) is recognized for 60 minutes.

Mr. MICHEL. Mr. Speaker, it has been a long and tumultuous year.

It has always been a pleasure and a privilege to serve with you Mr. Speaker, but I must say it has been even more so this year.

We have won some important votes on the floor of this House. I like winning. As you know all too well, it is a new experience for me and our minority. However, I understand better now what you have always understood: The elation is very, very short lived. Sometimes it does not last long enough for you to get off the House floor and toast victory. Another problem comes up; another vote occurs; the evening news turns your victory into defeat.

This has been a very trying year, Mr. Speaker. Long time, dealing with a revolution in public attitude. There have been more pressures, more demands, more deadlines. Many of our procedures and traditional ways of doing things around here have been shot through the Capitol dome and scattered into infinity. We have had to endure more numbers, statistics, charts, graphs, and figures than an accountant at tax time. The good news is that we have survived it all and accomplished much. The bad news is that we will be doing it all again next year.

I want to take a moment to compliment the Speaker and our colleagues on your side of the aisle who have conducted themselves with dignity, honor, and a sense of responsibility throughout the course of this session, whether we agreed or disagreed. For the most part, the proceedings have been conducted with fairness and the issues have been resolved in a manner that does justice to this deliberative body.

I just think this Congress has conducted itself in the proud traditions of the body and paid itself tribute.

I have to take this opportunity to address myself to the Members on my side of the aisle in particular and say publicly that I have never worked with a more intelligent, dedicated, and committed group of people. The Republicans I have been privileged to serve in this session have my respect and admiration. Our newer Members have been most willing to work and most anxious to learn. The more senior Members have been more energetic, more cooperative and more hard working than at anytime in my career. I am indebted to all of you.

To all the Members of this body, I want to say this: The Congress of the United States has for years been the subject of ridicule and low esteem in the eyes of the public and in the manner in which its proceedings have been reported. In some cases, it has been justified in my mind, in others, not. This year, I think more than any other in my memory, the Members of this body have done more to restore the integrity and honor owed to the Congress. The Members of the 97th Congress in its 1st session have served their Nation well and reinstilled a sense of pride in those of us who believe in this body and the ideal of public service.

Next year, I may deny it all, but this year as we end the session close to the Christmas season, I am compelled to express these thoughts and thank you all for the privilege of serving with you.

Mr. Speaker, I submit the following summary for insertion in the RECORD:

SUMMARY OF CONGRESSIONAL ACTIVITIES DURING THE 1ST SESSION OF THE 97TH CONGRESS

Mr. Speaker, looking back over the last 12 months, I have to say this has been one of the most rewarding, the most dramatic and the most successful years I have had as a Member of Congress.

We in this House helped bring about a change in the course of American history and we helped define a new direction for national government and national politics in this country.

When you think about the magnitude of the great change in political thought that has taken place, somehow all of the budget numbers and tax figures pale in significance.

Unlike the sloganeering of past Administrations, this year has truly been a new beginning for the nation and the world.

By any standard of measurement, the First Session of the 97th Congress has to be considered a success for the nation, for the Reagan Administration and for those of us in this body who have long fought for the principles of limited government, individual freedom and responsibility and the pursuit of world peace through the strength of our security and the strength of our beliefs.

Our greatest achievements, I believe, were made on the domestic front. We have reversed the dangerous cycle of 12 to 17 percent growth in the rate of federal spending and our dependence on inflation to finance government activities. We have enacted the largest single tax reduction in American history and made tax reduction permanent through indexing. We have reordered many of our national priorities, particularly in regard to national security.

During this First Session we have also made some strides in controlling the growth of the Congress, but there is still much that needs to be done to improve our procedures, reduce costs and provide for fair and equitable rules of procedure. We must also address ourselves to the need for more effective budget procedures under the 1974 Budget Act.

In my summary of activities during the First Session of the 97th Congress I would like to concentrate on four areas. They are:

A. Government spending and budgeting
B. Tax Relief
C. General Legislative Activity
D. Record of the House

If you had to single out one major achievement of the year, the decision would be difficult. Both the reduction in the growth of federal spending and tax reduction have and will continue to have a significant impact on the federal government and the lives of millions of Americans for sometime to come. They both deserve detailed review.

A. GOVERNMENT SPENDING

In the first federal budget influenced by President Carter (Fiscal Year 1977) total government spending in outlays amounted to $402 billion. In Fiscal Year 1981, just ended, the last fiscal year over which President Carter had influence, federal spending amounted to $660 billion, or an increase of 64 percent in just four years.

The outlay figures for those years are:

Fiscal year 1977, $402 billion.
Fiscal year 1978, $450 billion.
Fiscal year 1979, $493 billion.
Fiscal year 1980, $579 billion.
Fiscal year 1981, $660 billion.

The growth in federal spending between 1980 and 1981 was close to 14 percent. President Reagan proposed and the Congress enacted a budget for Fiscal Year 1982 that represented a 6 percent increase in spending growth. The Reagan budget for Fiscal Year 1982 called for reductions in anticipated spending of $35 billion, plus an additional $13 billion in the fall initiative. The Congress has enacted savings of about $41 billion as a result of those requests. Furthermore, the Reagan request called for reductions over a 3-year period of $135 billion. The Congress has enacted legislation to save an estimated $130 billion. These actions are unprecedented.

There was some impact in terms of restraint on the Fiscal Year 1981 budget, as a result of actions taken by the Congress and Administrative savings made by the Executive Branch. However, the real impact will be felt in Fiscal Year 1982. The Carter Administration projected total federal spending for '82 at $739 billion. Undoubtedly, had President Carter remained in office, that figure would have run tens of billions of dollars higher. In comparison, President Reagan's initial '82 budget request was $695 billion. That projection has grown as well, to about $735 billion, but it remains well under what the Carter level would have been at this time and in the end will represent a dramatic reduction in growth.

Since it is difficult to project exactly where we would have been today under Democratic fiscal policies, it is also difficult to measure the full force of the Reagan initiatives this year on matters of spending. Under any circumstances, however, they have to be looked upon as immense and certainly far-reaching, politically and economically.

There are two characteristics of our fiscal activities that should be noted. One is the procedural application of the Budget Act and the other is the philosophical, movement toward block grants and entitlement reform.

In the first instance, one can only conclude that the Budget Act has not served us will procedurally. Major reforms along the lines we have proposed over the last several years are badly needed.

In 1981, the House for the second time, applied the reconciliation process to the First Budget Resolution, which turned out to be one of the more effective and dramatic diversions from the Act. However, other deviations have not been as laudatory.

One of the most critical problems is the development of economic assumptions. The Reagan Administration has been criticized for the economic assumptions on which the House based its passage of the Gramm-Latta Budget Resolution. However, faulty economic assumptions and cost projections are by no means unique to the Reagan Administration. They represent a serious flaw in the process and defy partisan attachment.

President Carter, for example, submitted a budget for the Fiscal Year 1981 in March 1980 that called for $611.5 billion in outlays and a budget surplus of $16.5 billion. The Congress followed the President's lead and enacted a First Budget Resolution providing for $613 billion in outlays and a surplus of $200 million. We finished the year with $660 billion in outlays and a deficit close to $60 billion. In other words, the deficit projection was so far from reality that the economic assumptions and cost projections on which it was based lost all credibility. Deficit projections for Fiscal Year 1980 were $30 billion off the mark and the outlay projections for that year were more than $40 billion off the mark.

The second characteristic of the fiscal activities of the House that must be noted is the ground broken in the areas of block grants and entitlement reform.

These initiatives represent the advent of the "New Federalism" which is the cornerstone of the Reagan program.

The President proposed last spring the consolidation of 88 federal programs into five block grants, as the first step toward returning to state and local governments more control over programs affecting their constituencies and reducing administrative costs of the programs.

It has to be said that the Congress did not go near the distance in inaugurating this concept as the Administration would have liked. However, there can be no minimizing the fact that block grants are in place in both concept and practice. This "foot-in-the-door" achievement is of significant magnitude.

The Congress did consolidate 57 programs into nine new block grants, with total spending of $7.5 billion. The new block grants include:

1. Preventive Health
2. Maternal and Child Health Services
3. Alcohol, Drug Abuse and Mental Health
4. Primary Care
5. Social Services
6. Community Services
7. Low-Income Energy Assistance
8. Community Development
9. Education

Attached is a summary of these programs which was published in the National Journal October 10, 1981.

The Congress also took the first steps under reconciliation to reform federal entitlement programs, which are strangling the ability of the government to control fiscal policy. Entitlements, in the strict sense, account for nearly 60 percent of all government spending. While substantial progress was made toward entitlement reform this year, the more positive note is the bipartisan commitment to further reforms next year, through another round of reconciliation.

B. TAX RELIEF

The President proposed in 1981 and the Congress enacted the largest single tax reduction in the history of the country, directly on the heels of an Administration that had enacted the largest single peace-time tax increases in history.

The tax reduction program, finalized through several rounds of negotiations and partisan competition, includes major incentives to stimulate productivity in the private sector and thus create jobs and substantial across the board tax rate reductions for individuals.

The tax reduction for individuals will benefit all wage-earners and will benefit all income groups, percentage wise and dollar wise, to a greater extent than the tax proposals advanced by the Democratic leadership and reported out of the Ways and Means Committee in the summer of 1981.

Those who earn $10,000 or less, who have paid 2.3 percent of all income taxes will now receive 2.9 percent of the overall benefit of

the tax cut. Those who earn between $10,000 and $60,000 who have paid 71.7 percent of all income taxes will now receive 74 percent of the benefit. In dollar amounts, a one-earner family of four earning $15,000 will receive $2,084 in tax savings over the next five years as opposed to $1,755 under the Democratic proposal which was defeated. The tax savings for a $20,000 a year family during the same period will be $618 more than the same family would have received under the Democratic program. The attached chart shows the difference between the current law (Reagan program) and the Democratic program in six income categories. (Chart not printed in RECORD.) It should be noted, however, that these computations do not include the benefit that will be derived from the indexing of individual taxes which is included in current law. So whether you discuss the issue in terms of percentages or actual dollar amounts, there is no justification for the charge that the Reagan tax program provides less benefit to lower and moderate income families.

In addition to the individual tax cut provisions described above, the new tax law provided additional savings incentive provisions, which include the following:

Starting January 1, 1982, every working man and woman in the United States, regardless of whether or not they are covered by an existing pension plan, can now open an individual retirement account (IRA). A single working individual can invest up to $2000 a year in an IRA and deduct it from his income tax. A married individual with a non-working spouse can invest up to $2250. Two married working people can invest up to $4000 a year, and deduct it from their income taxes. A self-employed individual can write off 15% of his income, up to a maximum of $15,000 (Keogh accounts).

In addition, an individual can invest in an all-savers certificate and earn up to $1000 interest tax free, or $2000 for a couple.

In 1982 and 1983, one can earn up to $100 a year tax free in dividends. In 1985, the new law provides for a 15% net interest exclusion in which one subtracts consumer interest earned from savings interest paid, and takes 15% of the amount in tax free income.

C. GENERAL LEGISLATIVE ACTIVITY

Another of the significant achievements of the First Session of the 97th Congress was the enactment of a foreign assistance authorization bill and the accompanying foreign assistance appropriation bill. This was the first time since 1979 that foreign assistance legislation has successfully worked its way through the Congressional process.

The symbolic significance of this legislative success is as important as its substantive contribution to the Reagan Administration's foreign policy. In passing authorization and appropriation bills for foreign assistance, the Congress demonstrated that it shares President Reagan's comprehensive view of American security and his conviction that friendly nations must be aided both militarily and economically if freedom is to be defended in the world.

At the same time, the Congress also approved President Reagan's $200 billion appropriation bill for defense. While the defense budget is, as so often claimed "the largest in history", it must be seen in the context of dwindling support for national defense over a period of years. It also must be measured as part of the whole. As a percent of total federal spending and as a percent of the Gross National Product, defense spending is considerably less than the dollar amounts suggest. This defense budget therefore, must be judged not only by the total dollars involved but by the absolutely vital part it plays in the defense of the United States and of the free world. For the first time in years, the United States is showing—to friends and potential adversaries alike—that we are willing to make the sacrifices necessary to defend freedom.

History may well record that President Reagan's victories in foreign policy and national defense were the most important of the First Session of the 97th Congress. For the first time in years, the Congress has joined the President of the United States in telling the nation and the world that foreign policy and national security issues are of profound importance.

In other legislative areas, we find it regrettable that we were unable to adopt a comprehensive regulatory reform bill to move forward the third pillar of the Reagan program. While the Congress was relatively inactive in this area, however, the Reagan Administration moved forward under the leadership of Vice President Bush in eliminating more than 180 federal regulations and modifying many others for a potential savings of $18 billion.

We also failed to fully address the problems in the Social Security program and deal with the long-term financial difficulties in a nonpartisan manner. The fault for this failure rests with all of us. However, if any future progress is to be made to the benefit of current and future recipients, it is absolutely essential that we deter any further attempts to turn this critical issue into a political football, thus rendering any consideration of Social Security next year useless and destructive.

The Congress did finally enact a comprehensive agriculture re-authorization bill that represents a workable compromise between the agri-business interests and the Administration's goals of budget restraint. This issue, more than most others considered, produced heated controversy and division on both sides of the aisle and was almost the tragic victim of highly parochial pressures on the legislative process.

D. RECORD OF THE HOUSE

I think it is appropriate at this juncture to review some of the activities within the House that would normally be of an internal nature and not of general interest. However, there were some activities that deserve mention.

There was much publicity and interest earlier in the year in the bipartisan coalition that produced the dramatic spending and tax victories this summer. When you analyze the statistics and past voting trends, the Democratic cross-over was not unique or for that matter, even rare. However, it is unfair to judge those voting patterns on that basis alone. The coalition support for the Reagan program was a political phenomenon. Pressures were unusually great. The issues were unusually immense and complicated. The stakes were unusually high. The coalition which produced victory symbolized a degree of political courage and stamina this House has not seen in some time. I am indebted, and the nation is indebted, to those individuals on the other side of the aisle who stood by the President and, in fact, provided him the strong political leadership he needed.

I also have to record an even greater phenomenon. Republicans voted more than 90 percent behind the President on crucial budget and tax votes early this year, defying past voting patterns and demonstrating more dramatically than ever our commitment to change. I can't say too much for the courage and commitment shown from our side. Overall, the President received good support throughout the year and on those 28 issues where we had a Republican Policy position in the House our Members voted together 91.3 percent. Despite the immense issues before us and the pressures on all of our Members, overall Republicans voted together 76 percent of the time. I am proud of our Membership.

Republicans also played an important role in making some in-roads for the first time in the funding of House Committees. The 1980 Committee authorization was $43.6 million. The 1981 figure was reduced to $39.6 million, a $4 million reduction. It should be noted that $1.5 million of the decrease came from the budget of House Information System (HIS); nevertheless, the figures reflect a 9 percent decrease in committee funding. More significant than the actual numbers is the fact that it is the first time since 1975 that committee funding has been reduced.

Final figures on reductions in the size of committee staffs will not be available until next year, but the preliminary figures suggest that the reduction rate may be as high as 5 percent.

Another aspect of House activities worth mentioning is the shift in the amount of legislation considered. The number of bills introduced and considered is so great that the chance of improper or inadequate consideration must constantly be guarded against. During the first session of the 95th Congress, in 1977, there were 174 legislative days and 12,490 bills introduced. This averages out to 72 bills per legislative day that had to be considered by the House or committees. In 1979, there were 173 legislative days and 7,459 introduced, for a per day average of 43.

The 1st session of the 97th Congress contained 161 legislative days, with 6,114 introduced, making the per day average just 38.

I think this trend toward less legislation is laudatory and I hope the trend continues.

SUMMARY

There is no question that this has been a productive and historical legislative session.

We did not accomplish all that we sought to accomplish. However, we have not wavered from the goals we set out to achieve. Those on both sides of the aisle who began this session committed to the programs and principles set down by the President can be justly proud of the achievements they produced, many times under trying circumstances, formidable opposition and conditions which sometimes created doubt and frustration over the time, energy and dedication required to achieve those goals.

Is the nation better off today as a result of what we accomplished? The answer is yes. Will the nation be better off in the months and years to come as a result of what we did? Again, the answer is yes. There is no question about it. There is no doubt, no hesitation.

We are currently in the throes of a recession and an accompanying rise in unemployment. No one can minimize the seriousness of these economic problems. However, no one can deny that the roots of these problems run deep into the past. They are not the result of policies followed this year, nor are they a result of policies of the past year. Recession and unemployment are the painful price we are paying for years of irresponsible and almost criminal neglect of the

American economy and its ability to produce. To deny that fact of economic life is to reduce the national dialogue to a low level of political opportunism.

Despite the seriousness of the recession, there are signs of improvement and revitalization. We are beginning the long road back to stability of inflation and interest rates and looking forward to a return to growth in productivity. You will recall that when President Carter took office, he inherited an average interest rate on Treasury bills of 4.9 percent. When he left office, the rate had nearly tripled to 15 percent. The T-bill rate as of December 7 was down to 10.4 percent. President Carter also inherited a prime rate of 6.8 percent. Before he left office it had hit 21.5 percent. The rate is currently 15.5 percent and dropping. President Carter also inherited an inflation rate of 4.8 percent. But before he left office it had risen above 20 percent. It is currently running at less than 10 percent.

Obviously, the Reagan Administration cannot take full credit for these occurrences anymore than it must shoulder the blame for high unemployment.

We have and are now experiencing dramatic fluctuations in the economy. Record high inflation rates, record high interest rates and record high unemployment rates are all the results of years and years of inconsistent and highly politicized economic policies.

What is of utmost importance today is that we have finally discredited the practice of responding to inflation with recession and responding to recession with inflation. We have, for the first time in decades, an economic policy that rejects such notions and sets a new course that, again, for the first time in decades, is consistent. If we can maintain our commitment through the first half of next year, we will have successfully beaten back a recessionary period without massive injections of inflationary government spending.

We must always remember and never underestimate the disastrous conditions we faced at the beginning of this year and the dramatic and revolutionary change of direction we've made in just one year.

We can be proud of the consistency and new direction with which we have approached our economic problems. We have demonstrated that we have the economic and political courage to follow through. Past Congresses and the previous Administration in particular offered no new direction and more importantly failed to address economic policy with the consistency and the courage of conviction.

Consistent economic policy and persistence in the pursuit of economic goals will ultimately enable this nation to turn the corner, return to stable productive growth and send a signal to the entire world that the United States can be depended upon.

I am particularly grateful to those Members among our own ranks and those on the other side of the aisle who have been consistent and courageous in the positions they have taken and in their actions on the floor of this House. Political courage and adherence to principle in times of adversity have been the hallmark of our success.

DIFFERENCES IN TAX LIABILITY BETWEEN TAX ACT OF 1981 AND THE WAYS AND MEANS COMMITTEE VERSION

These Block Grants Are Only a Taste of Things To Come

The nine new block grants, fashioned out of 57 existing federal aid programs, make a sizable mouthful for President Reagan's first bite at new federalism. But Reagan says they are only a taste of things to come.

The nine block grants account for $7.5 billion of the $88 billion in federal aid that Congress has authorized for fiscal 1982. More than 450 assistance programs remain narrow-purpose categorical grants to states and localities. Reagan had proposed consolidating 88 programs into five block grants, but Congress split them into nine blocks and excluded the biggest programs, such as the $3.48 billion compensatory education program and the $1.15 billion program for educating the handicapped. Congress also attached more strings than the President had in mind and cut less out of program budgets than he had urged.

Reagan promises to return to Congress for additional mergers and fewer strings on the existing block grants. "We are committed to more block grants," Judy Peachee, special assistant to the President for intergovernmental affairs, told a group of state officials attending a regional workshop in Denver on implementing the block grants. "We are committed to greater flexibility. We are committed to a balanced federal budget."

Here is a rundown of the nine new programs, their 1982 authorization and the appropriation proposed by Reagan.

Preventive health: This new grant merges eight preventive and public health programs, including assistance for such disparate care as emergency medical services, hypertension control, rodent control, fluoridation and rape prevention. Like some other block grants, this one retains earmarked funds for favorite congressional programs. Every year, $3 million of the authorization must be spent on rape prevention and services; in fiscal 1982, the states must spend at least 75 per cent of the amount they spent in fiscal 1981 on hypertension programs; and they must support emergency medical services, although no amount is specified. The states no longer have to match the federal dollars they receive, but they must use the federal money to supplement state programs, not to supplant them.

$95 million authorized; $83.6 million proposed.

Maternal and child health services: The heart of this seven program consolidation is the maternal and child health services and crippled children's services program, but it also includes federal aid for research into sudden infant death syndrome and genetic diseases as well as lead-based paint poisoning prevention. This program has congressionally mandated set-asides for research, hemophilia and genetic disease programs. Congress also required that state health departments operate this program, but because most of those state agencies already were administering the seven folded-in programs, this block grant is one of the easiest for the states to assume. They must match every $4 from the federal government with $3 of their own.

$373 million authorized; $291.3 million proposed.

Alcohol, drug abuse and mental health: Five mental health, alcoholism and drug

abuse control and prevention programs are merged into this block grant, which requires states, at least in the initial years, to spend about the same proportionately on mental health and alcohol and drug abuse programs as they did in fiscal 1980. Although no specific application form or plan is required, the states must certify compliance with 13 "assurances of quality, fairness and appropriateness of expenditure" to get their funds.

$491 million authorized; $432.1 million proposed.

Primary care: This health care block grant doesn't go into effect until Oct. 1, 1982, to give time for the states which did not administer the two merged programs, community health centers and primary care research and demonstrations, to gear up. During fiscal 1982, the states will get $2.5 million to plan for assumption of the program, which aids clinics in underserved areas. Once they take over the program, the states may not use any federal funds to administer it; most of the other block grants allow up to 10 per cent of the allocation for state administrative costs.

$284 million authorized; $241.7 million proposed.

Social services: The Administration says this block grant merges there programs, but all of them were part of an existing block grant to states under Title XX of the Social Security Act, which helps states provide a variety of social and health services. The new program removes some strings, including a targeting provision. It is the biggest program of the nine.

$2.4 billion authorized; $1.97 billion proposed.

Community services: With the abolition of the Community Services Administration, this block grant takes over five categorical programs that had been run by that agency. They are community action, senior opportunities and services, community food and nutrition, energy conservation and training, evaluation and technical assistance. The Health and Human Services Department, to which the program has been transferred, can spend up to 9 per cent of the funds directly. The states may spend only 5 per cent of their allocations for administration.

$389.4 million authorized; $225 million proposed.

Low-income energy assistance: This program doesn't consolidate anything. It is called a block grant because it removes many of the statutory strings attached to its categorical predecessor. New mandates are general; for example, the states must spend a "reasonable" amount on energy crisis intervention.

$1.85 billion authorized; $1.4 billion proposed.

Community development: In the past, the Housing and Urban Development Department administered the segment of the community development block grant that went to cities with less than 50,000 population as a categorical program. Now the operation goes to the states with a few strings—such as a requirement to develop a housing assistance plan—removed. In drawing up a plan to allocate and spend the funds, the states must consult with the affected local governments. State takeover of this program is voluntary.

$1.08 billion authorized; $950.4 million proposed.

Education: This block grant merges 25 elementary and secondary school programs that used to go to state and local education agencies. Lumped together are such major programs as desegregation aid and the National Teacher Corps and small programs for metric education and consumer education. The new block grant may be used in three areas so broad as to support almost any kind of education assistance: basic skills development, education improvement and support services and special projects. The funds go to the state education agencies, which must pass through 80 percent to local education agencies. The states may not veto any expenditures proposed by localities. This program went into effect on Oct. 1, but the states don't take over until next July because, like most education grants, this one receives its funds a year in advance.

$589.4 million authorized; $518 million proposed.

VA CONTINUING RESOLUTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. HAMMERSCHMIDT) is recognized for 5 minutes.

● Mr. HAMMERSCHMIDT. Mr. Speaker, it gives me a great deal of satisfaction to take note of the level of funding for veterans services and benefits provided in the continuing budget resolution which cleared the Congress December 10, 1981.

While I regret the necessity for reductions made in certain programs administered by the Veterans' Administration, adequate funds have been provided so there will be no major reductions in medical care and, in fact, significant increases have been allowed for in entitlement programs for disabled veterans, their dependents and survivors.

President Reagan felt compelled to veto the continuing resolution passed by the Congress last month. But it was not because he felt that excess money was in the resolution for veterans' benefits and services. The fact is that with respect to veterans' programs, the second resolution is almost identical to the first. The level of funding for personnel is also the same.

It is my understanding that the costs of the October 1981, Federal pay raise will also have no effect on the number of VA employees for which appropriations have been made. It is the stated intention of the Appropriations Committee that the additional costs of this pay raise will be met through deficiency appropriations in advance of the anticipated supplemental appropriation or through the use of funds other than those designated for personnel.

Mr. Speaker, the veterans of America have fared well during a time when many other Federal programs have been pared down. As ranking member of the Veterans' Affairs Committee, I cannot overstate the magnificent job that has been done by our distinguished chairman, SONNY MONTGOMERY, in presenting the case for veterans with courage, diligence, and intelligence.

The chairman of the Appropriations Subcommittee on HUD-Independent Agencies, Mr. BOLAND, of Massachusetts, has also stood steadfast in his commitment to make certain veterans programs are adequately funded. Working in tandem with him on this highly complex legislation was BILL GREEN, of New York, ranking member of the Subcommittee. I hope America's veterans and other recipients of VA benefits will join me in recognizing the great contribution made by these individuals in preserving VA programs.●

THE THREAT TO EDUCATION IMPLIED IN RECENT OMB PROPOSALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. LEACH) is recognized for 60 minutes.

Mr. LEACH of Iowa. Mr. Speaker, as the executive branch continues its deliberations on the fiscal year 1983 Federal budget, I rise to discuss the fundamental and urgent nature of Federal aid to education in our society.

On December 8, the Washington Post reported that the Office of Management and Budget (OMB) hopes to reduce Federal education funding by more than 40 percent. The reported budget proposals would decrease Federal support for the Head Start program, would cut in half appropriations for title I remedial reading and math study, would reduce by one-third vocational education funding and would begin the phaseout of all federally funded education research activities. In trimming the Department of Education's budget by more than $5 billion, student financial aid would be reduced by more than 60 percent.

Before elaborating on these proposals, let me stress at the outset that they are nothing less than revolutionary. While the administration has previously made great efforts to accommodate a variety of interests as it steers the Federal Government in a new fiscal direction, it is nevertheless clear that the budget issue is becoming less one of holding down Federal spending and more one of establishing different spending priorities. As one who favors fiscal restraint, but a different set of taxing and spending priorities, I feel obligated to outline the implications of OMB's proposals for education, and to set forth an alternative agenda for action.

Mr. Speaker, the national interest in quality education has been recognized throughout our history in such landmark legislation as the Northwest Ordinance of 1787 and the GI bill. Proper public policy demands concern for human as well as corporate capital. Our economy, our national security and our international competitiveness all depend on a well-educated population providing a productive work force

and source of energizing ideas. If America is to compete abroad, it needs educated innovators; if it is to achieve social unity, it needs to provide equal access to basic education. How then should one view OMB's reported budget recommendations for education programs?

Most would agree that we benefit from the back-to-basics approach now emerging in elementary and secondary education. Competency in reading, writing, and mathematics is essential for individuals to play a productive role in society. In this regard, the title I compensatory education program for disadvantaged children focuses on remedial reading and math instruction. Presently funded at approximately $3.2 billion, the program serves over 5 million children. It represents perhaps our best chance of breaking that oft-mentioned cycle of poverty which drains our Treasury, yet OMB is proposing a 50-percent reduction in fiscal year 1983 funding.

Here it should be stressed that study after study has indicated that those children who do not achieve a manageable ability to read and write and to work with basic mathematics by the fourth or fifth grade are precisely the individuals most likely at a later age to become dependents on the State, in and out of prison. Resources applied to basic education in the elementary grades are the Federal Government's cheapest and most effective anticrime and welfare avoidance programs. Failure to provide for basic education for children will necessitate provision of greater sums at a later age for societal misfits. It is, to paraphrase a popular television commercial, a national travesty to waste a mind.

In like fashion, the rapidly changing nature of the private sector and the growing recognition that the economy is becoming increasingly service- rather than production-oriented would suggest that more and more working Americans as well as those who are unemployed will need vocational education or job retraining. Yet OMB has apparently chosen to propose that appropriations for vocational education be reduced from $800 to $500 million—a cut of 40 percent.

Last July, 1 joined a majority of my colleagues in supporting an amended version of the President's education block grant proposal. Implicit in this thoughtful attempt to return control of many education programs to the States was the recognition that certain programs should remain as national initiatives. The research activities conducted within the National Institute of Education are one example. As States struggle to assume the costs imposed by block grants, can we reasonably believe that vital research on problems of national scope will be continued?

With regard to higher education programs where most of the budget reductions are targeted, I am concerned that the OMB proposals present an almost insurmountable challenge to students and institutions of higher learning—both public and private. If reports of the OMB recommendations are correct, the Pell grant program for low-income college students would be reduced by $1.6 billion or 60 percent leaving almost 2 million students without grants-in-aid. While we have not yet assessed the full impact of last summer's reforms in the guaranteed student loan program, OMB has reportedly recommended that eligibility of graduate students by terminated. The best and the brightest would be denied the advanced education vital to management of a technologically advanced society. It should be stressed that the administration argued last spring that student financial aid programs be needs-based, yet the proposals advanced by OMB would eliminate two vital programs available to low-income students—national direct student loans and supplemental education opportunity grants. A third campus-based program allowing students to work their way through school, the college work-study program, would be trimmed by one-third.

Let me stress that the pluralistic nature of our higher education system is one of its great strengths, envied throughout the world. The administration has publicly recognized the merit of institutional pluralism in its controversial proposals relating to tuition tax credits. Nevertheless, OMB's budget proposals would so undermine the viability of private institutions that greater burdens will inevitably be placed on public supported colleges and universities.

If projected cuts in education funding are approved, most private colleges will have to sacrifice quality as their primary concern. Further cuts in student aid will cripple some excellent colleges and force students to attend public institutions where costs to society are much higher. The issue is one of survival for some and quality for all. It is also one of cost to the taxpayers. In my own State, public institutions of higher education are already at maximum capacity. If students are driven to public institutions of higher learning, the costs saved at the Federal level will be transferred to State government—but at a higher level because state supported institutions cost society more than the average private college. In my district, for instance, St. Ambrose and Iowa Wesleyan Colleges cost society about 60 percent as much per student to support as the University of Iowa.

Finally, Mr. Speaker, let me address three concerns expressed by opponents of Federal aid to education.

First, with regard to budget priorities, it is impressive how much restraint Congress has already applied to Federal education expenditures. Outlays for major elementary, secondary, and postsecondary programs will increase in fiscal year 1982 at rates far below the inflation rate. Social security student benefits are being phased out on the administration's premise that needy students can apply for the very programs OMB now seeks to repeal.

Second, with regard to those who would argue that State and local governments as well as the private sector can finance a greater proportion of education costs, it is fair to ask if this alternative financing acutally exists. In the State of Iowa where a large percentage of the state budget is already devoted to education, Federal budget reductions in a wide array of other programs will result in increased competition for the State dollar. Already limited State appropriations for education will inevitably be viewed as a revenue source for other social programs. In talks college heads have held recently with major corporations and foundations, the message is loud and clear. Industry is either unable or unwilling to make up the shortfall. In fact, the new tax act gives corporations and wealthy individuals less incentive to donate to charity.

Finally, in reference to those opposed to any Federal involvement in schools due to concerns about the establishment of the Department of Education, I would emphasize that the administrative approach existent in the Old Department of Health, Education, and Welfare was seldom characterized as anything except bureaucratic. Governmental accountability cannot be achieved when a Department like HEW comes to expend 40 percent of the Federal budget. The United States was the last Western democracy to establish a Cabinet-level Department of Education. It was overdue. And, although the Department's existence is short, it would appear to be cost effective.

The same cannot be said for some of the Federal programs voted by this Congress. For Congress to fund the MX missile system, the B-1 bomber, the Tennessee-Tombigbee Dam, the Clinch River breeder reactor, tobacco, sugar, and peanut programs, and then reduce the funding for education is a denial of judgment.

And for Congress to weaken fiscal policy by reducing taxes on the oil industry—even though most oil companies have little in the way of U.S. tax liability—and authorize companies that lose money to sell their tax losses to companies which earn a profit is a denial of responsibility. Education of the young is a better investment in our economy and national defense

than any tax break or missile ever will be.

Two and a half milleniums ago Aristotle wrote:

All who have meditated on the art of governing have been convinced that the fate of empires depends on the education of youth.

Some wisdom is ageless.

ONE HUNDREDTH ANNIVERSARY OF BIRTH OF FORMER SPEAKER SAM RAYBURN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. WRIGHT) is recognized for 60 minutes.

Mr. WRIGHT. Mr. Speaker, the purpose of this special order is to pay tribute to the former Speaker of the House, the Honorable Sam Rayburn of Texas.

On January 6, while this House will be in adjournment, it will be commemorating the 100th anniversary of the birth of Sam Rayburn. He was born in Tennessee and moved with his family to Texas at a very young age.

He served as the youngest member of the Texas Legislature and was to that time its youngest speaker. He came to the Congress in 1913, along with such other stalwarts as Alvin Barkley and Fred Vinson, of Kentucky. He served longer as Speaker of the U.S. House of Representatives than any other person.

Sam Rayburn was not of an imposing stature, but he was a little giant. He cast a long shadow of legislative history across the annals of the United States.

His was a leadership responsible for railroad legislation, for the Interstate Commerce Commission, for the Rural Electrification Administration, for the Federal Housing Administration, and for many other landmark programs that have made life better for millions upon countless millions of American people.

What I think those of us who served with him remember him for most, however, was his unrivaled ability to sum up succinctly in a very few words what all the rest of us had been trying to say. On more than one occasion after we had pounded our minds about the periphery of a given issue, Sam Rayburn would rise and speak for 2 minutes and so unerring was his instinct for the jugular vein of any issue that most of us found ourselves nodding in assent and saying to ourselves, "That's just what I was trying to say."

He was a man of few words. Sam Rayburn believed in his ability to sum up human character and he believed in human character. He often said,

If you tell the truth the first time, you don't have to remember what you said.

Sam Rayburn had a reverence for the orderly procedures of this institution. He was accustomed to rapping the gavel gently and having all Members come raptly to attention.

The public never really understood what made Sam Rayburn tick, those who simply saw him on those occasions when he presided over the National Democratic Convention as it was televised across the land. He would scowl that businesslike scowl of his when he rapped the gavel and that milling mob first not knowing the rules, and second not really caring about the rules, failed to come to order. I am sure that there were many people across the land who gained from that impression of Mr. Rayburn as an irascible old rascal or a crotchety old curmudgeon. He was neither. He was a gentle and kindly man. What had happened was that his sense of propriety had been offended by the failure of that mob at the National Convention to obey and respect those rules of orderly democratic procedure which were to him sanctified.

Sam Rayburn believed in a bipartisan kind of government.

Joe Martin was his friend and never would he tolerate an unkind word to be spoken about Joe Martin, his counterpart in his, Sam Rayburn's presence. He told me,

If Joe Martin tells you he will do a thing, you don't have to write it down and remember it. He will remember it and he will do it, because his word is good.

These are just a few of the things that I remember about Mr. Rayburn. He was a person of deep personal honor. I think the Nation is richer because of his having lived. He was in almost a clerical sense wedded to the House, almost in the sense that a priest could be said to be wedded to the church, Sam Rayburn gave his life to this institution. He had some contempt for his colleagues who for one reason or another deigned to leave the House and run for or serve in the other body.

□ 2320

He thought they had given up the better part of the congressional service to do so.

Mr. Speaker, I know that there are many others who served with Mr. Rayburn who will want to be commemorative of this occasion.

● Mr. FASCELL. Mr. Speaker, Sam Taliaferro Rayburn left Washington, D.C., with more than an office building bearing his name. He left a tradition of dedicated public service, a legacy of sound judgment and wisdom, and an inspiring standard of integrity in his duties as the longest-serving Speaker of the House of Representatives of the U.S. Congress. His unerring instinct for facts and for how those facts could be related to the best interest of our country—regardless of what emotion, political benefit or self-interest might dictate—made his years of service in the Congress a unique era in its history. His record of achievement and fame is an enviable one; his method of performance is a high standard which all of us could well emulate.

In my 27 years in the Congress, I have served with four Speakers of the House. Sam Rayburn, the elder statesman of that accomplished group, stands out as a master of his special craft and a skilled politician. No one knew better how to strike a balance between the twist of the arm and a pat on the back. Sam Rayburn will always stand out in my mind as a person of humility and honesty who bore the tremendous responsibilities of the third highest office in this country with pride and magnificence.

As we approach the 100th year of Sam Rayburn's birth, I wish to join in this tribute to a great American, a distinguished statesman and, for me, a true friend.●

● Mr. ADDABBO. Mr. Speaker, it is indeed with great honor and respect that I take this opportunity to join my distinguished colleagues in the House of Representatives in honoring what would have been the 100th birthday of the man who held the office of Speaker of the House longer than anyone else in American history, Sam Rayburn.

It is quite fitting that the great State of Texas, a proud and dynamic part of America, should have had as one of its voices in Congress a man as dedicated, hardworking, and of course, charismatic, as Sam Rayburn was. As a Member of Congress he epitomized what a public servant should be, a man who never let the needs of the general public play second fiddle to the desires of a special few.

As Speaker of the House of Representatives he was undoubtably one of the most skillful Speakers this body has ever known, his ability to move legislation through Congress by his persuasion abilities is now legendary. He touched those fortunate enough to have served with him, as I did. The lessons I learned with him during the brief time we were friends I shall carry with me forever.

Many words of praise and respect have been spoken of Sam since his death in 1961. Though it has been over 20 years since he walked the Halls of Congress the fact that we still speak so fondly and revering of him today indeed reflects the impact he had in Washington and the Nation as a whole.●

● Mr. BENNETT. Mr. Speaker, I rise today in tribute to one of the great heroes of this Congress, Speaker Sam Rayburn. It was a great honor for me to have served under such a great leader in this House. Sam Rayburn was presiding over this body when I arrived as a freshman in 1949, and he led this body with dignity and tough-

ness until his death in 1961. His proteges were many and included a President of the United States. His legacy included much of the New Deal, which gave hope to tens of millions of Americans. Throughout his long and success-filled career, he was known for his ability to muster votes by quiet, behind-the-scenes persuasion. Though those crisis-filled years of the depression and world war and growing menace abroad, Sam Rayburn stood for a strong America both at home and around the world. His contributions to the Congress, to his country and to mankind live today and will serve as an inspiration to all who come here for generations to come.●

● Mr. BOLAND. Mr. Speaker, I am pleased to join with the distinguished majority leader, JIM WRIGHT of Texas, in paying tribute to our late beloved Speaker, Sam Rayburn, whose 100th birthday anniversary is on January 6, 1982.

Everyone familiar with the American political scene over the last several decades has been familiar with the name of Sam Rayburn, the farmer-lawyer from the black clay country of Texas. His long and impressive service in this Chamber will certainly rank as one of the historical highlights of the 20th century.

Sam Rayburn dedicated his life to this House. He believed in it as a great institution. He agreed with our Founding Fathers that the House of Representatives should be kept close to the people.

As Speaker of the House, Sam Rayburn distinguished himself for fairness and responsibility by protecting the rights of all Members of the House, majority and minority alike. He brought grace and greatness to the Office of Speaker. I am proud to have served under a leader of his intelligence, compassion, and courage.●

● Mr. BROOKS. Mr. Speaker, on January 6, our Nation will mark the 100th anniversary of Mr. Sam Rayburn's birth and, with each year that passes, the people of this country gain a new appreciation of the many contributions that he made to the fabric of our life as a democratic nation.

Sam Rayburn and I were both colleagues and close personal friends for a great many years. When I entered Congress in January 1953, he was already a living legend in both Texas and Washington. He began his congressional career in 1913, the same year Woodrow Wilson was inaugurated as President. In 1937, he was elected House majority leader, the first Texan to hold this influential position. In 1940, he became Speaker of the House, a position in which he served for a total of 17 years.

As a young man in my first term of office, I was deeply honored to be invited by Mr. Rayburn to join his daily board of education meetings in the Capitol. I still remember those meetings fondly and the political lessons we all learned under the guidance and leadership of Mr. Sam.

While Mr. Rayburn served as Speaker of the House longer than any other man in our country's history, he never lost sight of the fact that his first responsibility was representing the interests of his constituents in Texas. All of us who served with Mr. Rayburn loved and respected him. He was a man of solid character, great courage, and keen vision. We valued his wise leadership and we deeply miss his warm friendship. Indeed, his influence will always be felt by all Americans who share Mr. Rayburn's commitment to democracy, freedom, and self-government.●

● Mr. ZABLOCKI. Mr. Speaker, it is a high honor and privilege to have this opportunity to say a few words about our revered, late Speaker Sam Rayburn—in anticipation of the 100th anniversary of his birth on January 6, 1982.

Speaker Rayburn was first elected to Congress for the term beginning on March 4, 1913—just 4 months after I was born—and he subsequently compiled a record of continuous service as a Member of this House, which has never been equaled. His service to this body, however, should be judged more in terms of its quality and overall impact, than in terms of its longevity.

Above all, Mr. Sam was a product of this House, who reflected its most honored and venerable traditions. He had no other ambition, but to serve the House of Representatives to the best of his ability. His oft-quoted "Code of Leadership" makes this sense of dedication clear.

> I shall be just, I shall be fair, and lead as the lights are given to me, as I have in the past, being proud to be a Member of this House. As I have said to you so often, the House of Representatives has been my life, and it is today and it always has been my love . . .

The stories of Sam Rayburn are legendary and time, today, does not permit me to recount those which come most immediately to mind. However, if one must summarize in a few brief words the public career of someone who has had such a strong and abiding influence on his colleagues, including those who have attained some of the highest offices of the land, it would be that he was a devoted and even partisan member of his party, who always placed the interests of his country above all other considerations—and acted accordingly.

As Eric Sevareid once observed:

> A few have learned to love Sam Rayburn, many to like him, and all have learned to respect him.

That is his legacy and his enduring reputation. On the 100th anniversary of his birth, he remains, as he was in life—a very human, but compelling inspiration.●

● Mr. DERWINSKI. Mr. Speaker, on January 6, the late Speaker Sam Rayburn would have been 100 years old. It is a special pleasure for me to join my colleagues in paying a tribute to the everlasting memory of this great American, who left an indelible mark upon the Congress and upon our Nation.

As a young Member of Congress when Sam Rayburn was Speaker, I came to respect the great leadership qualities he demonstrated. He was a man who believed fervently in the procedures and responsibilities of the House of Representatives. In my opinion, Sam was one of the most outstanding legislators in our history.

Sam Rayburn's influence on the course of legislation and on the legislative branch of Government was without parallel. He was the intimate and respected adviser of Presidents; the worthy and able representative of his people; friend, counselor and respected leader of the Congress. Throughout his many years as Speaker, he used his great influence wisely. He possessed a rare combination of wisdom, personal integrity, and political horsesense. His love of country and his devotion to the principles and ideals upon which this Nation was built helped him make a lasting mark in world and domestic affairs. He was truly a great patriot.

Sam Rayburn is gone—but his role in history will remain forever.●

● Mr. DYSON. Mr. Speaker, I rise today to pay tribute to Samuel T. Rayburn, one of the greatest statesmen to ever serve in the House of Representatives. As we near the 100th anniversary of his birth, it would serve us well to reflect on this man's many years of service to his country.

Sam Rayburn, born on January 6, 1882, led the life of a farm boy, often working from dawn until dusk in his family's cottonfields. Although always busy, he did have the opportunity when he was 12 to hear Representative Joseph W. Bailey of Texas speak. As he stood there in the pouring rain, the young Rayburn was moved by what he heard and resolved to become a U.S. Congressman.

Mr. Speaker, I feel that I share a common farm background with Sam Rayburn, as well as many of his ideals. His life, and what he stood for, has always been an inspiration to me. Like Sam Rayburn, I was elected to the State legislature at the age of 24 and to the Congress at a relatively young age. His life has provided me an example of what a young man can accomplish through determination and hard work.

Through a political career that spanned several generations and some of the most dramatic legislative battles of the 20th century, Sam Rayburn

solidified his reputation as a partisan Democrat, but also as an able compromiser. Rayburn expected party loyalty, however he never asked a Member of Congress to vote against his principles. He became one of the strongest Speakers in American history through a combination of tact, informal influence, shrewd political sense, and a reputation for integrity.

Mr. Speaker, I often recall these words which Sam Rayburn once spoke, "The steam which blows the whistle seldom turns the wheel." To me these words ring especially true today as we face the new demands placed on us by our constituency. The occasions on which Sam Rayburn left the chair and descended the well of the House in order to speak always drew a large and attentive audience of his colleagues. The word that "Mr. Rayburn is up" would spread through the cloakrooms and corridors of the Capitol, and the Members would crowd to listen. The attention which he drew from his colleagues when he descended to speak was not because the whistle was being blown, but that the wheel was being turned.●

GENERAL LEAVE

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the subject of Mr. Rayburn at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

FOREIGN AID: A NEW TUNE FOR THE OPPOSITION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

● Mr. LAFALCE. Mr. Speaker, after years of haranguing against foreign aid, Republican Party spokesmen now voice the proposition that foreign aid is indispensable, because President Reagan, a Republican President, now says it is.

I submit, Mr. Speaker, that the Republicans are right, but for the wrong reasons. Foreign aid should not be supported simply because the President has requested that it be, but because our Nation has a great tradition of providing assistance—both economic and military—to poor nations throughout the world. This tradition rests not only on our moral code, but also on our realization that American assistance to the developing nations is vital to our Nation's security and economic well-being.

I join all of our colleagues in welcoming the President's realization that our foreign assistance programs provide the backbone of our response to the global challenges of aggression and peace. Regrettably, however, the President has left behind him a rhetorical legacy that prompts us to view his pronouncements with skepticism. We will never truly know the depths of the President's commitment. Does it represent a true conversion to new principles, or conversion weighted in political expediency? Only time will tell. Today we can at least celebrate the conversion.

The new found religion of our colleagues in this body, Mr. Speaker, is even more perplexing. Gone from the debate on the fiscal year 1982 foreign aid bill were the protestations of yesteryear that foreign aid is the supreme rip-off of the American people at a time when our domestic economy is faltering and the budget is being radically and indiscriminately slashed. Ironically, these conditions which fed the battle cry of foreign aid opponents are now worse than ever, but the voices remain muted, drowned out by the oratory of allegiance to the President.

Mr. Speaker, I must lower my own disbelief for I welcome the support of our Republican colleagues for what I believe is a well-balanced foreign aid package. For the first time in my memory, a majority of both parties joined forces to pass the foreign aid bill, stamping it with the true seal of bipartisanship. I hope that our Republican colleagues will, over the next several months and years, take the time to fully understand the programs and directions that they now support. We in the majority will continue to stand ready to mount a bipartisan effort in support of future foreign aid bills in 1983, 1984 and beyond, and we will need their continued support.

Recently, the Agency for International Development prepared a newsletter which provides well reasoned, thoughtful answers to all of the criticisms that have been levied at the foreign aid program in the past. How familiar those questions are, Mr. Speaker. We have been providing answers to them over and over again to the apparent dissatisfaction of foreign aid's detractors. Apparently, logic and carefully reasoned responses were insufficient to lure a few votes our way. Now, thanks to pressure from the White House we have the votes that are needed to pass the aid program.

But what of the future, Mr. Speaker? What happens when the White House is once again home to a Democrat? Will our Republican colleagues continue to support foreign aid, or will they revert to their old tactics of obstructionism and opposition? What will happen when the imperative of supporting our President is no longer operative to our Republican colleagues? Of course, only time will tell. However, we must continue to make the case for foreign aid regardless of the seeming cushion of support it now has in this body. I am afraid that if the cushion is filled with air, it will too easily burst.

Mr. Speaker, I commend to all our colleagues, Democrat and Republican, foreign aid proponent and opponent, the AID publication. It provides answers to the questions most often raised by our constituents about the foreign aid program. These are the very questions that fueled the rhetoric of those in this body who have opposed foreign aid in the past. I trust that a reading and understanding of the answers provided will help strengthen the bipartisan foundation for our foreign aid program that was laid this week.

Thank you.

The AID publication follows:

WORLD DEVELOPMENT LETTER

About a year ago, World Development Letter answered a series of questions actually asked by a woman from Missouri in a letter to one of her senators. These were commonly asked questions about the U.S. foreign assistance program, and we added a few that other correspondents had posed. In this issue, we're repeating most of them and bringing the facts and figures up to date.

"We have to work five months out of every year just to pay our taxes. Are we going to bankrupt the United States so we can support the world?"

The per-person annual cost of all foreign economic assistance is about $34. Most of that $34 is spent in the United States for goods and services that mean jobs and income for Americans.

Take Missouri for example. The U.S. foreign aid program bought almost $50 million in goods, services and agricultural products in Missouri during 1980 for use in the less developed countries. Of the total, $41.6 million went to Missouri farmers and food processors for grain and other agricultural commodities under the Food for Peace program. The balance, $8 million, went to Missouri manufacturers and other firms for supplies used in overseas economic development programs administered by the Agency for International Development. The foreign aid program buys more from other states than it does from Missouri: $96 million from California, $173 million from New York, $145 million from Kansas, $114 million from Texas—to name a few.

"I just don't understand why we have a foreign aid program. We have a lot of poor people in the United States, too. America can take care of itself; let developing countries take care of themselves."

Progress in the Third World serves the U.S. national interest. Apart from our traditional humanitarian concerns, as these nations develop they become bigger customers for our farms and industries; they become bigger markets for American investments and more accessible sources of raw materials essential to our economy and our national defense.

For example: U.S. exports to developing countries have tripled in the past five years. These countries now buy 38% of U.S. manufactured exports.

U.S. exports to developing countries exceed our exports to all of industrialized Europe and are four times greater than our

exports to Japan. Some 2 million Americn jobs now depend on exports to the Third World. One out of every 10 acres of American farmland produces for export to those countries. In 1979, the upward trend of U.S. private direct investment in developing countries continued with an increase of 19 percent, compared with a rise of 17 percent the year before. At the end of 1979, a cumulative $47.9 billion was invested by U.S. companies in the Third World.

The U.S. depends on Third World countries for 100 percent of our natural rubber; 96 percent of our tin, essential to the electronics industry; 88 percent of our bauxite, vital to our aircraft industry; 75 percent of our cobalt, needed by the steel and nuclear industries.

By the year 2000, about 6 billion people—1.5 billion more than now—will crowd this planet. More than 80 percent of them will be living in the less developed countries. There—despite the progress that has been made—extreme poverty, overpopulation, environment degradation, disease and periodic famine are still the lot of most. These conditions breed increasing violence, riots, terrorism, urban guerrilla warfare and border strife. In our own backyard we have already felt the impact of Third World overpopulation and poverty in the massive immigration of Latin Americans into the United States.

"Our social security program is in trouble (no money) yet we spend $77 billion for foreign aid. (That is sick.)"

We can't speak for the social security program. But last year the total for all U.S. foreign economic assistance programs added up to $7.6 billion. That is 1.33 percent of the federal budget and .20 percent of our Gross National Product. To give some perspective, in 1980 alone Americans spent $50.8 billion on alcoholic beverages and $20.8 billion on tobacco products.

"Why does our country lend millions of dollars to foreign countries at 2.5 percent to 3 percent interest, yet we Americans must pay 15 percent to 16 percent?"

We do extend loans to some Third World countries (not all foreign countries, of course) on easy terms—2 percent to 3 percent for up to 40 years—because it is one of the best ways to expedite their economic and social development and to benefit U.S. interests.

The sale of American grain at low interest is a case in point. Already one of every 10 U.S. acres of farmland produces for food exports to the Third World. The Third World share of our overseas market is increasing. From 1979 to 1980 the U.S. agricultural exports to the Third World increased 35 percent—from $10.8 billion to $14.6 billion.

In addition, farm sales abroad created hundreds of thousands of jobs in related industries. Workers in grain elevators, truckers, shippers, those on assembly lines who make tractors, the mechanics who maintain farm equipment may not know it, but their jobs depend in part on grain sales to the Third World.

These sales at favorable interest rates are also hastening the development of poor countries that may some day be our best customers. Twenty or 30 years ago, for example, South Korea, Taiwan and Singapore, among others, were struggling to feed their people, In 1950 Taiwan's per capita income was less than $100 a year. In 1980, it was $2,200—and the country is a major purchaser of U.S. Grain and other products.

"Why does the United States have to carry the foreign aid loan alone?"

It doesn't. Although the United States contributes the largest dollar amount, most other developed countries devote a greater percentage of their wealth to economic assistance to developing countries than does the U.S. The United States is 15th down the list of 17 "donor" countries of the free world. Only Italy and Austria earmark a smaller percentage of their Gross National Product for foreign aid than we do.

"If I don't pay my debts the stores cut off my credit. But with developing countries, we just keep shoveling the money down the drain. Why?

Developing countries do pay their debts. For 1946 to 1980, U.S. economic aid loans and credits totaled over $47.3 billion. Principal and interest payments to the U.S. amounted to over $23.6 billion by the end of 1980. Virtually all loans and credits disbursed early in this period have been repaid in full—with interest and on time, sometimes in advance of maturity. With rare exceptions, the balances remaining reflect loans that have not yet reached maturity, payments that are not yet due. In short, the repayment record has been excellent.

And it's not money down the drain: development is occurring. Many of the countries of Southeast Asia have achieved a level of development few would have predicted a decade ago. India has survived a drought on the strength of its own home-grown food. Population growth rates have dropped dramatically in Thailand, Indonesia, Colombia, the Dominican Republic, South Korea, the Philippines and Panama, among others. More than 30 countries are establishing health care systems that were virtually nonexistent in the past. Third World nations are increasingly able to borrow in private capital markets for development projects.

"How come we are sending millions of tons of grain to developing countries for free, yet farmers in this country are paying such high prices for grain for cattle that meat is being priced out of sight?"

The bulk of the grain exported under our Food for Peace program is sold—not given—to Third World governments at roughly the same price that American farmers pay. What free grain we do send abroad helps people devastated by disaster or provides food for nursing mothers, school children and food-for-work programs.

Much of our economic assistance is designed to help developing countries increase their own farm output—thereby reducing global demands on U.S. food supplies that tend to bid up grain prices.

"Why are we sending so many of our dollars overseas when there are so many things that need to be done at home?"

By and large we are not sending dollars. Most foreign economic assistance over the years has consisted of food, equipment, training, expert services, heavy machinery and technology. Most of these have come from American farms, factories, universities and research institutions in all 50 states and the District of Columbia. More than a third of all U.S. economic aid has been extended on a loan or credit basis and is being repaid with interest. This means that a large percentage of money spent has gone to U.S. business and Americans for goods or services they render Third World countries. Thus, though the benefits are reaped by developing nations, the money ends up in U.S. pockets.

"I see red when I read that we are sending foreign aid to OPEC countries."

The United States extends aid to only three of the 13 OPEC countries. They are Indonesia, Nigeria, and Ecuador, which together provide the U.S. with about 18 percent of its oil and are considered stabilizing elements in their regions.

The fact that a country has oil doesn't necessarily mean it's rich. Indonesians earn an average of $385 a year, Nigerians $670 and Ecuadoreans $880. Nigeria is a large market for U.S. goods and training services; our exports there reached $1 billion in 1978, and a vocational skills training program financed exclusively by the Nigerian government brings the U.S. an average of $12 million a year. Ecuador is one of the smallest oil producers in OPEC with limited reserves. Unless new oil is discovered it may have to import petroleum by 1985.

"How come we are pouring millions of dollars into China, which they have no way of paying back?"

We're not.●

ELMER W. HENDERSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. BROOKS) is recognized for 5 minutes.

● Mr. BROOKS. Mr. Speaker, as we bring this 1st session of the 97th Congress to a close, we also bring down the curtain on the distinguished career of one of the most capable and respected staff members on Capitol Hill. After 27 years with the Government Operations Committee, Elmer W. Henderson is retiring.

Elmer joined the committee staff in 1955 when his good friend, and mine, Bill Dawson, was chairman. He stayed on through the chairmanship of Chet Holifield, and since 1975, when I had the good fortune to become chairman, he has continued to provide valuable guidance and assistance to the committee. During those years he has served as staff director of two subcommittees, general counsel of the full committee, and in his present capacity as senior committee counsel.

With his professional competence—Elmer has a master's degree in sociology from the University of Chicago and a law degree from Georgetown University—his wide experience and his strong sense of duty and responsibility, he has contributed immeasurably to the work of the Government Operations Committee, especially in the areas of Government reorganization, consumer protection, and Government procurement. And with his ready spirit of cooperation, his warm and friendly manner, and his unfailing sense of humor, he has won the respect and personal regard of all who have been associated with him.

As outstanding as Elmer's achievements on Capitol Hill have been, he had already made a notable contribution to the history of this country before he arrived on Capitol Hill. Back in 1942, while working for the Fair Employment Practices Commission, he was denied dining car service while traveling by train in the South. Elmer filed a complaint with the Interstate Commerce Commission that resulted,

in 1950, in one of the Supreme Court's landmark civil rights decisions.

In the case of Henderson against the United States, which attracted the attention and support of civil rights lawyers and organizations from around the country, the Supreme Court outlawed the practice of providing separate dining car tables for black and white passengers—a long step forward in the battle for equality that has also been one of Elmer's lasting endeavors.

We wish him more victories—if fewer battles—in the years ahead.●

● Mr. ROSENTHAL. Mr. Speaker, I want to join with the distinguished chairman of the Government Operations Committee, Mr. BROOKS, in paying tribute to the committee's senior counsel, Elmer Henderson, who is retiring at the end of this month after a long and distinguished career.

I have known and worked with Elmer Henderson since I came to Congress in 1962 and joined the Government Operations Committee. During my service on the committee, Elmer and I have worked closely together, particularly on legislation which would have created a consumer protection agency in the Federal Government.

A great deal has been written by students of Congress about the importance of staff in the functioning of the legislative process. Elmer Henderson's service on the Government Operations Committee is a classic illustration of the indispensable and creative role of staff in advising and counseling Members of Congress. Unlike machine parts, it is not always easy and sometimes not even possible to replace someone of Elmer's talents, integrity, and concern for the public interest. He will be missed. I will miss his advice and amiable friendship; and the institution of the Congress will miss his steady guidance.●

● Mr. FASCELL. Mr. Speaker, I would like to join the distinguished chairman of the Government Operations Committee (Mr. BROOKS) in paying tribute to Mr. Elmer W. Henderson, who is retiring from the committee staff after 27 years of service.

Elmer and I came to the Congress together and it has been a great pleasure for me to have had the opportunity to work with him over the years. The professionalism and dedication to his job which he brought to the committee and the subcommittees for which he worked have made our jobs much easier. But far more important, they have resulted in positive contributions to the functioning of the U.S. Government which have had major impact on our laws and the ways in which they are administered.

The committee, the Congress, and the Nation should be proud of public servants like Elmer Henderson. We will miss his ready smile and his wise advice but I know our colleagues all wish him the very best as he enters into a new phase of his already productive life.●

● Mrs. COLLINS of Illinois. Mr. Speaker, I join with my distinguished colleague and full committee chairman, the gentleman from Texas, in commemorating Elmer Henderson's 27 years of service to the Committee on Government Operations. His career exemplifies the professionalism all of us rely upon from the staffs that assist us, and his long service helped insure continuity in the committee's discharge of its responsibilities.

I am personally in Elmer Henderson's debt, for I arrived in Washington to fill the unexpired term of my husband, George Collins, after his tragic death in a plane crash. As a new Member of the Congress and the Committee on Government Operations, I found Elmer's assistance invaluable. Both he and my late husband were good friends of former Chairman Bill Dawson, and I benefited from his advice and his help. I believe all of us appreciate the counsel we received from those who know the intricacies of congressional procedures. As a new Member, I was especially grateful for the aid provided by my fellow Chicagoan.

Beyond the contribution he has made to the Congress, Elmer Henderson has the rare distinction of being the plaintiff in a crucial civil rights case decided by the U.S. Supreme Court. A man with the tenacity to fight for a civil rights issue through several layers of the judiciary in the 1940's has to be recognized as a strong man. Elmer Henderson is that. However, he is not a contentious man. His striking characteristics are cooperativeness, helpfulness, and a warm sense of humor. Elmer could work hard for a cause and yet be an easy man to work with.

In an era when it is all to easy too castigate the Congress as an institution, Elmer Henderson provides an example of the dedication and competence we find far more often than the critics recognize. It is fitting that we acknowledge his valuable contribution to the Congress and the country, and I am pleased to add my voice to those who wish him well in his well-earned retirement.●

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

EXPLANATION AS TO VOTE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 5 minutes.

● Mr. DANIELSON. Mr. Speaker, I was unable to be present on the floor of the House of Representatives on Thursday, December 10, 1981, when the House voted on rollcall No. 346, and approved the Journal of Wednesday, December 9, 1981. The vote was 230 yeas to 188 nays. Had I been present, I would have voted "yea."

Nor was I present for rollcall No. 348 when the House agreed to a motion to recommit House Joint Resolution 370, making further continuing appropriations for the fiscal year 1982, to the Committee on Appropriations with instructions to report it back forthwith containing an amendment in the nature of a substitute that provides an additional $1.7 billion reduction in budget authority. The vote was 222 ayes to 194 noes. Had I been present, I would have voted "no."

OUR NATION'S WATER NEEDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, I am today introducing along with my colleague, DOUG BEREUTER, a bill which I hope will serve to generate an intelligent discussion of our Nation's water needs and the authority of each State to utilize the water resources within its boundaries. Although I think it is generally accepted that each State has the authority to determine water use within its borders, I believe that recent developments have given rise to the need for the Federal Government to clarify the limit of each State's power to divert water resources for use outside of the State.

I have been a long-time advocate of efforts to halt excessive and wasteful spending on pork-barrel water projects as well as efforts to promote the conservation of water. In this regard, I am delighted to see that a great deal of attention has been focused lately on what some have termed our "next resource crisis." In fact, many experts claim that the oil crisis will pale in comparison to what we might expect with water shortages in the not-so-distant future.

We should be grateful for this attention. We need to determine our national water priorities and answer the difficult water questions we will encounter. I am hopeful the bill we are introducing today will stimulate this dialog.

The language of our bill is straightforward. The bill merely prohibits any State from selling interstate water flowing through its boundaries for use outside the State unless there is in

place a compact between the drainage basin States, and the sale is approved by all of the compact States.

We have introduced this bill because we are extremely concerned that such a sale, approved without the consent of the adjoining basin States, will set a dangerous precedent for future situations—in effect, putting a large, perhaps irreparable crack in our reservoir of water problem solutions. I fear these sales, approved without the aforementioned consent, will serve short-term, parochial interests at the expense other States and our national welfare. States would be pitted against each other in competition for this precious commodity.

Mr. Speaker, condoning such sales would, I am afraid, open a Pandora's box of troubles, evolving into a situation where States would be acting purely for short-term economic reasons over prudent, wide-ranging actions serving the general good of our Nation. A precedent would be set which could escalate into full-scale bidding wars between differing interests for available water. Eventually, the water would be allocated to the user with the greater financial resources, rather than reserved for practices which may be more responsible. In this instance, allocation by the market place may not be sound, and would pervert what would otherwise be the reasonable distribution of our water resources.

However, by enacting the proposal that my colleague and I are introducing today, we might avoid the intolerable situation where one or two interests dictate the distribution of this essential, inalienable, and rather finite resource. At the same time, we would be pursuing a cautious and more responsible course in shaping our country's future water policies, taking into consideration our needs and sources of supply. Many unanswered questions exist with regard to our water policies, such as ownership or claims and rights of competing interests, and these matters should be resolved before we allow States to sell water outside their borders in an unrestricted fashion.

One fact remains clear, Mr. Speaker. In finding the answers to these difficult public policy questions, we must maintain a spirit of cooperation and openmindedness and work together to solve our problems, rather than struggle at odds with each other.

Mr. Speaker, I ask that the legislation be entered in the RECORD at the close of these remarks. Thank you.

H.R. 5278

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That no State shall sell or otherwise transfer, for use outside of such State, water which is taken from any river or other body of surface water which is located in or which passes through more than one State or any aquifer or other body of groundwater which underlies more than one State unless—

(1) there is in effect an interstate compact (A) between the States in the drainage basin of such river or other body of surface water, or (B) between the affected States, in the case of such an aquifer or other body of groundwater, which governs such sale or transfer, and

(2) all the States which are parties to such compact consent to such sale or transfer.●

NATIONAL ENGINEERING AND SCIENCE MANPOWER ACT OF 1982

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FUQUA) is recognized for 10 minutes.

● Mr. FUQUA. Mr. Speaker, I rise to introduce, with my colleague and subcommittee chairman, DOUG WALGREN, a new bill, the National Engineering and Science Manpower Act of 1982. The intent of this legislation is to provide for a comprehensive national policy for engineering, technical, and scientific manpower, and to create a Coordinating Council on Engineering and Scientific Manpower with a mission of providing a supportive environment for industry, State and local government, and private sector initiatives to enhance our national technical manpower capabilities.

Mr. Speaker, the Committee on Science and Technology has been viewing with increasing alarm the problem of engineering and scientific manpower as we have focused on the issues of economic recovery and the strengthening of our national defense. It is obvious, I believe, that without the necessary technical, engineering and scientific manpower, we cannot hope to proceed with implementing these vital programs. All the advances in science and technology potentially available to us will be unattainable if we lack the human resources to develop and apply them.

Our committee has recently held a number of hearings on engineering and scientific manpower concerns. Among the facts we heard presented were:

That we currently lack a clear and comprehensive national policy regarding technical, engineering, and scientific manpower.

That enrollment in engineering has increased by over 50 percent in the past decade, while the number of engineering faculty have declined by better than 10 percent.

That instructional and research instrumentation have become increasingly inadequate and obsolete—students are no longer acquiring even near "state-of-the-art" training.

That high industrial salaries are attracting graduate students and faculty out of the universities, thus worsening an already severe shortage of trained educators.

That, whereas our scientific and engineering resources are declining both in quality and quanity, Japan, Russia, and other international competitors are increasing theirs.

Perhaps, the most troubling comments at our hearings came from Dr. Frank Press of the National Academy of Sciences. In summarizing various studies by the National Research Council and the National Science Foundation, the results all pointed to a troubled American school system with declining student performance and teacher effectivenes in pre-college and college levels. There has been a decline in the use of laboratory instruction coupled with a heavy emphasis on multiple-choice testing which reduced the importance attached to learning concepts and relationships. Science, mathematics, and critical thinking skills do not seem to be high priorities among many school administrators.

At the same time that we are finding repeated evidence of these weaknesses, there is a serious national commitment in Japan, Germany, and the Soviet Union to quality science and mathematics instruction at the pre-college level. This not only develops a solid science and math foundation in those going on to college, but also provides a high degree of science and math skills in the work force at all levels. This has been an important factor in the very rapid expansion of technical industries in these countries.

Mr. Speaker, because of this and other evidence, it is my view that Congress must join in an effort to articulate the Federal role and responsibility concerning engineering and scientific manpower. It is for this reason that Mr. WALGREN and I are introducing this legislation which has three major functions:

First, it establishes a clear national policy for technical, engineering, and scientific manpower, including giving specific authority for mission agencies to develop necessary manpower programs. Such policy is particularly important as many useful and critical programs have been eliminated in the Federal budgetary review process for lack of specific support by Congress.

Second, in order to implement this policy, and coordinate related programs, the bill establishes a Coordinating Council on Engineering and Scientific Manpower within the National Science Foundation.

Representatives from industry and academia, as well as the President of the National Academy of Sciences, the National Academy of Engineering, the Director of OSTP, the Chairman of the National Science Board, and the Director of the National Science Foundation will be members. The Chairman of the Science Board will serve as the Council Chairman. A Council of

this nature will have the authority to review and study the spectrum of science and engineering education efforts within the Federal Government. Other than the comprehensive education program based in NSF, there are numerous splintered and narrowly focused efforts in our mission agencies. I believe we could foster a far better and broader utilization of these varied endeavors if there was a specific body charged with the responsiblity of knowing the scope and nature of all the ongoing programs.

Third, the bill establishes a special matching fund for specific programs initiated by industry, and other private sector institutions, or State and municipal governments. The fund could be administered by the Council to provide a strong collaborative and complementary environment for private sector and non-Federal initiatives. The bill authorizes $50 million for the fund and $1 million for operation of the Council.

Our ideas for legislation are still in the formative stage. It is my purpose in introducing this legislation to provide a focus for congressional discussion and exchange of related ideas. I look forward to working with my colleagues on this important and complex issue.●

SOCIAL SECURITY CONFERENCE REPORT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. FORD) is recognized for 5 minutes.

● Mr. FORD of Michigan. Mr. Speaker, as far as I am concerned, the President surprised every working man and woman in America. We were led to believe during the campaign that social security recipients would not have to fear a loss of benefits. At that time, condidate Reagan said that reports of reductions in social security were "exaggerated and inaccurate stories * * *."

Then it all changed. President Reagan proposed the elimination of the minimum benefit and it was rammed through Congress as part of the Omnibus Reconciliation Act. The President needed this minimum benefit elimination for purely budgetary reasons—to allow his administration to pay the tremendous costs of its tax cut and increase in military spending. Frightened by the political spectre of a huge budget deficit caused by the failure of trickle down tax policies and continued high interest rates, the Reagan White House had to cut social security. The White House strategy was clear: Cry loud and long about the eminent bankruptcy of the social security trust funds; steamroll the Congress by panicking earnest and well-meaning citizens; then mug another social program to balance the budget.

The opportunity to reverse the terrible decision to eliminate the minimum benefit came when the House passed a separate Democratic bill, H.R. 4331, which called for total restoration of the minimum benefit for both current and future retirees. Regretfully, the Senate version of H.R. 4331 only restored the benefit for certain current recipients rather than for all current and future retirees.

The conference report we are voting on today contains very little of the House language, and does not take into consideration what the people in this country want and deserve. I am supporting this measure, but very frankly, the only positive provision in this agreement will allow the old age and survivors' insurance fund to borrow from the medicare and disability insurance trust funds. The old age and survivor's insurance trust fund is the only part of the social security system facing any difficulties at all. Now, with interfund borrowing, this problem can be solved.

What this conference report fails to do is restore the minimum benefit to any future retirees. These are people who for years have counted on receiving the minimum benefit when they retired. And, they have had this taken away from them with very little warning. In 1982 alone, nearly 100,000 elderly persons who would have received the benefit prior to enactment of the reconciliation act will now not receive it. These are, more often than not, retirees with little other income.

Mr. Speaker, the minimum benefit was frozen at $122 for new beneficiaries as part of the Social Security Amendments of 1977. There is no adequate explanation for the change to a precipitious elimination which unfairly penalizes those who have counted on the minimum amount in the near future.

The action we have taken here today tells the American people that the Congress cannot be counted upon to make good on its promises; it tells the American people that the rules of the game may be changed at any time without forewarning. In addition, if Congress were asked directly if it would vote to sacrifice the aged women of this country in order to reduce the deficit, I would like to think that the answer would be a resounding "no." Yet, eliminating the minimum benefit after December 31, 1981 amounts to roughly the same result. Over 70 percent of the beneficiaries are aged women, some of them very old indeed.

The Reagan administration has trained its sights on social security in what appears to be an effort to mutilate one of the Nation's best programs of social insurance. I will continue to fight against these negative changes so that those who have worked hard all their lives to make this Nation rich and strong can enjoy their retirement with dignity and a sense of economic security.●

NATIONAL PRISON GUARD TRAINING ACADEMY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. SHAMANSKY) is recognized for 5 minutes.

● Mr. SHAMANSKY. Mr. Speaker, today I am introducing a bill to create a National Prison Guard Training Academy.

I was impressed with a speech given last May by the Chief Justice of the Supreme Court, Warren Burger, which addressed the fact that guards in our Nation's prisons are not well-trained for the sensitive role they must play in our criminal justice system. I agree with the Chief Justice that without special training in dealing with antisocial people in the demanding circumstances of confinement, prison guards sometimes can become part of the problem which leads to sending exconvicts back into society as harden criminals, as Chief Justice Burger said:

> The operations of a correctional or penal institution is no place for amateurs. It calls for substantial professional training and the highest order of sensitivity, beginning at the guard level.

This need for training is becoming particularly acute. Our Nation is in the process of beginning an expensive, large-scale prison construction program. We require new prisons to deal, belatedly, with the explosion in the number of criminals we now incarcerate. Last June 30 State and Federal prisons held 350,000 men and women, an increase of 20,000 prisoners in just 6 months. The task of guarding these growing numbers of convicts increases in difficulty with each incarceration.

The Attorney General of the United States, William French Smith, announced earlier this year the creation and opening of the National Corrections Academy in Boulder, Colo. The academy is the culmination of several years of effort by the Congress, the Chief Justice, the Attorney General, the Director of the National Institute of Corrections, and the Director of the Federal Bureau of Prisons.

The bill which I am introducing would require the expansion of the program at the new academy to provide the much needed special training for the guards of our Federal, State, and local penal institutions. Improving the training of our prison guards obviously will not cure what the Chief Justice called the epidemic of crime in America, but it is one of many necessary steps to begin controlling, then reducing, that epidemic. Thank you.

The text of bill follows:

H.R. —

A bill to amend title 18, United States Code, to require the National Institute of Corrections to establish and administer training programs for guards employed at State correctional, juvenile, and detention facilities

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Congress hereby finds that—

(1) rapidly increasing prison populations are placing greater strains upon State correctional systems;

(2) as correctional facilities become more crowded, there has been a dramatic increase in prisoner disturbances;

(3) guards employed at correctional facilities often are underpaid and lacking in formal training; and

(4) well-trained guards are better able to manage and respond to problems which frequently arise at correctional facilities, and they are more likely to contribute to the achievement of rehabilitative goals.

(b) It is the purpose of this act to amend title 18, United States Code, to require the National Institute of Corrections to establish training programs for guards employed at State and local correctional, juvenile, and detention facilities.

SEC. 2. (a) Section 4352 of title 18, United States Code, is amended by redesignating subsection (b) through subsection (e) as subsection (c) through subsection (f), respectively, and by inserting after subsection (a) the following new subsection:

"(b)(1) The Institute, in addition to the functions which it may carry out under subsection (a), shall establish and administer a training program for individuals who are employed, or who seek to be employed, as guards at State correctional, juvenile, and detention facilities. The training program shall—

"(A) be established after consultation with State correctional officers; and

"(B) train such individuals with respect to effective methods and techniques for the administration of such facilities and for the treatment and rehabilitation of criminal and juvenile offenders.

"(2) The Institute shall perform the functions established in paragraph (1) directly, and not through contracts or other arrangements with public or private agencies, organizations, or individuals.".

(b) Section 4352(a)(13) of title 18, United States Code, is amended by inserting after "(13)" the following: "except as provided in subsection (b)(2),".●

SAKHAROV STATEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

● Mr. WIRTH. Mr. Speaker, I have today introduced House Concurrent Resolution 241, which expresses the sense of the Congress protesting the continued internal exile of Andrei Sakharov and his wife, Yelena Bonner, and their treatment by the Government of the Soviet Union.

As you all know, Liza Alekseyeva, the young woman in whose behalf Sakharov and his wife undertook their recent hunger strike, has been granted permission to leave the Soviet Union. This is a happy event—Alekseyeva will be reunited in the United States with her husband Aleksei Semyonov, and the hunger strike, which cost Dr. Sakharov and his wife so dearly in health and determination, is over.

This is also an historical event—the first time the Soviet Union has capitulated to the human rights demands of an individual. The emigration of Liza Alekseyeva is thus fundamentally important.

In the House, we made our voices heard by unanimously approving House Resolution 286, a resolution I introduced last week associating the Congress with the Sakharovs' hunger strike protest.

Mr. Speaker, our voices must rise again. The good news of Liza Alekseyeva's emigration takes place against a background of uncertainty, for there is grave concern in the international human rights community that Andrei Sakharov will be returned to his status of internal exile within the Soviet Union, to languish alone as a victim of state prosecution.

Now is the time to make it known that the United States cannot mutely tolerate such treatment of the Soviet Union's leading human rights activist, Nobel Peace Prize winner and great physicist. Continued internal banishment for Andrei Sakharov is inconsistent with the positive steps the Soviet Union has taken in allowing the emigration of Liza Alekseyeva, and runs counter to the expectations of the freedom-loving people of the world.

I urge my colleagues support of House Concurrent Resolution 241.●

FEDERAL SUPPORT FOR THE ARTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, we all know that threats to Federal funding for the arts continue as the President seeks additional budget reductions. Relatively small programs such as Federal support for the arts cannot survive further cutbacks.

Fortunately, funding for the arts boasts a committed core of supporters across the Nation who have been instrumental in preserving a modicum of Federal support to date. I know they will continue to be heard.

It has been 16 years since the Federal Government committed itself to supporting the arts. Congressional passage of the National Foundation on the Arts and Humanities Act in 1965 established a National Foundation on the Arts and Humanities to consist of a National Endowment of the Arts, a National Endowment for the Humanities, and a Federal Council on the Arts and Humanities which was to coordinate the activities of the two endowments.

Today, a vigorous tradition of private support for the arts is forming, thanks to this landmark legislation. In testimony given at hearings held in 1965, the financial plight of the arts at that time was described in detail and ascribed to inadequate private support for artistic excellence. Today, the situation has much improve, although there are still those who oppose full funding of the endowments because, they contend, Federal support for the arts discourages private contributions. This simply is not so. In fact, the Business Committee for the Arts, which issues a triennial report on business participation in support of the arts, reports a steady increase in financial support from only $21 million in 1966 when the endowments were established, to over $436 million in fiscal year 1979.

The phenomenal growth in the arts that has occurred since the establishment of the National Endowment for the Arts has had far-reaching economic benefits. According to a report issued by the Cultural Assistance Center entitled, "Public and Private Support for the Arts in New York City," New York City's cultural institutions generated $3 billion in expenditures and receipts in 1974. Although current figures are not yet available, they are projected to be around $4.5 billion.

National Endowment for the Arts grants, which require a matching ratio of approximately 3 to 1, have stimulated private contributions. NEA's Office of Public Affairs reports that it made 364 grants in 1981 totaling $98,064,500. The required 3-to-1 match ought to have generated about $310 million. Instead, the $98 million granted by NEA has so far generated over $628 million of private support, a ratio in excess of 6 to 1. There can be no doubt—Federal support for the arts, far from discouraging private support, has stimulated it in a very substantial way.

Yet, even with the additional support for the arts that has been forthcoming since the establishment of the endowment, the United States lags far behind in its per capita expenditures for the arts. The Council for International Urban Liaison recently reported levels of government expenditures for the arts in several different countries. They note that Great Britain spends $8.60 per capita for the arts; the Netherlands $24 per person; Canada $29.18; Australia $31.00; Belgium $41.10; Finland $45; Sweden $70; and Switzerland $270! Yet we, the world's wealthiest nation, spend a grand total of only $1.45 per person in support of the arts.

The situation could be worse, however. The administration's budget proposal for the endowments would have cut our miniscule per capita expenditure on the arts in half. Because of strong support from committed people

around the country, we have been able to successfully defend the endowments against repeated attempts to slash their budgets during the appropriation and budget reconciliation processes.

But lest we forget people in our mad rush to justify arts programs in budgetary terms, we must remember that the arts industry, if I may use that term, employs over 1 million people across the country. Proposed administration cutbacks will not only reduce financial support for arts project, but will cause social dislocations as well.

The war has not yet been won despite our limited successes to date. Although we know that support for the arts can be justified on moral and esthetic grounds, it is also true that support for the arts is good business. Because the "bottom line" is what this administration cares about most, we must engage in debate on their terms, never forgetting, however, that the concentration on dollars represents only one facet.

THE PRESIDENTIAL TASK FORCE

Apparently disturbed by even the paltry sum spent by our Government on the arts, President Reagan appointed a 36-member task force to study the relationship of the Federal Government to the arts and humanities. He charged it with the task of suggesting ways to increase private support and of recommending improvements in the operation of Federal arts and humanities programs. The task force, which included nationally prominent artists and scholars, and foundation and corporation executives, was cochaired by the distinguished actor Charlton Heston, University of Chicago President Hanna Gray, and State Department Ambassador for Cultural Affairs Daniel Terra. The task force reported that the structure of the endowments is sound, and that professional peer panel review is effective and fair. It proposed, however, that the Federal Council be revitalized by adding to its membership representatives from the private sector. Furthermore, the task force recommended that the Council's Chairman be selected from among its private sector members so that a national network of leaders could be formed that would further stimulate private giving.

Other recommendations included maintaining the endowments' panel review system, establishing a program of Presidential Fellows in the Arts and Humanities, and changing tax laws to encourage private giving.

PRESIDENTIAL FELLOWSHIPS

Although, in general, the recommendation to establish special Presidential fellowships in the arts seems a good one, the task force's suggestion that they be administered by the Federal Council is puzzling. Early discussion of the Presidential fellowships specified that the fellowships would be privately funded so that the role of the Council would be purely administrative. Because the final report of the task force includes no mention of private financial support, I question the wisdom of making the Council a grantmaking body and am concerned lest this program duplicate or conflict with the endowments' fellowships. Hearings on the task force recommendations that will soon be held by the Postsecondary Education Subcommittee should clarify this issue, however.

RECOMMENDED TAX CHANGES

The task force report notes that the Economic Recovery Act of 1981 will probably result in reduced private support for cultural activities. Prior to passage of the new tax laws, corporations could give up to 5 percent of their taxable income to charitable groups. Although it is true that the new law raises that limit to 10 percent, other tax benefits provided to corporations by the same law reduce their taxable incomes to such an extent that the corporation income tax has virtually been eliminated. Consequently, 10 percent of a substantially reduced taxable income could place the deductibility limit of some corporations at levels that are lower than they were when the 5-percent limit was in effect.

As far as individual taxpayers are concerned, the across-the-board reduction in income tax rates will likely decrease incentives for individuals to contribute to the arts. For example, a contribution of $1,000 to the arts by a person formerly in the 70-percent bracket cost that person only $300. Today, that same $1,000 contribution in the new 50-percent bracket costs $500.

The sweeping and ill-considered provisions of the tax bill will probably cancel out a well-intentioned provision of the new law that allows persons who file nonitemized tax returns to deduct 25 percent of their charitable contributions up to a ceiling of $100 in 1982, and to deduct 100 percent of their charitable contributions by 1986. Unfortunately, the magnitude of contributions by this group of people pales in comparison to that of potential corporate contributions to the arts.

Another recommendation made by the task force would allow artists to deduct the fair market value of works of art they donate to museums or libraries, and not just the cost of their materials, which is the case now. It is ironic that under present law collectors can deduct the fair market value of works of art they donate, but the pieces' creators cannot.

The task force also recommended other changes in the tax laws, including the establishment of tax credits for charitable giving by individuals and corporations and the elimination of restrictions on the percentage of income that may be given to charity. Unfortunately, estimates made by the Subcommittee on Postsecondary Education indicate that it would cost the Government between $3 and $5 billion and, as such, would be unacceptable to the administration and unlikely to pass in Congress at this time.

The task force report concludes that, "America's arts and humanities are vigorous in spirit, although frail in financial health."

CURRENT BUDGET SITUATION

President Carter, before he left office, proposed that funding for the NEA be $175 million for fiscal year 1982, about $16 million more than the 1981 appropriation. The present administration's proposed budget, which it presented to the Congress in March, proposed that the NEA be funded at only $88 million and that the Institute for Museum Services be given only enough money to close down their operations. This recommendation represented a halving of funds for the NEA. On top of the initially proposed slash in funds, the administration requested an additional 12-percent reduction in September, which would have left the NEA with a budget of only $77.4 million.

When October 1 arrived—the beginning of the Federal fiscal year 1982—the House approved funding for the NEA of $157.5 million, but the Senate had not yet acted on its appropriation bill. To allow the Government to continue functioning, because most funding bills had not yet been acted upon by both Houses, several continuing resolutions had to be passed. The first, which expired on November 15, funded the NEA for the first few weeks of this fiscal year at a level corresponding to $157.5 million annually. Unhappy that the first continuing resolution would have permitted spending at levels far higher than those proposed by the President in September, the administration attempted to reduce spending levels by issuing what are known as deferrals. Although the initial deferral for NEA attempted to set spending at $77.4 million annually, to conform to the 12-percent reduction in spending requested by the White House in September, the Office of Management and Budget was prevailed upon to revise their figures back up to the $88 million figure initially proposed by the administration. The second continuing resolution which expired on December 15 provided $149 million for the NEA, an amount that corresponds to that provided in the regular appropriations bill.

On December 10, the Congress gave final approval to an appropriations bill that would fund the NEA at $143.04 million which awaits the President's signature at this writing.

This administration's perverse priorities are well illustrated by one item from the Defense Department's budget. There, an item can be found

that would provide $89.7 million for military bands. The administration's proposed budget for all of the NEA was $88 million. On the basis of the administration's revised budget, the NEA's music program, which supports orchestras, chamber music groups, composers, and more, would be allotted a grand total of less than $10 million.

We are living in stressful times—times that call for tender ministrations to our country's battered spirit. That spirit is most deftly expressed through the arts. Yet Federal support for the arts represents only two one-hundredths of 1 percent of the national budget. Military strength alone cannot sustain us or substitute for spiritual well-being. The National Endowment for the Arts must not be asked to endure further cuts in its budget and programs.●

AT THE RISK OF BEATING A DEAD TROJAN HORSE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

● Mr. RODINO. Mr. Speaker, I know that to speak of the dismal David Stockman affair today is to risk beating a dead Trojan horse, but, in the aftermath of the recent bizarre revelations, questions continue to nag. His dismissal or resignation will not make them go away. Nor can he be rehabilitated by a simple "woodshedding" by the President.

Our Nation's economy is in severe trouble. The current recession threatens to be long and deep. Nine million workers—white collar and blue collar—cannot find jobs, the greatest number of unemployed since 1939. This is the price, the administration coldly tells us, that we must pay to bring down inflation. Yet, no substantial relief from inflation and high interest rates, the companion ills of the administration's tight-money policy, is clearly on the horizon. The Federal deficit is ballooning almost beyond imagination, the result of excessive tax cuts and bloated defense spending. And the safety net for the truly needy—in vain pursuit of the now-abandoned goal of a balanced budget—is truly shredded.

Still, Mr. Reagan says he is determined to keep us on the risky and costly course he has set.

Until his true thoughts were revealed last month in the Atlantic Monthly, David Stockman was widely conceded to be the administration's most effective economic spokesman. My personal view is that he is one of the brightest individuals in the administration and was second only to the President in his talent as a salesman.

When he marched up to Capitol Hill time after time last spring to tell us that the untested theory he was fervently propounding was the path to Utopia he was, for too many Members of Congress, convincing. They sincerely believed he knew what he was talking about and acted accordingly.

When not on the Hill, he was eloquently arguing his case in the media. Week after week, his face graced the covers of magazines. Week after week, he appeared on the TV news shows, assuring the Nation that, yes, it was possible to cut taxes, increase military spending and balance the budget, bring down inflation and provide full employment, if we would only give supply-side a chance. And the people, many of them, believed him.

All the while, he was privately telling a reporter's tape recorder in colorful language that he had concluded that the very program he was so effectively selling to the public and the Congress would not work, that it all was a Trojan horse built to hide a trickle-down scheme contrived to enhance the revenue of the rich.

To me, that was the cruelest of hoaxes, Mr. Stockman's own Trojan horse.

Whether Mr. Stockman argued his case and expressed his concerns in the White House councils and to the President, I do not know. He did tell the reporter that he fought and lost a battle to cut deep into what he saw as a $30 billion swamp of Pentagon waste.

If one argues for a certain policy position and loses, it seems to me that there are two acceptable avenues available. One can be a good soldier and continue to support the chosen policy publicly, even though one might have private doubts about it. Or, if one feels strongly about the defects of the policy, one can simply quit.

What is not acceptable, in my view, is to carry on business as usual in public, make deals one does not intend to keep, and then say in private that what one is saying in public is hogwash.

The latter is the course Mr. Stockman cynically chose, solely in the interest of political victory.

What would have happended if he had been as candid with the Congress and the publc last spring and summer as he was being with the reporter? Obviously, many Members would not have voted as they did, knowing that a chief architect of the policy had grave doubts that it would work. Certainly, the program would not have been steamrollered through Congress. Instead, the normal and rational processes of government might have been followed. Through traditional committee deliberations, in a spirit of cooperation, we likely would have reached a sensible compromise on economic policy. But it would have been a compromise based on reason, not a compromise based on threats, which, of course, is really no compromise at all.

If we had stood up for the prerogatives of Congress, we would not have been blitzed by the administration juggernaut that was driven by threats of veto and retaliation. We would have taken time for thoughtful consideration of this radical program—time that Mr. Stockman himself regrets not taking, according to the Atlantic article.

David Stockman's credibility is gone. His deficit projections change faster than Washington weather. How can we have faith that the new numbers he has extracted from his computer make any more sense, are any more valid than those he admittedly manipulated earlier this year? Will we accept his startling projections and go along with the further mutilation of those programs that serve our neediest citizens—a mutilation that Mr. Stockman even now reportedly is seeking?

These questions cannot be dismissed by dismissing Mr. Stockman. The magnitude of the damage done again casts doubt on the veracity of Government.

Some 8 years ago, I was being urged by many Members of Congress to move swiftly through the impeachment process. I resisted such urgings, for I was certain that the public's trust in Government would be further eroded if there was even a perception of a thoughtless rush to action and judgment.

Speaking then on the floor of the House in favor of a resolution to empower the Committee on the Judiciary to conduct the Nixon impeachment inquiry, I observed that, "The real security of this Nation lies in the integrity of its institutions and the informed confidence of its people."

I believe this to be no less true today. I do not think it too harsh a judgment to say Mr. Stockman has undermined that integrity and shaken that confidence.

After the black days of Watergate, Presidents Ford and Carter worked to rebuild public faith in Government institutions. This episode is a setback in that rebuilding process.

Mr. Stockman, therefore, besides wrecking his own credibility, has done a great disservice to his successors and to the institution he heads. In short, when will we again be ready to believe the Office of Management and Budget?

One other question troubles me: What if the Washington Post had chosen not to remain silent back in those critical days of spring?

What would have happened if the Post would have followed normal newspaper practice and published immediately on page 1—almost certainly that is where it would have landed—the fact that David Stockman had said that Kemp-Roth had always been a Trojan horse to bring down the tax rate for the rich and that supply-side

economics was trickle-down in masquerade? If the Post had told us then that we were being deceived?

Timely publication in the Post—rather than months later in the Atlantic—might have prevented us from falling into the economic fix we are now in.

Without knowing the details of the agreement struck by Mr. Stockman and the reporter, William Greider, one perhaps should hesitate to comment on this apparent exercise in self-censorship by the Post.

Nevertheless, the recent characterization of the Reagan program as an economic Bay of Pigs by Richard Snelling, the Republican Governor of Vermont, calls to mind a case of newspaper self-censorship exercised during preparations for the Cuban invasion more than two decades ago.

Writing of the doomed adventure in "A Thousand Days," Arthur M. Schlesinger, Jr., tells of the New York Times, at the Government's behest, suppressing an article reporting that an attack on Cuba was imminent. Mr. Schlesinger goes on to wonder whether, if the article had been published, the country might have been spared a disaster.

In this case, I wonder the same thing.●

LEGISLATION ESTABLISHING MOUNT ST. HELENS NATIONAL VOLCANIC AREA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. BONKER) is recognized for 5 minutes.

● Mr. BONKER. Mr. Speaker, I am introducing today a bill that would establish a Mount St. Helens National Volcanic Area in Washington State.

The new volcanic area would encompass about 110,000 acres within a boundary that is identical to the volcanic area proposed by Washington Gov. John Spellman. It would be administered by the Forest Service.

While I believe that this plan goes a long way toward resolving controversies over the size and shape of the protective zone around the mountain, I want to stress my view that the bill should also serve as a starting point for discussions and, eventually, hearings on how the legislation can be improved. I welcome all such suggestions.

The devastating eruptions of Mount St. Helens have both created a unique assembly of natural features and destroyed a major part of the timber base that supports much of the local economy of southwest Washington.

Designation of a national volcanic area will give the mountain and portions of the land around it prominence that certainly is deserved and will promote tourism that could be the key to the economic recovery of the area.●

A TRIBUTE TO TOM CORCORAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, a great and beautiful light went out of the lives of countless numbers of people when, on December 6, we received the shocking news that Tom Corcoran has passed away. He was so energetic, so dynamic, so full of life, it seemed that he was indestructible. Yet, complications following an operation thrust him out of our lives. I loved him like a brother and so did my late wife, Mildred. He and I became acquainted when we were both at Harvard Law School. He was one of my earliest contacts when I was sworn in the Senate in January 1937 with the Roosevelt administration. I have observed from my dairy of those days that I saw him often about the many issues which arose in the Senate and in the administration and in the country. Through all the intervening years, I felt I had a mighty force on my side whatever my needs might be because Tom Corcoran was my friend. Mildred and I were often visitors in his home as his children were coming into life. We felt almost like members of the family. Finally, Tom's beautiful wife Peggy went to her reward. Our relationship continued warm and constant with Tom and the children. When my beloved wife Mildred passed away, Tom came to Florida and spent 2 days and 2 nights with us, from Mildred's repose in Miami to her final interment in Tallahassee. When I came back to Washington, Tom called me and said why do you not come now and spend a few days at my home. He was sensitive to my loneliness because he had experienced it, and I spent 2 comforting weeks in the warm hospitality of his gracious home. Tom was one of the greatest men I have ever known. Extraordinary brilliance of mind, enormous capacity for work, immeasurable drive—he was a tremendous human force in the world. He was a mighty warrior in any cause in which he was enlisted, and there were many causes in which he fought heroic battles. He was a brilliant lawyer who found congeniality of mind in the learned Justice Oliver Wendell Holmes whom he served as clerk. He lengthened the reach, he expanded the substance, he enormously enlarged the scope and meaning of the New Deal and the work of President Franklin D. Roosevelt. He could roar like a lion, as it were, and move like a whirlwind, yet he could be as gentle as a lamb, as soothing as a babbling brook. He could strike like a giant and coo like a dove. He reared a noble and able family; he served immeasurably his country in a long and noble life; he touched myriad hearts; he was a massive figure in the world of his time. Fortunate are those of us who knew Tom Corcoran; rich are those of us who had the treasure of his friendship and who, all the days of our lives, will cherish his beautiful memory.

At Tom's funeral, his long-time friend and partner, James H. Rowe, Jr., delivered a beautiful eulogy to Tom. He caught the real spirit of Tom when he said that the hearts of the young men like Tom and those who worked with him in the New Deal days were touched with fire. I would like, Mr. Speaker, to enable Members and those who read this message to brighten their memory of Tom Corcoran with this beautiful eulogy by Mr. Rowe and to include the following remarks in the body of the RECORD as it appeared in the Washington Post of December 16. I am joined in this request by a long time and devoted friend of Mr. Corcoran, the able Senator from West Virginia, Hon. JENNINGS RANDOLPH:

"OUR HEARTS WERE TOUCHED WITH FIRE"

(By James H. Rowe, Jr.)

I thought he would live forever.

The son of a Yankee Puritan mother and an Irish father, Thomas Gardiner Corcoran inherited from one the persistent, driving diligence and from the other the imagination and irresistible ebullience and gaiety that carried him throughout his life. His incredible energy was fearful to behold. A few weeks ago he said to his doctor that recently he had often found himself tired, and he wondered why. His doctor said, "It goes with the territory once you're 80." And the patient was said to have replied, "Not with my territory, it doesn't!"

He was a New Hampshire mountaineer and a football player. It took him some years to become varsity center at Brown because of his size—but he made it. He was a downhill skier, indifferent at best if one looks back on his broken ankles and legs—but he skied. He was a first-rate scholar when he wished to be, valedictorian of his class, Phi Beta Kappa and on the Harvard Law Review. He was secretary to Supreme Court Justice Oliver Wendell Holmes: there was no greater honor for a young lawyer in the nation.

He was a great advocate at the bar, a brief writer of excellence and a superb intellectual persuader of men. He was an unparalleled legislative draftsman.

Except for Franklin Roosevelt himself, he and Ben Cohen—Corcoran and Cohen—were a huge part of the New Deal. They were the generals and captains of their young armies. The New Deal legislation, which has remained on the statute books for almost a half-century, is testament to them both. Together they were much stronger than just adding them one to one. All through the government during those New Deal years, they had scores and scores of youthful juniors awaiting their orders. Ben was the idea man, the visionary, the man of wisdom. Tom was the quarterback, the strategist, the persuader.

In the past few days, my phone has been ringing from all over the country as members of this now thin gray line of the New Deal mourn one of their own.

With the possible exception of the Founding Fathers, there was never before and certainly has not been since, the excitement,

the intellectuality, the excellence or the sense of accomplishment that existed in the New Deal. It is remembered by the hundreds, even thousands, of young men and women who flocked to Washington to serve under such leaders as Franklin Roosevelt and his brain trusters.

Tom loved to quote his old master, Justice Holmes. And Holmes' words, when speaking of his old Civil War comrades in a speech delivered on Memorial Day 1884, also apply to the New Dealers—because of Tom and Ben: "Through our great good fortune, in our youth our hearts were touched with fire."

Tom was, or course, himself a man for heroes. He had great ones like FDR and Justice Holmes. Gen. Claire Chennault, who led the American Flying Tigers in China against the Japanese, was another. Tom supplied the general with men and material and took on the war "over the hump" against the Japanese as his own personal war.

As a private lawyer, he treated his clients the way he would himself. Once he took them on as clients, they were his cause. I remember a conversation years ago with his old close fiend, the late Ben Sonnenberg, the famous New York public relations man. I ran into him somewhere on Cape Cod and he asked: "How's Tommy?"

I said, "About the same."

He said, "You know, Tommy has one great failing. I do a great deal of work these days for the cigarette companies, and they are all dreadfully fearing the cancer attack on cigarettes. I never forget that it is they who have cancer, not me. But Tommy always gets cancer along with his clients."

It was, I feel, a valid point. He was indeed a last-ditch fighting crusader for those clients. Though some of us felt occasionally that some of the clients didn't deserve it, Tom always did.

Essentially, he had the soul of a schoolmaster. When Peggy died, almost a quarter of a century ago, he became mother as well as father to his children. He made sure that they excelled in their studies; they also had to do everything else well. They took all kinds of lessons in golf, tennis, dancing, fencing, riding, whatever. I often thought that if he ordered all of them out into the field, handed each a bow and arrow and directed them to put the arrow through a target at 100 paces, every one of them could have done it with ease. He said at least 1,000 times to them and at least 100 times to me that he could give his children only one thing: the ability to take care of themselves in an unstable, difficult and dangerous world. And proudly he produced three lawyers, two doctors and one landscape architect.

On Sunday, Dec. 6—the day Tom died—at the family's request I called Lady Bird Johnson. She said immediately; "A large part of my life is gone—a sparkling, glittering part."

He was always the most generous man I have ever known.

Once more I remember the words of his hero, Justice Holmes—about what Holmes almost a century ago, had said about an old lawyer friend of his own:

"When a great tree falls, we are surprised to see how meager the landscape seems without it. So when a great man dies."●

NATIONAL TRANSPORTATION SAFETY BOARD MEMBERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. MINETA) is recognized for 5 minutes.

● Mr. MINETA. Mr. Speaker, the existing statute authorizing the National Transportation Safety Board requires that not less than two of the five Board members have background in the field of accident reconstruction, safety engineering, or transportation safety.

I have not been one of those who believe that nominees with technical qualifications invariably make good Board members, and those without such technical qualifications invariably make bad Board members. We have to look no farther than the current outgoing Chairman of the Board, Jim King, to realize that an absence of prior technical expertise does not prevent an individual from serving with distinction on the Board.

Nevertheless, the quality of recent nominees to the Board has clearly raised concern as to whether higher standards are needed to assure that a qualified Board will be available to conduct the vital safety responsibilities of the Board.

It is my belief that the appropriate avenue for insuring the continued competence of the Board is for the Senate to exercise its confirmation responsibilities rigorously and thoroughly and without reluctance to weed out nominees who are in any way less than fully qualified for the extraordinarily diverse demands and responsibilities of this job.

If, however, the Senate cannot bring itself to assure that only fully qualified nominees are confirmed to board positions, then we may have to extend by law the requirements of technical knowledge and experience to all five positions on the Board, such as would be accomplished by the bill I am introducing today.●

A TRIBUTE TO THOMAS GARDINER CORCORAN

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Louisiana (Mrs. BOGGS) is recognized for 10 minutes.

● Mrs. BOGGS. Mr. Speaker, when the Congress reconvenes in January the Nation will be observing the centennial commemorations of the births of two of its most distinguished sons, Franklin Delano Roosevelt and Sam Rayburn.

Also, when we start our new session for the first time in 50 years we will be denied the advice and assistance of another of America's outstanding sons, Thomas Gardiner Corcoran. It was Tom Corcoran who conceived many of the programs and drafted the enabling legislation to launch and promote President Roosevelt's New Deal. It was Tom Corcoran who worked with Speaker Rayburn in following administrations as an artful persuader in the adoption of legislation to promote a continuous improvement in the quality of life for all Americans in a sound economic environment. Eternally young, constantly curious, intellectually profound, he was excited about the new era of the age of space and technology ushered in by the recent success of the Space Shuttle program. We will miss especially his enthusiastic guidance in the legislative initiatives which we will need in this area.

The extent of the loss of Tom Corcoran was expressed in this morning's Washington Post by his longtime associate and devoted friend, the distinguished attorney and public servant, Jim Rowe, thusly:

OUR HEARTS WERE TOUCHED WITH FIRE

(By James H. Rowe, Jr.)

I thought he would live forever.

The son of a Yankee Puritan mother and an Irish father, Thomas Gardiner Corcoran inherited from one the persistent, driving diligence and from the other the imagination and irresistible ebullience and gaiety that carried him throughout his life. His incredible energy was fearful to behold. A few weeks ago he said to his doctor that recently he had often found himself tired, and he wondered why. His doctor said, "It goes with the territory once you're 80." And the patient was said to have replied, "Not with my territory, it doesn't!"

He was a New Hampshire mountaineer and a football player. It took him some years to become varsity center at Brown because of his size—but he made it. He was a downhill skier, indifferent at best if one looks back on his broken ankles and legs—but he skied. He was a first-rate scholar when he wished to be, valedictorian of his class, Phi Beta Kappa and on the Harvard Law Review. He was secretary to Supreme Court Justice Oliver Wendell Holmes: there was no greater honor for a young lawyer in the nation.

He was a great advocate at the bar, a briefwriter of excellence and a superb intellectual persuader of men. He was an unparalleled legislative draftsman.

Except for Franklin Roosevelt himself, he and Ben Cohen—Corcoran and Cohen—were a huge part of the New Deal. They were the generals and captains of their young armies. The New Deal legislation, which has remained on the statute books for almost a half-century, is testament to them both. Together they were much stronger than just adding them one to one. All through the government during those New Deal years, they had scores and scores of youthful juniors awaiting their orders. Ben was the idea man, the visionary, the man of wisdom. Tom was the quarterback, the strategist, the persuader.

In the past few days, my phone has been ringing from all over the country as members of this now thin gray line of the New Deal mourn one of their own.

With the possible exception of the Founding Fathers, there was never before and certainly has not been since, the excitement, the intellectuality, the excellence or the sense of accomplishment that existed in the New Deal. It is remembered by the hun-

dreds, even thousands, of young men and women who flocked to Washington to serve under such leaders as Franklin Roosevelt and his brain trusters.

Tom loved to quote his old master, Justice Holmes. And Holmes' words, when speaking of his old Civil War comrades in a speech delivered on Memorial Day 1884, also apply to the New Dealers—because of Tom and Ben: "Through our great good fortune, in our youth our hearts were touched with fire."

Tom was, of course, himself a man for heroes. He had great ones like FDR and Justice Holmes. Gen. Claire Chennault, who led the American Flying Tigers in China against the Japanese, was another. Tom supplied the general with men and material and took on that war "over the hump" against the Japanese as his own personal war.

He was always the most generous man I have ever known.

Once more I remember the words of his hero, Justice Holmes—about what Holmes, almost a century ago, had said about an old lawyer friend of his own:

"When a great tree falls, we are surprised to see how meager the landscape seems without it. So when a great man dies. . . ."●

TRIBUTE TO AMBASSADOR ANDREW V. CORRY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. FOLEY) is recognized for 5 minutes.

● Mr. FOLEY. Mr. Speaker, I was extremely saddened to hear earlier this month of the death of Andrew V. Corry, who served this country with distinction as Ambassador to Sri Lanka, Sierra Leone, the Maldive. Islands, and in a number of other important assignments.

Perhaps the first thing that struck one on meeting Andrew Corry was the remarkable breadth of his interests and the depth of his knowledge. There seemed to be no intellectual discipline that he did not have at least a passing familiarity with, and in many—history, science, music, mathematics, religion, literature—he was an expert. He was forever grappling with the complexity of politics and of life itself and forced his friends to do the same. Time spent with him was intellectually demanding but worth the effort. Blessed with a fine mind and a healthy but humane skepticism, he applied his mastery of fact, his curiosity, and his often acerbic wit to the questions of the day. He not only introduced those of us who knew and respected him to new ideas and points of view, but made us appreciate old ideas that had simply been neglected.

Ambassador Corry helped old friends and associates here and abroad in countries where he had served. An omnivorous reader, he shared not only the ideas he gained from books but his book collection itself. The libraries of his friends are filled with the books and recordings he gave them. He made the families of his friends his own family, showering the children with gifts and encouraging them to pursue their goals and aspirations. His rich legacy consists in his extremely distinguished service to his country over many years and in the high regard and warm memories of his many friends.

Mr. Speaker, I ask that his obituary which appeared in the Washington Post on December 2, 1981, be inserted in the RECORD.

A. V. CORRY DIES, WAS U.S. ENVOY

Andrew Vincent Corry, 77, a mineralogist and career Foreign Service officer who was U.S. ambassador to Sierra Leone, Sri Lanka and the Maldive Islands in the 1960s, died of emphysema Nov. 24 at a hosptial in San Diego, Calif.

Mr. Corry, who lived in San Diego, was ambassador to Sierra Leone from 1964 to 1967. He then served as U.S. ambassador to Sri Lanka (formerly Ceylon) and the Maldives, an island group in the Indian Ocean, before retiring about 1969.

He joined the State Department in 1947 and became minerals attache in New Delhi, India, later that year. He was consul general in Pakistan, a consultant to U.S. agencies in South America and coordinator of Senior Foreign Service Policy at the State Department's Foreign Service Institute before being appointed an ambassador.

In 1954, he received the State Department's Commendable Service Award.

Mr. Corry was born in Missoula, Mont. He was a graduate of Harvard University and a Rhodes scholar who earned two bachelor's degrees and a master's degree from Oxford University, England. He also earned a master's degree in geology from the University of Montana School of Mines, where he was an assistant professor early in his career.

There are no immediate survivors.●

RESOLUTION TO PROTEST INTERNATIONAL EXCHANGE PROGRAMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, today we are introducing legislation to express the sense of Congress that funding for the educational and cultural programs of the U.S. International Communications Agency (USICA) should not be disproportionately reduced, but in fact, should be enhanced and strengthened.

The USICA's educational and cultural programs, including the Fulbright scholarship program, the international visitors exchange program and the Humphrey Fellowships program are America's best weapons in the battle of ideas. The past 15 years has seen the USICA's budget as a whole decline by 30 percent in constant dollars. The U.S. Government-funded exchange program, for example, is now operating at 60 percent of the 1965 levels. As the U.S. programs have been steadily declining the Soviet Union's expenditures for educational, cultural, and information activities have been markedly increasing, to a conservatively estimated annual expenditure of at least $1.7 billion—approximately four times that of our comparable efforts.

As an example of this disparity, a recently released, unclassified CIA report, "Communist Aid Activities in Non-Communist, Less-Developed Countries, 1979 and 1954-1979," reveals that an influx of foreign students into Soviet academic institutions in 1979 brought the number being trained in the Soviet Union to new heights. This influx, together with those already in the Soviet Union, totaled 31,000, a dramatic increase of 18,000 foreign students since 1970. The cost to the Soviet Union to train these students in 1979-80 was conservatively estimated at $170.5 million while the U.S. Government, through its AID and USICA programs sponsored only 3,523 foreign students at a cost of $18.8 million.

In the Third World, the Soviet Union already offers more than 10 times as many fellowships as does the United States. According to a House International Relations Committee report, "In Soviet-Third World relations, the Soviet leadership appears to have placed its greatest hope for ultimate success in the academic exchange programs."

The U.S. foreign exchange programs represent the most effective nonmilitary means for promoting strong foreign policy and true international understanding. The exposure to American ideas, political philosophies, and society that these programs generate stimulate interest in the United States and expand U.S. commercial and political ties. Clearly, these programs are vital to our national security and essential for promoting U.S. interests abroad.

As the need for a stronger educational and cultural exchange program has risen, budgetary restraints have, unfortunately, tightened. Recently, however, the administration and the USICA have announced that the bulk of USICA budget reductions would be achieved by slicing these programs by a disproportionate percentage. I strongly urge that Congress show its deep concern over any proposed spending reduction imbalance that would severely impact on our efforts to educate and influence future world leaders.

Our hope is that this will be a bipartisan effort to counter the Soviet offensive to become, as a recent New York Times editorial stated, "the unrivaled champion of education and culture for most of the poorest nations of the world."

At this point in the RECORD, I include the following bill:

H. CON. RES. 243

A bill to express the sense of the Congress that the educational and cultural programs of the U.S. Communications Agency should not be disproportionately reduced, but should, in fact, be strengthened

Whereas the educational and cultural programs of the International Communications Agency are vital to United States national security;

Whereas over the last 15 years the USICA's funds have decreased by 30 percent in constant 1965 dollars;

Whereas the recent State Department budget reductions threaten to further exacerbate the decline in the United States effort in the worldwide contest of ideas, while the Soviet Union's expenditures for educational, cultural, and information activities have been dramatically increasing to approximately four times our comparable effort;

Whereas the Fulbright Scholarship Program, the International Visitor Program, and the Humphrey fellows program represent the most effective nonmilitary means for promoting strong foreign policy and true international understanding; and

Whereas the exposure to American ideas, political philosophies, and society that these programs generate can considerably stimulate interest in the United States and expand United States commercial and political links: Now, therefore, be it

Resolved by the House of Representatives (the Senate concuring), That it is the sense of the Congress that the educational and cultural programs of the United States International Communications Agency should not absorb any disproportionate share of the budget reductions, and that efforts should be made to stop the decline in resources for such programs and to lessen the sharp disparity between Soviet-Eastern Bloc expenditures and similar United States efforts.●

MO UDALL—THE GENTLEMAN FROM ARIZONA

(Mr. SCHEUER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SCHEUER. Mr. Speaker, as we wind down this 1st session of the 97th Congress, and prepare for the holiday season, it seems an appropriate moment to pause for reflection about one of this body's most highly respected and popular Members, MO UDALL, of Arizona.

I am inserting in the RECORD today a copy of an article about MO, which appeared in the November 1981 issue of Audubon magazine. It is well worth reading and I commend it to my colleagues. This article is one of the best pieces I have ever seen about Mo and his career and about the things he holds dear and special.

I was struck as I read the piece just how much we all admire this man who, as someone said, "stands tallest in the House of Representatives." And I do mean all of us—I am convinced that a clear majority of our Republican friends will acknowledge that they very much like and admire this fellow from St. John's, Ariz.

When MO UDALL takes the floor, the rest of us listen. We know he is going to have something to say that is worth hearing. How much better a place this great Chamber might be if each of us could take some coaching from Mo in compassion, kindness, civility, and decency. Like Abe Lincoln, Mo has a gentle way with his wit. He does not hesitate to use it on himself to make a point, but he never uses humor to hurt someone else. He is a genuine storyteller in the tradition of Will Rogers. For all of us who treasure public service, MO UDALL stands tall as a model.

MO UDALL has brought honor and respect to this House in his 20-plus years of service. He is widely admired for being the beautiful guy that he is. I hope you all will join me in simply saying, "Thanks, Mo, for being yourself."

THIS FELLA FROM ARIZONA

(By James M. Perry)

Representative Morris King Udall of Arizona climbed out of the Army helicopter, took a long look at the Nizina and Chitina canyons below him, gazed at the snow-capped peaks of 16,000-foot mountains above him, spread out his arms in ecstasy, and said: "I want it all!" The occasion was Udall's first extensive trip to Alaska, two weeks that represent what he says were the "most exciting" days of his life. The visit led, ultimately, to Udall's proudest achievement, passage of the Alaska lands bill that set aside 104.3 million acres with some of the most spectacular scenery in the world for the benefit of all of us, forever.

He didn't get it "all," of course (though he did get what he saw from the plateau in the Wrangell Mountains that day). When the legislation was in place, containing weaker language passed by the Senate, he said he "shed a tear" for southeastern Alaska, because the bill allows timber interests to chop up 300-year-old trees and "send them to Japan to make plywood." But he figures he got 85 to 90 percent of what he was after, and he is enough of a philosopher to know that's better than what most people get out of life.

"Mo" Udall, the chairman of the House Committee on Interior and Insular Affairs, may not be the best friend the environmental movement has in high places, but it would be difficult to find anyone more important. He is—he remains, despite staggering reverses that would daunt most of us—funny, smart, down-to-earth, honest, sassy, patient. He has become a national treasure.

"He's one of the real giants in public life today," says his old friend and Alaska sidekick, Representive John Seiberling of Ohio (who likes to boast he was hung in effigy one day in Sitka, alongside Udall). "Mo's pretty much the best shot we have at standing up to [Secretary of the Interior] James Watt and the rest of these people in the Reagan Administration," Seiberling says. Maybe, Udall's friends suggest, it will be his last great battle. He's fifty-nine years old. And now he has Parkinson's disease. With medication, he can control it, but it slows him down and causes him some physical distress.

Udall's story is a kind of American political classic. Born in a hamlet out in the desert, he came to Washington wearing funny suits and cowboy boots. He bucked against the tradition that the new boys keep their noses clean and their mouths shut. He ran against the Speaker and lost. He ran for the number two job—majority leader—and lost. Then he ran for President, in a spectacular effort to break out of the pack. When he lost again, he finally seemed to accept his fate. He became what he is—one of the great legislators of our time.

It is important, Udall believes, to understand the land.

He understands it; he has no choice. His grandfather, David King Udall, was a pioneer. In 1880, he led fifty Mormon families to a place in the desert called St. Johns, halfway between Phoenix and Albuquerque. "Of all the places the Mormons picked," says Udall, "this was probably as harsh and as unproductive a land as they tried. The growing season was short, the soil wasn't all that good. But they stuck it out and made a community of it."

His grandfather, a polygamist, settled in Arizona about the same time Miles Romney, former Michigan Governor George Romney's polygamist grandfather, settled there. Udall and Romney knew each other, of course, and both were befriended by a Jewish merchant named Baron Goldwater, Senator Barry Goldwater's grandfather. All three of the grandchildren—Morris, George, Barry—ran for President; all of them lost.

The Mormons were not welcome in Arizona. Udall's grandfather was arrested on a trumped-up perjury charge and sent off to prison for three years. He was released when President Grover Cleveland wrote a full pardon. "My grandfather was persecuted because of his beliefs," Udall told Ben MacNitt of the Arizona Daily Star. "I deeply understand these things."

Grandfather Udall came home from jail "fired up with carrying out the work of redeeming the desert." That wasn't all he was thinking about, for he went on to sire eighteen children, including Morris Udall's father, Levi (who, forsaking polygamy, fathered only six children).

Levi Udall studied law with a local judge and sent off to a correspondence school for lessons. He became a lawyer himself and ultimately rose to become chief justice of the Arizona Supreme Court. When he died in 1960, he left a few thousand dollars and a two-bedroom house to his widow, Louise Lee. She was a writer, with a keen interest in Indain life and culture. Her book "Me and Mine," is the story of a Hopi woman.

St. Johns was a town of about 1,325 church-going Mormons and Roman Catholics. "The only paved road was the highway that passed through town," Ben MacNitt has written. "The movie changed twice a week at the Ritz Theatre, 100 pounds of sugar cost $5.80, everybody worked hard, and most thought life was pretty good."

Udall lost his right eye when he was six years old. He and two of his friends were making a wagon train out of Coke bottles tied together with string. Udall pulled out a small knife to cut the taut string; somehow, the knife jumped out of his hand and hit him in the eye. He was treated locally with hot compresses. By the time his family realized something was seriously wrong, it was too late. Doctors in Phoenix, 150 miles away, removed the eye.

For all of that, Udall went on to star in high school on both the basketball and football teams. The basketball team went to the state championship and lost in the first round. The players were awed by the size of the University of Arizona gym. "Think of all the hay you could store here," one of them said. The football team, with Udall at quarterback, was undefeated.

Udall remembers what it was like to grow up in that harsh desert environment. "You learned," he told MacNitt, "that nature had first laws, that nature was bountiful and generous if you handled it right. . . . We had no tractors. We had horses and plows. You learned the cycles, the seasons. . . . It's just a closeness with nature, a closeness to fundamental laws of nature that I guess you get in no other way."

When World War II began, Udall joined the Army. He was assigned to a noncombat support unit at Fort Douglas, Utah, where he organized a basketball team. "On my starting five, I had seven good eyes," he recalls.

When he came out of the service, he went to the University of Arizona, starred on its basketball team, and opened a barber shop in the basement of the infirmary. Later, while he was at law school at the University of Denver, he played an 82-game schedule with the Denver Nuggets of the National Basketball Association. The team was awful, and Udall was not one of its stars.

By then, Udall was no longer a practicing Mormon. "When I went off to school, I began to read widely, philosophy and history, and my mind expanded. I lost a great deal of interest in the church and haven't really been active since I went off to World War II."

It was Mormon doctrine then—it has changed since—that black people are cursed. Black people, then, couldn't become priests in the Mormon Church, in which almost all the males become priests. Udall never accepted that dogma.

Of the six Udall kids, Mo was the one most interested in politics. He always wanted to run for Congress; sometimes, late at night, he fantasized about being President. When a vacancy occurred in the Second Congressional District (Tucson) in 1954, Mo wanted to run. But he had to give way to his older brother, Stewart, who had never shown any interest in holding elective office until that moment. Stewart won, and Mo for some time thereafter may have harbored a trace of resentment. Mo went back to his law practice, hoping for an appointment to the State Supreme Court. Magically, a vacancy occurred there, too—and the governor appointed a Udall to it. Only it was Mo's ultra-conservative uncle, a Goldwater type, who got it.

In 1961, President Kennedy appointed Stewart Udall to the cabinet as his Secretary of the Interior. Mo ran for the vacant seat in a special election, barely won it, and came to Washington green as grass.

He must have been a sight. Here he was, one-eyed, six feet five inches tall, and, as author Larry King has written, "a month short of thirty-nine," looking "something like a rodeo hand in short burr haircuts, bow ties, and a wide leather belt studded with ersatz stones and a silver buckle. There was about him a disconcerting combination of country-boy shyness and a bawdy cowlot humor."

He brought with him his wife, the former Pat Emery, a Vassar graduate, and their six children. Mo loved it, the children more or less adjusted to it, and Pat Udall hated it. The marriage ended in 1965; Pat left town and took the children with her. Mo married a Capitol Hill secretary—Ella Royston—three years later. He calls her "Tiger" and gets out of the way when she's mad. It's a happy marriage.

Right from the start, Mo began doing something that most congressmen never would think of doing: writing long, eventually thoughtful essays once a month to his constituents back home. At first, though, he was simplistic, cautious, and very political. He tended to play to the worst yahoo sentiments of his readers, mindful that Arizona is one of the most conservative states in the nation, and getting more conservative every election.

"I am willing to risk a nuclear war rather than live under Communism," he wrote in 1962. But he doubted things would come to that, because he insisted we actually were winning the Cold War. In 1965, he suggested President Johnson might be wrong about Vietnam. It didn't matter, though, because "he is our President, and he deserves our loyalty and support." By the end of the year, he predicted, the corner would be turned in Vietnam.

Mo Udall came of political age the night of October 23, 1967, when he gave a speech in Tucson at the Sunday Evening Forum, one of the region's largest civic meetings. There were 2,800 people in the audience—newspaper editors, party officials, businessmen. They were "important people," and hardly one of them opposed Johnson's policies in Vietnam.

Udall got right to the point.

"I have come here tonight to say as plainly and as simply as I can that I was wrong two years ago, and I firmly believe President Johnson's advisers are wrong today." Unless the nation changed direction, he warned, "I predict we will have 750,000 troops committed to Vietnam within the next eighteen months. There will be more bombing, more civilian deaths in South and North Vietnam, more American casualties. . . . We are on a mistaken and dangerous road."

He said he had a plan, and he was willing to share it with his listeners, each of whom—shocked—was on the edge of his seat by now. "I propose," he said, "that the United States halt all further escalation and Americanization of this war and that it discontinue sending any more Americans to do a job that ought to be done and can only be done by Vietnamese. I am suggesting that we de-escalate and de-Americanize this war and that we begin the slow, deliberate, and painful job of extricating ourselves from a hopeless, open-ended commitment. . . . I am suggesting that we start bringing American boys home and start turning this war back to the Vietnamese."

When he was finished, there wasn't a sound in the hall. Then one or two people began to applaud; soon, the whole crowd was on its feet, giving Udall and his heresy an ovation. The speech, according to Robert Peabody, a political scientist who has edited Udall's newsletter, "made headlines across the land, from the Nogales Herald to the front page of The New York Times."

After all, he wasn't just any congressman. His brother was the Secretary of the Interior, and one of the better-known politicians in the country. Just before leaving for Tucson, Udall had given a copy of his speech to the President, with a note saying how much he regretted what he was about to do. The White House reacted almost instantaneously: Udall was offered a private briefing by Secretary of State Dean Rusk; McGeorge Bundy called him on the telephone. Even as he was dressing to go to the auditorium, his Washington neighbor, Nicholas Katzenbach, the Undersecretary of State, telephoned, in a final effort to dissuade him.

Udall says now, shucks, it wasn't much. "In the great chorus of oratory so characteristic of that time, mine was just another voice." He's too modest. He was, after all, one of the first, and quite possibly the first, regular Democrat to turn against Johnson and the war. It was an act of courage.

He wasn't always that courageous.

"Right-to-work," for example, has long been a special problem for Udall. "It's been an emotional subject," he says. "Two referenda and an act of the state legislature have rejected labor's arguments and embedded in our constitution a state 'right-to-work' law." Udall concedes he is out of step with the right-to-work philosophy, but he says he pledged in his first campaign to vote Arizona's way on right-to-work. And so, in 1965, he did, in a vote labor didn't let him forget for years.

Then there is the Central Arizona Project, which was started before his time and probably won't be finished until after he is gone. Environmentalists say it is a multibillion-dollar boondoggle. Udall has supported it, and has pledged to see it through. Uncharacteristically, he ducks responsibility for the most controversial part of it, the Orme Dam, by noting it's in someone else's congressional district.

Then there was his support of the Bridge Canyon (later Hualapai) and Marble Gorge dams smack in the Grand Canyon. Friends of the Earth's David Brower was executive director of the Sierra Club back then, and he and his organization were outraged by the idea of building the dams. The Sierra Club ran full-page ads asking, "Do you want to flood the Grand Canyon for profit?"

Brower believes Udall was so outraged by the Sierra Club's opposition to the dams that he triggered the Internal Revenue Service's investigation of the club's tax-de-

ductible status. He believes Udall and the head of IRS met the day after the ads appeared, and that IRS sent a wire to the Sierra Club the day after that. As a result, the Sierra Club did lose its special tax status, and that situation remains unchanged today (although the club, like Friends of the Earth, maintains a separate foundation to which contributions are tax-deductible).

Udall concedes he supported the Grand Canyon dams. He argues they were part of the Central Arizona Project then, and he was elected with a mandate to support that project. He points out that power in the area is now supplied by polluting coal-fired generating plants. Thus, if the dams had been built to supply hydroelectric power, the air today would be cleaner. He concedes, too, that he wrote a letter to IRS about the Sierra Club. He says it wasn't the ads that offended him so much as the club's lobbying effort on Capitol Hill. But he does not agree that his letter triggered the investigation or played a major role in it. He insists the letter was mailed after IRS had decided to challenge the club's tax status.

Udall may have come to Washington wearing funny suits, but it didn't take him long to catch on. He wasn't willing, like so many of his colleagues, to wait his turn. He was ambitious and quickly became frustrated. He watched in dismay as many of the best people in the House went home to run for governor or for the Senate, or just said to hell with it and went home—or downtown—to practice law.

Remembering his own confusion when he first came to Washington, he organized orientation seminars for the freshmen. Out of that came a book (written with Donald Tacheron), THE JOB OF THE CONGRESSMAN, that includes all kinds of advice, some of it exotic (how, for example, to get plants for the office—free, of course, from the Botanic Gardens).

He joined other young liberals in the Democratic Study Group and became something of a legislative specialist. But young members of Congress didn't enact much legislation then. Nobody, in fact, was enacting very much legislation. Twenty years ago, Udall says, "all movement seemed to stop, and the House became a sleeping giant."

First, as Speaker, was Sam Rayburn, an old man from Texas. Then came John McCormack, an old man from Massachusetts. "There was a Rip Van Winkle quality to the House," Udall recalls. "We were a case of arrested development."

It was on Christmas Eve, 1968, that Udall tried to break out of the trap. That day, he telephoned Speaker McCormack in Boston to announce he was going to challenge the old man for his job when the 91st Congress convened in January. Udall had trouble explaining what he had in mind because, according to writer Larry King, McCormack "kept hoo-hawing season's greetings." When McCormack finally got the message, he cut off the greetings, and the connection.

The challenge to McCormack was symbolic, mostly: Udall never expected to win. On the basis of private commitments, though, he did expect to get about 80 votes. In a secret ballot, he got 58; McCormack got 178. According to Larry King, "maybe a hundred statesmen" later sought out Udall to whisper that they had stuck with him in the voting.

He has done some other things he'd just as soon forget. He led the effort to get a whopping pay boost for his colleagues, and that at least earned him warm—but private—thanks. He played a key role in passing the Postal Regulation Act, which led to even drearier mail delivery. He led the fight for a land-use act, defeated because of a propaganda barrage laid down by his Arizona colleague, Sam Steiger, and every conservative organization.

In 1970, McCormack announced he was stepping down as Speaker, and he laid his bony old hands on Carl Albert, the majority leader, to succeed him. Udall decided to run for the number two job, thereby positioning himself on the succession ladder right behind Albert. This time, it wasn't symbolic at all: Udall and his strategists thought he would win. He prepared his ground as carefully as he could, studying in excruciating detail the history of earlier leadership fights. His principal opponent, it turned out, was the late Hale Boggs. Also running were Jim O'Hara, Bernie Sisk, and Wayne Hays. First ballot: Boggs, 95, Udall, 69; Sisk, 31; Hays, 28; O'Hara, 25. Hays pulled out, in favor of Boggs. O'Hara backed out, favoring no one. Second, and final, ballot: Boggs, 140; Udall, 88; Sisk, 17.

Udall and his aides turned their "MO" buttons upside down. Now they read "OW." And hurt it did.

That was eleven years ago, but Udall is the only one of those House members active in that fight still serving. Time is a sneak, and it has sneaked up on Udall. Slowly, with no one noticing, he gradually became one of the old lions himself. And, maybe, for the first time, he sometimes looked down the road at the years stretching ahead, leading, if he was lucky, to the chairmanship of the Post Office and Civil Service Committee. Maybe he could see himself becoming one of those old men in the Congress, cat-napping in their chairs on the House floor.

So, having failed twice to win leadership posts in the House, he decided in 1974 he would try to lead the whole country. He decided to run for President, in a fairly spectacular last effort to break out of the encircling trap.

It wasn't actually his idea. Two of his colleagues, Henry Reuss and David Obey, both of Wisconsin, ruminated one day why so many senators run for President, and no members of the House. Who, they asked themselves, was qualified in the House to be President? That took some thought. Udall, they finally concluded. They told him what they had come up with, and Udall told them it wasn't a bad idea. If they could get 10 percent of the Democratic membership of the House—25 reasonably warm bodies—to sign a letter of intent that he ought to give the idea a go, he would do it. (Of course, it didn't mean they would endorse him; that would have been far too risky.) Instead of just 25 signatures, Obey and Reuss came up with 44 (of whom only 18 are still serving), and the unlikeliest candidate joined the 1976 presidential race.

"When you buy a President," Udall's friend, Congressman Obey, said at the time Udall began running for President, "you buy his psyche. That's why I like Mo. He's fresh, he's sensible, he's smart, and he lacks all traces of pomposity. He has just the personal characteristics that should catch on. They'd have caught on by now if he had 'Senator' in front of his name instead of 'Representative.'"

But, having "Representative" in front of his name, Udall encountered a problem, right away. Outside of Washington (and, of course, Tucson), no one had ever heard of him. Running for President may have been, initially at least, Udall's most humbling experience. (To be sure, at the very same time, an obscure governor from Georgia, Jimmy Carter, was undergoing a similar experience.)

I remember being with him—this is the first occasion I recall spending much time with Udall—in Oklahoma City. It was a Saturday night, and he had been invited to speak at a big Democratic dinner. He thought he was going to be the main speaker, even if George Wallace was going to be at the head of the table, too.

But it wasn't a dinner at all. It was a rally in a shabby big room in the basement of a hotel that had seen its better days back when they first struck oil. Udall's wife and her mother had come all the way from Washington, Ella Udall to hear Mo, her mother to hear her particular hero, Governor Wallace.

It was awful, but this is what it's like, campaigning for President when you're not famous. It is what Walter Mondale has called the "death march." First the master-of-ceremonies auctioned off books autographed by Ted Kennedy, Ed Muskie, and Bella Abzug, whose names drew a prolonged chorus of boos.

All through the evening, thirsty Democrats kept slipping out of the hall and heading down a dingy corridor to "hospitality" rooms, where the liquor flowed. Finally, Wallace was pulled out of his wheel chair and helped to the lectern. He gave the same speech he has given a thousand times, and the crowd loved it. When he was finished, at least one-third of the people in the room got up and went home. It was almost eleven o'clock when Udall's turn came. By then, nobody wanted to listen to the kind of serious speech Udall had prepared. They thought they'd heard that speech—from Wallace.

Udall did the best he could. He stuffed the speeches back in his pocket and started telling stories. He always talks loud, but he talked extra-loud even for him that night. The jokes began to bring the crowd alive. Good ol' boys nudged their wives. Hey, they seemed to say, catch this fella from Arizona. he ain't half-bad.

When it was over, Udall stumbled off to bed. It was after one in the morning. He got up in the dark, before six o'clock, to catch a plane for Kansas City and another speech, hoping somewhere along the line he would catch the eye of David Broder of The Washington Post or John Apple of The New York Times or columnist Evans and Novak, someone who would say that he was a serious candidate for the Democratic presidential nomination. It almost worked.

The trouble was, the liberal vote splintered, some of it going to Fred Harris, some to Birch Bayh, some to Jimmy Carter. Udall came in second to Carter in New Hampshire, second to Henry Jackson in Massachusetts. He went to bed thinking he had won in Wisconsin, only to be awaken to the news that Carter had snatched victory away.

It was not what anyone would call a highly organized or rigidly disciplined campaign. Staff turnover was high—Udall has never been very good at recruiting and keeping a first-rate staff. And his brother Stewart kept poking the fires, causing all kinds of flare-ups. When the election was over and the campaign managers for all the candidates gathered at Harvard to talk about it, two sets of managers appeared for Udall, each saying it was the truly legitimate one.

Udall's managers were mad at each other, but they never seemed to get mad at Udall

himself. The campaign veterans call themselves "Mozos," and they still hold reunions. Robert Neuman, a leading "Mozo," says he couldn't believe his eyes when he saw members of Udall's Secret Service detail "cry when we told them the campaign was finished."

What kind of President would Udall have been?

No doubt he would have been more certain of his goals than Jimmy Carter ever was. Surely he would have known how to operate in Washington, his own city, better than Carter. He is irrepressible, and so almost surely he would have been fun to have around. But, even some of his best friends wonder if he would have been tough enough for that job. "He is a very accommodating man," says Neuman. "Maybe that wouldn't have been a good thing." Beyond that, he may not take himself seriously enough to maintain the kind of ego we demand of our Presidents.

So now, apparently, the trap had closed. Udall had tried everything, and failed. Then, suddenly, lightning—two bolts of it—struck. When Congress convened, Udall discovered he had a choice of being chairman of the Post Office and Civil Service Committee or the Interior and Insular Affairs Committee. Interior was unexpected, for it should have gone to Harold (Bizz) Johnson of California. But Johnson chose to become chairman of Public Works and Transportation. Udall grabbed Interior.

Until then, Udall's track record as a legislator was not all that sensational. It included, after all, that "reform" of the postal system. It included, too, losing efforts to pass a land-use-planning bill, universal voter registration by postcard and public financing of congressional elections.

In the 95th Congress, though, everything seemed to come into place. Why? Perhaps because Udall finally realized this would be his ultimate role. Perhaps because he finally had the power and the reputation to push ahead. Perhaps because it was simply time to do these things.

One of his major successes didn't even involve the Interior Committee. He had to shepherd the civil-service reform bill through the Post Office Committee, because its aging chairman, Robert Nix, was preoccupied with a primary election.

Mo Udall, as much as any man, is responsible for civil service reform, the first overhaul of the civil service since the merit system was created in 1883. It wasn't his idea; it was a pet project of President Carter's, one of the few things the new President really felt deeply about. Udall had no love for Carter (and vice versa), but he pushed the bill against all the roadblocks thrown up by federal employes and the congressmen representing districts heavy with federal bureaucrats.

It took an entire month to "mark up"—or write—the bill in committee. Committee members opposing the reform called up one crippling amendment after another. The same tactics were pursued on the House floor.

Udall cut a deal with troublesome members of the committee, saw to it that President Carter mollified a congressman who wanted action on his own pet bill, and finally took a consensus bill to the House floor. Once again, though, Udall was buried in a flurry of meaningless, time-delaying amendments. For three days and most of three nights, the debate droned on. The last session went on for five hours. In the end, though, Udall and the President got what they wanted. The legislation is designed to create incentives in the bureaucracy for exceptional work and to make it easier for departmental managers to fire the incompetents. It is still too early to tell if it's working.

What it did demonstrate is why Udall had become such a good legislator. He possesses the necessary qualities:

Patience. Young members think you write legislation by tossing a bill together and issuing a press release. Wrong. It takes time, and endless patience. Udall is a patient man.

A lawyer's mentality. Under that aw shucks, cowboy demeanor lurks a legal mind as sharp as a Wall Street managing partner's. Years earlier, his friends note, Udall wrote the book—quite literally—on the laws of evidence in Arizona. He is a good lawyer; he appreciates distinctions some of us might call nit-picking.

An extroverted personality. Udall likes people; people like him. No one gets very mad at him, so he can reach compromise and cut deals where others would never be able to open a conversation.

Commitment. For all this, on some things he cares very deeply.

More up Udall's pet alley (and back in his own committee) was strip-mining legislation. Next to Alaska, it is probably his proudest accomplishment.

"It took me four Congresses before Carter finally signed it," Udall says. "It was really the first thing I became interested in when I joined the [Interior] committee [in 1961]. Among the senior members, nobody then really cared about it. And so I gradually became associated with it."

Congressman Seiberling says, "It was Udall's idea to give the states primary jurisdiction for regulating the mines under the bill—unless they failed to follow the guidelines. Then, of course, the government would step in. It was that idea, I think, that made passage of the bill possible."

Udall is a forgiving man, but he has never forgiven President Ford for vetoing the strip-mining bill—twice. "That really showed me where President Ford was," Udall says. "Ford never really had any feel for the land. Even Herbert Hoover, even Nixon did better."

Like all tough legislation, it was a compromise. Coal-mining people were unhappy about it. They argued it would be a roadblock to necessary production. Environmentalists regretted the bill didn't cover strip-mining for copper and other minerals and that it gives a partial exemption to small operators.

At about the time the strip-mining legislation finally was being enacted, Udall came up with what he thought was a marvelous idea. Given all the complaints about how long it was taking to build energy facilities, why not some kind of mobilization board to cut the red tape and get on with the necessary work?

"I'd been reading a book about when Jimmy Byrnes was in the Roosevelt White House during World War II and he had a staff of about ten people to run the War Mobilization Board. He'd get on the phone to the head of United States Steel and say, 'What the hell's going on here? They need steel in Philadelphia to build more battleships.' This was the idea I had when I talked to Carter at Camp David."

But, says Seiberling, "the White House tried to grab the idea from Mo and run with it. They came up with an Energy Mobilization Board that would have overruled federal and local laws."

"My God," says Udall, "I created a monster."

According to Seiberling, Udall dug in his heels—so deep "the idea finally died." Udall has so much respect in the House, Seiberling says, "that he doesn't have to call on the Speaker or anyone else for help very often. But, when he does, he gets help. He got it here. The Speaker backed him up, and we don't have an Energy Mobilization Board."

Alaska is the gem in the Udall collection.

Not just Mrs. Stewart, too, Mo boasts about the "famous—or infamous—Udall freeze," and he's talking about when his brother was Secretary of the Interior and he halted the parceling out of land in Alaska. "I arrived in Washington right after Alaska became a state. Chapter One was statehood; it gave 104 million acres to the people of Alaska.

"Chapter Two came late, when the natives said, 'What the hell's going on here? What about us? We were here first, and we want some land too.' So my brother clamped the 'freeze' on. It said, 'Hey, team, all you miners and folks in Alaska, stop picking off all the good land for yourselves.'"

Out of that, finally, came passage of the Alaska Native Claims Settlement Act. "That gave another 55 million acres to the Alaska natives, set up regional corporations, and was intended to be a final land settlement," Udall says.

"John Saylor (the late Republican congressman from Pennsylvania and one of Udall's allies) and I got an amendment—we lost in the House but we won in the conference committee—which said, 'All right, the state got its land, the natives got their land, how about the people of the United States?'

"We said there are world-famous places in Alaska—Mount McKinley, the Brooks Range—how about a settlement with the rest of us?"

That became one of the most famous numbers in environmental history, d-2—section d-2 of the native claims act. In it, the Secretary of the Interior—Rogers Morton then—was instructed to come up with a list of national parks, game refuges, and forests, for "all of us."

Udall and Seiberling and other members of the committee went to Alaska for two weeks to look at the property, to see what should be set aside. Recollecting that trip, Udall is almost euphoric.

"It really grabs you. Alaska is so big. We had support from the Army with helicopters, even amphibious planes. We could go anywhere. It's a stunning piece of real estate. Unless you've been there, you just don't realize the grandeur and majesty of it. It's fragile, but it's relatively untouched.

"I remember once a group of scientists who had been up there were all excited about a place called Noatak. Nobody had ever heard much about it, as far as I know, but it's the only ecosystem—the only river basin—that has not suffered from the hand of man. And we can preserve the whole thing.

"You'll see this or that one day and say it's the greatest. The next day, you'll see three other things that are even better. There are things like the Kobuk Sand Dunes, above the Arctic Circle. Due to some strange weather patterns, the way the wind works, there's an arid place that has basically the same climate as southern Arizona. It just takes your breath away."

Udall remembers the day he and Seiberling and a small group of staff members and newspaper reporters landed in a helicopter

on one of those dunes. "Traveling with us," says Udall, "was Dora Trapkin, a staff person. She was sort of everybody's favorite. I put an arm around her on top of this dune and said, 'I do hereby declare this the Dora Trapkin Sand Dune.' "

Seiberling remembers when they flew into Umiat on the North Slope. "It was just a couple of house trailers. Someone told us we could take a short helicopter ride to look at some archeological sites, and three of us decided to do it—me, Udall, and the little delegate from Guam, Tony [Antonio Borja] Won Pat.

"Well, we got there and looked around, and then when it was time to fly back to Umiat the pilot couldn't get the helicopter started. We could see Umiat—it was just a speck on the horizon. I said, 'Well, Mo, I guess we better start walking.' And off we went. It was just tundra, with these little hummocks sticking out of the icy water. It was perfect for Udall, with those long legs of his. He could stride from one hummock to the next. It was hard for me, and it was just awful for poor Tony. Fortunately, after we'd gone a mile, another helicopter came and fished us out."

Seiberling says he and Udall "got an understanding of Alaska on that trip we might never have gotten any other way." he says they learned then that "the natives—the people out in the bush—have a right to live off the land. But there is a clash between the sport hunters and the subsistence people. The sport hunters go out and shoot moose for their deep freezers. So there's competition involved. The Alaska constitution says you can't make a distinction between types of hunters. But there is one greater power—Congress. And we protected the natives in our legislation. We became determined on that trip we would honor our commitment to protect the natives. Mo's support on that point was indispensable."

Back in Washington, in a conference with members of the Senate, Udall says, "We finally reached an agreement on a bill at two in the morning" at the end of the session. "I said, 'Gentlemen, we've done something very historic here. Now let's get the hell out of the road and let the staff put it together so we can take it to the floor of the House and the Senate tomorrow.' "

Udall thought he had reached an agreement earlier with Alaska Senator Mike Gravel to go along with the arrangement. "But Gravel said to me, 'Mr. Chairman, I have a few changes I want in the bill.' 'All right,' I said, 'what are they?' The first one was a $5 billion Susitna hydroelectric project, the biggest in history. The next was a sea-level Panama Canal or something. That's how it went. It was impossible. He was just demagoguing it, killing the bill. People in there were just violent, because he'd sat there for six days without saying anything."

Udall had to do it all over again in the next Congress, and he treasures a headline—he has framed it—from the Anchorage newspaper "showing how we beat the hell out of them." The Udall bill passed the House, 360 to 65. But Gravel was still over in the Senate, and "this time it was an election year and he was going to get reelected whatever the cost."

Even with Gravel's opposition, the Senate passed a bill, not as good as the House's, but a plus on balance. "The strategy," says Udall, "was to keep it out of conference and make us negotiate informally with the Senate. Stevens [Ted Stevens, the other Alaska senator] always figured he'd get more out of an informal deal like that.

"Then came the shock of the Carter defeat. All of a sudden, we were in a position where we'd have to go back and do it all over again, and now the Republicans controlled the Senate. The only option was to take the Senate bill.

"There's an old country-western song that says, 'There's a time to hold 'em and a time to fold 'em.' I decided the time had come to fold 'em. And I was right."

It is astonishing, when you think about it, that any bill was passed. Alaskans generally opposed the legislation. Gravel, who was defeated for all his pyrotechnics, made a career out of opposing it. The entire state watched the final debate on TV, beamed to them by satellite. "I'll never forget it," Udall says. "In my closing speech, I said I've been through legislation creating twenty or more national parks and there's a pattern to it. At first, after you propose it, and you go visit the towns where it's going to be, they threaten to hang you. They say it will ruin the community. You go back five years later and they think it's the greatest thing that ever happened. You go back in twenty years and they'll probably want to name a mountain after you."

A few days after his speech, Udall received a letter from Fairbanks. "The guy called me an idiot and said he was attaching a picture of the only mountain in Alaska that would ever be named after me. I turned the page to a picture of this big, beautiful mountain. It said, in big type, 'Mount Bull----.' "

The new administration, Udall figures, can't do much about Alaska.

"It's very clear in the Antiquities Act—it's been tested many times in court—that once something is in a national park, it takes the Congress to get it out. I remember Wally Hickel coming to town after the famous 'Udall freeze' and saying, 'Anything Udall can do I can undo.' He had to eat that."

Anyway, Udall says, the Alaska delegation doesn't want to fight that battle again. "I saw Don Young [Alaska's only member of the House] the other day, and he said it was all right for me to come back to Alaska. He said he wasn't sure about Seiberling, though."

Udall is more pessimistic about the strip-mining legislation.

"There's a kind of basic difference with this new administration, and it is bad news for conservationists. Republicans always have had some feel for conservation. It is, after all, an old tradition with them, going back to Teddy Roosevelt and Gifford Pinchot. Even Hoover wasn't so bad. Nixon never had much feel for the outdoors. You'd find him walking the beach in San Clemente in a pin-stripe suit and a tie. But he sensed politically—he'd served in the House and the Senate—that the Republicans had a stake in conservation. And he believed it was a continuing one. Ford was bad for conservation, but at least he never fired Russell Train and other real conservationists he inherited in his administration.

"I really thought this administration might put a few people in there that had some feel for conservation. But I haven't found any. It's typical that the guy they've got to run the strip-mining program is out of the Indiana legislature and had a cozy little land thing with the coal companies. You just know how tough he's going to be on these folks who are screwing up the land."

Udall fears "the strip-mining bill could be mangled pretty badly by the administration. You get a tough guy down there and he won't hire good people, and he tells the inspectors to squint and not look too hard. Then he changes the regulations to allow unlimited departure from the approximate original contour. It's going to be very tough."

Seiberling agrees, although he says the administration can't completely "gut" the bill by regulation, as they have proposed to do. That, he insists, requires new legislation. He says Udall is planning a bigger, tougher fight than he's willing to admit, yet.

Udall is preparing a counterattack. First, he says, will be a quiet effort to form a majority of the House to restore some of the cuts and fight some of the regulations the administration has proposed. "Maybe," he says, "we'll do what we can to save the Land and Water Conservation Fund. A lot of people think what they want to do there—kill it—is an outrage. They want to kill the Youth Conservation Corps, too. We can rally sentiment for that. In the western states, we have what's called payment in lieu of taxes, which is federal payment to those people because we have so much of the land. They're trying to eliminate it.

"We'll see what we can do."

There has been talk that Udall will retire at the end of this term. After all, even as he has become a national figure, he has become suspect to the increasingly conservative voters back home. Then there is his struggle with Parkinson's disease. He's paid his dues, friends say, and he deserves a rest.

I asked him about that.

"I'm sticking around," the man who christened the Dora Trapkin Sand Dune replied. "You bet. Yes. Damn right. I'll fight them to the last breath."

H.R. 5252—THE CLEAN AIR ACT AMENDMENTS OF 1981

(Mr. LUKEN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. LUKEN. Mr. Speaker, the first session of the 97th Congress is about to end with the matter of the reauthorization of the Clean Air Act unresolved. It is not in the environmental or economic interest of the Nation for Congress to adjourn this year without at least having on the table a legislative proposal. Such a proposal can permit us to produce sound legislative changes to improve the Clean Air Act. This should allow us to act expeditiously when we return to the second session in January.

Timing for action and reauthorization of the law is crucial. Accordingly, I along with my fellow colleagues and friends, Congressmen EDWARD R. MADIGAN of Illinois, BOB TRAXLER of Michigan, ELWOOD HILLIS of Indiana, JOHN D. DINGELL of Michigan, and JAMES T. BROYHILL of North Carolina, have introduced bipartisan legislation to focus attention on certain practical and necessary legislative reforms.

The reforms recommended in H.R. 5252 will help us move toward forceful, effective air pollution control by the Federal Government, the States, industry, interested citizens, and affected employees. With appropriate refinements and modification of the

Clean Air Act by H.R. 5252, the Nation will continue its progress in the control of air pollution. These revisions will help remove the uncertainty and complexity of the law. At the same time, they will serve to strengthen the national economy, protect jobs, and provide further employment opportunities.

We suggest that without such a comprehensive legislative document designed to achieve these goals, Congress will find itself resuming in January without a legislative plan for improving and making workable our air pollution control programs.

We anticipate substantial labor and industry support for this bill. We hope that this bill will alleviate the serious concerns of our friends in environmental organizations who have expressed fears that changes Congress may make to the law would be too extensive.

As a member of the House Energy and Commerce Committee, I, and those who join with me today, have had an opportunity to study closely the options for modifying the Clean Air Act. I have personally explored the need for certain refinements in the law through the thoughtful series of oversight hearings held by my good friend, the Honorable HENRY A. WAXMAN, chairman of the Subcommittee on Health and the Environment, and in discussions in my home district and with representatives of labor, industry, State government, and the environmental community. My colleagues who join with me today have also investigated the technical aspects of the law and made similar determinations which have permitted our cosponsorship of H.R. 5252.

A recent public opinion poll conducted by the Opinion Research Corp. concludes that most people want Congress to take another look at the Clean Air Act and to remove some of the cumbersome restrictions to industrial development. This survey shows that the public does not want major changes which will weaken the law, but does believe the law can be simplified without degradation of air quality.

H.R. 5252 provides a good legislative initiative. It is consistent with the recommendations of many interested organizations including both the AFL-CIO policy-guideline on congressional review of the Clean Air Act and the National Environmental Development Association Clean Air Act project.

The National Commission on Air Quality, State and local government, the recently released Brookings study and many others all echo the theme of unnecessary complexity. The cumbersome administrative procedures and duplicative requirements often imposed by the Clean Air Act unnecessarily hamper economic growth and industrial development.

They, like us, want reauthorization legislation to assure that the Clean Air Act will continue to do the job for which it was intended—while removing some of the unnecessary impediments.

Since the Clean Air Act was enacted in 1970, the Nation has undertaken a far reaching, costly, and ambitious program to reduce air pollution throughout all regions. Major commitments have been made by all affected segments of the society to install pollution-abatement equipment and adopt other measures to protect the quality of the air which people breathe. This effort has been successful. Air quality has improved dramatically.

However, we must draw upon the experience of the past decade in attempting to correct certain complexities and weaknesses that have been revealed in the Nation's clean air programs. In many instances certain requirements place a strain on the economy with no commensurate air quality benefit.

The bill addresses our concerns and provides a framework for modifying the Clean Air Act to achieve these objectives, while retaining the central regulatory requirements of the present program. The most serious problems within the current program which H.R. 5252 would correct are as as follows:

First, current procedures for approval of new industrial projects are excessively confusing and impose unnecessary delays.

Second, the procedures for Federal review and approval of State implemention plans are also needlessly complicated and time consuming.

Third, present deadlines in the statute are totally inappropriate in certain limited areas of the country.

Fourth, the CO and NO_x requirements on new automobiles are excessively stringent in view of the limited number of areas where the air quality standards are not being achieved.

As indicated above, H.R. 5252 does not alter a number of key provisions of the current Clean Air Act. These provisions include:

First, no change in the way primary and secondary national ambient air quality standards are established.

Second, all existing control requirements in State implementation plans will remain in effect. The bill would allow for extensions of time to be granted only in those areas which cannot meet current deadlines.

Third, the statute would continue to require that all sources in areas which have not achieved compliance with the air quality standards will be required to install all reasonably available control measures. This will continue the effort to achieve compliance in those areas not meeting the standards.

Fourth, new industrial projects will be required to install the best applicable pollution control technology which has been demonstrated for such sources.

Fifth, the statute will continue to provide special protection for the "Class I" areas, to assure protection of pristine air quality in areas of special national concern, including national parks.

Sixth, a systematic program to insure emission standards compliance by motor vehicles.

Within the context of a continuing commitment to maintain an ambitious and intensive national air pollution control effort, and building on the foundation of the core elements described above, our proposed bill would seek to achieve reductions in bureaucratic requirements that do not contribute meaningfully to air quality control and which seriously burden the national economy.

SUMMARY OF PROVISIONS OF THE CLEAN AIR ACT AMENDMENTS OF 1981

PURPOSES OF THE BILL—H.R.5252

The purposes of H.R. 5252 are to amend certain provisions of the Clean Air Act applicable to both stationary and mobile sources of air pollution, while—

Preserving the basic framework and purposes of the Clean Air Act,

Continuing unchanged the statutory requirements of the Clean Air Act for setting and revising national primary and secondary ambient air quality standards,

Lessening complexity in the process of achieving those standards and other requirements of the Clean Air Act,

Expediting the process for review and approval of State implementation plans,

Providing a reasonable and appropriate extension of time, where necessary, for the States to achieve attainment of such national standards and providing administrative flexibility for the States and the Administrator to achieve with reasonable effectiveness, and in a timely fashion, the purposes of the Clean Air Act,

Ensuring that economic, energy, safety, environmental, and other relevant factors (including employment opportunities) are adequately considered, consistent with the purposes of the Clean Air Act, in the process of achieving such national standards and other requirements of the Clean Air Act,

Supporting training programs for the States and local governments; and

Providing sufficient budget authority and personnel for the Administrator of the Environmental Protection Agency to enable that agency, and the States, to carry out the provisions of the Clean Air Act in a timely and efficient manner and without undue reliance on contractors.

Title I of the bill relates to stationary sources. Title II applies to mobile sources.

TITLE I

Use of best available data

The bill amends section 107(d) of the Clean Air Act by stating what we understand to be current EPA policy that in revising area designations, the best available data, whether obtained by monitoring or modeling, should be used. Where reliable monitoring data is available, such data would be considered the "best available

data." The Administrator would be the one deciding what data meets this sound criterion.

State implementation plan (SIP) revision process

The National Governor's Association, the Southern Governor's Association, the State and Territorial Air Pollution Program Administrators (STAPPA), the Administration, and many others have repeatedly urged administrative and legislative changes in the Clean Air Act concerning the SIP revision process. Mr. James K. Hambright, Director of the Bureau of Air Quality Control in Pennsylvania and President of STAPPA, testified on April 8, 1981, before the Senate Committee on Enforcement and Public Works in favor of such changes. He said:

"State air pollution control agencies have become increasingly frustrated however, by the cumbersome and uncertain process involved in establishing, in obtaining Federal approval of and in revising the State Implementation Plans."

H.R. 5252 seeks to adopt the STAPPA proposals for legislative change as much as possible, while providing safeguards to ensure adequate review by EPA and the public of SIP revisions where appropriate. The premise of the bill is that *all* SIP revisions do not warrant a full scale review and even where such review is needed, EPA must move expeditiously. This is the position adopted by the AFL–CIO last month in its resolution and policy guideline. The guideline states:

"The federal review process for state implementation plans should be accelerated and a distinction should be made between revision of state plans which do not need EPA approval."

SIPs or SIP revisions pending at the EPA in various stages, including those that have been conditionally approved, prior to enactment of the bill will continue, under the bill, to be approved or disapproved in accordance with present law. Later revisions would follow the procedures of this bill.

H.R. 5252 adds a new section 129 to deal with SIP revisions. SIP revisions submitted to the Administrator after the date of enactment of this Act would be subject to a simplified process. This process would consist of the following:

Following submission by a State to the Administrator of a revision, the Administrator would be required to publish notice of such submission in the Federal Register.

At least 30, but not more than 70, calendar days would be permitted for written comments respecting such provision.

Where the State plan revision was submitted to the Administrator after the State conducted administrative proceedings similar to those which would be conducted by the Administrator pursuant to the Administrative Procedures Act (notice and comment), the Administrator would be permitted to approve or disapprove the State plan revision without conducting additional hearings, although the Administrator is not precluded from holding such hearings. The Administrator would be required to approve or disapprove the plan revision at any time between 70 calendar days after the date of its submission and 120 calendar days after the date of submission. If the 120 day period expires and is not extended, and if the Administrator fails to act, then such revisions shall be deemed to be approved by the Administrator.

During this period, the Administrator on his own motion or on the petition of anyone who shows a need for an extension may extend the 120 day period for an additional period of not more than 60 days. At the end of this period, if EPA fails to approve or disapprove the revision, it is approved automatically.

I want to stress that the objective of this provision is to obtain timely EPA approval and disapproval. In futherance of this objective, the bill authorizes joint State-EPA hearings, encourages EPA participation in State proceedings, and provides a reasonable time frame for public comment. Thus, the automatic approval provision should have to be rarely used, but it is available. Clearly, this provision is not to be construed as a signal to cut funds and resources at EPA.

The bill also makes a technical change allowing the EPA Administrator discretionary authority to delegate to regional administrators some or all approvals and disapprovals of SIP revisions. Present law apparently has been construed to preclude such delegations.

The bill provides an expedited program for handling non-controversial plan revisions. "Non-controversial revisions" would require notice in the Federal Register and would be Federally enforceable, just as if they were approved by EPA.

A "non-controversial revision" is generally defined as those revisions:

For which no person has filed with the State a written objection to the revision within 30 days after final State action;

Which were adopted by the State pursuant to EPA approved procedures, including notice and opportunity for public participation and notice and opportunity for participation by the Administrator;

Which, in the cases of changes in emission limitations, schedule or timetable for compliance, or provisions for a permit, affect stationary sources in operation when the changes are proposed and which do not permit increased emissions in significant allowable or actual amounts. This latter provision concerning emission, etc., changes must await EPA regulations. In promulgating such regulations, the Administrator must take into account the purposes of the Clean Air Act, the need to insure adequate public comment on, and review by the Administrator of, significant changes in emission limitations, schedules, timetables, and permit provisions, and the need for review by the Administrator of plan revisions which may affect air quality in more than one State.

Any non-frivolous objection will make a revision controversial and subject to the so-called "automatic" procedure.

Mr. Hambright, in his April 8, 1981 testimony, said:

"There is no satisfactory provision in the Federal statutory scheme for handling the inevitable special cases which most states treat as variances. Variances may be permanent or temporary and may apply to emission limits or to compliance schedules. Long term variances can be treated as SIP revisions but there are no provisions for short term variances in the Clean Air Act. By the time a three-month extension of an interim compliance deadline can receive SIP approval, for example, the new date will have long past, thus leaving the source exposed to Federal or citizen legal action even though the state may have granted a change which could not legally be disapproved by EPA."

The bill seeks to address this problem. It allows States to issue short-term variances to SIP's on the basis of an emergency, strike, act of God, fuel shortage, fuel disruption, temporary fuel change of any kind or nature, unusual circumstances, or other unforseeable event for no longer than 6 months. Variances may not be renewed on the basis of the same set of circumstances.

Non-controversial revisions and short-term variances will be deemed to be Federally approved when they are finally approved at the State level and published in the Federal Register in a form developed by EPA and the Office of Federal Register. The State will prepare them and send them directly to that office for publication pursuant to the Clean Air Act. They will then be treated as Federal agency documents and will be Federally enforceable and subject to judicial review in Federal court.

The bill also extends the current 9 month period to develop SIP's for new pollutants to a reasonable time (but not to exceed 24 months) and provides the Administrator with discretion to extend the time for meeting new standards on request of the Governor.

The bill requires the Administrator to conduct periodic audits of State implementation plans and compliance activities. Contractors are not to be used as suggested by STAPPA. States shall be notified of deficiencies. If the State fails to correct problems, the Administrator may require appropriate revision, suspend the non-controversial plan revision process, the short-term variance process, or invoke Sec. 110(a)(2)(H) [Federal revision] or any combination of these.

In providing this flexibility in the SIP revision process, we are placing a considerable amount of responsibility on the States to ensure that the revisions are made in compliance with the Act. We expect EPA to monitor State compliance carefully and fully. We expect the States to exercise these responsibilities judiciously.

The bill adds the following audit provision:

"Acting through full-time officers or employees of the United States and without the use of any authority to enter into contracts with any other person, the Administrator shall conduct periodic audits of applicable State implementation plans and other State activities required by this Act to determine whether or not such plans and activities are being carried out in compliance with the requirements of this Act. It is the intent of Congress that the Administrator shall exercise reasonable discretion in determining the frequency of audits and the extent of any specific audit in any state, taking into consideration the need to be satisfied that each State plan is, and that other State activities are, at all times in compliance with the requirements of this Act. Each State shall cooperate with the Administrator in the conduct of any such audit. The Inspector General shall periodically review the Administrator's audit activities under this subsection and report his findings to the Congress in accordance with the provisions of law applicable to him.

"The Administrator shall notify the State of any information, including any deficiency or problems concerning such plan or such State activities, derived from such audits. Where a State fails to correct any deficiency or problem noted by the Administrator within such period as the Administrator deems appropriate, the Administrator may, in addition to requiring any appropriate revision of the plan pursuant to section 110(a)(2)(H), suspend the application of the provisions of subsection (b), (c), or (d) of this section (or any combination thereof).

Reports of such audits shall be available to the State and the public.

Enforcement

The bill amends sections 113 and 120 of the Clean Air Act.

The section 113 amendments are designed primarily to give EPA some limited discretion in the choice of enforcement remedies. Current law (Sec. 113(a)) authorizes, where a person is found to be in violation that extends beyond 30 days issuance of an order to comply or an initiation of a civil action under section 113(b). However, section 113(b) requires, that in the case of a major stationary source, EPA must either commence a civil action to assess a civil penalty or for an injunction when the violation extends beyond 30 days after notice. This provision in the present law tends to nullify the discretion in the enforcement order.

The bill seeks to correct this problem, while making it clear that such orders must be of limited duration and that EPA must act promptly to either issue an order or begin a civil action. The objective is to ensure compliance and to provide effective envorcement tools.

The bill based on recent hearings by our Committee, makes it clear that EPA should not contract directly or indirectly with law firms to handle enforcement matters.

The section 120 changes generally seek to give discretion to EPA to use the noncompliance penalties and to provide that once the authority is delegated to the States, EPA will not be second-guessing the States. We should stress that we understand that this authority which is extremely complex has never been used primarily because of its complexity and mandatory features. We feel certain that the States would not welcome it in its present form.

Case-by-case attainment date extensions

The National Governor's Association recently said:

With greater responsibility, the states can and should be able to accommodate new industrial growth in nonattainment areas in accordance with a policy of achieving net air quality benefits and ensuring reasonable, steady progress toward attainment of the standards.

The Governors support the establishment of binding deadlines for the achievement of ambient air quality standards. The Clean Air Act should contain a provision allowing EPA to provide an extension for up to a statutorily specified period for areas with severe and persistent air quality problems.

For an area to qualify for such an extension, increasingly more stringent control strategies would have to be implemented over time. Failure to implement such strategies successfully should result in federal sanctions, tailored to the magnitude and nature of the failure. Use of inspection and maintenance programs should be required only when an area cannot project attainment by December 31, 1987, or fails to meet expected milestones.

The lowest achievable emission rate (LAER) requirement for new sources which emit more than 100 tons per year of any regulated pollutant in a nonattainment area is a limitation on economic development in urban areas with no significant improvements in air quality and encourages urban sprawl. All new sources should be evaluated equally under the Best Available Control Technology (BACT). The LAER concept should be dropped.

The bill would permit any State to seek and obtain on a case-by-case basis an extension of the 1982 attainment date for NAAQS pollutants to 1987. The Act now allows extensions until December 31, 1987 for ozone and carbon monoxide.

States are eligible to receive the extension if they:

Certify to the Administrator that attainment of such standard is not possible within the period prior to December 31, 1982 despite the implementation of all reasonably available measures; and

Makes a commitment that they will not modify the State Plan in a manner as will adversely affect reasonable further progress. (This is often referred to as the "no backslide" provision).

The EPA would decide the term of the extension, just as is the case of ozone and carbon monoxide under current law.

In addition, upon application of any State, the Administrator may grant an additional extension for a period not to exceed 6 years after the first extension for any of the pollutants, including ozone and carbon monoxide. This extension may be granted if the State demonstrates to the Administrator that:

The State has made reasonable further progress during the prior extension;

All applicable implementation plan provisions are being adequately implemented, including all provision relating to reasonable available control technology;

Air quality problems are so severe and persistent that the standard cannot be achieved;

The State has adopted and implemented a program for ensuring reasonable compliance by vehicles in use; and

The State has a reasonable and practical program for obtaining the standards within a specified period.

The bill makes it clear that this extension is discretionary with EPA and should not be easily obtained. EPA must be satisfied that the State has made a good faith effort in reducing pollution and achieving attainment.

It is certain that many areas of the country will fail to meet the federal air quality standards by the specified deadlines. This problem has come about, not because the States have not attempted to bring these areas into compliance on time, but because air pollution problems were more complex than Congress had anticipated. Failure to meet the air quality standards on time will trigger (or continue in place) severe sanctions halting new construction in these areas.

The National Commission on Air Quality, the States, industry and labor and environmentalists have all agreed that something must be done about this situation. The bill seeks to achieve this objective.

Sanctions

The bill modifies the construction ban sanction in the Act. The new sanction applies in nonattainment areas where a State fails to meet the statutory attainment deadline and fails to obtain an extension up to 1987. If this occurs, permits for major stationary sources which emit the particular air pollutant may not be issued under section 173 of the Clean Air Act for the construction or modification of any such source in that area. The requirement, however, may be waived on a case-by-case basis for new sources.

Federal sanctions against the State withholding sewer grants and highway funds are eliminated.

I and M

Part D of the Clean Air Act is amended to give the States some needed flexibility in regard to I and M, while continuing this provision. Instead of the rigid provision in section 172(b)(11)(B) of the Act, H.R. 5252 adds a new paragraph (12) t section 172(b).

In a nonattainment area which the Administrator determines to be an urban area having a population greater than 500,000 and in which the highest levels of photochemical oxidants and carbon monoxide for 1981 exceed the national ambient air quality standard for that pollutant by an amount equal to, or greater than 50 percent of the level specified in the primary national ambient air quality standard for that pollutant, the SIP must contain a cost-effective program applicable to in-use motor vehicle emissions which is not inconsistent with the purposes and requirements of the mobile source provisions of the Clean Air Act.

The program shall, where appropriate as determined by the applicable State, include a cost-effective program for vehicle inspection and maintenance, but in any such case, the inspection and maintenance program may, as determined by the State, apply first to motor vehicle fleets and commercial operators and then, at such time as the State determines that it is necessary for attainment, to other vehicles. Immediately after enactment of H.R. 5252, any State may review its implementation plan provisions respecting any nonattainment area within the State under which a motor vehicle inspection and maintenance program was adopted before the date of the enactment of H.R. 5252. If the State determines that such area is not such an urban area with greater than 50 percent of the pollutant, the State may, in its discretion, continue the I and M program, or submit a plan revision to modify or eliminate it.

Control technology

New sources proposing to build in these so-called nonattainment areas or existing source planning to modernize their plants will continue to be required to install the best systems of air pollution control. However, to simplify these requirements, Lowest Achievable Emission Rate (LAER)—the present definition of control technology for new sources in these areas—would be eliminated, effective upon enactment of this bill, and the control technology requirements for both PSD and nonattainment areas would be standardized as Best Available Control Technology (BACT).

The bill stresses that the States may require more stringent technology. It provides for case-by-BACT where there is no standard of performance established under section 111 of the Act.

Studies by the National Commission on Air Quality found that there has been little or no practical difference between BACT and LAER requirements in practice and that in the overwhelming majority of cases (over 90 percent) these requirements have been set equal to the federal New Source Performance Standards. These changes should simplify the current nonattainment program for building new plants and modernizing existing ones.

Prevention of significant deterioration

Included with Mr. Hambright's testimony was the STAPPA recommendations of December 10, 1980. In the case of PSD, they are:

"(1) Eliminate the incremental limits for air quality degradation for Class II and Class III areas;

"(2) Eliminate short-term increments for Class I areas;

"(3) Require BACT for all new sources in attainment and unclassified areas;

"(4) Change the PSD applicability threshold for all source categories to 100 tons per year after control for new sources and for aggregate increases of 100 tons per year for modified sources;

"(5) Retain the current requirement that NAAQS may not be violated;

"(6) Eliminate mandatory pre-application monitoring and modeling except where the state determines it to be necessary to demonstrate that NAAQS (or Class I increments, where applicable) will not be violated; and

"(7) Include fugitive sources of criteria pollutants in emission totals."

H.R. 5252 follows many of these recommendations.

The bill would eliminate the present increment requirements in Class II and Class III areas. In those areas it would continue in effect present requirements that every substantial industrial project obtain a government preconstruction approval, install best available technology, and demonstrate that it would cause no violations to applicable ambient air quality standards. The bill would make no change in the increment system requirements for Class I areas, except the current excedence provision for short-term increments.

It has been all but universally agreed by experts familiar with implementation of the PSD provisions that they have proved to be extremely cumbersome, bordering on unworkability, and that they have produced little or no actual air quality benefit. Studies have shown that in nearly every case of an industrial project undergoing PSD review, the mandated levels of pollution control have been derived from the BACT determination rather than from the increment requirements. The increment requirements, however, are the most time-consuming and costly and generate the greatest amount of confusion and unrealiability in their application. Moreover in the vast majority of Class III areas, ongoing progress in reducing air pollution from existing sources, together with tight controls on new sources, will provide a continuing improvement in total air quality with the result that the increment features will never have actual significance in the regulatory framework. Their elimination will, therefore, greatly simplify and streamline procedures for approval of industrial projects without, in our judgment, detrimental effects on air quality.

Special safeguards are warranted, however, in the Class I areas which typically included national parks or other areas of unique importance where pristine air quality provides a distinctive national value. In those areas the stringent increment provisions would be continued as a safeguard, notwithstanding that they may be in certain instances present severe problems for legitimate development projects.

In its policy guidelines included with its recent resolution the AFL-CIO said:

"Prevention of significant deterioration

"Congress should review the present requirements in classified clean air areas and rectify the complexity and uncertainty of obligations facing new industrial sources. Also, Congress should examine; the necessity of covering all sources, small or large; and shortening the preconstruction review process which has been severely criticized.

"Other current enforcement strategies such as, short-term tracking of increment consumption should be examined carefully to determine their real effect on air pollution control. Finally, state air control authorities should be specifically directed to exercise the flexibility granted them under law."

We believe that this bill is consistent with the AFL-CIO policy, as well as with the recent policy statements of the National Governor's Association.

New source performance standards

A requirement of the Clean Air Act is that EPA make determinations at to what constitutes best levels of pollution controls for various industry categories. This determination is called the New Source Performance Standard. It requires the pollution control standard to be designed into certain new plants.

Such a standard exists for coal-fired boilers used in power plants and other industrial sources. Set in 1971, this requirement specified certain performance requirements that these boilers had to meet. Companies were allowed to meet these standards in any way they could. For sulfur removal, for example, many could meet the standard by burning low sulfur coal.

Conditions changed in 1977. Amendments adopted by Congress ordered EPA to set new standards for both utility and industrial boilers which in addition to the standard compliance limits, coal-burning facilities would also have to remove a certain percentage of sulfur regardless of the coal's sulfur content.

This so-called percentage reduction requirement in practice requires the installation of costly stack-gas scrubbers.

The bill would prevent the percentage reduction requirement from being extended to industrial boilers which are small users of coal in this country. The addition of scrubbers to this source of boiler would add high costs to industry and the public with little or no benefit in air quality and could discourage expansion of coal production and use. While the law applies to these industrial boilers, it has not been applied to them by EPA, Thus, the bill does not really change existing requirements.

Chlorofluorocarbons (CFCs)

Chlorofluorocarbons or CFCs are a family of chemicals that have found extensive use as aerosol propellants, foam blowing agents, heat transfer media in air conditioning and refrigeration, solvents, chemical intermediates and in numerous other applications.

In the U.S., the major applications of CFCs include their use as a heat transfer agent in refrigeration and air conditioning, a blowing agent in the manufacture of flexible and rigid foams, and a solvent to clean and dry metals and electronic components. Numerous miscellaneous uses also exist, including food freezing, coal cleaning and personal protection warning devices.

Five manufacturers of CFCs supply approximately 5,000 direct purchsers of CFCs and tens of thousands of firms that purchase CFCs through distributors. At times the distribution chain involves five or six different firms, including a repackager. These distributors and users of CFCs included both large and small firms. Many ultimate users of CFCs are service establishments using small amounts of CFCs to recharge air conditioning and refrigeration systems. Other small businesses that use CFCs include building contractors, hospitals and clinics, and plants using CFCs as a solvent.

Part B of the Act is amended by H.R. 5252 to require the President to report to Congress within two years on the status of actions undertaken by the United States to reach international agreements concerning protection of the stratosphere. The objective is to encourage multi-lateral action, rather than unilateral action by the United States concerning the concentration of ozone in the stratosphere. EPA is doing this.

The bill also amends Section 157 of the Act to require findings and determination by EPA before any regulations are proposed or prescribed under this Section.

In the 1980 EPA issued an Advance Notice of Proposed Rulemaking which indicated that EPA was considering a proposed rule to limit nonaerosol use of CFCs. At recent hearings by our Health Subcommittee on CFCs, EPA's Director of the Office of Toxic Substances, Mr. Don R. Clay, said:

"EPA received over 2,000 comments on the Notice. It is clear that many segments of industry consider additional regulatory action—particularly the regulatory strategies discussed in the ANPR—to be premature and controversial. The Agency believes that the issues raised in these comments deserve considerable attention and further analysis which has been initiated.

"Any decision on EPA's future course of action regarding CFCs will need to reflect the fundamental problem of coping with the scientific uncertainties. Uncertainties about the impact, extent and direction of stratospheric ozone changes due to CFC emissions still remain. EPA recognizes that some uncertainties regarding whether depletion will occur, and what its magnitude would be, will probably remain for years. Domestic and international research efforts will continue to improve our understanding of the causes, magnitude, and potential effects of changes in stratospheric ozone. EPA intends to monitor and encourage support of research efforts by other nations, international organizations, industry, academia, and other agencies, where feasible. The data available from these many sources, carefully scrutinized, should enable us to determine whether additional regulatory measures need to be undertaken and, if so, when."

H.R. 5252 seeks to insure these matters before regulations are proposed or adopted. The bill, however, recognizes that once these determinations and findings are satisfied and there is an endangerment to public health or welfare EPA would be empowered under the Act to issue appropriate regulations. The EPA, however, must be satisfied that the concerns set forth in the amendment Section 157 are met.

TITLE II

Mobile source amendments

Lead time requirement

It provides, in setting more stringent standards, minimum lead times of 48 months for new heavy-duty vehicles and engines, and 36 months for all other new motor vehicles and engines.

Also, if in setting more stringent standards, EPA must insure that the standard reflects the degree of emission reduction determined to be reasonably achievable through application of technology that has been adequately demonstrated to be available for the model year to which the standard would apply. In making this determination, EPA must give appropriate consideration to costs, the applicability of the technology to gasoline or diesel fueled vehicles or engines, impact on fuel economy and other factors: The EPA will also consider studies required by Section 202(a)(3)(E).

Section 317 of the Act is not amended by the bill.

Heavy duty truck standards

The bill preserves current standards applicable to heavy duty trucks and EPA's authority to revise them. It provides that once more stringent standards for such trucks are promulgated, they must remain in effect for four years. Because of the unique concerns of trucks, standards for oxides of nitrogen and particulate matter must be prescribed at the same time.

Light duty vehicles standards

The bill establishes the following standards for passenger cars for model year 1982:

Carbon Monoxide-7.0 gpm (current law under waiver authority)

Oxides of Nitrogen-2.0 gpm

Hydrocarbons-41 gpm (current law unchanged)

There is no provision concerning methane.

The standards may be revised upward or downward by regulation effective in model year 1987 or thereafter, except the standards may not be more stringent than the standards established for model year 1981 and three year lead time provided.

According to estimates by the National Academy of Sciences, the National Commission on Air Quality, and EPA the difference in the impact on air quality between the two standards is negligible. EPA projects that by 1987 the total in-use car fleet would average 26.3 grams per mile under a 3.4 standard and 26.6 gpm under a 7.0 standard, a difference of only .3 gpm.

Presently, outside of California which sets its own vehicle standards, EPA has designated as non-attainment for nitrogen dioxide, only 2 (of the 3,215) counties in the country. These two, Chicago and Denver, are very marginal situations. In fact, Denver has not exceeded the national air quality standard since 1977 and ambient levels have dropped in Chicago since 1979. According to latest EPA estimates, total passenger car NOx emissions have decreased 13 percent since 1973 (the year that standards began). The largest annual reduction occurred in 1979 as new cars meeting the 2.0 g/m standard (which started in 1977) began to significantly impact with the favorable result of reduced emissions from the total on-the-road fleet.

After 1986, the EPA Administrator may revise the passenger car emissions standards carbon monoxide (CO) and oxides of nitrogen (NO_x) to more stringent levels.

The present requirements of the Act specifying exact percentage reductions for emissions from heavy-duty vehicles would be revised to permit EPA to adopt standards which provide a reasonable level of control in terms of air quality need, technological feasibility and cost effectiveness. Ninety percent reduction standards for HC and CO would require costly (about $900 per truck) catalyst technology for gasoline power trucks. Such standards would, according to EPA, result in only an improvement in air quality of 2 percent for ozone and 7 percent for CO. Marginally less stringent standards would avoid this cost with no discernible adverse impact on air quality.

The seventy five percent reduction standard for NO_x has been found by EPA (and the National Academy of Sciences) to be infeasible for diesel trucks.

Standards hould be based on demonstrated air quality need and not on abstract percentage reduction pre-determinations.

High altitude

Separate standards for high altitude areas would be retained. The present approach with regard to vehicles sold in high altitude areas (providing for emission reductions proportional to those required at low altitude) would be continued beyond model year 1983. Permitting vehicles to be designed to meet standards at sea level or high altitude depending on their area of use is essential, to avoid the unnecessary cost, performance, and fuel economy penalties the present law would impose on the 97 percent of the fleet not sold at altitude. EPA would be authorized to compile and report to Congress data in the event concerns arise about model availability in high altitude areas.

Warranty

With respect to warranty provisions of the Act covering emission control devices, the period would be reduced to 24 months or 24,000 miles. This amendment would not affect either the initial 5 year/50,000 mile certification process or the Administration's recall authority which extends for 5 years or 50,000 miles. This action is prompted by concerns about the anti-competitive effect of the extended warranties, particularly as studies of the recently implemented California program point to serious distortions in the marketplace.

Authorize the EPA to provide following rulemaking procedures alternatives to current testing methods.

Provide that if EPA determines that, based on a statistically valid and representative sample of vehicles, any class or category of vehicles or engines, although properly maintained, used, and adjusted, do not on an average conform to the standards, the EPA must notify the manufacturer. The manufacturer then must promptly submit a corrective action plan to be approved by EPA that could include recall or some other acceptable enforcement mechanism.

Require EPA to examine by a study the existing air pollution control program to determine its efficacy and, if appropriate, to develop alternative, practicable approaches to the control of emissions from mobile sources. Any new approaches must not diminish current air quality protection, help stimulate economic growth, reduce costs. The competitive effects of any new approach must be assured.

A report of the study must be submitted to Congress within a year after public comment thereon.

If findings concerning feasibility, air quality, and competition are made, EPA can develop proposed regulations meeting certain criteria. The regulations cannot be finalized except with the approval of Congress.

TITLE III

Authorization for appropriations

The bill contains at the fiscal year 1981 authorization levels, funding for the Clean Air Act with particular emphasis for funding of State programs including training of State and local personnel as recommended by STAPPA in their testimony before the Senate Committee on Environment and Public Works as delivered by the Environmental Protection Agency Director of Illinois. The funding levels of H.R. 5252 do not include funds for research and development because we believe that is a matter considered by the Committee on Science and Technology.

This funding level would be for three years and is particularly important to the States in light of the increased responsibility provided by this bill.

Additionally, the proposals in H.R. 5252 to amend the Act are substantially consistent with the AFL-CIO Resolution on Environmental Policy and the AFL-CIO policy-guideline on Congressional review of the Clean Air Act as adopted last month at the union's convention.

Also the provisions of H.R. 5252 are reasonably consistent with the previously announced Administration principles on the Clean Air Act.

In addition, H.R. 5252 makes a number of important changes aimed at correcting concerns about the provisions of H.R. 4400 relating to innovative waivers, averaging, testing, certification, and recall, as well as the studies in the bill. These concerns were expressed by the United Auto Workers Union who support H.R. 4400, as revised in H.R. 5252, and at hearings chaired by our distinguished colleague from California, Mr. WAXMAN.

We want to particularly extend our appreciation to Chairman WAXMAN and the diligent efforts of his Subcommittee staff for the extensive hearings conducted since last September on the Clean Air Act and on proposed legislative changes in that Act. Those hearings helped us develop this bill and crystalize our thinking on these matters. We think we can now move to the markup stage in the traditionally bipartisan approach adopted over the years on Clean Air by Senators Muskie and BAKER and by Congressmen STAGGERS and BROYHILL and more recently by Senators STAFFORD, RANDOLPH, and HART.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. RUSSO (at the request of Mr. WRIGHT), for today, on account of illness.

Mr. LELAND (by himself), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CLINGER) to revise and extend their remarks and include extraneous material:)

Mr. FRENZEL, for 20 minutes, today.

Mr. MICHEL, for 60 minutes, today.

Mr. HAMMERSCHMIDT, for 5 minutes, today.

Mr. LEACH OF IOWA, for 60 minutes, today.

(The following Members (at the request of Mr. SWIFT) to revise and extend their remarks and include extraneous matter:)

Mr. WRIGHT, for 60 minutes, today.

Mr. LAFALCE, for 15 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. COELHO, for 5 minutes, today.

Mr. BROOKS, for 5 minutes, today.

Mr. LUKEN, for 5 minutes, today.

Mr. DANIELSON, for 5 minutes, today.

Mr. BEDELL, for 5 minutes, today.

Mr. FUQUA, for 10 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. SHAMANSKY, for 5 minutes, today.
Mr. WIRTH, for 5 minutes, today.
Mr. WEISS, for 5 minutes, today.
Mr. CROCKETT, for 5 minutes, today.
Mr. RODINO, for 5 minutes, today.
Mr. BONKER, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. MINETA, for 5 minutes, today.
Mr. ALEXANDER, for 10 minutes, today.
Mrs. BOGGS, for 10 minutes, today.
Mr. FOLEY, for 5 minutes, today.
Mr. PANETTA, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. WEISS, immediately before the vote on the conference report to H.R. 4331 in the House today.

Mr. MOFFETT, to revise and extend his remarks to appear before the vote on S. 1196, foreign assistance conference report.

Mr. LIVINGSTON, remarks to be included at end of debate on H.R. 4331, Social Security Amendments of 1981 conference report.

Mr. SILJANDER, to revise and extend his remarks and include extraneous matter after vote on conference report on foreign aid appropriations.

Mr. PATTERSON, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $2,160.

Mr. PATTERSON, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $3,840.

Mr. PERKINS, to revise and extend his remarks immediately after the remarks of the gentleman from North Carolina (Mr. ANDREWS) on the Older Americans Act.

Mr. SCHEUER, and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $2,040.

Mr. LUKEN, and to include extraneous material on the Clean Air Act amendments of 1981.

Mr. SENSENBRENNER, immediately following the vote on H.R. 5274.

Mr. CLINGER, immediately following the vote on H.R. 5274 today.

Mr. PORTER, immediately preceding the vote on the conference report on H.R. 4559.

Mr. DOUGHERTY, immediately following the vote on H.R. 4331.

Mr. WEISS, to revise and extend his remarks, immediately after oil merger moratorium resolution.

(The following Members (at the request of Mr. CLINGER) and to include extraneous matter:)

Mr. DANIEL B. CRANE.
Mr. LEWIS.
Mr. STANTON OF OHIO.

SENATE JOINT RESOLUTIONS REFERRED

Joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 117. Joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week"; to the Committee on Post Office and Civil Service; and

S.J. Res. 134. Joint resolution to designate 1982 as the "National Year of Disabled Persons"; to the Committee on Post Office and Civil Service.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 4241. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes;

H.R. 4331. An act to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act;

H.R. 4431. An act to provide for the designation of the E. Michael Roll Post Office; and

H.R. 4926. An act to authorize the Secretary of the Army to acquire by purchase or condemnation, such interests in oil, gas, coal, and other minerals owned or con-

trolled by the Osage Tribe of Indians as are needed for Skiatook Lake, Okla., and for other purposes.

A BILL PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on December 15, 1981, present to the President, for his approval, a bill of the House of the following title:

H.R. 4845. A bill to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebr., as the "Robert V. Denney Federal Building and Courthouse."

ADJOURNMENT SINE DIE

Mr. WRIGHT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to .

The SPEAKER pro tempore (Mr. COELHO). In accordance with the provisions of Senate Concurrent Resolution 57, the Chair declares the 1st session of the 97th Congress adjourned sine die.

Thereupon (at 11 o'clock and 22 minutes p.m.), pursuant to Senate Concurrent Resolution 57, the House adjourned.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2698. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Plant Quarantine Act of August 20, 1912, as amended, to eliminate certain unnecessary regulatory requirements; to the Committee on Agriculture.

2699. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the act of July 2, 1962, to authorize intrastate quarantines under extraordinary emergency conditions; to the Committee on Agriculture.

2700. A letter from the Principal Deputy Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics), transmitting a report on Selected Reserve recruiting and retention incentives, pursuant to 10 U.S.C. 2134, 37 U.S.C. 308b, and 37 U.S.C. 308c; to the Committee on Armed Forces.

2701. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the publishing distribution office function at Wright-Patterson Air Force Base, Ohio, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Forces.

2702. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment and services to Korea (Transmittal No. 82-17), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2703. A letter from the Assistant Attorney General for Legislative Affairs, transmitting the annual report on enforcement of title II (extortionate credit transactions) of the Consumer Credit Protection Act, covering fiscal year 1981, pursuant to section 203 of the act; to the Committee on Banking, Finance and Urban Affairs.

2704. A letter from the Secretary of the Interior, transmitting a draft report on definitions and delineation criteria for undeveloped coastal barriers, pursuant to section 1321(c)(2) of the National Flood Insurance Act of 1968, as amended (97 Stat. 419); to the Committee on Banking, Finance and Urban Affairs.

2705. A letter from the Chairman, President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research, transmitting the annual report of the Commission for fiscal year 1981, pursuant to section 1802(d) of the Public Health Service Act, as amended; to the Committee on Energy and Commerce.

2706. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense services to Canada (Transmittal No. 82-15), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2707. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to Korea (Transmittal No. 82-17), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2708. A letter from the Acting Director, Defense Security Assistance Agency, withdrawing the notice of the Air Force's intention to offer to sell certain defense equipment and services to Venezuela (Transmittal No. 82-12), previously transmitted pursuant to section 36(b) of the Arms Export Control Act (Executive Communication No. 2639); to the Committee on Foreign Affairs.

2709. A letter from the Acting Administrator, Panama Canal Commission, transmitting a report covering fiscal year 1981 on the Commission's disposal of foreign excess property, pursuant to former section 404(d) of the Federal Property and Administrative Services Act of 1949; to the Committee on Government Operations.

2710. A letter from the Acting Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of judgment funds awarded to the Lac du Flambeau Band of Lake Superior Chippewa Indians of Wisconsin in Dockets Nos. 18-C and 18-T before the U.S. Court of Claims, pursuant to section 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

2711. A letter from the Clerk, U.S. Court of Claims, transmitting the court's judgment order in Docket No. 119, *The Sioux Tribe of Indians, etc.* v. *The United States;* to the Committee on Interior and Insular Affairs.

2712. A letter from the Special Assistant to the President for Administration, transmitting a report on the total number of employees employed at any time during fiscal year 1981 in the White House Office, the Executive Residence at the White House, the Office of the Vice President, the Office of Policy Development (Domestic Policy Staff), and the Office of Administration, pursuant to 3 U.S.C. 113; to the Committee on Post Office and Civil Service.

2713. A letter from the Comptroller General of the United States, transmitting a report on losses of revenue to the Government because of low medical care charges to liable third parties (AFMD-82-2, December 16, 1981); jointly, to the Committees on Government Operations and the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LONG of Maryland: Committee of conference. Conference report on H.R. 4559 (Rept. No. 97-416). Ordered to be printed.

Mr. DINGELL: Committee on Energy and Commerce. House Concurrent Resolution 178. Concurrent resolution disapproving the Federal Trade Commission trade regulation rule relating to the sale of used motor vehicles. (Rept. No. 97-417). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BRINKLEY (for himself and Mr. TRIBLE):

H.R. 5241. A bill to amend title 10, United States Code, to revise and codify the permanent provisions of law relating to military construction and military family housing; to the Committee on Armed Services.

By Mr. COLLINS of Texas:

H.R. 5242. A bill to amend the Communications Act of 1934 in order to establish new procedures for the renewal, assignment, and transfer of broadcast licenses, to provide certain deregulation of broadcast services, and for other purposes; to the Committee on Energy and Commerce.

By Mr. PHILIP M. CRANE:

H.R. 5243. A bill entitled the "Fair Treatment for Skilled Trades Act of 1982"; to the Committee on Education and Labor.

HR. 5244. A bill to amend the Housing and Community Development Act of 1974 for the purpose of providing guaranteed loans under title I of such act to assist communities with a shortage of water supply; to the Committee on Banking, Finance and Urban Affairs.

H.R. 5245. A bill to reduce expenditures by the Federal Government by 5 percent for the fiscal year 1982; to the Committee on Government Operations.

H.R. 5246. A bill to remove statutory limitations upon the application of the Sherman Act to labor organizations and their activities, and for other purposes; to the Committee on the Judiciary.

H.R. 5247. A bill directing the Secretary of Defense to exercise complete control over the Panama Canal unless and until an appropriate committee in Congress determines, on the basis of an investigation that the Government of Panama did not engage in certain acts not in the national security interests of the United States; to the Committee on Merchant Marine and Fisheries.

H.R. 5248. A bill to eliminate any requirement in the Internal Revenue Code of 1954 of a holding period to qualify a transaction for long-term capital gain treatment; to the Committee on Ways and Means.

H.R. 5249. A bill to establish "National Tax Liberation Day" as a legal public holiday; jointly, to the Committees on Post Office and Civil Service and Ways and Means.

By Mr. FOLEY:

H.R. 5250. A bill to amend the copyright law to exempt private, nonprofit recording of copyrighted works on video recorders from copyright infringement; to the Committee on the Judiciary.

By Mr. GUARINI:

H.R. 5251. A bill to reinstate the national trigger provisions which were part of the extended unemployment compensation program before they were repealed by the Omnibus Budget Reconciliation Act of 1981; to the Committee on Ways and Means.

By Mr. LUKEN (for himself, Mr. MADIGAN, Mr. TRAXLER, Mr. HILLIS, Mr. DINGELL, and Mr. BROYHILL):

H.R. 5252. A bill to amend the Clean Air Act; to the Committee on Energy and Commerce.

By Mr. FUQUA:

H.R. 5253. A bill to name the U.S. Post Office, courthouse, and Federal building in Gainesville, Fla., the "D. R. (Billy) Matthews Federal Building"; to the Committee on Public Works and Transportation.

By Mr. FUQUA (for himself and Mr. WALGREN):

H.R. 5254. A bill to provide a national policy for engineering, technical, and scientific manpower, to create a national coordinating Council on Engineering and Scientific Manpower, and for other purposes; to the Committee on Science and Technology.

By Mr. JEFFRIES:

H.R. 5255. A bill to amend the General Education Provisions Act to reduce the period for which records must be retained by recipients of funds under Federal education programs; to the Committee on Education and Labor.

H.R. 5256. A bill to amend the General Education Provisions Act to reduce the period for which records must be retained by recipients of funds under programs administered by the Rehabilitation Services Administration; to the Committee on Education and Labor.

By Mr. JOHNSTON (for himself, Mr. NAPIER, and Mr. SOLOMON):

H.R. 5257. A bill to amend the Fair Labor Standards Act of 1938 relating to employees of the House of Representatives; to the Committee on Education and Labor.

H.R. 5258. A bill to amend the Occupational Safety and Health Act of 1970 to require the House of Representatives to establish and maintain an effective and comprehensive occupational safety and health program; to the Committee on Education and Labor.

H.R. 5259. A bill to amend title VII of the Civil Rights Act of 1964 relating to nondiscrimination in employment by the House of Representatives; to the Committee on Education and Labor.

By Mr. KOGOVSEK:

H.R. 5260. A bill to amend the Mineral Leasing Act of 1920 to provide for the disposition of certain revenues; to the Committee on Interior and Insular Affairs.

By Mr. LAFALCE:

H.R. 5261. A bill to establish Federal product liability tort law standards; to the Committee on Energy and Commerce.

By Mr. MAVROULES:

H.R. 5262. A bill to amend the Buy American Act to require any component costing more than $10,000 to be separately evaluated for domestic origin under such act; to the Committee on Government Operations.

By Mr. MARLENEE:

H.R. 5263. A bill to prohibit the issuance of mineral leases in the Bob Marshall Wilderness Area in the State of Montana; to the Committee on Interior and Insular Affairs.

By Ms. OAKAR (for herself, Mr. PEPPER, Mr. WRIGHT, Mr. VENTO, Mr. ST GERMAIN, Mr. JONES of Tennessee, Ms. FERRARO, Ms. MIKULSKI, Mrs. BOGGS, Mrs. SCHROEDER, Mr. BIAGGI, Mr. SHANNON, Mr. PEYSER, Mr. RATCHFORD, Mr. MARKEY, Mr. LUNDINE, Mr. OTTINGER, Mr. HOYER, Mr. BARNES, Mr. LONG of Maryland, Mr. MOFFETT, Mr. RUSSO, Mr. SAVAGE, Mr. ECKART, Mr. OBERSTAR, Mr. STOKES, and Mrs. COLLINS of Illinois):

H.R. 5264. A bill to restore minimum benefits under title II of the Social Security Act with respect to existing and future beneficiaries; to the Committee on Ways and Means.

By Mr. RUSSO:

H.R. 5265. A bill to amend the Internal Revenue Code of 1954 to clarify the treatment of outdoor advertising displays for purposes of the accelerated cost recovery system; to the Committee on Ways and Means.

By Mr. VOLKMER:

H.R. 5266. A bill to amend the Internal Revenue Code of 1954 with respect to the at risk rules applicable to the investment tax credit; to the Committee on Ways and Means.

H.R. 5267. A bill to amend the Internal Revenue Code of 1954 to repeal certain windfall profit tax changes enacted by the Economic Recovery Tax Act of 1981, to repeal the special treatment of horses under the accelerated cost recovery system enacted by such act, and to repeal the special leasing rules enacted by such act; to the Committee on Ways and Means.

By Mr. WAMPLER (by request):

H.R. 5268. A bill entitled the "Federal Meat Inspection Act Amendments of 1981"; to the Committee on Agriculture.

By Mr. WEISS:

H.R. 5269. A bill to amend the National School Lunch Act to eliminate as a condition of eligibility for receipt of free or reduced-price lunches that the social security account numbers of all adult members of a household be provided on the application for such assistance; to the Committee on Education and Labor.

H.R. 5270. A bill to amend the National School Lunch Act to provide that income used for certain special hardship conditions shall not be included as income for purposes of determining eligibility for free or reduced-price lunches; to the Committee on Education and Labor.

By Mr. WHITE:

H.R. 5271. A bill to amend the Freedom of Information Act to limit the disclosure to foreign countries of information held by the U.S. Government, and for other purposes; to the Committee on Government Operations.

By Mr. WINN:

H.R. 5272. A bill to provide private sector training and placement opportunities for residents of enterprise zones, emphasizing the use of community-based organizations and the involvement of small business concerns, and for other purposes; to the Committee on Education and Labor.

By Mr. BARNES:

H.R. 5273. A bill to allow the George Washington University Higher Education Facilities Revenue Bond Act of 1981 of the District of Columbia to take effect immediately; considered and passed.

By Mr. BROWN of Ohio:

H.R. 5274. A bill to provide for congressional evaluation of energy policy by imposing a moratorium on certain acquisitions involving major energy concerns and domestic petroleum companies until June 30, 1982; jointly, to the Committees on Energy and Commerce and the Judiciary.

By Mr. DE LA GARZA:

H.R. 5275. A bill to extend the delay in making any adjustment in the price support level for milk, and to extend the time for conducting referendums with respect to marketing quotas for wheat, upland cotton, and rice; to the Committee on Agriculture.

By Mr. ATKINSON (for himself, Mr. BOWEN, Mr. LUKEN, Mr. APPLEGATE, and Mr. WILLIAMS of Ohio):

H.R. 5276. A bill to provide assistance for transportation improvement projects; jointly, to the Committees on Energy and Commerce, Public Works and Transportation, and Ways and Means.

By Mr. BARNARD:

H.R. 5277. A bill to dispose of unclaimed property from closed national banks; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BEDELL (for himself, Mr. BEREUTER, Mr. HARKIN, Mr. SMITH of Iowa, Mr. LEACH OF IOWA, MR. TAUKE, Mr. EVANS OF IOWA, MR. DAUB, Mr. GEPHARDT, Mr. SKELTON, Mr. VOLKMER, Mr. COLEMAN, Mr. BAILEY OF MISSOURI, MR. WHITTAKER, Mr. TAYLOR, Mr. EMERSON, and Mr. MARLENEE):

H.R. 5278. A bill to prohibit any State from selling or otherwise transferring interstate waters located in such State for use outside such State unless all other States in the drainage basin of such waters consent to such sale or transfer; to the Committee on Interior and Insular Affairs.

By Mr. BENNETT:

H.R. 5279. A bill to insure equal consideration of nonstructural water resources projects and plans, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. BIAGGI:

H.R. 5280. A bill to establish a Department of Older Americans, and for other purposes; to the Committee on Government Operations.

By Mr. BONKER:

H.R. 5281. A bill to establish the Mount St. Helens National Volcanic Area, Wash.; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. PHILLIP BURTON:

H.R. 5282. A bill to withdraw the National Wilderness Preservation System and other lands from operation of the general mining and mineral leasing laws; to the Committee on Interior and Insular Affairs.

By Mr. ROBERT W. DANIEL, JR. (for himself, Mr. WHITEHURST, and Mr. TRIBLE):

H.R. 5283. A bill to terminate the authorization for a portion of the Norfolk Harbor and Thimble Shoal Channel, Va., improvement project; to the Committee on Public Works and Transportation.

By Mr. ECKART (for himself, Mr. LOWRY of Washington, Mr. BROOKHEAD, Mr. DICKS, Mr. COELHO, Mr. FORD of Michigan, Mr. HERTEL, Mr. MCHUGH, Mr. DOWNEY, Mr. WILLIAMS of Ohio, Mr. PERKINS, Mr. FOGLIETTA, Mr. MOTTL, Mr. DENAR-

DIS, Mr. WOLPE, Mr. FLIPPO, Mr. OBERSTAR, Mr. EDGAR, Mr. CLAY, Mr. STOKES, Ms. OAKAR, Ms. FERRARO, Mr. HOLLENBECK, Mrs. COLLINS of Illinois, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. TRAXLER, and Mr. YOUNG of Alaska):

H.R. 5284. A bill to repeal the changes made by the Omnibus Budget Reconciliation Act of 1981 in the trigger provisions contained in the extended unemployment compensation program; to the Committee on Ways and Means.

By Mr. FAUNTROY:

H.R. 5285. A bill to amend title 11 of the District of Columbia Code to require the Council of the District of Columbia to establish the fees for jurors serving in the Superior Court of the District of Columbia; to the Committee on the District of Columbia.

H.R. 5286. A bill to convey the District of Columbia Employment Security Building to the District of Columbia and to provide for the payment of a note entered into to finance the construction of such building; to the Committee on the District of Columbia.

By Mr. FRANK:

H.R. 5287. A bill to amend the Immigration and Nationality Act with respect to aliens who seek to enter the United States to do research at colleges and universities; to the Committee on the Judiciary.

By Mr. GREGG (for himself and Mr. JEFFORDS):

H.R. 5288. A bill granting the consent of Congress to the compact between the States of New Hampshire and Vermont concerning solid waste; to the Committee on the Judiciary.

By Mr. GUARINI:

H.R. 5289. A bill to provide that the Federal tax rules applicable to certain private deferred compensation plans shall apply to deferred compensation plans of tax-exempt organizations; to the Committee on Ways and Means.

By Mrs. HECKLER:

H.R. 5290. A bill to provide that petroleum company overcharges payable to the United States shall be available for low-income energy assistance and weatherization, and for other purposes; to the Committee on Energy and Commerce.

H.R. 5291. A bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased individuals and in the location of missing children; to the Committee on the Judiciary.

H.R. 5292. A bill to amend the Internal Revenue Code of 1954 to provide that the standard mileage rate for use of a passenger automobile which may be used in computing the charitable contribution deduction shall be the same as the standard mileage rate which may be used in computing the business expense deduction; to the Committee on Ways and Means.

H.R. 5293. A bill to amend the Internal Revenue Code of 1954 to provide tax relief to residential users of refined petroleum products; to the Committee on Ways and Means.

H.R. 5294. A bill to provide additional assistance to small business concerns in acquiring procurement information and contracts from the United States; to the Committee on Small Business.

By Mr. HERTEL:

H.R. 5295. A bill to prohibit the issuance of Federal oil and gas leases in the Great Lakes; to the Committee on Interior and Insular Affairs.

By Mr. HERTEL (for himself, Mr. BRODHEAD, and Mr. HILLIS):

H.R. 5296. A bill to amend title 10, United States Code, to prohibit the purchase of foreign-made administrative motor vehicles by the Department of Defense; to the Committee on Armed Services.

By Mr. LONG of Maryland:

H.R. 5297. A bill to amend part D of title IV of the Social Security Act to provide that the procedures which are presently available to AFDC families for the collection of past-due child and spousal support from Federal tax refunds shall also be available to non-AFDC families; to the Committee on Ways and Means.

By Mr. MINETA (for himself and Mr. SNYDER):

H.R. 5298. A bill to require members of the National Transportation Safety Board to be chosen from individuals with expertise in the fields of accident reconstruction, safety engineering, transportation safety, or transportation regulation; jointly, to the Committees on Energy and Commerce and Public Works and Transportation.

By Mr. MORRISON:

H.R. 5299. A bill to authorize the Secretary of the Interior to construct, operate, and maintain an enlarged Bumping Lake, Supplemental Storage Division, Yakima project, Washington; to the Committee on Interior and Insular Affairs.

By Mr. MORRISON (for himself and Mr. SKEEN):

H.R. 5300. A bill to amend the act of June 24, 1938, to allow the Secretary of the Interior to invest certain funds collected by Indian irrigation and power projects; to the Committee on Interior and Insular Affairs.

By Mr. MORRISON (for himself, Mr. PRITCHARD, Mr. BONKER, and Mr. SWIFT):

H.R. 5301. A bill to authorize the Secretary of the Interior to construct, operate, and maintain a Yakima River fish facilities improvement project; to the Committee on Interior and Insular Affairs.

By Mr. NOWAK (for himself and Mr. MARRIOTT):

H.R. 5302. A bill to amend the Small Business Investment Act of 1958 to improve the operations of small business investment companies; to the Committee on Small Business.

By Mr. O'BRIEN:

H.R. 5303. A bill to amend the Milwaukee Railroad Restructuring Act to facilitate the purchase of lines of bankrupt rail carriers to provide for continued rail service, and for other purposes; to the Committee on Energy and Commerce.

By Mr. RINALDO:

H.R. 5304. A bill to amend part A of title XVIII of the Social Security Act to provide for medicare coverage of alcohol detoxification facility services; jointly to the Committees on Ways and Means and Energy and Commerce.

By Mr. SEIBERLING:

H.R. 5305. A bill to amend the Internal Revenue Code of 1954 to repeal the special leasing rules added by the Economic Recovery Tax Act of 1981 which permit transfers of tax benefits, and for other purposes; to the Committee on Ways and Means.

By Mr. DASCHLE:

H.J. Res. 379. Joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week"; to the Committee on Post Office and Civil Service.

By Mr. LUKEN (for himself and Mr. DORNAN of California):

H.J. Res. 380. Joint resolution proposing an amendment to the Constitution of the United States with respect to the right to life; to the Committee on the Judiciary.

By Mr. PANETTA:

H.J. Res. 381. Joint resolution to designate the week beginning April 4, 1982, as "National Philippine Veteran Week"; to the Committee on Post Office and Civil Service.

By Mr. WIRTH (for himself, Mr. BONKER, Mr. FRANK, and Mr. LANTOS):

H. Con. Res. 241. Concurrent resolution expressing the sense of the Congress with respect to the continued internal exile and treatment by the Government of the Soviet Union of Andrei Sakharov and his wife, Yelena Bonner; to the Committee on Foreign Affairs.

By Mr. FLORIO (for himself, Mr. RODINO, Mr. WEAVER, Mr. PATTERSON, Mr. DELLUMS, Mr. FAUNTROY, Mr. WOLF, and Mr. WEISS):

By Mr. McEWEN:

H.R. 5306. A bill for the relief of Djamel Mahmoudi; to the Committee on the Judiciary.

By Mr. SHUMWAY:

H.R. 5307. A bill to validate conveyances of certain lands in the State of California that form part of the right-of-way granted by the United States to the Central Pacific Railway Co.; to the Committee on Interior and Insular Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 800: Mr. ADDABBO, Mr. AKAKA, Mr. ANDERSON, Mr. AUCOIN, Mr. BARNES, Mr. BINGHAM, Mr. BOLAND, Mr. BROWN of California, Mr. JOHN L. BURTON, Mr. CORRADA,

Mr. JAMES K. COYNE, Mr. DE LUGO, Mr. DENARDIS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. FASCELL, Mr. FAZIO, Mrs. FENWICK, Mr. FISH, Mr. FOGLIETTA, Mr. FOWLER, Mr. FRANK, Mr. FROST, Mr. GINGRICH, Mr. GOLDWATER, Mr. HORTON, Mr. HOYER, Mr. KILDEE, Mr. KOGOVSEK, Mr. LOWRY of Washington, Mr. MCCLOSKEY, Mr. MCHUGH, Mr. MCKINNEY, Mr. MATTOX, Mr. MAZZOLI, Ms. MIKULSKI, Mr. MINETA, Mr. PANETTA, Mr. PATTERSON, Mr. PEPPER, Mr. RAHALL, Mr. REUSS, Mr. ROE, Mr. ROSENTHAL, Mr. RUSSO, Mr. SABO, Mr. SCHUMER, Mr. SEIBERLING, Mr. SHARP, Mr. SIMON, Mr. SMITH of Pennsylvania, Mr. STARK, Mr. STRATTON, Mr. TRAXLER, Mr. UDALL, Mr. VENTO, Mr. WAXMAN, Mr. WEISS, Mr. WOLPE, Mr. YATES, and Mr. GEJDENSON.

H.R. 983: Mr. DREIER.

H.R. 1300: Mr. NICHOLS.

H.R. 1325: Mr. TRIBLE.

H.R. 1597: Mr. ASHBROOK.

H.R. 1648: Mr. TAYLOR, Mr. COLLINS of Texas, and Mr. SMITH of Pennsylvania.

H.R. 1657: Mr. OBERSTAR.

H.R. 2007: Mrs. HOLT and Mr. ALEXANDER.

H.R. 2488: Mr. SMITH of Pennsylvania, Mr. WOLPE, Mr. KRAMER, Mr. MCKINNEY, Mr. LENT, Mr. WOLF, and Mr. SCHUMER.

H.R. 2597: Mr. GUARINI, Mr. HYDE, Mr. ROEMER, Mr. BAILEY of Pennsylvania, Mr. MONTGOMERY, Mr. COLLINS of Texas, Mr. SYNAR, Mr. BRINKLEY, Mr. WINN, Mr. MCCURDY, Mr. DANIEL B. CRANE, and Mr. DAUB.

H.R. 2828: Mr. CARNEY, Mr. DENARDIS, Mr. DERWINSKI, Mr. ECKART, Mr. FITHIAN, Mr. HANSEN of Idaho, Mr. LEVITAS, Mrs. ROUKEMA, Mr. WAXMAN, and Mr. YOUNG of Alaska.

H.R. 3028: Mr. NEAL.

H.R. 3031: Mr. PEPPER, Mr. BARNARD, and Mr. HANSEN of Idaho.

H.R. 3038: Mr. NEAL.

H.R. 3236: Mr. WILSON.

H.R. 3269: Mr. HYDE, Mr. MOORHEAD, Mr. DYMALLY, and Mr. MAVROULES.

H.R. 3526: Mr. RALPH M. HALL.

H.R. 3624: Mr. NAPIER, Mr. BAFALIS, Mr. DAUB, Mr. ROTH, Mr. SIMON, and Mr. FORSYTHE.

H.R. 3626: Mr. NAPIER, Mr. BAFALIS, Mr. DAUB, Mr. ROTH, Mr. SIMON, and Mr. FORSYTHE.

H.R. 3824: Mr. MCGRATH.

H.R. 3940: Mr. FOGLIETTA and Mr. EDGAR.

H.R. 3984: Mr. MARLENEE, Mr. SKEEN, and Mr. ENGLISH.

H.R. 4159: Mr. NEAL.

H.R. 4227: Mr. DORGAN of North Dakota, Mr. BINGHAM, and Mr. HARKIN.

H.R. 4309: Mr. SAWYER, Mr. HAGEDORN, and Mr. SABO.

H.R. 4326: Mr. GUARINI, Mr. DE LA GARZA, Mr. GAYDOS, Mr. ALBOSTA, and Mr. FIELDS.

H.R. 4449: Mr. HUNTER.

H.R. 4454: Mr. BADHAM, Mr. BEREUTER, Mrs. BYRON, Mr. DAUB, Mr. GRISHAM, Mr. GUARINI, Mr. JOHNSTON, Mr. KAZEN, Mr. LENT, Mr. MCEWEN, Mr. MONTGOMERY, Ms. OAKAR, Mr. PASHAYAN, Mr. ROE, Mr. SHELBY, Mr. SHUMWAY, Mr. TAYLOR, Mr. THOMAS, Mr. WINN, and Mr. WON PAT.

H.R. 4467: Mr. YATRON.

H.R. 4550: Mr. BARNES, Mr. GINGRICH, Mr. LENT, Mr. NELLIGAN, Mr. ROTH, Mr. SCHUMER, Mr. AKAKA, Mr. SMITH of New Jersey, Mr. RAILSBACK, and Mr. WOLPE.

H.R. 4617: Mr. GARCIA, Mr. FOGLIETTA, Mr. ADDABBO, Mr. MOLLOHAN, Mr. JOHN L. BURTON, Mr. ROSENTHAL, Mr. CROCKETT, Mr. SMITH of Pennsylvania, Mrs. CHISHOLM, Mr. CLAY, Mr. MINETA, Mr. RODINO, Mr. WEISS, Mr. MURPHY, Mr. OTTINGER, Mr. MAVROULES, Mr. FROST, Ms. MIKULSKI, Mrs. COLLINS of Illinois, Mr. SOLARZ, and Mr. GEJDENSON.

H.R. 4653: Mr. WON PAT, Mr. NEAL, Mr. FOGLIETTA, Mr. RATCHFORD, and Mr. OTTINGER.

H.R. 4705: Mr. FISH, Mr. SKELTON, Mr. DREIER, Mr. DAUB, Mr. RINALDO, and Mr. MILLER of Ohio.

H.R. 4708: Mr. AUCOIN, Mr. COELHO, Mr. JAMES K. COYNE, Mr. DAN DANIEL, Mr. FOGLIETTA, Mr. FRANK, Mrs. HOLT, Mr. LEHMAN, Mr. MCCLOSKEY, Mr. NEAL, Mr. NICHOLS, Mr. PARRIS, Mr. ROEMER, Mr. ROSE, Mr. ST GERMAIN, Mr. WEBER of Ohio, Mr. WHITEHURST, and Mr. WYDEN.

305. Also, petition of the council, Helena, Ohio, relative to deregulation of natural gas prices; to the Committee on Energy and Commerce.

306. Also, petition of the town meeting, Needham, Mass., relative to nuclear weapons; to the Committee on Foreign Affairs.

A MESSAGE RECEIVED BY THE CLERK FROM THE SENATE AFTER SINE DIE ADJOURNMENT

WASHINGTON, D.C.,
December 18, 1981.

HON. THOMAS P. O'NEILL, Jr.,
THE SPEAKER, HOUSE OF REPRESENTATIVES, WASHINGTON, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, the Clerk received at 9:30 a.m. on Thursday, December 17, 1981, the following messages from the Secretary of the Senate: That the Senate passed without amendment H.R. 5273.

With kind regards, I am.

Sincerely,

Edmund L. Henshaw, Jr.,
Clerk, House of Representatives.

H.R. 5273. An act to allow the George Washington University Higher Education Facilities Revenue Bond Act of 1981 of the District of Columbia to take effect immediately.

ENROLLED BILLS AND A JOINT RESOLUTION SIGNED AFTER SINE DIE ADJOURNMENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker pro tempore:

On December 17, 1981:

H.R. 3567. An act to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes;

H.R. 4119. An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes;

H.R. 4503. An act to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes; and

H.R. 4910. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations.

On December 18, 1981:

H.R. 1797. An act to direct the Secretary of the department in which the U.S. Coast Guard is operating to cause the vessel *Capt Tom* to be documented as a Vessel of the United States so as to be entitled to engage in the coastwise trade;

H.R. 2494. An act to designate the John Campbell U.S. Courthouse;

H.R. 3799. An act to extend the Federal tort claims provisions of title 28, United States Code, to acts or omissions of members of the National Guard, and to provide that the remedy under those provisions shall be exclusive in medical malpractice actions involving members of the National Guard;

H.R. 4353. An act to amend the act entitled "An Act to Establish a Uniform Law on the Subject of Bankruptcies", approved November 6, 1978;

H.R. 4506. An act to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Ill., as "Melvin Price Lock and Dam";

H.R. 4894. An act to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes;

H.R. 5273. An act to allow the George Washington University Higher Education Facilities Revenue Bond Act of 1981 of the District of Columbia to take effect immediately; and

H.J. Res. 377. Joint resolution providing for the convening of the 2d session of the 97th Congress.

On December 22, 1981:

H.R. 779. An act to authorize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District No. 1 and the city of Weatherford, Tex., for the use of water supply storage in Benbrook Lake, and for other purposes;

H.R. 1465. an act to amend the Congressional Budget Act of 1974 to require the Congressional Budget Office, for every significant bill or resolution reported in the House or the Senate, to prepare and submit an estimate of the cost which would be incurred by State and local governments in carrying out or complying with such bill or resolution;

H.R. 2241. An act to provide for the establishment of the Bandon Marsh National Wildlife Refuge, Coos County, State of Oregon, and for other purposes;

H.R. 3210. An act to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes;

H.R. 4327. An act to amend the Immigration and Nationality Act, and for other purposes;

H.R. 4559. An act making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes;

H.R. 4879. An act to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association;

H.R. 4995. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes; and

H.R. 5159. An act to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

SENATE ENROLLED BILLS SIGNED AFTER SINE DIE ADJOURNMENT

The SPEAKER announced his signature to enrolled bills of the Senate of the following title:

On December 17, 1981:

S. 657. An act to designate the Department of Commerce Building in Washington, the District of Columbia, as the "Herbert Clark Hoover Department of Commerce Building";

S. 1086. An act to extend and revise the Older Americans Act of 1965, and for other purposes;

S. 1211. An act to amend the Toxic Substances Control Act to authorize appropriations for fiscal years 1982 and 1983;

S.J. Res. 34. Joint resolution to provide for the designation of the week commencing with the third Monday in February 1982 as "National Patriotism Week"; and

S.J. Res. 136. Joint resolution to validate the effectiveness of a plan for the use or distribution of funds appropriated to pay a judgement awarded to the San Carlos Tribe of Arizona.

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED AFTER SINE DIE ADJOURNMENT

The SPEAKER pro tempore announced his signature to enrolled bills and joint resolutions of the Senate of the following titles:

On December 18, 1981:

S. 884. An act to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes;

S. 1192. An act to amend the National Visitor Center Facilities Act of 1968 to provide for the rehabilitation and completion of Union Station in Washington, District of Columbia, and for other purposes;

S. 1551. An act to amend title 5, United States Code, to extend the Federal Physicians Comparability Allowance of 1978, and for other purposes;

S.J. Res. 57. Joint resolution to provide for the designation of February 7 through 13, 1982, as "National Scleroderma Week";

S.J. Res. 84. Joint resolution to proclaim March 19, 1982, "National Energy Education Day"; and

S.J. Res. 117. Joint resolution to authorize and request the President to designate the week of January 17, 1982, through January 23, 1982, as "National Jaycee Week."

On December 22, 1981:

S. 271. An act to amend the Communications Act of 1934 to eliminate certain provisions relating to consolidations or mergers of telegraph and record carriers and to create a fully competitive marketplace in record carriage, and for other purposes;

S. 831. And act to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes;

S. 1196. An act to authorize appropriations for fiscal years 1982 and 1983 for international security and devlopment assistance and for the Peace Corps, to establish the Peace Corps as an autonomous agency, and for other purposes;

S. 1493. An act to deauthorize several projects within the jurisdiction of the Army Corps of Engineers;

S. 1946. An act to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes;

S. 1976. An act to amend the Act of July 31, 1946, as amended (40 U.S.C. 193a);

S.J. Res. 100. Joint resolution to authorize the participation of the United States in a multinational force and observers to implement the Treaty of Peace between Egypt and Israel; and

S.J. Res. 121. Joint resolution to provide for the designation of the year 1982 as the "Bicentennial Year of the American Bald Eagle" and the designation of June 20, 1982, as "National Bald Eagle Day."

BILLS AND A JOINT RESOLUTION PRESENTED TO THE PRESIDENT AFTER SINE DIE ADJOURNMENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills and a joint resolution of the House of the following titles:

On December 16, 1981:

H.R. 4209. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

On December 17, 1981:

H.R. 3567. An act to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes;

H.R. 4119. An act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes;

H.R. 4241. An act making appropriation for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes;

H.R. 4331. An act to amend the Omnibus Reconciliation Act of 1981 to restore minimum benefits under the Social Security Act;

H.R. 4431. An act to provide for the designation of the E. Michael Roll Post Office;

H.R. 4503. An Act to amend the Federal Water Pollution Control Act to authorize funds for fiscal year 1982, and for other purposes;

H.R. 4910. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations; and

H.R. 4926. An act to authorize the Secretary of the Army to acquire, by purchase or condemnation, such interests in oil, gas, coal, minerals owned or controlled by the Osage Tribe of Indians as are needed for Skiatook Lake, Okla., and for other purposes.

On December 18, 1981:

H.R. 1797. An act to direct the Secretary of the department in which the U.S. Coast Guard is operating to cause the vessel *Capt Tom* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade;

H.R. 2494. An act to designate the John Campbell U.S. Courthouse;

H.R. 3799. An act to extend the Federal tort claims provisions of title 28, United States Code, to acts or omissions of members of the remedy under those provisions shall be exclusive in medical malpractice actions involving members of the National Guard;

H.R. 4353. An act to amend the act entitled "An Act to Establish a Uniform Law on the Subject of Bankruptcies," approved November 6, 1978;

H.R. 4506. An act to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Ill., as "Melvin Price Lock and Dam";

H.R. 4894. An act to authorize the Secretary of the Interior to disburse certain trust funds of the Lac Courte Oreilles Band of Lake Superior Chippewa Indians of Wisconsin, and for other purposes;

H.R. 5273. An act to allow the George Washington University Higher Education Facilities Revenue Bond Act of 1981 of the District of Columbia to take effect immediately; and

H.J. Res. 377. An act providing for the convening of the 2d session of the 97th Congress.

On December 22, 1981:

H.R. 779. An act to authorize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District No. 1 and the city of Weatherford, Tex., for the use of water supply storage in Benbrook Lake, and for other purposes;

H.R. 1465. An act to amend the Congressional Budget Act of 1974 to require the Congressional Budget Office, for every significant bill or resolution reported in the House or the Senate, to prepare and submit an estimate of the cost which would be incurred by State and local governments in carrying out or complying with such bill or resolution;

H.R. 2241. An act to provide for the establishment of the Brandon Marsh National Wildlife Refuge, Coos County, State of Oregon, and for other purposes;

H.R. 3210. An act to amend the Surface Transportation Assistance Act of 1978, to establish obligation limitations for fiscal year 1982, and for related purposes;

H.R. 4327. An act to amend the Immigration and Nationality Act, and for other purposes;

H.R. 4559. An act making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes;

H.R. 4879. An act to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association;

H.R. 4995. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes; and

H.R. 5159. An act to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

BILLS AND A JOINT RESOLUTION APPROVED AFTER SINE DIE ADJOURNMENT

The President, subsequent to the sine die adjournment of the Congress, notified the Clerk of the House that on the following dates he had approved and signed bills and a joint resolution of the House of the following titles:

On December 17, 1981:

H.R. 4591. An act to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes.

On December 21, 1981:

H.R. 4845. An act to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebr., as the "Robert V. Denny Federal Building and Courthouse."

On December 23, 1981:

H.R. 1465. An act to amend the Congressional Budget Act of 1974 to require the Congressional Budget Office, for every significant bill or resolution reported in the House or the Senate, to prepare and submit an estimate of the cost which would be incurred by State and local governments in carrying out or complying with such bill or resolution;

H.R. 3455. An act to authorize certain construction at military installations for fiscal year 1982, and for other purposes;

H.R. 3484. An act to provide for the minting of half dollars with a design emblematic of the 250th anniversary of the birth of George Washington.

H.R. 4995. An act making appropriations for the Department of Defense for the fiscal yer ending September 30, 1982, and for other purposes; and

H.R. 5159. An act to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

BILL DISAPPROVED AFTER SINE DIE ADJOURNMENT

The President announced his disapproval of the following bill with a memorandum of disapproval as follows:

H.R. 4353

MEMORANDUM OF DISAPPROVAL

I am withholding my approval of H.R. 4353, to amend the Act entitled "An Act to Establish a Uniform Law on the Subject of Bankruptcies."

This bill would benefit the creditors of a single large asset bankruptcy. The debtor's estate has disputed the amount which it must pay to the Referees' Salary and Expense Fund. While I am aware that the Fund has been abolished with respect to recent cases, nothing except this debtor's dispute of the assessment distinguishes this one case from all others where the plan of arrangement was confirmed prior to September 30, 1984. I cannot support this effort to confer special relief in the guise of general legislation at a possible loss to the Treasury of $1.6 million. I believe the judicial process should be allowed to run its course.

RONALD REAGAN.

THE WHITE HOUSE, *December 29, 1981.*

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*Submitted December 29, 1981*]

Mr. ZEFERETTI: Select Committee on Narcotics Abuse and Control. "Annual Report, Part I, Activities for the year 1981, of the Select Committee on Narcotics Abuse and Control, 97th Congress, First Session" (Rept. No. 97-418, Pt. I). Ordered to be printed.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

[*Pursuant to the order of the House on December 14, 1981, the following report was filed on December 30, 1981*]

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 3637. A bill to provide for jurisdiction over common carriers by water engaging in foreign commerce to and from the United States utilizing ports in nations contiguous to the United States; with amendments. Referred to the Committee on Energy and Commerce for a period ending not later than April 6, 1982, for consideration of such portions of the bill and amendments as fall within that committee's jurisdiction pursuant to clause 1(h), rule XI (Rept. No. 97-419, Pt. I). Ordered to be printed.

SENATE—*Wednesday, December 16, 1981*

(Legislative day of Monday, November 30, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Gracious Father in Heaven, not only do the Senators and all who work here look forward to the recess, their spouses and children are filled with the anticipation of unbroken time with them. I pray that nothing will be allowed to disappoint or frustrate those expectations. Grant to those who travel special protection wherever they journey, and return them safely when Congress convenes in January.

Let every home be filled with joy, pleasure, and peace. Dissolve estrangement or hostility which alienates family members, and draw them together in warm, loving, secure relationships. Give the Senators the ability to relax from tension and pressure. Help them to remember that they are not VIP's at home, but husbands and wives and parents. Help them to give priority to their loved ones, devoting undivided, undistracted times to their needs and concerns.

Dear God, make this holiday season the most wonderful ever for this large Senate family and all their relations. Bless them abundantly as they face the new year that they may return refreshed and equipped for whatever awaits them in the Senate. In the name of Him whose entry into history we celebrate. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE MAJORITY LEADER'S YEAR-END REPORT

Mr. BAKER. Mr. President, "America is changing hands," wrote political journalist David S. Broder in his 1980 book, Changing of the Guard. "In the 1980's, the custody of the Nation's leadership will be transferred * * * to a new set of men and women."

Nowhere has this changing of the guard been more dramatic than in the U.S. Senate. Of the Senators who serve in the 97th Congress, a solid majority—54—are in their first full term of office; and 79 Senators have served two full terms or less. Nothing like this has happened since the late 1940's, when the postwar generation took over the reins of political leadership.

Few changes in great institutions are instant, or occur overnight. Nonetheless, 1980 gave added impetus to the transition by providing the Republican Party, for the first time in a generation, with the opportunity to lead a body of the Congress.

The challenges confronting this new Senate are many: unleashing the energies of our economy, taming the Government bureaucracy, defending the American way of life and working toward world peace. They are challenges that every political generation must cope with in one way or another. In addition, the new Senate faces its own unique set of challenges: inflation and economic stagnation at home, confusion and uncertainty abroad, and a sense that we must renew our historic values.

In facing up to these challenges, the new Senate struggles to find its own set of answers and to reassure the American people that our instruments of government can be forthright and responsive.

A BRIEF HISTORY

"The Senate is a school. The world's history is its text book. The record of a single day's proceedings frequently shows a range of work as wide as Christendom. No man well made up can be there long, if he will but listen, without himself becoming wiser and better. His opportunities for usefulness multiply as the new days come to him; his intellectual horizon expands, his view broadens and he grows stronger."—Senator W. A. Peffer, August 1898.

Since this is the first time in 26 years that the Republican Party has had the opportunity to report, as the majority, on the year's activities of the Senate, I think it is appropriate to recall briefly the previous periods in which Republicans stood in the majority.

In the past 120 years there have occurred seven transitions of party control in which Republicans have taken the majority in the U.S. Senate. These transitions happened during periods of grave national crisis: at the onset of the Civil War and at the conclusion of the two World Wars, and in periods of economic turmoil, ranging from depression to runaway inflation. Historically, we measure the stature of of our political parties and leaders by their success in meeting the challenges that they faced.

The first Republican Senate convened on July 4, 1861, having been called into special session by President Lincoln to meet the challenges of secession and Civil War. The Republican Party was barely 6 years old when it captured the Presidency and both Houses of Congress, under the rallying cry of "Free Soil, Free Men and Free Labor." The demands upon Congress were awesome: 11 States had separated from the Union; the first military campaign at the Battle of Bull Run on July 21, had ended in a disastrous rout of Union forces; other nations abroad were carefully observing divisiveness in the United States for their own advantages. The future of the Nation looked grim indeed.

But the 37th and 38th Congresses rose to meet those challenges, funding an army which eventually proved triumphant in combat, establishing a national banking system to promote a sound economy, passing a Homestead Act to encourage Western agricultural expansion and capping these efforts with passage of the 13th amendment to abolish slavery in the United States. The efforts of those wartime Congresses contributed significantly to the Republican Party's continuation in the majority in the United States for 18 years, until 1879.

There was no such national emergency when Republicans again won control of the Senate in 1881, but during that period the party built its reputation on an anti-inflationist "sound money" policy. Advocating the gold standard and tariffs to protect developing American industry, the Republican 47th Congress also enacted the Nation's first civil service reform legislation, following the tragic death of President James Garfield—100 years ago—at the hand of a dissatisfied officeseeker. Although the House often had Democratic majorities, the Senate remained Republican until 1893.

A terrible depression brought Republicans back into control of the Senate and House in 1895. The "Panic of 1893" had brought about general economic collapse, a stock market crash, business failures, and massive unemployment. Republicans campaigned and won on a strong economic platform calling for higher tariffs to restore employment, protect wages, and raise farm prices, and for hard currency in opposition to the free silver demands of inflationists. The return to prosperity that followed helped insure Republican majorities in the Senate for another two decades. This was a period of great industrial expansion and technological innovation at home and spreading American influence overseas—years which we recall now as a "progressive era."

Voter frustration with wartime economic controls, inflation, higher taxes, and increasing American involvement in European affairs brought the next transition to a Republican Senate in

1919, immediately following American participation in the First World War. Election of the Republican 66th Congress was followed by the election of three consecutive Republican Presidents and a decade of unprecedented prosperity. But having won credit for the prosperity of the 1920's, the party also endured the blame for the crash and depression that followed, losing its Senate majority in the election of 1932.

Not until after World War II did the voters return a Republican majority to the Senate. Again, an unsettled economy was the chief issue, as inflation raged after wartime wage and price controls were lifted. When meat prices rose, the New York Daily News headlined its story "Prices Soar, Buyers Sore/Steers Jump Over the Moon." Campaigning under the slogan "Had Enough?" Republicans recaptured the majorities in the Senate and the House for the first time since the beginning of the New Deal.

The Republican 80th Congress is perhaps the most famous Congress of the 20th century. The first to follow the Legislative Reorganization Act of 1946, it is often called the "First Modern Congress," despite the fact that President Truman branded it a "Do-Nothing Congress." On the contrary, the 80th Congress left behind an impressive record. In foreign policy, the Republican Senate endorsed the Truman Doctrine for emergency aid to Greece and Turkey to contain communism, it enacted the European recovery program, the Marshall plan, to rebuild European allies, and it adopted the Vandenberg resolution, which paved the way for American participation in NATO and other collective security agreements.

Just as Senator Arthur Vandenberg was the foremost Republican spokesman in the Senate, Senator Robert Taft dominated domestic policy. Author of the most significant domestic legislation of the 80th Congress, the Taft-Hartley Labor Act, Senator Taft did not formally hold the title of Republican leader at this time, although he was popularly recognized as "Mr. Republican." The New Republic commented on his influence by noting that "Congress now consists of the House, the Senate and Bob Taft."

The most recent Republican Senate, the last before the current session, began in the final months of the Korean war and coincided with the first election of President Dwight D. Eisenhower. Among the first priorities of the 83d Congress were tax reductions and reform, and it also adopted President Eisenhower's program for flexible price supports and expansion of the social security system. But the Republican program was limited by the narrowness of the party's "majority," which after several deaths and appointments was not a majority at all: 47 Republicans, 48 Democrats and 1 Independent.

Near the close of the 83d Congress, Republican leader William Knowland complained that he was operating "from a position in which no man has heretofore been asked to serve, a position in which I have the responsibilities of being majority leader in this body without a majority." Senator Knowland's Democratic counterpart, Senator Lyndon Johnson, immediately replied:

If anyone has more problems than a majority leader with a minority, it is a minority leader with a majority.

Such were the vicissitudes of Republican leadership of the Senate over the past 120 years. As we have seen, the party has often received its mandate in moments of military and economic turmoil. Its historical standing, and its standing in the eyes of the American people—and voters—has depended upon its ability to meet those challenges. Surely the challenges that the 97th Congress has faced have been no less trying than those that confronted our predecessors. Just as rarely, we will be judged by our success in meeting them.

LEADERSHIP

"Let everyone play the part he can play best, some speak, some sing, and all 'holler.' "—Abraham Lincoln.

Leadership of the U.S. Senate has evolved to a point beyond even the vision of no less a visionary than Thomas Jefferson, who once wrote:

The Lex Majoris Partis is the fundamental law of every society of individuals of equal rights; to consider the will of the majority enounced by the majority of a single vote, as sacred as if unanimous, is the first of all lessons in importance, yet the last which is thoroughly learned.

Today in the U.S. Senate, there are new refinements and complexities in the principle of majority rule. Party numbers no longer translate into foregone conclusions, and nothing can be taken for granted. The inherent capacity of the individual Senator has perhaps never been greater.

Nevertheless, I consider my position as majority leader to be a uniquely fortunate one—a position imbued with historical resonance, yet at the same time beset by the challenges of effectively leading a body as diverse and ambitious as the Senate.

The majority leader cannot do his job alone; and in that regard, I would like to acknowledge the immeasurable contributions made by others.

To a degree unprecedented in recent years, the Republican leadership in Congress has been fortunate enough to join in productive partnership with the President of the United States and chart a common course.

President Reagan's numerous trips to Capitol Hill have been indicative of his eagerness to keep congressional relations harmonious and productive. And, Pennsylvania Avenue has been anything but a one-way street during this administration. I, along with many of my colleagues, have enjoyed frequent trips to the White House in addition to regularly scheduled weekly leadership meetings there. These meetings have enhanced the executive/legislative partnership and made the day to day business of Government more efficient and more cohesive.

I have stated on the Senate floor on numerous occasions throughout the year, how fortunate I am to have served as minority leader while the distinguished Senator from West Virginia, Senator BYRD, served as majority leader. He was then, and is today in his capacity as minority leader, aware of the true nature of the Senate as an institution enraptured by tradition and precedent.

The distinguished minority leader has, by reason of experience and inclination, an understanding of the Senate that perhaps only service as the majority leader can bestow. He has been my partner, my colleague, and my friend, and I extend to him my deepest appreciation.

The assistant majority leader, the distinguished Senator from Alaska, Senator STEVENS, has also played a key role in the Senate's deliberations this year. His tireless efforts and professional determination have inspired and fueled key legislation, and he has made himself available to the leadership whenever it was required.

Senator STEVENS' counterpart, the distinguished assistant minority leader, Senator CRANSTON, has also played an instrumental role in the Senate's activities. He has been an admired foe, a dedicated party servant, and a political catalyst, and I wish to thank him for his assistance.

MANAGEMENT

"We can think of the internal politics of the Senate not as a small group of powerful men surrounded by everybody else, but as a group which divides labor and power—unequally to be sure, but still significantly—among almost all of its members."—Nelson W. Polsby from "Goodbye to the Inner Club."

When the 97th Congress convened, the Republicans formed a majority in the Senate with 53 Republican Senators, only two of whom were Members of the Senate when the Republican Party was last in control.

The first major transition since the advent of the modern professional staff era was an orderly and benign one, a dramatic transfer of influential power designed to coordinate and enumerate the goals of the new majority.

In organizing the Senate for their first time in a generation, Republicans found a committee structure that was overstaffed and excessively expensive. In December 1980, the Republican conference passed a resolution calling for the incoming Congress to make a 10-percent reduction—a real cut, divorced from indexing for inflation—in committee expenses from funds available in that calendar year. Accordingly, when the committee funding resolutions were presented at the beginning of the session, Republicans led the way in engineering the 10-percent reduction, thus trimming the operational costs of the Senate.

Certain key determinations made early in the session helped shape much of the year to come. Among those decisions was a judgment not to pursue any major changes in Senate rules. Throughout the last three decades, the beginning of a new Congress was usually marked by vigorous and substantial efforts to change Senate rules. Although some of these

proposals were adopted to respond to real needs, others were more far-reaching and amounted to unwarranted tinkering with Senate procedure. These biennial controversies over the rules subjected several new Congresses to fractious beginnings, and it was the intention of the leadership that the 97th Congress not be marred by disputes arising from unnecessary attempts to amend and redirect the rules.

Most of the proposed changes in Senate rules in recent years sought to chip away at the prerogatives accorded to the minority or the individual Senators. After serving in the minority for most if not all of their Senate careers, the leadership was sensitive not to continue this trend. In reviewing suggested amendments to the rules, the leadership began from the premise that only those changes as were absolutely vital to the modern operation of the Senate should be promoted, concluding that no such amendments were required and that the Senate, and its majority and minority parties, could function effectively within the existing procedural framework. Accordingly, the question of a rules change was put to rest.

Instead, the leadership focused on proposals intended to advance efficiency in Senate operations and planning: establishing a floor schedule early in the year that allowed committees maximum opportunity to conduct their business, and confining late night sessions, when necessary, to Thursday evening throughout much of the year.

The leadership also announced a decision that certain emotionally charged social issues—abortion, busing, school prayer—be set aside temporarily and that priority be given to enactment of President Reagan's economic program.

SUMMARY OF MAJOR ACCOMPLISHMENTS

The true legislator ought to be acquainted not only with what is best in the abstract, but also with what is best relative to circumstances.—Aristotle.

In the 1st session of the 97th Congress, the Senate compiled a signal record of accomplishments in domestic and foreign affairs. The Senate kept its commitment to reduce Federal spending significantly over the next 3 years and approved an omnibus reconciliation package that will cut spending by $35.1 billion in fiscal year 1982. The Economic Recovery Tax Act of 1981, approved by the Senate in August, cut individual tax rates by an average of 5 percent in 1981 and by an average of 23 percent by 1983.

In December, the Senate moved to strengthen the Nation's defenses when it appropriated $208 billion for military spending. The Senate also approved the President's sale of AWACS radar planes and other arms to Saudi Arabia. The Senate-passed agricultural bill will spend about $23 billion on farm and food programs over the next 4 years; this measure is still awaiting final action by a House-Senate conference committee.

THE BUDGET AND RECONCILIATION PROCESS

In order to put into effect the President's determination to cut Federal spending, Congress relied upon the relatively new legislative process of reconciliation. This procedure, authorized by the Congressional Budget and Impoundment Act of 1974, enabled Congress to achieve major savings in Federal spending through a single measure, rather than a number of bills affecting spending and budget authority and outlays. The procedure enabled each spending adjustment to be viewed in light of other proposed cuts and prevented weakening of the program by piecemeal attack.

Under the leadership of Senate Budget Committee Chairman PETE DOMENICI of New Mexico, the committee took a detailed inventory of the projected 1982 budget and voted unanimously in March to endorse President Reagan's call for major spending reductions. The full Senate substantially approved a $39.6 billion reconciliation package, which reflected a policy of spending restraint in accordance with instructions given to authorizing committees. The Appropriations Committee under the able and diligent leadership of its chairman, MARK HATFIELD, reported significant reductions in direct spending, which were encompassed in a major supplemental appropriations act, Public Law 97–12 signed into law by the President on June 5, 1981.

This cooperative effort to limit Federal spending brought to an end an era of extravagance that had carried the country to the brink of fiscal bankruptcy. And, it further provided the President with one of the two components vital to his economic recovery plan.

ECONOMIC RECOVERY TAX ACT OF 1981

The passage of the tax cut plan, the other component of the President's economic recovery package, guaranteed American wage earners and businesses the largest tax reduction in history. Fueled by the efforts of the chairman of the Senate Finance Committee, Senator DOLE, the Senate completed action on its version of the bill in late July; and after differences with the House were resolved, the measure was quickly approved and signed by the President in early August.

The measure provided a progressive tax cut of 5 percent across-the-board in individual tax rates that went into effect October 1 and will cut an additional 10 percent in 1982 and a final 10 percent in 1983. The maximum rate on capital gains was reduced from 28 to 20 percent, thus providing relief for the small investor and encouraging additional investments and industrial growth.

Married couples earning two incomes were at last provided substantial relief from the so-called marriage penalty and now can deduct 5 percent of up to $30,000 a maximum deduction of $1,500, of the lesser of their two incomes. This deduction will increase to 10 percent, a maximum of $3,000, in 1983. Relief for moderate income parents was provided by increasing to 30 percent from 20 percent the tax credit for child and dependent day care expenses. Additionally, the act increases the maximum amount of expenses eligible for the credit from $2,000 to $2,400 for one dependent and from $4,000 to $4,800 for two or more dependents.

Homeowners who are faced with buying and selling homes in today's depressed housing market were provided relief through an extension from 18 months to 24 months in the period an individual is allowed to defer taxes, or proceeds from the sale of a primary residence, if that money is used to buy another home at the same or greater cost. Further, the one-time exclusion from tax of capital gains from the sale of a home by those aged 55 and over was increased from $100,000 to $125,000.

The tax plan provides a number of incentives to business to get the wheels of American industry rolling again. The system of depreciating assets was simplified to allow businesses to write off the value of assets at an accelerated rate. Small businesses are now allowed expensing, or the immediate deduction of the cost of new or used machinery. The investment tax credit for the rehabilitation of old buildings was increased. Businesses now get a tax credit of up to 25 percent for new spending on research and development above and beyond the average annual amount spent on such activities over the 3 preceding years.

Savings incentives were added to encourage individuals to put more of their earnings into American investments. Individual retirement accounts (IRA) are now available to everyone who works and self-employed retirement plans (Keogh) now allow an individual to deduct $15,000, up from $7,500, in tax-free contributions.

DEFENSE APPROPRIATIONS

In December, Armed Services chairman, Senator TOWER led the Senate fight to reverse the trend toward cuts in the military budget by approving a $208 billion spending bill. This increase in defense spending comes at a time when the United States is faced with global challenges that pose a greater threat to our internal security than at any previous time in our history.

The Senate's bill provided $4.8 billion for a military pay increase and about $2.4 billion for the B–1 bomber. Mindful of the enormous cost overruns that threaten the credibility of military procurement requests, the Senate bill required close scrutiny of the B–1 bomber program and held it to a high level of accountability.

The conference agreement which was reached on H.R. 1995, the Defense Appropriation bill for 1982, appropriates $199,691,264,000 for the military services and the Defense Department agencies and for intelligence activities. This amount is $2,247,975,000 above the House allowance and $8,984,481,000 below the Senate total. It is $1,186,970,000 below the budget estimates.

Senate conference report chairman, Senator TED STEVENS of Alaska, paved the way for major changes to be adopted by the conferees. Conferees approved a Senate increase of $300 million to be allocated to the Coast Guard for ship construction and other capital equipment needs, and overall shipbuilding and conversion were also increased $372 million over the House allowance. Senate bill langauge designed to control B–1 bomber costs and MX missile basing was approved without change. Nearly $250 million in increased funding for National

Guard and Reserves equipment and supplies were authorized under the conference agreement; this increase strengthens Reserve components by nearly $50 million.

The $4.8 billion for pay costs and $1.6 billion for inflation approved by the Senate were dropped from the bill. These unbudgeted costs are to be considered under the conference agreement. The conferees also agreed to a House reduction of nearly $500 million based on adjusted fuel costs projections.

AWACS

American interests in the Middle East were strengthened when, under the guide of the Senate Foreign Relations Committee chairman, Senator PERCY, the Senate approved the President's sale of AWACS radar planes and other arms to Saudi Arabia. The vote came after a comprehensive debate in the best tradition of the Senate as a deliberative body, focusing the Nation's attention on the status and future of American policy in that critical area.

The $8.5 billion sale of the highly sophisticated aircraft will enable the Saudis to exercise effective control over incursions across their borders and constitutes a clear message to aggressors that the United States is committed to the security of its allies in the region. The judicious use of the AWACS is insured by agreements under which the Saudis will share all information gathered by the planes with the United States, desist from sharing the planes or their information with any Third World country, and operate the planes only over Saudi airspace unless the United States gives its consent to do otherwise.

AGRICULTURE APPROPRIATIONS

The Senate, led by the Agriculture Committee chairman, Senator JESSE HELMS, approved in early December, the 1981 farm bill conference agreement. This omnibus agricultural legislation provides for price protection and market stability for farmers through traditional price support and target price programs. The 1981 farm bill, as agreed in conference between the House and the Senate, has an estimated total cost over 4 years of $11 billion. This compares to the Senate-passed version of $10.6 billion and the House version with a total cost of $16.6 billion.

The bill includes numerous other programs, including export embargo protection, soil conservation incentives, agricultural research, extension and teaching programs, a farmer-owned grain reserve program and a 1-year extension of the food stamp program.

Additional features of the bill include continuing authority for disaster payments made when drought, flood, or other physical disasters prevent planting or reduces crops below certain levels. This assistance would be provided if Federal crop insurance is not available in the affected country or under other conditions; a revised peanut price support program; and a sugar price support program.

In late October, the Senate approved a $23 billion appropriations measure that will provide assistance to the Nation's agricultural producers through a variety of programs. The final measure, still awaiting final approval of the conference report, includes a number of provisions that will benefit both farmers and consumers.

COMMITTEE ON AGRICULTURE, NUTRITION AND FORESTRY

On behalf of the Senate Agriculture, Nutrition and Forestry Committee the distinguished chairman, Senator HELMS, submitted to the Congress in 1981 a number of complex bills which are vitally important to the nation and the world. The legislation produced by this Committee will have an impact on the daily lives of millions of American farmers as well as countless millions of American and world consumers, who depend on the nation's farmers for high quality food and fiber.

The Committee's over-all objective, under Republican leadership for the first time in a generation, was to provide reasonable agricultural programs without burdening the American taxpayer unnecessarily. The Committee's legislation provided the basic economic stability needed by the agricultural sector. However, the legislation also provided farmers an opportunity to derive a fair and reasonable profit in the marketplace.

The Committee went to great lengths to fashion agricultural legislation that would not result in unacceptably large Federal outlays. This was a prime concern since 1981 was the first year in memory in which severe budgetary constraints were such a prominent factor in the development of agricultural legislation.

The primary concern of the Committee in this session was the 1981 Farm Bill which, as passed by the Senate, will lend a degree of stability and predictability to the American agricultural economy while remaining within the tight budgetary restraints necessary at this point in our nation's history. For the most part, the Committee was successful in achieving those goals in the Senate-passed Farm Bill.

A vast array of laws and regulations ranging from basic farm and natural resource programs, which affect 3.5 million farmers, ranchers, and foresters, to food stamp provisions affecting over 22 million Americans, is under the jurisdiction of the Senate Committee on Agriculture, Nutrition, and Forestry.

The Committee is responsible for providing the legislative dynamics, which lead to the formation of a consistent national food and fiber policy favorable to farmers and consumers alike. The impact of legislation, rules and regulations implemented under Committee guidance has international significance since an ever-increasing portion of the world's population is growing more dependent on American farmers and ranchers for food and fiber.

The Committee, under the leadership of Chairman Jesse Helms, reviews on a continuing basis the applications, administration and execution of all laws relating to agriculture. The Committee monitors all program changes and developments that occur within the regulatory arena and receives reports from such agencies as the General Accounting Office with respect to the administration of laws within the jurisdiction of the Committee.

The Committee's role as guardian of consumer and farmer interests is highlighted by continuously receiving and examining reports on Federal agricultural functions of importance to the economy of the nation and to the day-to-day lives of each American.

Because of the diversity of interests affected by the Committee's actions and initiatives, the Committee strives to maintain a very complex, yet delicate, balance in every agricultural issue. Throughout the session the Committee set the goal of providing legislation and food policies with the broadest appeal possible.

Although much of the Committee's efforts in the early months of this session were devoted to analyzing and drafting the 1981 Farm Bill, the Committee reported major pieces of legislation, which have become law. The Committee is in various stages of reviewing legislation, including food safety laws (as in the Food Safety Amendments of 1981) and the extension of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

The Committee conducted 20 confirmation hearings on Presidential appointments and reported favorably on every nomination. Each nomination was subsequently approved by the Senate.

The Committee received and reviewed 31 reports on various Agriculture Department functions; 57 bills and amendments were referred to the Committee and its eight subcommittees.

The Committee conducted 35 hearings relating to farm legislation and executive branch appointments in addition to 24 days of hearings conducted during the review process for the 1981 Farm Bill.

A renewed and energetic thrust has been undertaken by the Committee's Republican leadership to make American agriculture as profitable as it should be with the least government intervention possible. The Committee is committed to the goal of providing the economic incentives and programs necessary to ensure the tremendous productive capacity of American farmers.

THE 1981 FARM BILL

The 1981 Farm Bill reported by the Senate Committee on Agriculture, Nutrition, and Forestry provides agricultural programs, which will complement, not control, the American agricultural economy.

The Committee, under the leadership of Chairman Helms, was successful in implementing agricultural programs which will provide economic assistance for farmers while keeping government spending at a minimum. In the meantime, the Farm Bill assures an adequate supply of food at reasonable prices for American consumers in addition to a large portion of the world's consumers.

The Farm Bill, which was the most significant piece of legislation for the new Republican leadership on the Committee, preserves the most worthwhile elements of existing programs, makes improvements in current law in many respects and makes significant advances toward a market-oriented agriculture—a goal shared by farmers and Senators.

Structuring a bill that was fiscally sound but responsive to farmers' needs and continuing to move toward a free-market philosophy for agriculture were three primary considerations of the Committee.

In his opening statement during the Farm Bill hearings, Chairman Helms set the tone for what would become the thrust for the Federal government's activities in the farm sector:

"Our intent in the 1981 Farm Bill legislation is to continue the current direction toward a market-oriented agriculture that emphasizes the private sector. We need a government policy that supports but does not dominate the farmer and in the process assures the consumer of an abundant supply of high quality food and farm products at reasonable prices."

"American agriculture and all who depend on it will focus on this legislative package and our actions involving it. For this Committee, there is no greater task than our work on this complex and delicate mix that has become known through the years as the 'Farm Bill'."

The aim of Federal farm policy is to induce elements of predictability into this inherently unpredictable business so that farmers

may make their planting and marketing decisions as effectively and efficiently as possible.

Because farmers must make such decisions well in advance of the return they receive from the sale of their crop—and in the face of inherently unpredictable forces such as weather and world market conditions—Federal farm policy has sought to provide a basic stability in the form of income assurances such as loan rates, target prices, reserves and other mechanisms.

Farmers benefit from these programs simply through the stabilizing effects produced. Consumers benefit from these same programs by the fact that America is blessed with an abundance of food unimagined elsewhere in the world.

The paramount feature of farm policies, from the time of the Great Depression until the late 1960s, was direct government involvement in agricultural production. Starting with the Agriculture Act of 1970 and continuing through the 1977 Farm Bill, Congress has gradually shifted the course of American agriculture away from direct Federal involvement in the farmers' business.

The 1977 Farm Bill established a positive direction toward market-orientation in U.S. agricultural policy. The 1981 Farm Bill continues that progress toward minimizing Government interference in agriculture and maximizing the farmers' opportunity to derive a fair profit from the marketplace.

The Committee held firm to its commitment to produce farm commodity legislation, which would have as little cost to taxpayers as possible.

Severe budget restraints were heeded by the Committee in order to produce a cost-effective farm program.

Since the enactment of the 1977 Farm Bill, there have been significant changes in the economic and geopolitical situations in the world, which made the task of writing a far-reaching, multi-faceted farm bill even more difficult.

The burdens of spiraling inflation and excessive government regulations have forced farmers' costs to skyrocket. The sudden imposition of the partial trade embargo with the Soviet Union disrupted the world markets in which American farmers earn one-third of their income. As a consequence, net farm income plunged by about 29 percent in current dollars, almost 40 percent in real terms from 1979 to 1980.

Cash receipts in 1980 from crop and livestock marketings are 4 to 6 percent above 1979. However, farm production expenses have increased from 8 to 10 percent in the same period, with net farm income projected at $17 to $21 billion for 1980.

In response to the devastating infestation of the mediterranean fruit fly in his home State of California, Senator Hayakawa introduced S. 1506, a bill which would provide protection from plant pest infestation. The USDA had no authority to initiate spraying and control of the fly was delayed.

Senator Hayakawa recognized the policy deficiency, and the bill, which has been incorporated into the Farm Bill, authorizes the Secretary of Agriculture to take necessary action if the Governor does not choose to initiate action on his own. Without control of the fly, California's economy might have been crippled, and this would have had an impact on the U.S. consumer and our world trade.

Further complicating farmers' plight is the fact that the farmer has little or no control over inflation, regulations, world trade patterns, and certainly, over the prices they receive for their products.

Addressing these challenges with additional concerns that developed since the enactment of the 1977 farm legislation was paramount in the Committee's consideration. Concern about the depletion of the Nation's soil and water resources, and the need for increased emphasis on research, teaching and extension activities of the U.S. Department of Agriculture were integral in developing an equitable farm package.

Since American farmers derive at least one-third of their income from foreign markets, an export policy is important to an all-encompassing Farm Bill.

With these considerations in mind, the Committee began an extensive hearing process spanning 24 days. Testimony was heard from representatives throughout the agricultural and consuming public.

The Committee followed the hearings with a three-week mark-up session on the Farm Bill.

The total cost of the four-year farm bill, as accepted by the Senate, is estimated at $10.6 billion. The conference agreement on the 1981 Farm Bill is estimated to cost $11 billion over the four-year life of the bill. The Agriculture Committee trimmed and re-trimmed programs where possible in order to comply with the budgetary limitations set forth in the First Concurrent Budget Resolution, adopted by the Senate early in the session.

Major savings were achieved in the Farm Bill by scaling down programs without seriously hampering the original intent of stabilizing agricultural producers' income. The Committee was careful to avoid making arbitrary cuts in essential farm programs but instead addressed each program on its merits and provided legislation based on that analysis.

THE DAIRY PROGRAM

In order to lend stability to the dairy industry, which had been plagued by returns which did not keep pace with extremely high costs of production, the dairy price support program was authorized by the Agriculture Act of 1949 to support the national average price received by farmers for manufacturing milk. However, in recent years, high price supports, which reached a level of $1.5 billion for 1980, have led to chronic over-production in the dairy sector.

In a move to strengthen the forces of the market in the dairy industry and to reduce unacceptably high government expenditures, the Conferees adopted milk price supports at not less than $13.10 per hundred pounds for fiscal year 1982. For fiscal years 1983, 1984, and 1985, the minimums would be $13.25, $14 and $14.60 if surplus purchases are projected at more than $1 billion. If purchases are projected at less than $1 billion, the minimum would be 70 percent of parity. The support floor could rise to 75 percent of parity if projected surpluses are less than 4 billion pounds in 1983, 3.5 billion pounds in 1984 and 2.69 billion pounds in 1985.

This provision will save consumers money and send a more correct price signal to dairy farmers.

The Committee Farm Bill provision also continued authority for the Commodity Credit Corporation to make surplus government stocks of commodities available without charge to nutrition projects under the Older Americans Act of 1965 and to child nutrition programs providing food assistance.

WOOL AND MOHAIR

The Committee retained the basic structure for the wool and mohair program, which was authorized originally in the National Wool Act of 1954.

The 1954 Act and the Food and Agriculture Act of 1977 provide for a formula-determined support price for wool and mohair and for supplemental payments to producers.

The current support price for shorn wool is 85 percent of the statutory formula which takes into consideration changes in the index of prices paid by farmers. The support price of mohair is tied to the support price for wool. The adopted formula would change the support level from 85 percent to 77.5 percent of the price support formula set by the 1954 legislation.

WHEAT AND FEED GRAINS

Wheat and feed grains are the lifeblood of the United States' agricultural economy and major contributors to the Nation's export trade. Wheat and feed grains account for approximately half of the $40 billion contributed annually by agriculture to the Nation's total export trade.

Currently, about 60 percent of the Nation's wheat crop must be exported to provide market outlets for wheat. Over the last decade exports ranged from 610 million bushels in 1971/1972 to 1.375 million bushels in 1979/1980. The United States produces about one-eighth of the world crop of wheat but exports 40 to 50 percent of the quantity entering world trade.

Corn, sorghum, oats, and barley are commonly referred to as feed grains since most of the use of these grains is for feeding livestock and poultry. However, these grains are also used for human consumption both domestically and in foreign markets.

The United States is the largest producer of feed grains in the world and supplied about one-quarter of the world's production of feed grains in the past three years.

Corn is the leading crop in the United States, in both volume and value of production. In fact, the nation accounts for about one-half of the world production of corn.

Due to the tremendous importance of wheat and feed grains in the national and world economies, it is essential to provide marketing flexibility and dependability for American producers.

The Committee continued the traditional combination of target prices and loans for the wheat and feed grain programs. Throughout the consideration of the Farm Bill, the Committee kept in mind that the ideal situation for American farmers would be a totally market-oriented agriculture. The Senate-passed Farm Bill is a definite, continuing step toward that ultimate goal.

A minimum target price for the 1982 crop year was set at $4.05 per bushel. The minimum loan rate was set at $3.55 per bushel.

The minimum target price for the 1982 crop year was set at $2.70 per bushel for corn. The minimum loan rate was set at $2.55 per bushel for corn. Target prices for the feed grains would be established on the basis of their feed value in relation to corn.

The Farm Bill makes prevented planting and reduced yield disaster payments available for each of the 1982 through 1985 crops of wheat and feed grains, for producers for whom Federal crop insurance is not available. The disaster payments will be computed based on current law. The Secretary of Agriculture will have the discretionary authority to make such disaster payments available to any producer if disaster losses have created an economic emergency that cannot be alleviated by crop insurance and other assistance programs.

The Farm Bill also authorizes acreage limitation and paid diversion programs for the 1982 through 1985 crops, if needed to protect against overproduction.

FARMER-OWNED GRAIN RESERVE

The farmer-owned grain reserve was initiated for grains in the Food and Agriculture Act of 1977. The Act required the Secretary of Agriculture to establish a wheat reserve and gave authority for a feed grain reserve. The farmer-owned reserves for wheat and feed grains are intended to remove grain from the market in periods of surplus production and low demand.

The reserve stocks are then made available for utilization when production declines or export demand strengthens.

However, the most important element of this program is that the reserves are owned by farmers, who benefit from increased prices when stocks are released to the marketplace.

The program has served primarily as a price support mechanism. Its role as a marketing tool for farmers has not yet been fully developed.

It was with the intention of increasing the use of the farmer-owned reserve that certain changes were made by the Committee.

Several major changes were made by the Committee in order to further enhance the operations of the farmer-owned grain reserve.

One of the most significant changes in the farmer-owned reserve was the elimination of the reserve call price—the point at which the Government requires farmers to repay loans, often forcing them to sell their grain. The revised provisions relating to the reserve call price authorizes the Secretary of Agriculture to adjust interest rates to encourage orderly marketing. The effect of this Committee action is to allow farmers to make their decisions based on the marketplace, rather than Government mandate.

In another major change in the farmer-owned reserve, wheat and feed grains authority for the reserve was made discretionary.

COTTON

The Committee kept the basic framework in place for the nation's cotton producers. Cotton producers have experienced several setbacks in their industry, ranging from a loss of markets to synthetic fibers to a severe reduction in yield brought about by the drought of 1980. The nation's cotton producers have also been plagued by soaring production costs on a crop which historically has required tremendous initial investments.

The Farm Bill provides for a loan and target price program for the 1982 through 1985 crops of upland cotton. Loans will be available at the lower of (a) 85 percent of the average U.S. spot market price for upland cotton during the preceding five years or (b) 90 percent of the average Northern Europe price for upland cotton, as determined under formulas set forth in the bill. However, in no case will the loan level be less than 55 cents per pound.

The minimum target price for 1982 cotton will be the higher of (a) 120% of the loan rate or (b) 71 cents per pound in 1982, 76¢ in 1983, 81¢ in 1983, 81¢ in 1984 and 86¢ in 1985. The Secretary of Agriculture could establish a higher target price for any year's crop in order to reflect any change in the per-acre cost of production.

Prevented planting and reduced yield disaster payments will be made available as in the wheat and feed grain programs. Also, acreage limitation and paid diversion programs for the 1982 through 1985 crops of upland cotton will be provided in the same manner as wheat.

RICE

A source of pride for the rice industry and the entire agricultural community has been the evolution of the federal program over the years from a strict marketing quota system with high support prices to a more market-oriented system of target prices and cropland set-asides.

Early in 1980, representatives of rice producers from the major producing areas developed a set of recommendations for the rice title of the 1981 Farm Bill. The producers agreed that the current program has worked well for the industry inasmuch as it allowed rice to move competitively into expanding markets and has given reasonable income protection to growers. However, rice producers favored further movement towards a market-oriented rice program which would stimulate production required to satisfy expanding world demand. The producer representatives recommended that the acreage allotment for rice be replaced by a national program similar to those for wheat, feed grains and upland cotton.

The Rice Production Act of 1975, enacted in February of 1976 and applicable to the 1976/1977 crops, instituted a market-oriented program for rice similar to the wheat, feed grains and upland cotton programs established under the Agriculture and Consumer Protection Act of 1973 and the Agricultural Act of 1970.

The new market-oriented program for rice included provisions for target prices, cropland set-asides, acreage diversions, and other disaster payments. Marketing quotas were suspended; restrictions on rice production were removed; and program participation was made voluntary. Acreage allotments were maintained, however.

The 1977 Farm Bill extended the Rice Production Act of 1975 through the 1981 crop year with historical acreage allotments continuing to apply for purposes of determining eligibility for Government payments and loans.

In keeping with the recommendations of the rice industry leaders, the Farm Bill provided a minimum target price for crop year 1982 of $10.85 per hundred pounds in 1982, $11.40 in 1983, $11.90 in 1984, and $12.40 in 1985.

The rice acreage allotment and marketing quota programs were repealed in lieu of the industry's favored programs of loan and target prices. The disaster assistance program was also extended to producers in counties, where the Federal Crop Insurance Corporation assistance is not available.

PEANUTS

A compromise peanut program was accepted that eliminates the allotment system but retains the poundage quota system with an increase in the support price. Under the new peanut program, anyone may grow peanuts but only those with poundage quotas which have been tied directly to allotments are eligible for the higher support levels.

The minimum national poundage quota for each crop will be 1.2 million tons. The total national poundage quota will be reduced 100,000 tons over the four years of the bill. A referendum of peanut producers will be held to determine if the peanut producers favor poundage quotas for following crops of peanuts. If more than one-third of the farmers voting oppose quotas, there will not be a national poundage quota.

The Farm Bill provides a minimum price support level for quota peanuts of the 1982 crop at $5.50 per ton. The price support level for succeeding crops will be adjusted to reflect changes in the cost of production.

SOYBEANS

In a significant move toward greater market orientation, the Committee revised the formula for determining the loan rate on soybeans. Instead of a series of calculations by the Government, the loan rate will be determined based on actual markets.

Soybean production is a national success story. Soybean production in the United States has increased from 5 million bushels in 1952 to 2.268 million bushels in 1979. Expanded acreage has accounted for much of the increased production of soybeans. However, thanks to major advances in research, soybean yields have increased from 1.7 bushels per harvested acre in 1925 to 32.1 bushels per acre in 1979.

American soybeans have become a dominant force in world trade. In 1979–1980, soybeans produced in the United States constituted over 80 percent of world trade. The rapid advance of the U.S. soybean industry has occurred almost entirely without Government intervention. In fact, the soybean industry is almost a classic example of successful free enterprise.

The Government role in soybean production is limited, which is precisely what soybean industry representatives requested. The only major mechanism of current programs applying to soybeans is the Commodity Credit Corporation loan program. Soybean growers have requested that soybeans maintain their traditional freedom from Government regulations by not being included in any farmer-owned reserve, land diversion or acreage reduction.

Also, re-emphasizing the soybean producers' market orientation is the mechanism in which soybean price support loans are determined.

Loans and purchases will be made available on soybeans at a level equal to 75 percent of the simple average price received by farmers for soybeans for five marketing years immediately preceding the then current marketing year. The price support level will in no case be less than $5.02 per bushel.

SUGAR

Due to the tremendous volatility of the sugar market and the problems faced in the world market by U.S. producers, the Committee made the decision to include sugar market protections in the Farm Bill.

A loan rate starting at 17 cents per pound in 1982 and increasing incrementally to 18¢ in 1985 was adopted. The program applied to domestically grown sugar beets and sugarcane.

AGRICULTURAL EXPORTS, EMBARGO PROTECTION

In order to enhance the U.S. Department of Agriculture's commitment to developing world markets for the Nation's produce, the Committee included major provisions relatting to agricultural exports.

Agriculture currently contributes some $40 billion annually to the Nation's exports. Much of the tremendous growth in world demand for the Nation's agricultural products can be attributed to an aggressive market development effort conducted by private enterprise with government assistance.

An agricultural credit revolving funds was established in the Treasury for use by the Commodity Credit Corporation to finance short-term commercial export sales of agricultural commodities, export sales of breeding animals and the establishment of handling facilities for agricultural commodities in importing countries.

In order to maximize free trade and inject a degree of accountability in the establishment of bilateral agreements involving commitments on the part of the U.S. to allow another country to purchase U.S. agricultural products and commodities on a commercial basis, the Committee added legislation requiring the President to notify—at least 30 days in advance—the agriculture committees of the Congress on proposed bilateral agreements, other than treaties, with nation's purchasing U.S. farm products.

A major provision, not previously included in farm bills, was added by the Committee in an effort to further protect farmers from the ravages of wild fluctuations in world trade patterns. The Committee included a strong provision drafted in large measure by Sen. Rudy Boschwitz, to offer financial relief to agricultural producers through either loans or payments if an embargo is imposed on only agricultural products without including other segments of the economy.

The Committee included the embargo protection provisions in response to the disastrous effects of the previous Administration's partial embargo of agricultural products to the Soviet Union following its invasion of Afghanistan.

Another significant export provision was the authorization for the Secretary of Agriculture to formulate a special standby export subsidy program for agricultural commmodities to neutralize export subsidy programs of other countries. The program would be implemented only if the President determines that the export subsidy program of

another country is adversely affecting the export markets of U.S. agricultural commodities.

PUBLIC LAW 480

Public Law 480 is the primary means by which the U.S. Government provides food assistance to foreign countries. Enacted in 1954, P.L. 480 has four legislative objectives: to provide humanitarian assistance; to expand international trade and develop markets for U.S. agricultural products; to support economic development within recipient countries; and to promote the foreign policy of the United States.

Since the program was conceived, 290 million metric tons of commodities valued at $31.7 billion have been exported through the program. Wheat and wheat products, corn and corn products, rice, sorghum, nonfat dry milk, soybean oil and cotton are among the major commodities exported through the program.

The Committee continued its commitment to the successful P.L. 480 program, realizing its tremendous importance to American agricultural producers as well as its importance to developing nations. The Committee agreed to extend current authorities under P.L. 480 through December 31, 1985.

RESEARCH, TEACHING, EXTENSION ACTIVITIES

By consensus, the Committee reaffirmed its support for the concept of research, teaching and extension activities carried out by the U.S. Department of Agriculture.

The Committee aimed its efforts toward improving a system which has proved to be highly successful.

The Committee began its consideration by approving provisions to revise the findings and purposes of the National Agricultural Research, Extension and Teaching Policy Act of 1977. The Committee, in calling for revision, emphasized the importance of a Federal-state partnership in conducting research, extension, and teaching; a strong basic research program; and long-range planning to meet national agricultural research, extension, and teaching objectives.

The Committee also proposed authorization for an additional Assistant Secretary of Agriculture, who could be responsible for managing research, extension and teaching activities in the Department.

Meanwhile, in order to ensure that research efforts are continued and expanded, the Committee also provided provisions for authorizations for appropriations of $50 million annually for each of the 1983 through 1987 fiscal years for the competitive grants program under P.L. 89–106.

SOIL CONSERVATION AND FARM LAND PRESERVATION MEASURES

One of the most significant additions to the 1981 Farm Bill is the soil conservation and farm land preservation title.

Natural resource conservation problems affect all segments of the American population. The Nation's soil and water resources form the foundation upon which our agricultural capacity for producing food and fiber for both domestic and export demands is firmly set.

Soil erosion is a serious problem in every state and seriously threatens the Nation's productive ability. There are 413 million acres of non-Federal land used for crop production in the United States and approximately 100 million of these acres are affected by excessive sheet, rill and wind erosion that leads to a loss in production.

It is in the national interest to provide programs which will put the necessary incentives in place which will encourage farmers to conserve and protect their valuable resources.

The provisions of the Senate-passed Farm Bill are designed precisely to achieve that goal.

The Special Areas Conservation program targets additional technical and financial assistance to areas of the country with serious soil and water resource problems. This new program is patterned after the highly successful Great Plains Conservation Program, which is operating in the states.

The bill will require the Secretary of Agriculture to establish a resource conservation and development program designed to assist states, local units of government and non-profit organizations in developing and implementing plans of land conservation and water management in designated rural areas. Technical and financial assistance will be provided to a minimum of 225 designated areas.

The Farm Bill also contains provisions designed to assure that the importance of farmland as a national resource and the need to preserve the Nation's farmland is recognized and considered in the administration of Federal laws and regulations. Federal agencies will be required to consider alternatives before taking actions that will result in the conversion of farm land to non-agricultural uses. Non-Federal actions on farmland conversion will not be regulated or affected by this bill.

The new title also contains provisions for volunteers for conservation in connection with conservation work carried out by the Soil Conservation Service.

Another section of this Farm Bill title authorizes the Secretary of Agriculture to make payments to farmers in certain areas who remove land from production for the purpose of installing enduring conservation measures that involve excavation of soil.

The Senate-passed Farm Bill reflects the diversity of American agriculture. The Farm Bill provides the basic structure for programs, which will serve producers effectively and efficiently. The strong healthy agricultural economy ensured by this Farm Bill will thereby benefit consumers.

STANDBY PETROLEUM ALLOCATION ACT OF 1981

In order to assure an equitable share of crude oil supplies for small or independent refiners during a time of national crude shortage, Senator Mark Andrews of North Dakota introduced the Standby Petroleum Allocation Act of 1981. In hearings before Senator Andrews' Rural Development, Oversight and Investigations Subcommittee, Chairman Andrews' emphasized that the passage of the bill was essential to give the highest priority to oil, gas, diesel and other fuels for agriculture and subsequently, the entire food chain—from planting to harvesting to processing and marketing, and finally to the consumer. Senator Andrews' bill was passed overwhelmingly by the full Senate.

BUDGET SAVINGS IN THE DAIRY PROGRAM (P.L. 97–6)

Early in the session, the Committee began its activities in the precedent-setting legislative initiatives to reduce Federal spending.

The bill, S. 509 (subsequently P.L. 97–6), was the first major budget-cutting measure undertaken by the new Republican controlled Senate and the new Reagan Administration. The passage of S. 509 set the tone for what would develop with succeeding budget control measures to be considered.

The Administration inherited a rapidly expanding Federal budget and a sagging economy. In order to revitalize the economy, it was necessary to begin reducing the Federal budget. The dairy price support semi-annual adjustment was the first test in the long budget cutting process.

Because of mounting Federal expenditures, the dairy price support semi-annual adjustment was a major area for Congress to review. Additionally, the dairy price support program is the only agricultural commodity program with a semi-annual adjustment.

Further, S. 509, by eliminating the semi-annual adjustment scheduled for April 1, 1981, would save an estimated $160 million in FY 1981 and $86 million in FY 1982, according to the Congressional Budget Office.

The purpose of the milk price support system, as conceived in the Agricultural Adjustment Act of 1949, is to assure an adequate supply of pure and wholesome milk to meet current needs at reasonable prices, reflect changes in the cost of production for farmers and assure a farm income level adequate to maintain the productive capacity to meet anticipated future needs.

However, farmers increased production more rapidly than consumer demand expanded. Consequently, huge government surpluses have built up. In FY 1980, the Commodity Credit Corporation spent more than $1 billion on the dairy price supports. This year gross expenditures are expected to be almost $2 billion, and the net cost to the Government could reach $1.7 billion.

The Committee found that the elimination of the semi-annual adjustment, scheduled for April 1, 1981, would have a very moderate impact on producers and would avoid an estimated 25 per cent per hundredweight increase in the annual average milk price. The resulting legislation benefited the taxpayer without significant adverse impact on milk producers.

OMNIBUS RECONCILIATION ACT OF 1981 (P.L. 97–35)

The consideration of the Omnibus Reconciliation Act of 1981 was a historic occasion for the Congress. It was the first major utilization of the reconciliation process, outlined in the Budget and Impoundment Act of 1974.

The Committee met and exceeded its reconciliation instructions. Rather than simply capping authorizations and deferring actual program cuts to the appropriations committees, the Senate Committee made specific changes in the authorizing legislation for programs, meeting the spirit of the reconciliation process as well as its substance.

In the areas within the Committee's jurisdiction, the Committee achieved savings for fiscal year 1982 totalling $1.5 billion in agriculture and farm-related programs, savings of almost $1.7 billion for fiscal year 1982 in food stamp program reforms and savings of about $1.5 billion for fiscal year 1982 and a total of $16.3 billion for fiscal years 1982 through 1984.

The bulk of the reductions came in the two largest areas of the U.S. Department of Agriculture's budget—food stamps and child nutrition programs. Most of the major reductions in the food stamp reconciliation measures were contained in S. 1007, adopted by the Senate on June 10, 1981.

Savings in the child nutrition program were achieved primarily by savings in such areas as the summer feeding program, where meals are handed out regardless of need. The Committee also tightened the program rules and regulations in order to eliminate fraud and abuse in all feeding programs.

The Committee also achieved major savings by placing caps on authorizations for certain USDA programs and cut back spending for certain Forest Service activities and reduced USDA personnel.

In addition, the conference substitute set minimum price support levels for milk between 75 percent and 90 percent of parity, with the actual levels based on the estimated amount of Government purchases under the price support level. The dairy program reductions served as an interim measure until the enactment of the Farm Bill, which made permanent program changes in the administration of the dairy price support.

Program changes ultimately approved by the House-Senate conferees on reconciliation in relation to agricultural programs included:

Reductions in the price support for milk.

Changes in the Farmers Home Administration and the Rural Electrification Administration loan programs. However, the Senate restored REA access to the Federal Financing bank program after the House had prohibited access in its reconciliation bill.

Recovery of inspection costs for cotton, tobacco grain and naval stores.

Spending reductions in the child nutrition and food stamp program.

Reductions in the authorization levels for the P.L. 480 (Food For Peace) program.

The Committee was careful to retain the basic farm programs necessary for a viable agricultural economy. However, without curbs on spending, the Federal budget would continue to grow at almost uncontrollable rates and continue to place increased pressure on the economy, which would severely affect American agricultural producers.

FOOD STAMP SPENDING CUTS—S. 1007

The total cost of the food stamp program in FY 1981 was estimated at $11.4 billion. Without any spending reforms, it is estimated that the program could reach as high as $12.5 billion in 1982. Currently, there are about 22 million Americans—about 1 in every 10—receiving food stamps.

In the past three years, the program has more than doubled in cost. In two years, between October 1978 and October 1980, participation jumped from 15.2 million to 22 million, a 45 percent increase.

Because of the tremendous increase in the cost of program, the Committee searched for solutions, which would still provide assistance to the truly needy while eliminating waste, fraud, and abuse in the program.

The committee bill increased the fiscal year 1981 authorization for appropriations for the food stamp program authorize appropriations, with limits, through fiscal year 1985, and make substantial changes in the Food Stamp Act of 1977 in order to ensure that future funding needs will be reduced and that greater control will be exercised over eligibility for food stamps.

Federal savings by S. 1007 amount to $1.8 billion in FY 1982 and rise to over $2 billion annually in later years.

The workfare provision included in S. 1007 was a significant step in providing further accountability and reality in the Food Stamp Program.

The Committee adopted an amendment offered by Chairman Helms to allow states or political subdivisions within states to operate workfare programs in which able-bodied recipients would be required to accept work offered by a state or local jurisdiction as a condition for participation in the food stamp program. The provision allows a state to apply on behalf of all or part of the state or a local government could apply directly to the Secretary of Agriculture to operate a workfare program.

Providing states and local jurisdictions with the option of establishing workfare projects is partially an outgrowth of the workfare projects that were established as part of the Food Stamp Act of 1977. That legislation provided for 14 demonstration projects to be established, upon request of the Secretary of Agriculture, to test the concept of working for food stamp benefits. The Committee was careful to provide the state and localities with the maximum flexibility in establishing and operating a food stamp workfare program.

Among other objectives, including benefits to state and local governments, the workfare programs:

1. Return something of value to the community for its support of the recipients. (The Federal Government pays 50 percent of the administrative costs involved in the operation of the workfare programs. The state and local governments receive the benefit of the work done by the recipients.)

2. Introduce the individual to the work environment.

3. Act as a deterrent to program participation for those who could work but choose not to work.

The Committee also adopted a provision prohibiting strikers from receiving food stamps due to a decrease in income as a result of a strike.

Under current law, strikers have frequently made themselves eligible for food stamps through the temporary loss of income during a strike.

The current law policy of allowing strikers to be eligible for food stamps during the strike has greatly damaged the program's public integrity. For example, food stamp benefits provided to strikers' households may have amounted to $37 million in fiscal year 1980. The Committee's provisions would automatically deny food stamps to households containing a strike member, unless the household could show that, immediately prior to the strike, it would have been eligible or was receiving food stamps according to the applicable food stamp laws. This denial of eligibility would continue food for the duration of the strike.

A single set of gross income eligibility limits is required by the bill as opposed to the original system of income limits that vary according to the type of household income and whether a household has special expenses such as medical expenses. The Committee bill established gross income eligibility limits at 130 percent of the applicable Federal "poverty line."

The Committee bill also made substantive changes in the mechanisms involving inflation indexing, earned income deductions, retrospective accounting procedures, and medical and dependent care deductions.

Other major provisions in the bill included:

Prevent artificial splitting of households by requiring non-elderly parents and their children to apply as one food stamp household and eliminating boarder provisions.

Removal of drug addicts and alcoholics, who are on residential treatment programs.

Delay and change of timing of the annual adjustments in the cost of the thrifty food plan.

Extend the penalty of disqualification to include misrepresentation as well as fraud and lengthen disqualification periods.

Improved practices for collection of overpayments.

DAIRY PRICE SUPPORT/WHEAT REFERENDUM LEGISLATION—H.R. 4612

S. 1697

Due to the delays in completing the Farm Bill in the House of Representatives, several stopgap measures had to be implemented since many agricultural programs reverted to the original authorizing legislation.

The bill, S. 1697, which passed the House of Representatives, maintained until November 15, 1981, the price of milk at the price in effect beginning October 1, 1981, and ending November 15, 1981, which is $13.10 per hundredweight. It is estimated that the increased milk price supports resulting from the return to the 1949 legislation for the dairy price supports would cost the government $200,000 per day, and if continued into 1982, it would reach as much as $1 million per day.

S. 1395 (P.L. 97-24)

S. 1395 delayed a wheat referendum, which would be necessary under the permanent legislation, which was in effect with the expiration of the 1977 Farm Bill. Without this measure, it would be necessary for wheat producers to vote on wheat allotments and quotas under the Agricultural Adjustment Act of 1949, which would be legislation in effect. For most commodities, marketing quotas and allotments have been replaced by loans and target prices.

In hearings relating to these measures, Senator Dole estimated that the wheat legislation would save taxpayers $7 million, not to mention a major savings in time and confusion created by conducting a national referendum.

EMERGENCY FUNDS FOR THE FEDERAL CROP INSURANCE CORPORATION—P.L. 96-11

The Committee provided the leadership and initiative in securing the necessary funds to ensure the continued operation of the Federal Crop Insurance Corporation.

The Federal Crop Insurance Act of 1980 was enacted to establish an expanded and improved all-risk crop insurance program for U.S. farmers. The FCIC program has been successful in expanding coverage to crop farmers throughout the nation.

However, due to the tremendous costs incurred in expanding the program, the crop insurance program faced a shutdown this year due to lack of funds.

S. 730, later enacted as P.L. 96-11, provided the temporary emergency authority for the FCIC to pay its administrative and operating expenses for 1980 out of funds set aside for payments of indemnities from the Commodity Credit Corporation fund.

The bill allowed FCIC to continue its expansion of crop coverage to additional crops as well as to continue expanding into additional counties.

EMERGENCY AUTHORITY FOR SECRETARY OF AGRICULTURE TO ASSIST IN PLANT AND ANIMAL HEALTH THREATS, P.L. 97-46

The problems encountered in California with the Mediterranean fruit fly highlighted the need for legislation, which would give the Secretary of Agriculture emergency authority in assisting with the eradication of economically devastating plant and animal diseases and pests.

Under P.L. 97-46, the Secretary of Agriculture now has the additional authority necessary to effectively assist states in dealing with outbreaks of animal and plant diseases as well as threats created by large increases in insect populations. Without this emergency assistance, agricultural economies could be destroyed.

FOOD SAFETY AMENDMENTS OF 1981 HEARINGS

The Food Safety Amendments of 1981 would amend the Federal Food, Drug, and Cosmetic Act, the Federal Meat Inspection Act, the Poultry Products Inspection Act, and the Egg Products Inspection Act.

The intent of the legislation is to make major revisions in the Nation's food safety laws. While a safe food supply is a top priority, certain revisions have been needed to bring outdated food safety laws in line with continuing advances in modern technology.

A focal point of discussion on the bill's amendments is the "zero-risk" standard, which is incorporated into current food additive laws. Much of the debate surrounding the bill was in relation to "zero-risk".

The Committee on Labor and Human Resources, and the Committee on Agriculture, Nutrition, and Forestry held three days of joint hearings in which witnesses from consumer, agricultural, government and industrial groups testified.

SUMMARY OF SAVINGS OF AGRICULTURE, FORESTRY, CHILD NUTRITION, AND RELATED PROVISIONS OF OMNIBUS BUDGET RECONCILIATION ACT OF 1981

[In millions of dollars]

	Fiscal year 1982		Fiscal year 1983		Fiscal year 1984	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
Agriculture, forestry, and related programs	728	1,554	936	1,775	1,535	2,267
Food stamps	1,658	1,658	2,046	2,046	2,334	2,334
Child nutrition	1,474	1,457	1,579	1,566	1,682	1,672
Total	3,860	4,669	4,561	5,387	5,551	6,273

COMMITTEE ON APPROPRIATIONS

The drive to reduce federal spending initiated by President Reagan has focused a national spotlight on the appropriations process. The role of the Appropriations Committee under the leadership of Senator Mark Hatfield, in setting specific funding levels for the thousands of federal programs has thus been enhanced. For while new authorization levels for federal programs were set in the Omnibus Budget Reconciliation Act of 1981, under Senate rules, appropriations may exceed authorization levels. Thus, it was left to the Appropriations Committee to enforce the resolve of Congress demonstrated in the reconciliation process.

This Committee has long embraced the goal of reducing spending, even during years when the cause was not a popular one. In 37 of the last 38 years, appropriations have been below the President's request. This year, unprecedented cuts were made.

In May 1981 Chairman Hatfield and the Committee made the first concrete response to President Reagan's call for reduced spending. While the Congressional Budget and Impoundment Control Act of 1974 established a workable impoundment process, until this year Congress had only approved 15% of presidential recommendations. This year, at the Committee's urging, the Congress approved P.L. 97–12, which rescinded fiscal year 1981 budget authority of $14.3 billion, or 95% of the President's request. The total amount rescinded in this single law is greater than the total sum of rescissions approved since the Impoundment Control Act was enacted in 1974. In addition, the Committee considered 131 requests for deferral of FY 81 funds, and a total of almost $4 billion was deferred.

The effort to reduce spending has carried over into action on fiscal year 1982 appropriations bills. During the past decade, appropriations have grown an average of over 16% a year, in current dollars. To a major extent, this growth has been due to entitlements within these appropriations. The rise in spending between 1981 and 1982 regular appropriations bills, at levels agreed to in the Senate, has been cut to 5%. This figure includes the $40 billion increase in defense spending between FY 81 and 82. Without this 25% increase, and a similarly large increase in the military construction appropriations, appropriations would be reduced by 9%. A table showing the levels of budget for the FY 81 and 82 regular bills is presented as follows:

Comparison of budget authority regular appropriation bills, fiscal years 1981–82

[Dollars in billions]

Subcommittee	1982	1981
Agriculture	20.8	20.0
Defense	199.7	159.7
District of Columbia	.6	.5
Energy-Water	12.5	12.0
Foreign operations	11.5	[1] 11.9
Housing and Urban Development	60.4	74.1
Interior	7.2	9.5
Labor-HHS	85.0	90.0
Legislative	1.3	1.2
Military construction	7.1	5.1
State, Justice, Commerce	8.6	9.1
Transportation	10.1	12.0
Treasury	9.4	9.7
Total	434.2	414.8

[1] Includes $5.5 billion for U.S. participation in the International Monetary Fund.

The Committee takes great pride in this record.

DEFENSE

Senator Ted Stevens and Senate allies successfully turned back floor efforts to delete $2.4 billion contained in H.R. 4995, the FY82 Defense Appropriations Bill, for the B–1 bomber. Senator Stevens and fellow committee members, in conference with the House, held the final defense spending total to less than $1.2 billion below the budget, effectively restoring more than $2.2 billion and House reductions. The final bill sustained all major features of the President's strategic package. Under Senator Stevens' leadership, the defense appropriations bill—$199.7 billion, the biggest ever—cleared conference in one day after it appeared there would be no final bill. As the Senate Majority Leader said, "Senator Stevens has persevered in a difficult assignment and brought to us a bill and resolved an issue that, earlier this year, even a few weeks ago, many predicted would not be resolveable in this session of Congress."

MILITARY CONSTRUCTION

Senator Paul Laxalt, Chairman of the Military Construction Appropriations Subcommittee brought a bill before the Senate containing $7.3 billion for FY82, $12.9 million under the President's amended request, even though H.R. 4241 featured the largest military construction budget in history. The final bill included a $75 million increase for the National Guard and Reserve Forces.

TRANSPORTATION

On November 3 when the Senate approved the FY82 appropriations for DOT and related agencies, Senator Mark Andrews, Chairman of the Transportation Appropriations Subcommittee said, "We have met the President more than halfway in the effort to cut the budget. We have done our fair share. We have taken a balanced and responsible approach." The bill, as later conformed to the Continuing Resolution, was $1 billion less than the President's March request and incorporated virtually the entire total of cuts. The Committee allocated these cuts among various programs in order to preserve the greatest benefit from each dollar spent. The Senate cleared the Conference Report for Presidential action.

DISTRICT OF COLUMBIA

The Senate adopted the conference report in H.R. 4522, D.C. Appropriations, FY 82 on November 19 thus clearing it for the President who signed into law on December 4, P.L. 97–91. Senator Alfonse D'Amato's D.C. Appropriations subcommittee had recommended $557,170,000, $13 million less than requested by the President. The conference committee agreed to that funding level.

ENERGY AND WATER DEVELOPMENT

The Senate adopted the conference report on H.R. 4144 Energy and Water Development Appropriation bill, FY 82 on November 21. The conference agreement provided $12.472,025,000 in new budget authority for FY 82. Senator Mark Hatfield, Chairman of the Energy and Water Development Appropriations subcommittee and Appropriation Committee chairman noted that the amount was $938,262,000 below the March request and only $92,000,000 in outlays above the September revised requests. Senator Hatfield also pointed out that the total amount for the bill was below both the House and Senate passed totals. Senator Hatfield added . . . "I believe that arriving at this lower total amount clearly shows our determination and commitment in both the House and Senate to reduce the growth in Federal spending. (CR. S. 13925, November 21, 1981).

LEGISLATIVE BRANCH

The Legislative branch appropriations bill was incorporated into H.J. Res. 325 Continuing Appropriations FY 82, P.L. 97–51. The measure thus provided $1.3 billion for the legislative branch in FY 82. The figure was $140 million below the budget request. Senator Mack Mattingly, Chairman of the Legislative Branch Appropriations subcommittee successfully worked to cut 10½ percent from the Senate budget for FY 82.

COMMERCE, STATE, JUSTICE

Senator Lowell Weicker's State-Justice-Commerce Appropriations Subcommittee reported the FY82 Commerce, State, Justice Appropriation bill at $8.63 billion. The bill was $53 million below the House version and $130 million below the President's March request of $8.76 billion. After the President's September 24 budget message, the subcommittee made reductions for various Departments and agencies funded in the bill; however, continued funding is provided for a number of important programs, including juvenile justice, legal services, and the Fulbright exchange programs.

FOREIGN OPERATIONS

For the first time in the last three years, there is reason to expect that the Congress will enact a Foreign Aid Appropriations Bill, under the leadership in the Senate of Senator Bob Kasten of Wisconsin, Chairman of the Appropriations Subcommittee on Foreign Operations. Senate passage of the bill on November 17, 1981, by a vote of 57 to 33, responded to the determination of the Reagan Administration that the programs it funded are vital to American foreign policy and the pursuit of American interests throughout the world. On December 15, agreement was reached in a conference with the House, and it is anticipated that the conference report will clear Congress today.

TREASURY

In response to the President's September requests for further budget reductions, Senator James Abdnor, Chairman of the Treasury Appropriations subcommittee re-shaped the reported version of H.R. 4121 which had been approximately $38 million beneath the President's March request. The bill, as it came to the floor in December, provided $9,397,072,000 in budget authority for Treasury, Postal Service and various related agencies. This amount was $467,560,000 less than the President's March request, $430,058,000 below the amount contained in the reported bill and $919,852,000 below the FY81 level. Senator DeConcini, ranking minority member on the subcommittee, praised Senator Abdnor's work and called the bill "an exceptional example of fiscal restraint."

HUD

Senator Jake Garn, Chairman of the HUD Appropriations Subcommittee proposed in full committee 44 changes to the conference agreement on H.R. 4034. The cumulative effect of these changes reduced by $1.6 billion the House proposed level for activities contained in the bill. The Senate adopted the conference report with amendments on November 21. The amended conference report was subsequently approved by the House on Dec. 10 and sent to the President. The savings achieved by the amendments proposed by Senator Garn amounted to reductions of approximately $1.373 billion from the previous level.

AGRICULTURE

The Senate adopted the conference report on H.R. 4119, the Agriculture, Rural Development and Related Agencies Appropriation Bill for fiscal year 1982 on December 15, 1981. The conference agreement, as amended, provides $22.6 billion in total obligational authority for fiscal year 1982. Senator Thad Cochran, Chairman of the Agriculture subcommittee, noted that the final agreement was $2.9 billion below the level provided for fiscal year 1981 and $125 million below the President's March request. Senator Cochran added, "We have succeeded in shaping this measure to a very fine balance between unprecedented budgetary con-

straints and the ever growing demand for continued progress in agricultural technology, soil conservation, rural development, and addressing food needs here and abroad."

INTERIOR

In an effort to get the Interior and Related Agencies Appropriations Act into line with the President's requirements—without gutting essential national resource and energy programs—subcommittee Chairman James McClure sponsored and secured passage of an amendment to the Conference Report which trimmed some $319 million from the bill. The final $7.2 billion bill, while still over the President's September budget, nevertheless represented about a 15 percent decrease from the comparable revised fiscal year 1981 Interior and Related Agencies budget.

Labor-Health and Human Services-Education

The fiscal 1982 Labor-HHS-Education Appropriations Bill was reported to the Senate on November 9, 1981. As Subcommittee Chairman Harrison Schmitt of New Mexico has pointed out, this is the first Labor-HHS-Education Appropriations Bill to be reported from the Senate Appropriations Committee in two years. In developing the bill, Senator Schmitt worked successfully to provide adequate funding for essential discretionary programs, such as biomedical research, Education of the Handicapped and Head Start, despite the fact that entitlement programs now consume about 70% of the funds in the measure. Senator Schmitt has made major proposals to reduce the entitlements as a necessary step to protecting the discretionary programs against even larger funding cuts.

The reported Labor-HHS-Education bill maintained important priorities for funding of discretionary programs, but still is $1.7 billion below the Subcommittee funding ceiling and some $1.5 billion below the House level for the measure. Until the Labor-HHS-Education bill is enacted, it will be funded through the Continuing Resolution. The Continuing Resolution passed this month basically maintains the Senate approach to the Labor-HHS-Education discretionary programs while providing for a $1.5 billion reduction to help the President meet his September budget goals.

Difficulties

The Committee operated this year under severe hardships. First, action on fiscal year 1982 bills was delayed two months as Congress awaited the budget revisions which were submitted by President Reagan in March. These revisions reduced requested budget authority by $37.5 billion.

During the summer months, normally prime time for consideration of appropriation bills, the attention of Congress was almost entirely devoted to the Omnibus Budget Reconciliation Act of 1981 and the Economic Recovery Tax Cut of 1981. Consideration of appropriations bills in Committee was hampered by the need to await determination of thousands of new authorization figures through reconciliation.

Just as the Appropriations Committee began reporting bills in September, the President, reacting to the worsening economic situation, requested that the Committee halt its action to await new savings proposals. The President's program was announced on September 24, and the details of the budget revisions were received in Congress on September 30, just one day before the beginning of the new fiscal year!

As a result of these factors, a continuing resolution was necessary to maintain the operations of the government pending further action on regular appropriations bills. This resolution, Public Law 97–51, set spending levels during the interim period at the lower of the two levels established by the Congress, where both Houses had acted on an appropriation bill. Where action had occurred in only one House, the rate established was the lower of the Fiscal Year 1981 or the level set by the one House. Public Law 97–51 expired on November 20.

While recommended appropriations for fiscal year 1982 were tens of billions under President Carter's original request, and billions under President Reagan's March request, the Committee was not able to achieve all the savings requested by President Reagan in September. His September request included a 12 percent across-the-board cut in discretionary non-defense programs, which the Committee could not support. As a result, H.J. Res. 357, the further Continuing Resolution adopted by the Committee after a strenuous, almost non-stop 20-hour conference with the House, was vetoed by the President. In its place, Congress sent to the President a simple extension of the previous resolution until December 15.

Subsequently two individual appropriations bills were signed by the President: H.R. 4144, making appropriations of $12,472,025,000 for Energy and Water Development, and H.R. 4522, making appropriations of $557,170,000 in federal funds for the District of Columbia.

After the Presidential veto of H.J. Res. 357, a cooperative legislative/executive search for additional budget reductions was instituted. The effort led to the identification of an additional $2 billion in outlay savings, which were embodied in a substitute offered in the House of Representatives by Mr. Conte, ranking Republican on the House Committee on Appropriations, and developed with substantial input from the Senate Committee. This substitute was then agreed to by both Houses.

The continuing resolution set spending levels for the fiscal year which the President indicated he would accept for the remainder of the regular bills not yet enacted. Consequently, a number of conference reports were adopted, after further reductions were made to bring them to the levels established in the latest continuing resolution. These included: H.R. 4119, making appropriations of $20.8 billion for Agriculture, Rural Development, and Related Agencies; H.R. 4995, making appropriations of $199.7 billion for Defense; H.R. 4034, making appropriations of $60.4 billion for the Department of Housing and Urban Development and Independent Agencies; H.R. 4035, making appropriations of $7.2 billion for the Department of Interior and Related Agencies; H.R. 4241, making appropriations of $7.1 billion for Military Construction; and H.R. 4209, making appropriations of $10.1 billion for the Department of Transportation and Related Agencies; H.R. 4559, making appropriations of $11.5 billion for foreign operations.

Outlook

The Committee notes with dismay that while non-defense appropriated funds have been reduced this year at great sacrifice to the programs involved and the citizens served by these programs, uncontrollable expenditures continue to increase. These uncontrollable programs, combined with extraordinary inflation, have been responsible for the overwhelming majority of the increase in federal expenditures over the past decade, yet attention has remained focused on reducing outlays in programs which remain genuinely controllable. Discretionary programs are now close to their bare-bones level. The Committee deplores this situation, and believes that spending can never be brought under government control as long as so much of the budget cannot be reached through the conventional budget process. Thus the Committee welcomes the indications that the Administration will propose substantial reductions in entitlement programs in the second session of the 97th Congress.

COMMITTEE ON ARMED SERVICES

The Armed Services Committee's primary responsibility, under the able leadership of its chairman, Senator John Tower, is for matters relating to the common defense. The annual authorization process is the principal method by which the Committee reviews the policies, programs, and budget of the Department of Defense. The Committee's authority in this area encompasses weapons development and procurement, military manpower and related matters.

In examining defense programs during the authorization process, the legislative and investigative functions of the Committee are often combined. For example, to determine manpower ceilings the committee will review manpower requirements and objectives in light of the perceived threat and present capabilities. During this review, the committee also evaluates the manpower objectives and whether they are being met by qualified personnel. Then, it will examine the planned changes in overall force structure, particularly as it relates to the addition of new ships and aircraft to any requested increase in manpower levels. The Committee carefully analyzes the annual Department of Defense authorization request to determine for itself whether or not such request is justified and then makes its recommendations to the Senate.

THE WORK OF SUBCOMMITTEES

The Subcommittees of the Senate Armed Services Committee always play a vital part in the Committee's work. The Subcommittees on Military Construction chaired by Senator THURMOND, Tactical Warfare chaired by Senator GOLDWATER, Strategic and Theater Nuclear Forces chaired by Senator WARNER, Preparedness chaired by Senator HUMPHREY, Sea Power and Force Projection chaired by Senator COHEN, and Manpower and Personnel chaired by Senator JEPSEN, devoted many hours examining the appropriate portions of the defense authorization request, greatly enhancing the full committee's ability to make constructive recommendations to the Senate.

OVERSIGHT AND REVIEW

One method by which the Committee performs its oversight functions is by requesting from the Secretary of Defense, the Secretaries and Chiefs of the military services, the Comptroller General, the Library of Congress, and the General Accounting Office reports on subjects that merit continuing congressional review. The process of acquisition of selected major weapons systems, for example, is monitored through a Department of Defense quarterly reporting system that is required by statute.

Nonlegislative investigations are another part of the Committee's defense related oversight responsibilities. These include committee, subcommittee, individual Senator and committee staff investigations into matters of public concern. For example, in June 1981 the Committee conducted hearings to receive testimony from Department of Defense and public witnesses on the potential effects of proposed reductions in impact aid on various school districts and on the dependent children of military personnel enrolled in public schools. In July the Committee held hearings to receive testimony from various officials on arms control issues. Also in July the Committee received testimony from Department of Defense officials on newly implemented defense procurement policies designed to combat waste, fraud, and abuse.

In a letter dated, September 17, 1981, Senator Charles Percy, Chairman of the Senate Foreign Relations Committee, requested that the Senate Committee on Armed Services, review the military and technical implications involved in the proposed sale by the United States of certain air defense enhancements to Saudi Arabia—namely, AWACS air-

craft, AIM–9L sidewinder missiles, KC–10 refueling aircraft, and conformal fuel tanks for F–15 aircraft. This information was necessary for the Senate Foreign Relations Committee to formulate a position on resolutions which had been referred to it and which provided for Congressional disapproval of the proposed sale. And on October 22, 1981, after several committee hearings, the Senate Committee on Armed Services submitted to the Senate Foreign Relations Committee a detailed report (Report No. 97–242) which discussed the military and technical implications associated with the sale of air defense enhancements to Saudi Arabia.

Of particular importance were the more than 10 hours of hearings on the President's program to modernize America's deterrent capability conducted by the Strategic and Theatre Nuclear Forces Subcommittee, under the able leadership of its Chairman John Warner. Chairman Warner provided the careful and rapid planning that was necessary to cover the entirety of the program. As the result of his work, almost half the testimony was given in open session so that it would be freely usable in Senate debate and available for other public discussions.

The Committee receives briefings each year from the Government intelligence agencies. All of these investigations and briefings increase the Committee's understanding of national security issues and better enable it to oversee national defense programs and policies.

LEGISLATIVE ACTIVITY

Under the leadership of Chairman John Tower, during the 1st session of the 97th Congress, the Armed Services Committee reported a total of six bills and resolutions to the Senate. The annual authorization bill for the Department of Defense was the major legislative item reported to the Senate by the Committee during the period. In addition, the Committee reported the DOD Supplemental Authorization Act of 1981, the Uniformed Services Pay and Benefits Act of 1981, the Military Construction Authorization Act of 1982, the Intelligence Authorization Act, 1982, Energy National Security Program Authorization Act of 1982, and the Defense Officer Personnel Management Act (to make technical corrections to the Act). A summary of this legislation is included in this report.

SUMMARY OF LEGISLATION REPORTED BY THE SENATE COMMITTEE ON ARMED SERVICES

I. Department of Defense Supplemental Authorization Act, 1981 (Public Law 97–39, August 14, 1981)

Purpose of the act

In addition to funds previously authorized to be appropriated in fiscal year 1981 for the Department of Defense, this Act authorizes:

1. additional appropriations for procurement of aircraft for the Army, Navy, Marine Corps, and Air Force; missiles for the Army, Air Force, and Marine Corps: naval vessels for the Navy; and tracked combat vehicles for the Army and Marine Corps;

2. additional appropriations for research, development, test, and evaluation for the Army, Navy, Air Force, and Defense Agencies;

3. an increase in the active duty personnel end strengths for the Navy, Marine Corps and Air Force;

4. an increase in the number of Marine Corps Reserve members authorized to serve on full-time active duty for the purpose of organizing, administering, recruiting, instructing, or training;

5. an increase in the civilian personnel end strength for the Department of Defense;

6. an increase in the authorization of the annual military training student load for the Air National Guard;

7. additional appropriations for military construction projects; and

8. certain general provisions relating to the operations of the Department of Defense.

The following is a Summary of Funds Authorized in the Act.

SUMMARY OF FUNDS AUTHORIZED IN ACT

[Dollar amounts in thousands]

	March amended request[1]	Authorized
TITLE I		
Procurement:		
Aircraft:		
Army	$128,000	$128,000
Navy and Marine Corps	143,600	143,600
Air Force	716,625	716,625
Subtotal	988,225	988,225
Missiles:		
Army	27,000	27,000
Navy		
Marine Corps	10,700	10,700
Air Force	209,369	205,900
Subtotal	247,069	243,600
Naval vessels	317,700	149,900
Tracked combat vehicles:		
Army	796,000	791,000
Marine Corps	11,300	11,300
Subtotal	807,300	802,300
Total, procurement	2,360,294	2,137,594
TITLE II		
Research and development:		
Army	79,500	83,463
Navy	146,900	138,067
Air Force	330,900	242,462
Defense agencies	41,000	16,936
Director, test and evaluation		
Total, research and development	598,300	480,928
Total, procurement and research and development	2,958,594	2,184,225
TITLE VI		
Military construction:		
Army	1,800	1,800
Navy	2,000	2,000
Air Force	56,100	55,240
Defense agencies	900	900
Family housing	16,022	0
Reserve forces	6,500	6,500
Total, military construction	83,322	66,440
Grand total	3,041,916	2,803,634

[1] Fiscal year 1981 supplemental.

The following is a summary of the Department of Defense manpower levels authorized in the act.

TITLE III—ACTIVE FORCES: SUMMARY OF AUTHORIZATION

	Request	Authorization
Active duty manpower, fiscal year 1981:		
Army	775,300	780,000
Navy	540,456	540,456
Marine Corps	190,600	190,600
Air Force	569,000	569,000

SEA PAY/SUB PAY TECHNICAL AMENDMENTS

The Congress considered three technical amendments to last year's sea pay/sub pay legislation and enacted these technical amendments along with the fiscal year 1981 defense authorization supplemental request.

TITLE IV—RESERVE FORCES: SUMMARY OF AUTHORIZATION

Full-time Reserve personnel—Marine Corps:	
Request	133
Increase	(+66)
Authorization	133

TITLE V—CIVILIAN PERSONNEL: SUMMARY OF AUTHORIZATION

Civilian manpower, fiscal year 1981:	
Request	1,013,900
Increase	+19,600
Authorization	1,012,250

TITLE VII—MISCELLANEOUS PROVISIONS

Since enactment of H.R. 7626, the Military Pay and Allowances Benefits Act of 1980, the need for certain technical changes had become apparent. H.R. 7626 granted the authority to accumulate ninety days leave under certain circumstances. Congress intended an effective date of October 1, 1979, for this provision in order to allow equal treatment for all who endured the prolonged Indian Ocean deployment both prior to and after the current January 1, 1981 effective date of the law. This change makes October 1, 1979, the effective date for the accrual of ninety days leave.

Additionally, certain members who were formerly entitled to incentive pay for the hazardous duty of submarine service were inadvertently denied eligibility for the new submarine duty incentive pay. A review of the Senate report on H.R. 7626 establishes that this was not the intent of Congress. Those excluded are operators or crew members of operational, self-propelled, submersibles, including undersea exploration and research vehicles. Also, the Congress recognized that a small group of members who serve periodically in submarines, but who do not have submarine designators (e.g., intelligence, supply and medical personnel) should also be entitled to the new submarine duty incentive pay. This Act provided that these personnel be made eligible when actually serving aboard submarines.

II. Department of Defense Authorization Act, 1982 (Public Law 97–86, December 1, 1981)

Purpose of the bill

For fiscal year 1982, this Act:

(1) authorizes appropriations for (a) major procurement, (b) research, development, test and evaluation by the Department of Defense, (c) operations and maintenance, and (d) civil defense;

(2) authorizes the personnel end strength for each military active duty component of the Armed Forces;

(3) authorizes the personnel average strengths for the Selected Reserve of each of the Reserve components of the Armed Forces;

(4) authorizes civilian end strengths for each military department of the Department of Defense;

(5) authorizes the annual average military training student load for each of the active and reserve components of the Armed Forces;

(6) imposes certain reporting requirements;

(7) imposes certain limitations with regard to specific procurement and R.D.T. & E. actions and manpower strengths; provides certain additional legislative authortiy, makes certain changes to existing law, and for other purposes.

This amendment was to the DOD appropriations bill, *not* the DOD authorization bill.

Overview of committee action on the bill

The congressional budget process places stringent time constraints on the Committee. By March 15, the Committee must provide the Budget Committee with target amounts for the national defense budget category for the Committee's deliberations and recommendations on the first concurrent budget resolution. The Committee recommended $227.4 billion in budget authority and $189.36 billion in outlays for fiscal year 1982. The first concurrent budget resolution included $226.3 billion in budget authority and $188.8 billion in outlays for the national defense budget category.

In deliberations on the defense authorization bill, fiscal and budgetary constraints were an important consideration. The Committee fully supported the congressional budget process and the concurrent resolutions on the budget throughout the authorization process.

The Senate Armed Services Committee, under Chairman Tower, gave careful consideration to the authorization bill in the 1st session of the 97th Congress. During the period January through December 1981, the committee and subcommittees held a total of 61 hearings, compiling approximately 10 volumes of printed testimony. Throughout consideration of this legislation, the full committee received important assistance from the Subcommittees on Military Construction, Tactical Warfare, Strategic and Theater Nuclear Forces, Preparedness, Sea Power and Force Projection and Manpower and Personnel.

Of significance during the consideration of the legislation was the increased emphasis given the Operation and Maintenance Budget by Senator Gordon Humphrey of New Hampshire, Chairman of the Subcommittee on Preparedness. In prior years, those rather mundane but important items within the O. & M. account, such as ammunition, spare parts, fuel, training and facilities maintenance, were regularly underfunded. As a result, military preparedness declined.

As a result of the increase in O. & M. funding, secured by Chairman Humphrey, 1982 will bring increases in supply and depot maintenance to eliminate maintenance backlogs for aircraft and combat vehicles. There will be significant increases for individual equipment and clothing for National Guard and Reserve Forces. There will be additions to funding for real property maintenance to begin to reduce the backlog of maintenance and repair that has resulted in deplorable living and working conditions of our military personnel. Furthermore, there will be provided increased flying hours for military aviation.

The Congressional Budget Act requires the Committee to report all authorization bills to the Senate by May 15. For fiscal year 1982, the Committee recommended authorization of $51.7 billion for procurement, $21.1 billion for research, development, technology and engineering, $63.5 billion for operation and maintenance and $127 million for civil defense, for a total authorization of over $136.5 billion. This total authorization was premised on a March 1981 Administration request of $136.5 billion. As a result of unexpected changes in general economic conditions, the Administration—in September 1981 while the Conferees of the House and Senate Armed Services Committees were considering the authorization bill—submitted a revised request of $130.3 billion vice the $136.5 billion originally requested. After a demanding conference with the House Conferees, the Committee returned to the Senate with a compromise bill authorizing $48.0 billion for procurement, $20.4 billion for research, development, technology and engineering, $62.2 billion for operations and maintenance and $0.1 billion for civil defense, for a total authorization of $130.7 billion.

The following is a summary of the funding levels provided for in Titles I, II, III and VIII of the Department of Defense Authorization Act for fiscal year 1982:

SUMMARY OF DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1982

[In thousands of dollars]

Item	March 1981 request	October 1981 amended request	House	Senate	Authorization	Net change from October 1981 request
Title I:						
Procurement:						
Army aircraft	1,797,400	1,897,300	1,880,300	1,836,700	1,910,200	+12,900
Navy/Marine Corps aircraft	9,352,500	9,244,500	9,902,600	9,331,700	9,302,500	+58,000
Air Force aircraft	14,751,898	13,843,898	15,023,698	15,070,798	13,773,698	−70,200
Army missiles	2,842,500	2,210,200	2,745,800	2,469,100	2,146,900	−83,300
Navy missiles	2,555,000	2,567,000	2,549,800	2,555,000	2,567,000	0
Marine Corps missiles	223,024	223,024	223,024	223,024	223,024	0
Air Force missiles	4,658,246	4,204,646	4,593,246	4,731,746	4,186,846	−17,800
Naval vessels	10,190,100	8,475,300	10,290,100	10,118,600	8,795,900	+320,600
Army tracked combat vehicles	3,487,300	3,202,300	3,469,500	3,537,300	3,251,200	+49,900
Marine Corps tracked vehicles	271,739	281,600	281,739	281,739	281,739	+139
Torpedoes and related support equipment, Navy	516,600	516,600	516,600	516,600	516,600	0

Coast Guard Reserve	12,000	11,700	12,000

TITLE VI CIVILIAN PERSONNEL

The Act provides that the military student training load for the Air National Guard be 2,377—an increase of 220 over the Administration request.

TITLE IX GENERAL PROVISIONS

The following are the highlights of the General Provisions in Title IX of the Act:

1. Section 905.—Permits military personnel to assist civilian law enforcement activities—particularly illicit drug enforcement efforts.

2. Section 909.—Authorizes the Secretary of Defense under certain specified circumstances to execute multi-year contracts for the procurement of defense equipment and associated services in order to achieve significant savings and to provide greater defense industrial stability.

3. Section 911.—Repeals the Vinson-Trammell Act of 1934 which imposed profit limitations on the construction of military aircraft and naval vessels. There was universal agreement among federal agency representatives and civilian industry representatives that the provisions of this Act were obsolete and served neither the interests of the federal government or industry.

Section 911 authorizes the President to submit new regulations to control excessive profits on defense contracts during periods of war or national emergency.

4. Section 914.—Prohibits the Department of Defense from doing business with contractors who have been debarred or suspended by another federal agency from pro-

viding equipment or services to the federal government.

5. Section 917.—Under certain circumstances, this provision prohibits the Secretary of Defense from obligating money for a particular program when such program has or is expected to exceed original funding estimates by more than a specified percent until the Secretary submits a report to Congress which report, among other things, provides an explanation of the cost overrun and outlines the steps to be taken to avoid further overruns.

III. Uniformed Services Pay Act of 1981

(Public Law 97-68, October 14, 1981)

Purpose of the act

The primary purpose of the Act is to increase the pay and allowances and benefits for members of the uniformed services and certain dependents. The legislation provides for variable increases in the basic pay and allowances for members, depending on grade and years of service. The legislation also authorizes increases in the amounts payable, establishes new authority, or modifies existing authority for flight pay, diving pay, enlistment bonuses, bonuses for nuclear-qualified officers, hazardous duty pay, and allowances for Armed Forces Health Professions Scholarship Program participants.

The legislation also provides new authority for temporary lodging entitlements, advance payment of certain travel expenses incurred in conjunction with permanent change-of-station moves, travel allowances for military members and dependents stationed at certain adverse overseas locations or in conjunction with certain emergencies and further establishes certain limitations on travel and transportation entitlements for members separating or being released from active duty. In addition, among other things, this Act increases the number of senior Reserve Officers' Training Corps (ROTC) scholarships for the Navy and Air Force, provides extended and increased authority for reimbursement of military members for alternate quarters when shipboard quarters are uninhabitable.

Background and Discussion

During the 96th Congress, significant increases in compensation were authorized for military personnel, including an 11.7 percent across-the-board pay raise, an additive Variable Housing Allowance, increases in flight and sea pay, improvements in permanent change-of-station reimbursements, and other improvements. Since enactment of these changes, some improvements in manning levels have been noted. However, Congress decided that further substantial improvements are necessary in fiscal year 1982 to provide necessary incentives for a career of military service, and to compensate members of the armed forces for the expenses they incur as a result of compliance with military orders. This Act addresses these needs by providing a wide range of general improvements plus specifically "targeted" increases aimed at enhancing career motivation and meeting manning needs in specific high-demand or hazardous skills. Set forth below is a summary of the officer and enlisted pay rates authorized in the Act:

COMMISSIONED OFFICERS[1]

Pay grade	Years of service computed under section 205 of title 37, United States Code													
	2 or less	Over 2	Over 3	Over 4	Over 6	Over 8	Over 10	Over 12	Over 14	Over 16	Over 18	Over 20	Over 22	Over 26

O-1	250	250	250	245	210	200	180	150

Of significance during Committee consideration of the legislation was an amendment offered by Sen. Dan Quayle to increase hazardous duty pay by 50%. Hazardous duty pay had not been increased since 1955. Sen. Quayle's amendment would adjust the pay scales to reflect the changes in the economic climate for the many personnel who everyday risk injury or loss of life.

AVIATION CAREER INCENTIVE PAY

"PHASE I	
"Years of aviation service (including flight training) as an offer	Monthly rate
2 or less	$125
Over 2	156
Over 3	188
Over 4	206
Over 6	400

"PHASE II	
"Years of service as an officer as computed under section 205	Monthly rate
Over 18	$370
Over 20	340
Over 22	310
Over 24	280
Over 25	250".

This Act provides a new basic pay table for uniformed service personnel and cadets at the military academies. These changes are intended to:

Relieve pay "compression" by providing larger pay differentials between first-term and career members to provide a positive career inducement;

Enhance pay rates for middle and senior enlisted grades to provide greater incentives for promotion, career advancement, and retention;

Add new longevity increases at 24 and 26 years to encourage longer service among senior enlisted personnel, and at 16, 18 and 20 years for O-3's; and

Provide increased retention incentives for mid-career officers and officers whose superior performance merits early promotion.

In effect, the Act increased the basic pay of military personnel by amounts ranging from 10 percent to 17 percent depending on pay grade. Basic pay for pay grade E-1 would increase by 10 percent; for E-2 and E-3, 10.7 percent; for E-4, 13 percent; for E-5 and E-6, 16.5 percent; for E-7, E-8, and E-9, 17 percent; and for all warrant and commissioned officers, 14.3 percent. Basic allowance for quarters and basic allowance for subsistence would increase by 14.3 percent.

Other provisions of this Act are designed to improve the "quality of life" of military personnel and their families in order to improve retention rates among our more talented military personnel who have been leaving the service in increasing numbers for more attractive civilian positions.

*IV. Military Construction Authorization Act of 1982**

(97th Congress, S. 1408)

Purpose of the act

The purpose of the Act is to provide construction and other related authority for the military departments, and the Office of the Secretary of Defense, within and outside the United States, in the total amount of $7,027,932,000.

Authorizations granted

Authorizations recommended are set forth in the table below:

Total authorization granted, fiscal year 1982

Title I (Army):	
Inside the United States	$350,176,000
Outside the United States	464,730,000
Minor construction	34,150,000
Subtotal	849,056,000
Title II (Navy):	
Inside the United States	957,288,000
Outside the United States	236,445,000
Minor construction	32,510,000
Subtotal	1,226,243,000

Title III (Air Force):	
Inside the United States	657,141,000
Outside the United States	569,174,000
Minor construction	28,680,000
Subtotal	1,254,995,000
Title IV (Defense Agencies)	304,890,000
Minor construction	6,210,000
Subtotal	311,100,000
Title V (NATO infrastructure)	425,000,000
Title VI (M–X)	366,000,000
Title VII (Military Family Housing):	
Construction	273,354,000
Operations and maintenance	2,040,184,000
Homeowners assistance	2,000,000
Subtotal	2,319,538,000
Title IX (Guard and Reserve Forces):	
Army National Guard	60,000,000
Army Reserve	50,000,000
Naval and Marine Corps Reserve	35,000,000
Air National Guard	100,000,000
Air Force Reserve	35,000,000
Subtotal	280,000,000
Grand total	7,027,932,000

*Currently pending before the House of Representatives.

Summary of Senate Action

The Department of Defense originally requested $6,660,536,000 in new authority to construct 737 projects at 405 installations, covering 49 States, the District of Columbia, and Puerto Rico and 22 foreign countries, and to operate and maintain the current inventory of 384,000 military family housing units. This request was amended during the review of the legislation to accommodate the revisions of the new administration in the amended amount of $7,028,842,000.

The Subcommittee on Military Construction and Stockpiles under the chairmanship of the distinguished Senator Strom Thurmond, heard testimony from Department of Defense officials and from Service representatives in support of the bill at four different hearings. Special presentations were received on the high cost, special interest programs being requested.

After carefully reviewing each individual project in the request, the committee recommended elimination of some projects which it felt were of questionable validity or could be deferred without injury to the overall program. In addition, the committee has added certain high priority projects that are far enough along in design so that they can be put under contract in fiscal year 1982.

The following table summarizes Senate action:

[Dollar amounts in thousands]

	Original request	Amended request	Committee approved	Difference: Amount	Difference: Percent
Title I—Army	$813,265	$849,616	$849,056	−$560	
Title II—Navy	1,074,183	1,175,283	1,226,243	+50,950	+4
Title III—Air Force	1,610,000	1,680,955	1,254,995	−425,960	−25
Title IV—Defense agencies	248,400	326,100	311,100	−15,000	−5
Title V—NATO infrastructure	425,000	425,000	425,000	0	0
Title VI—MX			366,000	+366,000	+100
Title VII—Military family housing	2,284,888	2,368,888	2,315,538	−53,350	−2
Title IX—Guard and Reserve	204,800	203,000	280,000	+77,000	+38
Total	6,660,536	7,028,842	7,027,932	−910	0

V. Intelligence Authorization Act, 1982

Purpose of the Act

For fiscal year 1982 the Intelligence Authorization Act:

(1) authorizes appropriations for fiscal year 1982 for (a) intelligence activities of the United States, (b) the Intelligence Community Staff, and (c) the CIA Retirement and Disability Systems;

(2) authorizes the personnel end-strengths as of 30 September 1982 for (a) the Central Intelligence Agency, and (b) the Intelligence Community Staff; and

(3) authorizes supplemental appropriations for fiscal year 1981 for the intelligence activities of the United States.

The Classified Report and the Appendix

The classified nature of United States intelligence activities prevents the disclosure of details of the intelligence budget.

Under the leadership of Chairman Barry Goldwater, the Senate Select Committee on Intelligence, however, has prepared a classified report which describes in detail the full scope and intent of its actions and the specific amounts authorized for each of the major intelligence programs. In its unclassified report on S. 1127, Senate Report No. 97–57, the Senate Select Committee on Intelligence states that "the classified report, although not available to the public, will have the full force of any Senate Report, and that the intelligence community will comply with the guidelines, directions and limitations contained therein."

The Committee on Armed Services has prepared a classified appendix to the classified report of the Senate Select Committee on Intelligence referred to above. This appendix contains details of changes recommended by the Committee on Armed Services to the classified report of the Select Committee on Intelligence.

VI. Energy National Security Program Authorization Act of 1982

Purpose of the Act

This Act provides authority for appropriations to the Secretary of Energy for the operating expenses, capital equipment and construction costs related to the National Defense Programs of the Department of Energy.

Nominations

Another important function of the Committee under Sen. Tower's leadership is to assist the Senate in exercising its constitutional duties in the nomination process. The Committee considers all nominations for the Department of Defense positions requiring the advice and consent of the Senate. During the first session of the 97th Congress, the Committee has acted on 29 statutory nominations, all of which were subsequently confirmed by the Senate.

Following hearings and favorable Committee reports, Caspar W. Weinberger was confirmed as Secretary of Defense, Frank C. Carlucci was confirmed as Deputy Secretary of Defense, John O. Marsh, Jr. was confirmed as Secretary of the Army, John F. Lehman, Jr. was confirmed as Secretary of the Navy, George Vernon Orr, Jr. was confirmed as Secretary of the Air Force, William H. Taft, IV, was confirmed as General Counsel of the Department of Defense, Richard D. DeLauer was confirmed as Under Secretary of Defense for Research and Engineering, and Thomas K. Turnage was confirmed as Director of Selective Service. In addition, over 58,295 nominations for military promotions were routinely considered by the Commitee and approved by the Senate.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Under the leadership of the distinguished Senator from Utah, JAKE GARN, the Committee on Banking, Housing, and Urban Affairs has emphasized two major priorities during the first session of the 97th Congress. First, the Committee has reduced the rapid growth of spending for housing, urban development, urban mass transit, and export subsidies. Second, the Committee reduced and streamlined Federal Government regulatory interference in State and local government decisions about housing and development, in business practices and recordkeeping, and in exports from the United States. The Committee has also made substantial progress toward legislation to remove unnecessary statutory and regulatory restrictions on the operation of financial institutions.

The Banking Committee's reductions in Federal spending are accomplished by title III of the Omnibus Budget Reconciliation Act of 1981, P.L. 97–35. For the four fiscal years 1981 through 1983, this title saves $62 billion in budget authority and $6.6 billion in government outlays. This budget authority savings in Banking Committee programs is over one-third of the total budget authority savings of $176 billion in the Reconciliation Act. Thus, the Banking Committee with the support and leadership of Senator RICHARD LUGAR'S Housing Subcommittee had a major role in accomplishing the budget savings of this landmark legislation. Senator LUGAR'S commitment to improved Federal housing and community development programs facilitated the passage of the Housing and Community Development Act Amendments of 1981, which among other important benefits, reduced Federal intrusion into local decisionmaking as well as costly overregulation and created a state administered small cities block grant program.

The Committee also increased the efficiency of Federal housing programs through changes adopted in the Reconciliation Act. By reducing the costs of assisting each needy family, housing assistance programs can help more families with the limited government subsidies available. Senator William L. Armstrong, Chairman of the Economic Policy Subcommittee, lead the charge for permanent tax and spending reduction, increasing military pay, and assuring that public housing serves the nation's poor.

The second priority of the Banking, Housing, and Urban Affairs Committee has been to reduce unnecessary statutory and regulatory restrictions. Reductions in excessive regulations have been accomplished through the Committee's Title III of the Reconciliation Act and other legislation passed by the Senate as recommended by the Committee.

As part of the Reconciliation Act, the principal urban development program, community development block grants, has been deregulated to reduce burgeoning administrative hurdles forced in the path of local governments seeking "entitlement" community development grants. Statutory constraints on local government decisions about the appropriate type of housing assistance for their area have also been reduced. These and other changes lessen improper Federal interventions in what should be local decisions.

The Business Accounting and Foreign Trade Simplification Act, S. 708, passed the Senate on October 9, 1981, based on the Banking Committee's recommendations.

Other legislation was also enacted in 1981 upon the Committee's recommendation. The Cash Discount Act, enacted on July 27, 1981, removes the 5 percent limitation and regulatory constraints on cash discounts that have inhibited the ability of merchants to offer discounts to cash paying customers. The George Washington Commemorative Coin Act, authorizing the minting of one silver commemorative half dollar to commemorate the two hundred fiftieth anniversary of the birth of George Washington, was enacted on December 9, 1981. The Senate passed the Olympic Coin Act on December 9, 1981 authorizing the Secretary of the Treasury to mint special coins commemorating the 1984 Los Angeles Olympics.

This will remove unnecessary regulatory restraints and uncertainties about the responsibility of U.S. companies for the actions of third parties and about the legality of common practises in other countries that are necessary to facilitate U.S. exports. These excessive regulations result from the Foreign Corrupt Practices Act of 1977. The bill will also remove excessive recordkeeping requirements imposed by the accounting provisions of that act.

At the Committee's recommendation the Senate also passed the Export Administration Act Amendments of 1981, S. 1112. These amendments will increase the efficiency of export controls and reduce duplication of effort by enhancing the deterrent effect of penalties and by increasing information sharing among the enforcing agencies.

Finally the Committee has begun to develop a consensus to continue deregulation of financial institutions. This will ensure the continued financial integrity of depository institutions and enhance their ability to offer financial services to serve the needs of individual and business consumers. On October 7, the Committee Chairman, Senator Garn, introduced S. 1720 which contains seven titles. Many of these titles were introduced separately this year by other Committee members, with provisions ranging from municipal revenue bond underwriting authority for commercial banks and commercial lending powers for savings and loan associations to an increase in deposit insurance to $250,000 on IRA/Keogh retirement accounts.

By introducing this legislation, conducting hearings and promoting discussions among interested parties, the Committee should complete action next year which will remove unnecessary statutory and regulatory restrictions on the operation of banks and thrift institutions. The need for this type of comprehensive legislation is a result of steadily increasing competition within the financial service industry which has made existing laws and regulations obsolete in many cases.

COMMITTEE ON THE BUDGET

The first session of the 97th Congress has been an extraordinary period for the Senate and no less so for the Committee on the Budget led by its distinguished chairman Senator Pete Domenici. In the first seven months of 1981, the Committee's work focused largely on the spending reductions proposed in the President's Economic Recovery Plan. Through the reconciliation procedure under the Budget Act, it was possible to move the President's spending reductions through Congress in a single Omnibus Bill which the President signed into law on August 13th. This bill reduced Federal spending below the levels it would have otherwise reached by $37.1 billion in fiscal year 1982, $45.1 billion in FY 1983 and $51.7 in FY 1984. Savings in years beyond 1984 will be even larger. The Budget Committee was in the center of the work on this unprecedented legislation.

In addition to its work on reconciliation, the Budget Committee developed the First Budget Resolution for FY 1982 and reviewed all pending legislation for consistency with overall Congressional policies.

DECISION TO USE RECONCILIATION PROCEDURES

Given the enormous economic problems facing the nation, and the scope and dimension of the spending reductions with which the President sought to implement his election mandate, it quickly became clear that the traditional legislative process was not likely to deliver comprehensive results within the time period in which action was needed. The logical alternative was the reconciliation process under the Budget Act. Senators Grassley and Gorton worked unendingly both in Committee and on the floor of the Senate to bring these procedures to fruition. Where other approaches have failed, Reconciliation has proven to be the first successful method to reduce the rate of growth of the Federal Government. The decision to use the reconciliation process was a Congressional decision. It could not have been employed without support from a majority in both chambers. The strong support of the Senate majority leadership and the cooperation of the House leadership were also essential. The reconciliation procedure was used because it is the only existing mechanism which assures that Congressional decisions on aggregate fiscal policies are in fact implemented by the standing committees according to an established time table. Furthermore, while compelling unified action, reconciliation preserves the fundamental roles of the authorizing and appropriating committees as the primary policy makers with respect to specific programs.

RECONCILING AUTHORIZATIONS

A key component of the decision to use the reconciliation process was the key reconciliation of authorizations. The authorizing committees were assigned the initial responsibility for reducing the levels of spending permitted in programs within their jurisdiction. This enabled the authorizing committees to recommend priorities among those programs over which they have jurisdiction so that the remaining funds would be spent for the highest priority purposes. It also avoided placing on the Appropriations Committee most of the burden of achieving fiscal restraint.

S. CON. RES. 9—INITIAL SENATE VERSION OF RECONCILIATION INSTRUCTIONS

After reviewing the President's proposals, the Committee on the Budget provided the Senate with recommended levels of spending reductions and provided the committees with a wide variety of options which could be used to achieve those reductions. The first step was the reporting on March 23, 1981 of S. Con. Res. 9. This was a free-standing reconciliation instruction in the form of an amendment to the Second Budget Resolution for FY 1981. This resolution called for spending reductions in excess of $35 billion in fiscal year 1982 and $87 billion over the fiscal year 1982–83 period. It assumed reductions in more than 200 programs and directed Senate Committees to begin immediately the major task of marking up the necessary legislative revisions and proposals. S. Con. Res. 9 passed the Senate on April 2, 1981 by an overwhelming majority of 88–10. Senator Quayle suggested the inclusion of funding for the alcohol fuels loan guarantee program, and the way was paved for a colloquy on the Senate floor which made possible the inclusion of funding during conference consideration.

S. CON. RES. 19—SENATE VERSION OF FIRST BUDGET RESOLUTION FOR FY 1981

Shortly after the Senate approved S. Con. Res. 9, the Committee on the Budget reported S. Con. Res. 19, the First Concurrent Resolution on the Budget for Fiscal Year 1982 (which additionally revised the Second Concurrent Resolution on the Budget for Fiscal Year 1981). Because the House preferred to go to conference on one legislative vehicle and address FY 1984 as well, the reconciliation instructions contained in S. Con. Res. 9 were expanded and incorporated into S. Con Res. 19 which covered FY 1981–84. Once again, the spending reduction procedures and instructions received the overwhelming support of the Senate and S. Con. Res. 19 was approved by a vote of 78–20 on May 12, 1981. The conference with the House was completed in one day because the House through adoption of the "Gramm-Latta" version had been substantially modified floor substitute, so that it was quite similar to the Senate's resolution. The final version of the resolution was approved on May 21, 1981 by a vote of 76–20.

S. 1377—RECONCILIATION BILL

The Committee on the Budget is responsible under section 310 of the Congressional Budget and Impoundment Control Act of 1974 for packaging the legislative recommendations made by the committees of jurisdiction in response to reconciliation instructions. Thus, on June 17, 1981, the Committee on the Budget reported S. 1377, the Omnibus Reconciliation Act of 1981, a bill of about 650 pages in length and supported by explanatory material of over 600 pages. After minor modification via floor amendments, this historic legislation was passed by a vote of 80–15 on June 25, 1981.

Extraneous material

During Senate consideration of the Reconciliation bill, extensive debate centered on the inclusion of so-called "extraneous material"—provisions that did not directly relate to reducing expenditures—in the bill. A number of Senators argued that such provisions should not be protected against filibuster or non-germane floor amendments under the provisions applicable to reconciliation bills. The Committee on the Budget has no power to edit the submissions of the instructed committees. Thus, committees were free to include matter in their submissions that was not directed to the goal of spending reductions. Only a small portion of the provisions in the bill were clearly extraneous, however. The Senate leadership sought and obtained a unanimous consent agreement, exempting from budget act protection provisions that were clearly extraneous. In addition, a number of extraneous provisions were dropped by the originating Committees.

Reconciliation conference

The conference on the Reconciliation Act consumed a full month. Given the extraordinary magnitude of the legislation, the conference deliberations were characterized

by a clear bi-partisan desire to achieve the level of spending reductions achieved by the two chambers in their separate bills. More than 250 Senators and Representatives participated in this conference and 59 subconferences were established to negotiate and resolve differences on the multitude of legislative provisions contained in the House and Senate-passed bills.

The conference concluded its exhaustive work on July 29. The mammoth bill came back from the House on July 31, and passed the Senate by a vote of 80–14 on July 31, 1981.

Multi-year budgeting

In addition to the use of the reconciliation process, the First Concurrent Resolution on the Budget for Fiscal Year 1982 contained another major step forward in the improvement of the budget process. The House and Senate, were, for the first time, able to agree on the spending and revenue targets for Fiscal years 1983 and 1984 as well as the totals for the fiscal year 1982. This resolution demonstrated that a multi-year approach to budgeting is feasible within the current procedural framework. Only through such an approach can the Senate have the necessary information and perspective to make rational decisions for today and tomorrow.

Credit budgeting—off-budget spending

Although the Federal budget encompasses nearly $700 billion of direct federal spending, it does not deal adequately with the nearly $150 billion of direct loan and loan guarantees granted by agencies of the federal government. Similarly, the deficit shown in the familiar federal budget is substantially augmented by the nearly $20 billion of off-budget deficit. Most of this off-budget deficit can be attributed to the credit activities of the Federal Financing Bank.

The Committee on the Budget attempted this year to expand the scope of the budget process to encompass more fully the total activities of the federal government. For the first time, the First Concurrent Resolution on the Budget for Fiscal Year 1982 established targets for Federal credit activities distributed by budget functions. In doing so, it established targets for both direct loans and loan guarantees for all federal on- and off-budget agencies. Additionally, the resolution called upon the Executive to limit the off-budget activities of the Federal Financing Bank to levels consistent with Congressional policy. The Budget committee has established a task force to recommend further measures that Congress might wish to take.

Delayed enrollment of spending bills

As part of the First Concurrent Resolution on the Budget for Fiscal Year 1982, the Committee on the Budget recommended and Congress adopted a provision to delay enrollment of appropriation and direct spending bills which exceed committee or subcommittee allocations under the budget resolution. This procedure, described in Section 301(b) of the Congressional Budget Act, provides Congress with the opportunity to re-examine spending decisions which depart from budget resolution assumptions before legislation is signed into law. This "second-look" reflects the Congress' commitment to review its fiscal and revenue policy decisions in the aggregate and, when appropriate, to revise such actions to comport with Congressionally-established policies.

Key role of other committees

Although the Committee on the Budget was the primary coordinator of the reconciliation process, its successful use was an achievement of the entire Senate. The responsible committees supported the reconciliation instructions and implemented the instructions as they emerged from the House-Senate conference. The Committees then helped manage the floor action on the reconciliation bill and led the work in the many reconciliation sub-conferences.

In the context of an effective budget process in general, and the Reconciliation Act and the First Concurrent Resolution on the Budget in particular, the determination of the committees of jurisdiction to live within the limits established by the Congress as a whole has been and will continue to be the bedrock upon which an effective budget process must rest.

Since its inception, the Committee on the Budget has consistently sought out the advice and opinions of the standing committees of the Senate and has given their priorities the greatest possible weight in the committee's deliberations on the contours of the federal budget. This year, as in every year, budget decisions reflected the will of the Senate which has never hesitated to use its prerogative to revise the priorities recommended by the Committee on the Budget.

Second budget resolution

The work of the Budget Committee after the August recess was directed primarily to the development of the Second Concurrent Budget Resolution for FY 1982. The resolution was approved by the Senate on December 9th and by the House on December 10th.

Both the timing and the content of the Second Resolution were greatly affected by developments in the nation's economy and by a new set of policy recommendations submitted to Congress by President Reagan on September 24, 1981. The delay in action on the Resolution beyond the September 15th target date specified in the Budget Act also stemmed partially from the fact that work on the Reconciliation Act consumed time the Budget Committee would normally have spent in developing the Second Resolution.

When Congress reconvened after the August recess, it was informed that the President would shortly submit revised budget proposals for FY 1982. The September 24th Presidential address to the nation and subsequent messages to Congress proposed substantial further spending reductions, along with certain revenue enhancement actions. The President's proposals took into account the worsening economic picture and its effects on the Federal Budget deficit.

The President's proposals proved to be quite controversial. For several weeks, the Republican leadership in the Senate worked on a possible counter-proposal. It proved impossible to develop a plan that could attract sufficient support in both Houses to have a chance of passage. As a result, many of the actions recommended by the President on September 24 were not approved by Congress.

In November, the Budget Committee met for a total of five days in an effort to develop the Second Budget Resolution. It proved impossible for the Committee to reach agreement on substantive revisions of the First Budget Resolution, even though it was clear that economic developments had caused the targets in the First Budget Resolution to become outdated. The Committee finally decided to recommend that Congress simply reaffirm the First Budget Resolution for the time being. In making this recommendation the Committee recognized several realities:

1. A comprehensive plan developed by Chairman Domenici for moving the Federal Budget toward balance was not endorsed by the Administration and was defeated in the Committee by a 12 to 10 vote.

2. The House Budget Committee had concluded that a reaffirmation of the First Budget Resolution was the only version of a Second Resolution that could be passed by the House.

3. The Administration was in the midst of its budget preparations for the FY 1983 cycle and would not have its new policy recommendations available until January 1982.

4. It became clear that projections of large deficits for the next several years and the softness in the nation's economy would require comprehensive policy deliberations not feasible in the waning days of this session of Congress.

In addition to reaffirming the First Budget Resolution, Congress included in the Second Budget Resolution language (1) reaffirming the goal of a balanced budget, (2) calling on the President to submit comprehensive proposals to provide maximum progress toward a balanced budget and (3) directing the Senate Budget Committee to report a revised Second Budget Resolution for FY 1982 and a First Budget Resolution for FY 1983 no later than March 31, 1982.

What distinguishes the first session of the 97th Congress from the standpoint of its handling of budget issues, is that this was the first time a majority of both chambers believed that the overriding obligation of the House and the Senate to the public was to reduce substantially the growth of federal spending. The key action of the Senate Budget Committee was to lead the way in using the budget process to achieve this vital goal. The Budget Act provided the legislative mechanism to achieve dramatic revisions of federal fiscal policy as proposed by the President and supported by a majority of the American people.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Under the leadership of Chairman BOB PACKWOOD of Oregon, the first session of the 97th Congress, proved to be an extremely busy and productive legislative session for the Committee on Commerce, Science, and Transportation. To date, a total of 116 bills and 8 amendments have been referred to the Committee, and 39 bills and resolutions have been reported by the Committee to the Senate. This legislation touches on issues in virtually every key economic, regulatory, and scientific sector in the U.S. economy, including those relating to aviation, communications, surface transportation, merchant marine, space, oceans, and the consumer.

Throughout the legislative process, the Committee has sought to deregulate economic activities to ensure that the consumer receives better service at less total cost, to reestablish the appropriate role of Congress in the establishment of key national policy issues, and to stimulate innovative thinking and approaches in efforts to solve key national problems and increase the national well-being.

This legislative philosophy has manifested itself in such legislation as that relating to Conrail, which best illustrates the commitment of the Federal Government to return the railroad industry to the private sector; to Amtrak, where significantly greater management flexibility to operate on a more economic basis was mandated; and to communications, where the Telecommunications Competition and Deregulation Act of 1981 created a deregulatory environment for the Nation's telecommunications industry for the first time in almost 50 years.

COMMUNICATIONS

During the first session of the 97th Congress, the Communications Subcommittee, under the leadership of Sen. BARRY GOLDWATER of Arizona, fostered Senate passage of legislation, creating for the first time in almost 50 years, a deregulatory environment for the Nation's telecommunications industry. In both broadcasting and domestic common carrier industries, the actions of the

Senate have regained for Congress (not the FCC or the Courts) its appropriate role of establishing national telecommunications policy.

LEGISLATIVE ACCOMPLISHMENTS—A SUMMARY

S. 270, the Radio Deregulation Act of 1981.—Introduced on January 27, 1981 by Senator SCHMITT, and cosponsored by Senators PACKWOOD, GOLDWATER, PRESSLER, STEVENS, CANNON, and HOLLINGS. Hearings were held before the Subcommittee on Communications on February 26 and 27, 1981. S. 270 was included, in substance, by amendment to S. 1377, the Omnibus Reconciliation Act of 1981 (P.L. 97–35). The amendment was adopted by the Senate on June 25, 1981 by a vote of 55–40. The House-Senate Reconciliation conference, held July 26, 1981, adopted significant provisions of S. 270, specifically a seven-year license term for radio broadcast licensees; a lottery to be used to select between competing applicants; and reimbursement of competing applicants subject to FCC approval.

S. 271, the International Record Carrier Competition Act of 1981.—Introduced on January 27, 1981 by Senator GOLDWATER, and cosponsored by Senators PACKWOOD, SCHMITT, PRESSLER, CANNON, HOLLINGS and INOUYE. Hearings were held before the Subcommittee on February 18, 1981. S. 271 was reported by the full Committee on March 12, 1981, and passed by the Senate by voice vote on June 22, 1981. The Bill repeals Section 222 of the Communications Act of 1934. It would thus permit the FCC to allow Western Union to provide international telecommunications services.

S. 601, the Television Licensing and Renewal Act of 1981.—Introduced on March 3, 1981 by Senator GOLDWATER, cosponsored by Senators PACKWOOD, SCHMITT, PRESSLER, STEVENS, KASTEN, CANNON, HOLLINGS, INOUYE, FORD, RIEGLE, and EXON. Hearings were held before the Subcommittee on March 23 and 30, 1981. S. 601 was included, in substance, by amendment to S. 1377, the Omnibus Reconciliation Act of 1981 (P.L. 97–35). The amendment was adopted by the Senate by a vote of 55–40. The House-Senate reconciliation conference, held July 26, 1981, adopted a five-year license term for television broadcast licensees, authorized a lottery system to be used in selecting among competing applicants, and subject to FCC approval, allows for reimbursement of competing applicants.

S. 720, the Public Telecommunications Act of 1981.—Introduced on March 17, 1981 by Senator Goldwater, and cosponsored by Senators PACKWOOD, SCHMITT and PRESSLER. Hearings were held before the Subcommittee on April 6 and 8, 1981, and the bill was reported out of full Committee on April 7, 1981. Although S. 720 remains on the Senate Calendar (No. 122), it was included, in substance, as an amendment to S. 1377, the Omnibus Budget Reconciliation Act of 1981 (P.L. 97–35) on June 25, 1981 by a 55–40 vote of the Senate. This measure, as approved in the House-Senate reconciliation conference, retains a forward-funding concept for public broadcasting, by authorizing appropriations of $130 million for three years beginning in 1984. The Conference agreement further authorized for public telecommunications facilities the following amounts: $20 million for 1982; $15 million for 1983; and $12 million for 1984.

S. 821, the Federal Communications Commission Authorization Act of 1981.—Introduced on March 27, 1981 by Senator PACKWOOD, and cosponsored by Senators GOLDWATER, SCHMITT and PRESSLER. Hearings were held before the Subcommittee on May 1, 1981. The bill was reported by the Committee on May 6, 1981. Although S. 821 appears on the Senate Calendar (No. 98), several significant parts of it were enacted as an amendment to S. 1377, the Omnibus Reconciliation Act of 1981 (P.L. 97–35). For the first time since its establishment in 1934, this measure adopts a two-year (1982–1983) authorization for the Federal Communications Commission at $76 million for each year. Also enacted was an authorization for the National Telecommunications and Information Administration at $15.4 million for 1982. This agency had not been previously subject to Congressional authorization.

S. 898, the Telecommunications Competition and Deregulation Act of 1981.—Introduced by Senator PACKWOOD on April 7, 1981, and cosponsored by Senators GOLDWATER, SCHMITT, STEVENS, KASTEN, KASSEBAUM, PRESSLER, CANNON, and INOUYE. Hearings were held before the Subcommittee on June 2, 11, 15, 16, and 19. S. 898 was reported by the Committee on July 16, 1981 and was passed by the Senate on October 7, 1981. The purpose of S. 898, the Telecommunications Competition and Deregulation Act is to encourage marketplace competition in telecommunications service and equipment, and to deregulate telecommunications services while establishing appropriate safeguards so as to prevent anticompetitive practices. Generally, S. 898 provides for the classification of carriers to be regulated, permits only a fully separated affiliate of a dominant-regulated carrier (AT&T is so classified) to provide competitive services and equipment, prohibits a regulated carrier from providing cable services in the same operating area, and provides for the prevention of cross-subsidization of the fully separated affiliate by the dominant-regulated carrier. The bill ensures that basic telephone service will continue to be available at reasonable rates.

S. 929, the Amateur Radio Service and Private Land Mobile Services Act of 1981.—Introduced by Senator GOLDWATER and cosponsored by Senators PACKWOOD, SCHMITT, PRESSLER, STEVENS, CANNON, HOLLINGS, and INOUYE. The Committee reported S. 929 on September 18, 1981, and appears on the Senate Calendar (No. 273). S. 929 amends the Communications Act of 1934 to provide for improved administration of the amateur radio service and land mobile and fixed services by the Federal Communications Commission to address the problem of radio-frequency interference to certain electronic equipment, to permit volunteer assistance to the Federal Communications Commission in the area of examinations licensing, and enforcement in the amateur radio service.

S. 1629, the Broadcast Deregulation Act of 1981, provides as follows:

1. The FCC shall encourage the development of new and diverse sources of broadcasting programming;

2. The FCC shall eliminate unnecessary or anticompetitive broadcast rules and regulations;

3. Radio stations are not required to provide news, public affairs, locally produced, or any other programs; to adhere to any programming format; to maintain program logs; to ascertain the problems, needs and interests of its service area; or to restrict the amount, length, frequency, or scheduling of commercial matter;

4. The FCC shall renew a broadcast license if it finds that the operation of the station has been free of serious violations of the Communications Act or the rules and regulations promulgated thereunder; and that, with respect to television broadcast stations, the licensee substantially met the problems, needs, and interests of the residents of its service area in its program service;

5. No competing applications shall be considered by the FCC at renewal time for both radio and television licensees; and

6. The FCC shall encourage new and additional services, and such services will be presumed to be in the public interest if they are found to be technically feasible without causing significant technical degradation to, or interference with, other radio transmissions.

AVIATION

Senator NANCY KASSEBAUM, Chairman of the Aviation Subcommittee, developed legislation reauthorizing the Airport and Airway Development Act (ADAP). Her measure, S. 508, was reported to the Senate on May 15. A major feature of Mrs. KASSEBAUM's measure is the "defederalization" of 69 large and medium hub airports which are basically self-sufficient. This approach furthers current efforts to reduce the Federal presence in our economy while allowing the government to concentrate its resources on those airports most in need of development assistance. This measure is of great importance to small and mid-sized communities whose economic health relies heavily on the availability of well-maintained airport facilities.

S. 508 reauthorized the airport and airway development program for fiscal years 1981 through 1985 making a number of amendments to the existing program which promotes the safety and development of the airport and airway system.

The bill provides capital development funds for over 3,000 publicly used airports. It also provides that the Nation's 69 largest airports would become ineligible for federal airport development assistance after September 30, 1982; 40 airports by September 30, 1981 and 29 more by September 30, 1982.

Those airports that become ineligible to receive Federal assistance for airport development and airport planning would be permitted to charge a passenger facility charge. This would give the defederalized airports an additional source of revenues which can be used to replace the funds lost by defederalization.

Qualifying states would be given a block grant to administer for development of small commercial service and general aviation airports within their boundaries. $54 million per year would be allocated to the States for this purpose. Airports located in non-participating States would continue to apply to the Secretary of Transportation to obtain their project grants.

S. 1377, the omnibus reconciliation bill, authorized the expenditure of $450 million from the Airport and Airways Trust Fund for FY 81 for airport development by extending certain provisions of the Airport and Airway Development Act of 1970.

The Surface Transportation Subcommittee, under the leadership of Senator JOHN DANFORTH of Missouri, was responsible for formulating policy for two of the most important transportation issues facing the new Administration—Amtrak and Conrail. Amtrak has been given a new direction which has been long in coming: to operate as any private sector railroad should, free of government regulation and management. For the first time since its birth, the Consolidated Rail Corporation (Conrail) has begun the long needed process of rationalizing its system to meet the transportation needs of its shippers with a concurrent goal of financial independence. The Subcommittee also dealt with many other rail issues including the rehabilitation of historic Union Station, as well as motor carrier issues long awaiting Congressional action.

SURFACE TRANSPORTATION

S. 1192: Union Station Redevelopment Act of 1981.

Amends the National Visitor Center Facilities Act of 1968 to provide for the rehabilitation and completion of Union Station;

Declares the facility shall be used primarily as a transportation center and secondarily as a commercial complex;

Transfers responsibility of the facility from Department of the Interior to the Department of Transportation;

Authorizes funds for the accelerated purchase of the facility over a six-year period for an additional annual payment of $275,000 (A savings of $27.8 million over the original 25-year lease/purchase agreement);

Authorizes the expenditure of $1 million of authorized funds from the Northeast Corridor Improvement Program (NECIP) for a study to determine the extent of deterioration; prepare a construction plan and detailed cost estimates to provide for the structural integrity of the building; within 12-months after enactment, the Secretary is to submit a report to Congress along with a plan/costs and a commitment of funds from authorized NECIP funds or from other authorized programs to be determined by the Secretary;

Utilizes Federal Highway funds allocated to the District of Columbia Department of Transportation to complete the parking facility and associated ramps;

Authorizes Secretary of Transportation to contract out space in the building, not used for transportation facilities, to a private developer for commercial development.

S. 1192 will provide for a final resolution to the critical issue of the rapid deterioration of the historic Union Station building; return the facility back to its original primary use as a transportation center and provide efficient facilities for passengers; provide for commercial development to generate funds to be used for the operation/maintenance of the facility to insure ongoing economic self-preservation and take the financial burden off of the taxpayers.

S. 1100 was introduced by Chairman PACKWOOD, and ordered reported out of the Senate Commerce Committee. In turn, its provisions were incorporated in S. 1377.

The purpose of the legislation is to end federal subsidies for Consolidated Rail Corporation (Conrail) by a date certain. It also ensures continued rail service in the Northeast and Midwest with the least amount of disruption to shippers, rail passengers, employees, other railroads, and communities.

The legislation provides for the transfer of Conrail's freight and passenger operations. On the freight side, the legislation directs the Secretary of Transportation to transfer Conrail to the private sector only as an entity through June 1, 1983. After that date, the Secretary may transfer Conrail's lines to several different purchasers, depending on whether the railroad meets certain profitability tests or needs additional federal funding. In transferring the freight lines, the Secretary is required to ensure continued rail service and to maximize the return to the Federal Government on its investment. To ensure continued rail operations during the transfer process, the legislation authorizes $262 million for Conrail subsidies.

On the passenger side, the legislation provides for the transfer on January 1, 1983 of Conrail's commuter operations to a newly established commuter entity (Amtrak Commuter Services Corporation)) or to the state and local authorities for whom Conrail now provides these services. To help in the orderly transfer of these services, the legislation authorizes $50 million.

The legislation repeals existing labor protection provisions which give Conrail employees deprived of employment the right to collect their salaries until age 65. The legislation replaces these provisions. Under the new law, employees deprived of employment because of any transfer of Conrail's lines or the abandonment of such lines, are entitled to a lump-sum payment pursuant to a schedule worked out by the Secretary of Labor and representatives of rail labor. In addition, in order to permit Conrail to reduce its labor costs, the legislation provides for the elimination of 4,600 excess employees. Further, the legislation provides for the orderly transfer of Conrail employees to acquiring railroads. The legislation authorizes $385 million to cover the costs of the new labor protection program.

In addition to the above provisions, the legislation provides for the establishment of a new Board of Directors of the United States Railway Association. The Board is to determine whether Conrail is profitable, review the Secretary of Transportation's transfer plans, and report to Congress on the financial viability of Conrail. The legislation authorizes $13 million for the USRA in fiscal 1982, and $4 million in fiscal 1983.

Conrail is a large railroad serving 16 states in the Northeast and Midwest. Those states contain one-half of the total U.S. population and manufacturing capacity. Conrail is a billion dollar business which handles 237 million tons of freight annually. It transports daily 450,000 one-way passengers. It has 79,000 employees.

Since Conrail's creation five years ago, the Federal Government has spent $6 billion on Conrail. Despite this, Conrail still is not profitable. Further, the labor protection program established for Conrail's employees has proved to be the most expensive in labor history, with estimates in the future ranging in the billions. These costs are far greater than ever expected.

The Conrail legislation is significant in ensuring that those who now depend on Conrail's services will continue to receive such services in the future. Further, any changes are designed to ensure the least amount of disruption to all concerned. The legislation is also significant from the standpoint of returning Conrail to the private sector and ending federal subsidies of the railroad. Finally, the legislation puts an end to Conrail's costly labor protection program and establishes one in its place that is fair and reasonable.

S. 1199, The Amtrak Improvement Act of 1981 was incorporated into S. 1377 (P.L. 97-35). The law contains a two year authorization for Amtrak, $735 million for fiscal 1982 and $788 million for fiscal 1983. To ensure a more cost effective performance, Amtrak is required to recover 50 percent of its costs, excluding capital costs, from its revenues, including non-federal contributions, in fiscal year 1982. The law also contains important provisions calling for Amtrak to realize cost savings in many areas, including food service, in which Congress feels that current losses could be reduced considerably or eliminated. The Amtrak Board of Directors is revised. The membership is reduced from seventeen to nine and the actual makeup of the Board is altered to be more representative of parties interested in Amtrak.

The new law ensures the continuation of a national passenger rail system. Amtrak is given greater flexibility to improve overall performance and to make decisions which will create an efficient and cost effective rail passenger system.

S. 1199 was introduced by Chairman PACKWOOD, and ordered reported out of the Senate Commerce Committee. In turn, its provisions were incorporated in S. 1377.

Local Rail Service Assistance: The law authorizes the Local Rail Service Assistance Program at $40 million for fiscal 1982, $44 million for fiscal 1983, and $48 million for fiscal 1984. The law also makes certain changes in the program including changing the federal share from 80 percent to 70 percent with the state contributing the remaining 30 percent.

The Local Rail Service Program provides important grant assistance to states for rail planning and support of service on rail branch lines. The program is intended to cushion shippers from the effects of potential or actual abandonments. Each state is guaranteed 1 percent of annual appropriations.

Northeast Corridor Improvement Project: The law provides that not more than $200 million be authorized for the Northeast Corridor Improvement Project in fiscal 1982 and not more than $185 million in fiscal 1983. The Secretary is also required to complete the Project in accordance with the goals established in the Railroad Revitalization and Regulatory Reform Act of 1976.

The Northeast Corridor is an important part of the national transportation system. The authorized funds will be used to complete Project improvements.

DEPARTMENT OF TRANSPORTATION AUTHORIZATIONS

Railroad research and development: The law provides for an authorization of $40 million for fiscal 1982. The authorization for this program ensures that important railroad research and development continues while at the same time federal spending in the area is reduced.

Minority business resource center: The law provides for an authorization of $10 million for fiscal 1982, 1983 and 1984.

The continuation of this program ensures small minority business will be involved in revitalization projects going on in the railroad industry.

Office of the Secretary: The law provides for an authorization of $35,193,204 for fiscal 1982, 1983 and 1984. Allocation of these funds, per year, within the Department for official reception and representation expenses shall not exceed $27,000. $10,486,615 is authorized for fiscal 1982, 1983 and 1984 for conducting national transportation planning, research and development activities.

Funding the Office of the Secretary allows the Secretary to continue the essential duties and functions of the office.

Transportation research and special programs: The law authorizes $30,047,000 for fiscal 1982, $32,300,000 for fiscal 1983 and $33,300,000 for fiscal 1984 for this program.

The law ensures that the important functions of this program continue.

Federal Railroad Safety Act of 1970: The law authorizes $27,650,000 for fiscal 1982 for this program.

The law provides that important improvements and progress in railroad safety continue, while at the same time reducing the federal investment in the area.

S. 1198/S. 1377 reduces FY82 spending by $320 million in budgetary authority (including $20 million for enforcement of the 55-mph speed limit) and $110 million in outlays. For each FY82, FY83, and FY84, $100 million is authorized for National Highway Traffic Safety's portion of the Section 402 highway safety program. For FY82, the Section 402 highway safety program will continue to operate as it has in the past. For FY83, and FY84, funding will be targeted on those programs and activities which are determined to be "most effective" in reducing accidents, deaths and injuries. On October 1, 1982, the

Gray Amendment will be repealed, thereby allowing the National Highway Traffic Safety Administration to repeal or revise the 18 highway safety standards after that date. No funding is provided for the following programs: innovative grants, 55-mph incentive grants, accident data, and 55-mph categorical grants. The school bus driver training program is phased out over a three-year period. The enforcement criteria for the 55-mph speed limit has been reduced.

S. 1198/S. 1377 reduces areas of Federal regulation (a) by deleting mandatory program requirements for State highway safety programs; and (b) by setting compliance with 55-mph speed limit at current FY81 50 percent level (reducing added costs otherwise for States to achieve higher compliance).

Interstate Commerce Commission (ICC): The law provides that authorizations for the ICC shall not exceed $79 million for fiscal 1982, $80,400,000 for fiscal 1983 and $80,400,000 for fiscal 1984. The importance of the law is to ensure that the ICC has the funding to continue its functions and programs.

S. 1000 amends the Independent Safety Board Act of 1974 to include aviation incidents within the scope of investigation of transportation accidents by the National Transportation Safety Board. Grants Board investigations priority over certain other investigations conducted by federal regulatory agencies.

It also authorizes appropriations for such investigations and reporting. It contains funding levels of $18,540,000 for FY 81, $19,925,000 for FY 82 and $22,100,000 for FY 83.

S. 1000 continues authorization for National Transportation Safety Board, while somewhat expanding their authority.

S. 1099, amending the Natural Gas Pipeline Safety Act of 1968, is an amendment giving the Secretary of Transportation greater flexibility in the scheduling of meetings for the Hazardous Liquid Technical Pipeline Safety Standards Committee. An amendment providing a slightly longer period within which an aggrieved party may file for judicial review of an administrative order. An amendment authorizing $1,000 million for appropriations for fiscal year 1983 for operations of the Hazardous Liquid Pipeline Safety Program. An authorization of $3.446 million to carry out the Natural Gas Pipeline Safety Program in each of FY82 and FY83. An authorization of $3.618 million to administer the Natural Gas State Grant-in-Aid Program in each of FY82 and FY83.

The legislation would amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 and authorizes appropriations for FY82 and FY83.

S. 960, as reported, provides an authorization of $8.332 million for each of FY82 and FY83 to carry out the Hazardous Materials Transportation Act of 1974. The bill also provides for a more coordinated and consistent Federal, State and local effort in the prevention of transportation involving hazardous materials and the emergency response to such incidents by promoting a greater State and local role in incident prevention and emergency response through Federal training and planning assistance.

S. 1402, the Uniform Motor Vehicle Standards Act of 1981, was ordered reported from the Senate Commerce Committee on December 10, 1981.

S. 1402, as reported does the following:

(1) Sets federal minimum trailer length standards of 48 feet for tractor-trailer combinations and 28 feet for "doubles" (a tractor followed by two semi-trailers);

(2) Permits a state to authorize trucks up to 102 inches in width to operate on the interstate highways. The federal standard for truck width is 96 inches;

(3) Requires the Department of Transportation to study the safety productivity and fuel efficency of turnpike doubles (a tractor followed by two 45 foot trailers); and

(4) Requires that certain trucks be equipped with splash guards for safety purposes.

S. 1879, the Milwaukee Railroad and Rock Island Railroad Amendments Act, provides an expedited arbitration process where purchasers of the Rock Island Railroad estate's properties and/or the estate's trustee can petition the Interstate Commerce Commission to determine a "fair value" for properties. The legislation also authorizes the Interstate Commerce Commission to permit carriers to provide service (without subsidy) over the defunct Rock Island Railroad lines. It was reported on December 10, 1981.

Business, Trade, and Tourism

As Chairman of the Senate Business, Trade, and Tourism Subcommittee, Senator Pressler was the original sponsor of S. 304, the National Tourism Policy Act. The Senate passed the conference report of S. 304 on September 29, 1981 and the House passed it on October 1st. President Reagan signed S. 304 into law on October 16th.

The National Tourism Policy Act is the result of seven years of study and discussion by Congress, several Administrations and representatives of the U.S. travel and tourism industry. P.L. 97–63 creates the new post of Undersecretary of Commerce for Travel and Tourism, an Executive Branch interagency coordinating council for federal policy on tourism, and a private sector Travel and Tourism Advisory Board for the Department of Commerce. This law acknowledges the crucial role of the travel and tourism industry in our nation's economy and establishes the part the Federal Government shall play in coordinating and promoting this important and growing service industry.

The final version of this bill differs considerably from its original form. As first introduced, S. 304 called for the creation of an independent agency to carry out the tourism promotion programs of the federal government. This independent agency would have replaced the U.S. Travel Service which is a division of the Commerce Department.

As signed by the President, Public Law 97–63 does the following:

(1) Renames the U.S. Travel Service the U.S. Travel and Tourism Administration.

(2) Elevates the Assistant Secretary for Tourism to the level of Undersecretary.

(3) Outlines a formal policy toward tourism which commits the federal government to a program of assisting with the development of the industry and the maximization of its benefits.

(4) Creates a Travel and Tourism Advisory Board comprised of industry members. The Board shall confer with the Secretary of Commerce on the implementation of federal tourism policy.

(5) Creates a cabinet level coordinating council which shall provide a forum for the discussion and resolution of conflicts within the federal establishment which may have a negative impact on the travel and tourism industry.

S. 1104, International Investment Survey Act reauthorization:

In addition to reauthorizing the program for 1982 and making a number of technical changes, this legislation provides the Act with a permanent authorization. In the future, there will not be a need for specific legislation to authorize the International Investment Survey Act; it will simply be a part of the Commerce Department's overall budget request.

S. 1105, A Bill To Reauthorize The U.S. Travel Service For Fiscal Year 1982 was introduced on May 4, 1981; reported by the Commerce Committee on May 6, 1981; and passed by the full Senate on June 2, 1981.

The purpose of S. 1105 is to reauthorize the U.S. Travel Service within the Department of Commerce (USTS). The USTS is the arm of the Federal Government which carries out programs to attract foreign tourists to the United States. Foreign tourists spent $12 billion in the United States in 1980, which makes tourism one of our largest foreign trade revenue producers.

The anticipated budget for the U.S. Travel Service for fiscal year 1982 is approximately $7.6 to $8.0 million.

The purpose of S. 1256, the Retail Dealer's Agreement Act, is to provide remedies to dealers of office machinery who may be encountering problems with the manufacturers of such equipment.

At the current time, dealers possess very few contractual rights compared to those retained by the manufacturers who supply them with the products they sell. The one-sided nature of the existing contracts has resulted in many unfair business practices being used by the manufacturers. These practices include such things as:

(1) Termination of the dealership with little or no notice

(2) Termination without just cause

(3) Imposition of arbitrary and unreasonable sales quotas

(4) Failure to supply manuals, parts and related supplies in a timely fashion

Through S. 1256, dealers of office equipment are given certain protections, as well as recourse to federal courts should a dispute arise with a manufacturer. It is hoped that by giving the dealers standing in federal court, the manufacturers will begin to treat the dealers in a more equitable fashion.

S. 1808. A Bill To Authorize An Undersecretary of Commerce For Economic Affairs, is a part of the Commerce Department's reorganization plan. The purpose is to consolidate the duties of two Assistant Secretaries into a single Undersecretary for Economic Affairs.

The positions being consolidated are the Assistant Secretary for Policy and the Chief Economist. Besides elevating the status of the Commerce Department's economic analysis functions, the consolidation is also resulting in a personnel savings of some 44 positions.

The new Undersecretary will oversee the following offices within the Commerce Department:

(1) The Assistant Secretary for Productivity, Technology and Innovation

(2) The Assistant Secretary for Economic Analysis and Policy

(3) The Bureau of Economic Analysis

(4) The Bureau of the Census

The Undersecretary will also be the Department's chief spokesperson on questions of economic analysis and planning.

S. 1687 made a correction in S. 1104, the International Investment Survey Act reauthorization. The bill was introduced and passed on September 30, 1981.

Science, Technology, and Space

During the first session of the 97th Congress, the Subcommittee, under the leadership of Senator Harrison Schmitt from New Mexico, has reauthorized the National Aeronautics and Space Administration Act, the National Climate Program Act, the National Earthquake Hazards Reduction Program Act, and the National Science Foundation

Authorization Act. The focus of the Subcommittee's activities under SCHMITT's direction has been to maintain our leadership in science and technology as part of the economic recovery program so that the investment in science and technology can be the basis for sustaining a strong economy and national defense.

S. 1098—National Aeronautics and Space Administration Authorization Act for fiscal year 1982:

The bill is an annual authorization bill for NASA. Six days of hearings were held. The bill was reported favorably out of Committee, May 6, without objection.

Although the bill was $100 million over the March budget request, the members of the Committee were sufficiently concerned about NASA research and development capabilities in space science, space applications and aeronautics to approve the authorization without any opposition. The bill passed the Senate by voice vote on May 21, 1981. A conference was requested by the Senate. The Committee on Conference agreed to the conference report on November 21, 1981. The conference report was passed by the Senate by unanimous consent on November 23, 1981. The conference report passed the House on December 8, 1981 and is awaiting signature by the President.

S. 999, the Earthquakes Hazards Reduction Act, was introduced as an original bill, S. 1001, to extend authorization for appropriations for fiscal year 1982. S. 1001 was passed by the Senate on April 29, 1981. The House added S. 1001 as an amendment to another bill, S. 999, the Fire Prevention and Control Act, which was subsequently passed in both Houses and signed into law as P.L. 97-80 on November 20, 1981.

S. 1002, Amendments to the National Climate Program, was introduced as an original bill to authorize appropriations for fiscal year 1982 for continued operation of a number of related programs in the Department of Commerce and for coordination of related programs in Agriculture, Defense, Energy, Interior, NASA, NSF, and NOAA. These programs are intended to increase knowledge of material and human-caused climatic processes and their implications for material and physical resources. S. 1002 passed the Senate on May 5, 1981.

S. 1094, the National Science Foundation Authorization was reported by the Committee as an original bill this year for the first time. Funds are authorized for: mathematical and physical sciences; engineering; biological, behavioral and social sciences; astronomical, atmospheric, earth, and ocean sciences; ocean drilling programs; Anartic research programs; scientific, technological, and international affairs; cross directorate programs; program development and management; and science and engineering education.

THE NATIONAL OCEAN POLICY STUDY

The National Ocean Policy Study is a Senate forum for ocean policy issues. Membership in the study is not limited to members of the Committee on Commerce, Science, and Transportation and, therefore, does not have subcommittee authority to report legislation. Oceanic legislative initiatives and authorizations are approved by the full Committee.

Four major authorizations of interest to NOPS were addressed by the Committee in the first session of the 97th Congress.

S. 1186—An original bill to amend the Marine Mammal Protection Act of 1972, as amended, to extend the authorization of appropriations for fiscal years 1982, 1983, and 1984 and with technical amendments concerning marine mammal-fishery interactions and the management of marine mammals by the States instead of the Federal Government.

S. Res. 148—In addition, S. Res. 148, a resolution calling for a moratorium of indefinite duration on the commercial killing of whales was introduced on June 1, 1981. The resolution directs the United States Delegation to the International Whaling Commission to work towards this goal. S. Res. 148 recognizes that whales are important living resources that need to be scientifically studied and protected and urges the U.S. Delegation to the International Whaling Commission to work toward the adoption of such a moratorium.

S. 1133—NACOA reauthorization:

This bill authorizes the National Advisory Committee on Oceans and Atmosphere at a level of $555,000 for FY 82. In addition, two technical amendments would:

1. Allow members to serve beyond their terms until replacements are appointed,

2. Raise the daily compensation rate to parity with the executive agencies.

The Administration request is for $555,000 for FY 82, and such sums as may be required for FY 83 and FY 84.

The House has agreed to the Senate bill.

MERCHANT MARINE

During the 1st session of the 97th Congress, the Merchant Marine Subcommittee established new precedent in the areas of Coast Guard and Merchant Marine. Under the leadership of Senator SLADE GORTON of Washington, the subcommittee worked with the administration to seek long-awaited regulatory reform in international liner shipping. The existing maritime subsidy programs came under close scrutiny. Legislation in both of these areas was introduced and hearings were held. The Committee will continue its consideration of these initiatives during the second session.

Under the leadership of Committee Chairman BOB PACKWOOD, the Coast Guard was accorded strong support. Hearings revealed the need for high funding levels for this vital service. This high level of concern can be expected to continue into the second session if the 97th Congress.

S. 831—Fiscal year 82 Coast Guard authorization:

Recognizing the vital role the Coast Guard plays in national defense, commercial and recreational vessel safety, search and rescue, environmental protection, icebreaking, and the President's direction for increased drug enforcement and immigration control, the Commerce Committee authorized a high level of funding for 1982. After a complete hearing, the Committee reported S. 831 on the calling for a total Coast Guard budget of $1.99 billion for F.Y. 1982.

The U.S. Coast Guard is the sixth largest navy in the world, yet its vessels are perhaps the oldest. Thus, the Committee placed special emphasis on vessel and aircraft acquisition and construction.

Broad Senate support of this reauthorization was evidenced by Senate passage of S. 831 on May 4, and a subsequent letter signed by 34 Members requesting high funding by the Appropriations Committee.

S. 1003—Marine sanctuaries reauthorization:

An original bill to amend Title III of the Marine Protection, Research and Sanctuaries Act of 1972 as amended to authorize appropriations for FY 82 and FY 83.

The Senate bill authorizes $2.235 million for FY 82 and $2.235 for FY 83.

The House has agreed to the Senate bill.

S. 1191—Fishermen's Protection Act reauthorization:

A compromise bill agreed to in July, extends the authorization to FY 82, FY 83 and FY 84, for such sums as may be required. In addition, two riders suggested by Senator Gorton were added, declaring the Green River in Washington an unnavigable river, and exempting fishing tender vessels from inspection for a five-year period.

S. 1017—Fiscal year 82 Maritime Administration authorization:

First introduced and reported from the Commerce Committee on S. 1017, this authorization was ultimately enacted, with amendments to the Merchant Marine Act of 1936, as part of the Omnibus Budget Reconciliation Act (P.L. 97-34). Funding was authorized at levels requested by the Administration; funding for vessel construction subsidies were eliminated; adjustments were made to increase slightly the ceiling on ship construction loan guarantees; and subsidized U.S.-flag operators were permitted to construct vessels overseas under limited circumstances.

Also passed was a routine private relief bill to waive the Jones Act to permit two specific fishing vessels, to engage in coast wise trades.

CONSUMER

During the first session of the 97th Congress, the Consumer Subcommittee, under the leadership if Senator ROBERT W. KASTEN, worked on legislation to reauthorize two important consumer agencies, including a major effort to reform Consumer Product Safety Commission legislation, and the Subcommittee participated in an initial legislative step toward reform in the product liability area.

LEGISLATIVE ACCOMPLISHMENTS

S. 1155, the Consumer Product Safety Amendments of 1981:

S. 1155 was introduced by Senator KASTEN on May 11, 1981, following comprehensive Consumer Subcommittee hearings on the performance of the Consumer Product Safety Commission on April 1, 2, 3, and 7, 1981. The Senate Commerce Committee reported the bill without opposition on May 12, 1981. S. 1155 was considered during the Conference on the House and Senate budget reconciliation measures, which included similar Consumer Product Safety Commission legislation passed by the House. The House-Senate Budget Reconciliation Conference, held July 24-26 1981, adopted in substantial part the provisions of S. 1155, which was then enacted as part of the Omnibus Reconciliation Act of 1981 (P.L. 97-35). This measure reauthorizes the Consumer Product Safety Commission for 2 years (F.Y. 1982 and 1983) at $33 million and $35 million, and it makes a number of substantive and procedural reforms in the agency's rulemaking, enforcement, and data dissemination authority.

S. 1096, the Product Liability Risk Retention Act:

S. 1096 was introduced by Senators KASTEN and PACKWOOD on May 4, 1981, and was reported by the Senate Commerce Committee on July 29, 1981, without opposition. S. 1096 received widespread bipartisan support and was cosponsored by 17 Senators. On September 11, 1981, the Senate agreed by unanimous consent to postpone action on S. 1096 and to pass H.R. 2120, an identical bill which had previously passed the House. The Risk Retention Act was signed into law on September 25, 1981 (P.L. 97-45). The Act permits product sellers to form their own insurance cooperatives, called "risk retention groups" and to purchase product liability insurance on a group basis.

S. 999, a bill to authorize appropriations for the Federal Fire Prevention and Control Act:

Following a hearing on March 11, 1981, the Senate Commerce Committee acted on April 23, 1981, to report S. 999 as an original bill, S. 999 passed the Senate by unanimous consent on April 29, 1981. Somewhat different authorizing legislation passed the House on October 13, 1981, as an amendment to S. 999. On November 5, 1981, a compromise bill was passed again by both Houses.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

The Senate can take great pride in the legislative achievements of the Committee on Energy and Natural Resources under the leadership of its distinguished Chairman James McClure during the first Session of the 97th Congress. During this session the Committee considered and favorably reported forty nominations submitted by the President, all of which were confirmed by the Senate. Those nominations included two cabinet officers (the Secretary of the Interior and the Secretary of Energy), the Chairman of the independent Federal Energy Regulatory Commission, and the first chairman and four Directors of the newly established United States Synthetic Fuels Corporation. The remaining nominations filled the numerous subcabinet positions in the aforementioned organizations.

The Committee's other activities during the First Session reflected a new increased emphasis on oversight of existing laws, increased support for administrative remedies to identified issues, and strong support for regulatory reform in the programs within the jurisdiction of the Committee. Legislatively, the Committee has reported numerous bills during the First Session, twenty-five of which have passed the Senate and nine of which have become public laws. It may be objectively concluded that in both the energy jurisdictional area and the natural resources jurisdictional area, that those bills and public laws have made a substantial contribution to the new policy directions set forth by the Reagan administration and the Republican Senate, as well as materially advancing our national interests and the benefits of the American people.

In the energy field, successful Committee initiatives included the first multi-year authorization for the Department of Energy, with authorized funding levels consistent with the President's budget, new off-budget financing for the Strategic Petroleum Reserve, and needed regulatory reforms in the areas of natural gas use by electric power plants and mandatory energy conservation requirements, all of which were contained in the Omnibus Budget Reconciliation Act of 1981. Other Committee actions sustained by Senate vote include (1) the President's decision to decontrol crude oil and avoid extension of the Emergency Petroleum Allocation Act, (2) extensions of the existing International Energy Agency antitrust exemption, (3) approval of the Alaska natural gas pipeline waiver package submitted by the President. Consistent with budget cutting efforts, Senator Frank Murkowski, chairman of the Subcommittees on Regional and Community Development was able to move through the Senate the Alaska Natural Gas Pipeline Waiver Package—the largest privately financed construction project in history. Senator Murkowski's three days of hearings on the measure, S.J. Res. 115, and his participation in the floor debate proved critical to its passage by the full Senate on November 19, 1981. The Committee also completed initial action on comprehensive nuclear waste legislation which is pending on the Senate Calendar. All of these actions together make a substantial beginning in the legislative implementation of the Reagan administration's energy policies.

In the natural resources area, the Committee focused its attention on needed federal lands policy issues related to mineral leasing reform, with actions on tar sands leasing, oil shale leasing, and geothermal leasing. In the Omnibus Budget Reconciliation Act of 1981, the Committee established for the first time, almost department-wide authorization limitations on the programs of the Department of the Interior and the Forest Service in the Department of Agriculture as well as the Advisory Council on Historic Preservation and the Pennsylvania Avenue Development Corporation. The Committee also began, to be completed in the next session, action on long-awaited reclamation law reform and final action on wilderness designations and related release under the Roadless Area Review Evaluation program. Additionally, the Committee considered numerous proposals for budgetary reforms related to current funding mechanisms for natural resource programs such as the Land and Water Conservation Fund and the payment-in-lieu of taxes program. The Committee also completed action, and the Senate passed legislation, to retrofit existing western dams with relatively significant hydroelectric generation capacity to meet the needs of our western states for additional electric power from existing structures. These and other actions supported the Reagan Administration's aggressive redirection of the natural resource policies of the previous Administration.

In summary, the Committee on Energy and Natural Resources in this first session of the 97th Congress, under Republican leadership, has made substantial progress in establishing a new direction in energy and natural resource policies. I am pleased on that basis to submit the enclosed report.

Led by Senator McClure, the Committee on Energy and Natural Resources during the first session of the 97th Congress completed action on a broad variety of executive and legislative issues. In the area of Executive Calendar action, the Committee considered and favorably reported forty nominations submitted by the President. All of the reported nominations were confirmed by the Senate and the nominees are in office today. The nominations included two Cabinet officers (the Secretary of the Interior and the Secretary of Energy), the Chairman of the independent Federal Energy Regulatory Commission and the first Chairman and four Directors of the newly-established Synthetic Fuels Corporation under the Energy Security Act of 1980. The remaining nominees filled sub-Cabinet positions in the two Departments, and FERC. Several of the nominations involved extensive investigation and multiple hearings to establish firmly the full qualification of the nominees for the appointed positions. As noted, all of the nominations submitted by the President have been considered and confirmed during this session of the Senate. Fourteen days of nomination hearings were held by the Committee.

One of the primary objectives of Chairman McClure during the 97th Congress has been to increase the emphasis on the oversight of existing laws rather than focus almost exclusively on legislation to enact new laws. Additionally, the Committee has intentionally increased the emphasis on supporting administrative action to provide remedies for identified problems and issues and on regulatory reform through the administrative process. Consequently, the Committee has devoted considerable time in formal hearings and informal meetings to these non-legislative priorities. This emphasis is reflected in 27 days of oversight hearings and 2 days of workshops.

Legislatively, the Committee, under Chairman McClure, has compiled an extensive record of activities in the energy field and in the natural resource field. The Committee has reported numerous bills in this session of the Senate, twenty-five of which have passed the Senate and nine of which have been enacted as public laws during the session. These bills have covered the full spectrum of the Committee's jurisdiction from energy regulation to federal energy programs to federal lands policy and federal resource management. With the exception of some of the less significant legislation, the Committee's action on legislation this year has been intended to advance the new policies of the Reagan Administration and the Republican Senate. In many cases, those policies often have been the subject of a broad consensus of bipartisan support within the Committee and in the Senate.

In the energy field, the Committee focused its early attention on the almost immediate decontrol of crude oil by the President after the Inauguration. The President's action in that decontrol was sustained by the Senate overwhelmingly and efforts to extend controls under the Emergency Petroleum Allocation Act were defeated. Obviously, much of the first half of the session also was devoted to actions in the Omnibus Budget Reconciliation Act of 1981. That legislation included for the first time a multi-year authorization for the programs of the Department of Energy with authorization levels for each of the three fiscal years under consideration and statutory procedures for programmatic funding under those authorization limitations. The Reconciliation legislation also included off-budget financing for the Strategic Petroleum Reserve program consistent with reconciliation instructions. The legislation also included provisions which amended the Powerplant and Industrial Fuel Use Act of 1978 to allow the use of natural gas in existing electric powerplants and to streamline coal conversion procedures for electric powerplants. In addition, the legislation amended existing law to repeal mandatory energy conservation standards and substitute voluntary performance standards for new buildings.

During this session the Committee reviewed in oversight hearings the provisions of existing law after expiration of the Emergency Petroleum Allocation Act for the standby allocation of crude oil on petroleum products in the event of a severe supply interruption. Those oversight hearings lead to legislative consideration of a bill to enact new, limited authority for the President to allocate crude oil and petroleum products in the event of such an interruption under very strict limitations and restrictions, where marketplace forces would not satisfy fundamental economic requirements. That legislation eventually was passed by the Senate by a vote of 85 to 7.

The Committee reported and the Senate passed overwhelmingly the President's waiver package for the Alaska Natural Gas Pipeline pursuant to expedited procedures in existing law. Senator Murkowski's three days of hearings on the waiver were instrumental in its adoption by the Senate. The waiver package, if enacted, would provide the legal basis for private financing for the pipeline project, while retaining essential protections for consumers and other interests in the lower forty-eight states.

The Committee completed action on comprehensive nuclear waste legislation, which will provide the programmatic and financial and legal basis for an aggressive solution to the nation's nuclear waste management challenge. The nuclear waste legislation, which also was reported by the Environment and Public Works Committee, will be the

subject of Senate action early in the next session.

The Committee completed extensive oversight review of the pricing provision of the Natural Gas Policy Act. The oversight review should provide the necessary basis for Senate consideration of any Presidential proposal for modifications of that Act to achieve further deregulation of natural gas.

All of these energy actions, particularly the multi-year authorization for the Department of Energy in the Omnibus Reconciliation Act of 1981, involved detailed consideration of numerous policy and program issues associated with the federal government's programs and policies for energy conservation, development and regulation. The Committee's actions in the several legislative initiatives, on balance, should lead to decreased Federal involvement and participation in the energy markets through direct and indirect energy programs and energy regulation. Those actions also generally have been consistent with the evolving energy policies of the Reagan Administration and the Senate Republican leadership.

In the areas of natural resources, the Committee acted aggressively to initiate Senate consideration of a broad spectrum of natural resource issues in this session of the 97th Congress. The Committee acted early on legislation to retrofit existing hydroelectric structures with significantly increased generation capacity to provide needed additional capacity for those western states having available projects for retrofit. In the Omnibus Budget Reconciliation Act, the Committee acted to bring needed budgetary constraints on the programs of the Department of the Interior and the Forest Service in the Department of Agriculture. For the first time, a total authorization limitation was enacted by that Act for those Department of the Interior programs in the jurisdiction of this Committee. The legislation also included a series of appropriations targets for individual programs within the Interior Department for purposes of allocating available funding under the authorization limitation. Similar action was taken in establishing a total authorization for the Forest Service programs in the jurisdiction of this Committee and the Agriculture Committee. Several of the proposed initiatives from the Reagan Administration were included in the Reconciliation Act, such as the termination of the Youth Conservation Corps Program.

The Committee also focused considerable attention on federal lands policy issues, particularly mineral leasing reform. Tar sands leasing reform legislation was enacted in the first session, while the Committee reported oil shale leasing reform legislation and concluded hearings on geothermal reform legislation which was introduced by Senator Armstrong. Each of these legislative initiatives is intended to provide needed statutory modifications to expedite the availability of these resources for development to meet our national needs and clarify otherwise ambiguous statutory provisions which would impede such development.

The Committee concluded the hearings to support legislation for Reclamation law reform and for completion of action on the relief and wilderness issues under the Second Roadless Area Review Evaluation. Chairman McClure expects to complete action in both of these very important issues in the next session of the 97th Congress.

Additionally, the Committee received and reviewed carefully Administration proposals for budgetary reform of the Land and Water Conservation Fund, the Payment-in-Lieu-of-Taxes Program and the deregulation of small hydroelectric structures. The Committee also considered and acted on sundry other national park and leasing bills during the first session. In the area of insular affairs, the Committee acted in its territorial jurisdiction on the Virgin Island Constitution legislation and several other key matters pending in that jurisdiction of the Committee in the Department of the Interior.

These several actions in the natural resources issues area supplemented aggressive administrative action within the Administration in support of often dramatic redirections of the natural resource policies of the previous Administration. The Committee would anticipate an acceleration of these activities in the natural resource area in the second session and succeeding Congresses.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

During the First Session of the 97th Congress, the Committee on Environment and Public Works, under the skillful leadership of the Honorable Robert T. Stafford, has been active in a number of major areas, including oversight and reauthorization of several of the Nation's environmental laws, nuclear waste disposal legislation, review of 22 nominations to the Executive Branch, and water resources and water project authorizations. Consideration of budgetary issues within the Committee's jurisdiction, essential to congressional efforts to restrain Federal spending, occupied much of the Committee's schedule during the First Session and necessarily interrupted or delayed its attention to several other priority issues. Nevertheless, the Committee reported a number of bills, several of which have become public law.

BUDGET ACTIVITIES AND RECONCILIATION

The Committee was extremely active in matters relating to review of the President's budget request for Fiscal Year 1982 and the Omnibus Reconciliation Act of 1981. During February and March the Committee held 7 oversight hearings to review budget requests for the Nuclear Regulatory Commission, Water Resources Council, Office of Water Research and Technology, Farmers Home Administration, Corps of Engineers, Public Buildings Service, Fish and Wildlife Service, Environmental Protection Agency, Appalachian Regional Commission, Federal Emergency Management Agency, Tennessee Valley Authority. After completing that review, the Committee held three days of mark-up to prepare recommendations for FY82 budget items to the Senate Budget Committee on March 15.

Following adoption of the First Concurrent Resolution for the FY 1982 budget in April and pursuant to the Reconciliation Instruction, the Committee was directed to achieve savings in the form of reduced direct spending and reduced authorizations for fiscal years 1981 and 1982. In its portion of the Omnibus Reconciliation Act of 1981, S. 1377, recommended savings greater than the total Reconciliation Instruction to the Committee. For Fiscal Year 1981 it recommended savings in budget authority of $2.351 billion and savings in budget outlay of $71 million. For Fiscal Year 1982 it recommended savings in budget authority of $5.001 billion and savings budget outlay of $1.055 billion.

The Committee's actions on the reconciliation measure included: (1) $185 million reduced direct spending for Federal aid highways in FY 1982; (2) rescission of $1.7 billion of previously appropriated funds for the Clean Water Act construction grants program, plus authorizing no appropriation for Fiscal Year 1982 unless substantive amendments to this program are enacted separately by Congress; (3) placed limitation on authorization of appropriations to the Corps of Engineers for spending on construction activities; (4) placed on overall limitation of $540 million annually through Fiscal Year 1984 on EPA's abatement, control and compliance activities and non-energy research and development activities; (5) rescinded $342.5 million in Fiscal Year 1981 budget authority for the Economic Development Administration and authorized not to exceed $50 million for EDA for Fiscal Year 1982, to comply with the Administration's request to eliminate this agency in the Department of Commerce; (6) rescinded $21 million of Fiscal Year 1981 budget authority for the title V Regional Commissions and repealed title V in Fiscal Year 1982, to comply with the administration's proposal to terminate the title V commissions; (7) reduced the authority of the Appalachian Regional Commission to appropriate funds for non-highway activities to a total of $142 million in the two year period ending Fiscal Year 1981 and repealed existing authorizing for Fiscal Year 1982 appropriations, also to comply with Administration requests; and (8) rescinded $177.5 million in Fiscal Year 1981 budget authority for the Tennessee Valley Authority for the construction of a coal gasification facility and prohibited TVA from obligating any budget authority for that plant in future years.

The Conference report on the Omnibus Reconciliation Act of 1981, necessarily a compromise between the House and Senate, resulted in savings applicable only in Fiscal Years 1982, 1983, and 1984. Although that agreement did not terminate the Economic Development Administration or the Appalachian Regional Commission, these agencies' programs were authorized at significantly reduced levels in Fiscal Year 1982.

CLEAN AIR ACT REAUTHORIZATION

The Committee's major environmental activity during the First Session has been the review of implementation of the Clean Air Act and the beginning of its reauthorization. As a prelude to these efforts, in March the Committee held a joint hearing with the House Subcommittee on Health and the Environment to receive the report of the National Commission on Air Quality. Beginning in April and continuing through July the Committee held a total of 23 public oversight hearings, including field hearings in Augusta, Maine, Billings, Montana, Casper, Wyoming, Seattle, Washington, Fairbanks, Alaska, Randolph Center, Vermont, and Albany, New York, on the Clean Air Act. Testimony was heard from more than 350 persons representing federal, state and local governments, environmental groups, special interest groups, and industry comprehensively reviewing such aspects of the current law as implementation by the states, coal production and coal burning, prevention of significant deterioration, attainment of the national air quality standards, and emissions from motor vehicles. In addition, in July the Committee held a hearing on the environmental impact of chlorofluorocarbons and in October a hearing on legislation related to interstate transport of pollutants and control of acid precipitation. Having completed these hearings, the Committee has begun markup to consider draft legislative language for amendments to the Clean Air Act and has completed six days of full Committee deliberations covering the issues of primary and secondary standards and mobile sources.

SUPERFUND ISSUES

Following enactment of the Comprehensive Environmental Response, Compensation, and Liability Act (or Superfund) at the end of the 96th Congress, during the First Session of the 97th Congress, the Committee has conducted oversight implementation of this important new law. Hearing in July focused on Superfund financing and on roles of the Federal agencies involved in implementation of the law. In addition, in March the Committee held hearings on S. 681, the Oil Spill Liability and Compen-

sation Act, a bill to provide a comprehensive system of response, compensation, and liability for oil spills complementing the toxic chemicals provisions of Superfund.

CLEAN WATER ACT REAUTHORIZATION

On December 10, 1981, a Senate and House Conference Committee approved a final version of legislation to reform and extend the construction grants program of the Clean Water Act. The program provides funding for sewage treatment plants across the nation. As agreed to by the Conference Committee, the final bill is much closer to legislation approved unanimously by both the Committee on Environment and Public Works and the Senate earlier this year than to a bill approved by the House of Representatives. As such, it makes major reforms in the construction grants program.

The construction grants program was designed in 1972 to deal with water pollution problems that existed at that time. It was not designed as a public works program nor as an adjunct to economic development programs. Certainly, it was expected that benefits beyond those to the environment would occur but the focus was to be on the environment and water quality. As the Committee discovered during lengthy hearings held earlier this year, the clean-up effort has suffered from the public's inability to discern whether the construction grants program is a public works program or an environmental program.

The Administration earlier this year agreed to support continuation of the program provided reforms were made. The Senate version of the legislation implemented these reforms, and they largely were accepted by the Conference Committee. Among the reforms are provisions that target federal assistance for treatment facilities that are needed to solve existing pollution problems, rather than providing large federal grants to build expensive plants with excess or reserve capacity to meet future growth.

OCEAN DUMPING

An original bill containing a one-year reauthorization of the ocean dumping provisions of the Marine Protection, Research, and Sanctuaries Act, S. 1213, was approved by the Committee in May, passed by the Senate in June, and became public law in June (Public Law 97–16).

TOXIC SUBSTANCES AND ENVIRONMENTAL OVERSIGHT

The Subcommittee on Toxic Substances and Environmental Oversight, chaired by Senator Slade Gorton, with Senator Max Baucus as ranking minority member has considered and reported to the full Committee several important authorization bills, each consistent with the Subcommittee's desire to work toward financially sound environmental programs within the Environmental Protection Agency and the Council on Environmental Quality.

The Subcommittee has reported bills to the full Committee regarding authorization of the environmental research and development programs, the toxics control programs, and the noise regulation programs of the Environmental Protection Agency and the overall operating program of the Council on Environmental Quality. These bills were at various stages of completion at year's end.

S. 1204, authorizing noise regulation and redesigning the strategy for regulation was reported by the full Committee on May 13, 1981, after prior hearing by the Subcommittee. Unamended by the full Committee, the bill was passed by the Senate on July 14, 1981. The House of Representatives has not acted.

S. 1205, authorizing research and development programs in the Environmental Protection Agency was reported by the full Committee on May 13, 1981. It is currently pending on the Senate floor.

S. 1210, authorizing general programs of the Council on Environmental Quality was reported by the full Committee on May 13, 1981, was passed by the Senate on June 2, 1981, and was amended by the House of Representatives on September 22, 1981.

S. 1211, authorizing Environmental Protection Agency programs under the Toxic Substances Control Act was reported by the full Committee on May 13, 1981, was passed by the Senate on June 2, 1981, and was amended by the House of Representatives on September 29, 1981. A substitute was agreed to at a conference of the House of Representatives and Senate on December 9, 1981.

SUBCOMMITTEE ON NUCLEAR REGULATION

Among the numerous issues addressed by the Subcommittee on Nuclear Regulation in 1981, legislation concerning the storage and disposal of spent fuel and high-level radioactive waste from nuclear activities was perhaps the most important. On September 24, 1981, Senators McClure, Simpson, Stafford, Domenici, and Symms introduced S. 1662, a bill to establish a limited program for Federal storage of spent fuel from civilian nuclear powerplants and to set forth a Federal policy, initiate a program, and establish a national schedule for the disposal of nuclear waste from civilian activities.

Joint hearings were held on this bill by the Senate Energy and Natural Resources Commitee and the Nuclear Regulation Subcommittee in early October. At that hearing, witnesses from the Department of Energy, Nuclear Regulatory Commission, Environmental Protection Agency, Office of Technology Assessment, and the U.S. Geological Survey presented their views, together with witnesses from various States, industry organizations, and the public. In addition, the Subcommittee on Nuclear Regulation held a field hearing in Richland, Washington, as well as a second hearing in Washington, D.C. to entertain the comments and suggestions of numerous other State representatives and members of the public.

On November 30, 1981, S. 1662 was jointly reported by the Senate Energy and Natural Resources and Environment and Public Works Committees.

In addition to nuclear waste legislation, the Subcommittee on Nuclear Regulation has held legislative and oversight hearings on a wide variety of important issues. In late February, the Subcommittee initiated hearings for the reauthorization of NRC activities for Fiscal Years 1982 and 1983. For the first time, the Subcommittee agreed upon an authorization bill funding NRC activities for 2 fiscal years, rather than the year-by-year authorization process of years past. On May 15, 1981, S. 1207 was reported to the full Senate by the Environment and Public Works Committee, and now awaits floor action.

In conjunction with the Subcommittee's consideration of NRC's Fiscal Years 1982–83 authorization, a number of issues were raised and addressed by the Subcommittee, either through oversight hearings, the introduction and consideration of legislation, or both. The Subcommittee convened a hearing in late April to examine NRC's Fiscal Years 1982–83 funding requests for its research activities, a program constituting nearly one-half of NRC's $500 million budget request. In addition, the Subcommittee held a hearing for the purpose of addressing delays in the licensing of commercial nuclear power reactors, leading to the inclusion in S. 1207 of a provision for licensing of such reactors prior to the completion of public hearings. The Subcommittee also held hearings on the NRC's Nuclear Datalink System, emergency planning and preparedness activities, clean-up of the Three Mile Island Unit 2 reactor, statutory hearing requirements for certain Commission actions involving no significant hazards, and implementation of the Uranium Mill Tailings Radiation Control Act. Included in S. 1207 are certain statutory changes addressing the concerns identified by the Subcommittee in each of the foregoing areas.

WILDLIFE PROTECTION

P.L. 97–79, S. 736; The Lacey Act Amendments of 1981:

On November 16, 1981, President Reagan signed into law legislation that doubles fines and increases other penalties for violating the Lacey Act, the Nation's oldest and most basic wildlife protection law. The Act makes it illegal to transport in interstate or foreign commerce any wildlife that is taken, possessed, bought, or sold in violation of the laws of states, the United States or other countries.

S. 736 was reported by the Committee on May 21, 1981, unanimously passed by the Senate on July 24, 1981 and unanimously approved by the House of Representatives on November 4, 1981.

Under the new amendments, violators charged with serious offenses now face possible felony charges with maximum fines of 20,000 and jail sentences of up to five years. Conviction on misdemeanor charges now can bring a 10,000 fine and a one-year jail term. Civil penalties include fines of $10,000 or less.

S. 1018, the Coastal Barrier Resources Act:

The Committee has held two days of hearings on S. 1018; a field hearing in Providence, Rhode Island and a hearing in Washington, D.C. which featured the testimony of Secretary of the Interior, James G. Watt. Secretary Watt lauded S. 1018 as "precisely the sort of imaginative environmental legislation we need—legislation which can solve real problems in the stewardship of our natural resources, while at the same time, responsibly addressing America's equally serious economic problems."

The stated purpose of S. 1018 is to minimize the damage to fish, wildlife, and other natural resources associated with coastal barrier structures by restricting future Federal expenditures and financial assistance which have the effect of encouraging development of undeveloped coastal barriers.

Endangered Species Act of 1973, Oversight:

On December 8 and 10, the Committee held oversight hearings on the Endangered Species Act of 1973. The hearings began the reauthorization process that must be completed by October 1, 1982. Topics discussed included: how the Act is being implemented; where the Act is working well; where problems have arisen; and what, if any, legislative changes are needed.

WATER RESOURCES SUBCOMMITTEE

The Senate Water Resources Subcommittee held hearings earlier in the year on some of the issues raised by the Administration on the overall water resources policy. S. 1095 was a response to the three issues raised at those hearings: the need for a more independent organization to address national water policy issues; the role of the Federal Government in assisting State and regional development planning; and the need for a program of Federally assisted water research on May 12, 1981, the subcommittee on Water Resources reported out the Water Resources Planning Act Amendments (S. Rept. 97–120).

The Reagan Administration has proposed to coordinate national water resources policy through the establishment of a Sub-Cabinet Council to address policy issues and an Office of Water Policy at the Interior Department. These organizations would provide no chairman solely to address water policy issues and no formal mechanism for formal congressional or state involvement. S. 1095 would authorize both a National Board on Water Policy, and a State Advisory Committee to review actions and proposals made by the National Board. The measure would also pro-

vide that the President could establish river basin commissions where the governors of the States involved had requested such a commission and two-thirds of the States located within the basin had concurred. The bill also establishes an Office of Water Programs at the Interior Department which would administer several multi-million dollar grant programs, such as State planning grants, State water research grants, and saline water research grants. These grants would be made in response to specific proposals and would require at least a 50–50 match from non-Federal sources.

Senator James Abdnor's support and leadership in this area offers real hope of the measure's passage. The Senate Committee has also held hearings on S. 1493, a non-controversial bill which would deauthorize several Corps of Engineers water projects. Committee reported the bill on November 12, 1981 (S. Rept. 97–270). Senator Abdnor was largely responsible for the favorable response to the bill which the Senate and House passed November 18 and 23, respectively.

At the beginning of 1980, the Corps of Engineers had 583 projects which were either "inactive" or "deferred". The Corps has its own program for project deauthorization, but many Members of Congress have claimed this process is too slow. In 1980, the Corps recommended that only 14 projects be deauthorized. The projects listed in S. 1493 would reduce the construction backlog of unconstructed projects by $2 million. The deauthorization would also eliminate continued Federal land maintenance expenditures, and would allow other proposed activities to occur on the site of the project. Following are the 13 projects proposed for deauthorization:

Dickey portion of the Dickey-Lincoln Project, Maine;
Meramec Park Lake, Missouri;
Lincoln Dam, Illinois;
Illinois River duplicate locks, Illinois;
Helm Reservoir, Illinois;
Big Blue Dam, Indiana;
Lafayette Dam, Indiana;
Clifty Creek Dam, Indiana;
Nansemond River project, Virginia;
Sixes Bridges Dam, Maryland;
Delmarva Intracoastal Waterway, Delaware, Maryland, Virginia;
Fort Point Channel, Massachusetts; and
Sandridge Dam, New York.

The Committee also held hearings on S. 621, which would provide for Federal-State cooperation in the development of water projects through the Water Resources Council, an independent agency the Reagan Administration intends to eliminate. The measure also provides for block grant Federal and non-federal cost-sharing, where the non-federal entities would pay for 25 percent of the construction costs and 50 percent of operation and maintenance costs.

S. 1692 introduced and moved through the Committee on Environment and Public Works by Chairman of the Water Resources Subcommittee James Abdnor is a landmark measure in that it will for the first time in our nation's history subject new port construction to a market test through which greater efficiencies and economies demanded by current realities will be realized.

The bill, which was reported out of committee on November 18, 1981, requires 100 percent non-Federal funding of new port construction, but calls for the Federal Government to pay for 75 percent of maintenance dredging at ports.

The Subcommittee held three full days of hearings on port development: June 12 and July 16 in Washington, D.C., and August 19 in Vancouver, Washington. In addition, port development was addressed at field hearings in Minneapolis, Minnesota and Great Falls, Montana.

TRANSPORTATION—HIGHWAYS

Senator STEVE SYMMS served as Chairman of the Transportation Subcommittee with Senator LLOYD M. BENTSEN as ranking minority member during the first session of the 97th Congress.

On January 13 the full Committee conducted a hearing at which Mr. Drew Lewis, then Secretary-designate for Transportation, testified on issues concerning the Federal-aid highway program. On February 25 the Transportation Subcommittee held a hearing with the Federal Highway Administrator to consider the budget recommendations of the Department of Transportation for the Federal-aid highway program for fiscal year 1982.

The Committee recommended in its March 15 Report to the Budget Committee that budget authority for the highway program be increased by $951 million from that in current law for fiscal 1982, including a transfer of $215 million in budget authority for the Appalachian Highways Program. This recommendation was consistent with the President's March budget request and is a decrease of $432 million in budget authority from fiscal year 1981. The Committee also recommended an obligation limitation of $8.1 billion for fiscal year 1982.

The Subcommittee conducted ten days of hearings on S. 1024, the Federal-Aid Highway Improvement Act of 1981 introduced by Senator SYMMS and S. 841 introduced on request by Senator STAFFORD.

Hearings were held in Washington, D.C. on April 29 and 30 and June 10 and 19. Hearings were also held in Sioux Falls, South Dakota on June 29; Rapid City, South Dakota on June 30; Fargo, North Dakota on July 1; Denver, Colorado on August 14; Boise, Idaho on August 15; and Seattle, Washington on August 17. Issues addressed by this comprehensive highway legislation and discussed during the hearings included completion of the Interstate System, rehabilitation needs of the existing Federal-aid System, category consolidation, the bridge program, and the appropriate federal participation in the Secondary, Urban and Safety programs.

The Committee ordered S. 1024 with amendments reported on September 30 by a vote of 14 to 2. The legislation as reported incorporated additional budget reductions requested by the President in September. It provided authorizations for the highway program through fiscal year 1986, provided a completion definition for the Interstate 4R program recognizing the need for preserving the capital investment made by the federal government, and consolidated many of the smaller categories in order to give States greater flexibility in addressing their specific needs. S. 1024 was passed by the Senate on November 16 and efforts to reach agreement between the House and Senate are now in progress.

PUBLIC BUILDINGS

Jurisdiction over matters concerning public buildings and the Public Buildings Service of the General Services Administration (GSA) is in the full Environment and Public Works Committee.

Early in this session the Committee reported comprehensive legislation to establish a federal buildings policy and to rewrite the basic authorities of the Public Buildings Service of GSA contained in the Public Buildings Act of 1959. Concerned over irregularities in the GSA public buildings program and determined to replace the so-called "prospectus" system of authorization by Committee with annual authorizations enacted by the full Congress and presented to the President, the Committee reported S. 533, the Public Buildings Act of 1981. This bill passed the Senate on May 6 by a vote of 93 to 0.

By linking the authorization, appropriation and budgetary processes, the legislation would establish orderly and fiscally disciplined public buildings planning and approval procedures.

This reform bill is the culmination of three years of effort of the Committee, beginning with a comprehensive review of the total public buildings program. Senate debate on the bill—together with a similar bill passed by the Senate last year, S. 2080—marked the first time in 20 years that the full Senate considered public buildings policies of GSA or even individual building project proposals of the Public Buildings Service.

The legislation also provides new initiatives in the display and exhibition of works of art in Federal buildings, and in the encouragement of greater public use of Federal buildings. It articulates policy for location of Federal agency offices, design and management of public buildings, architectural services, leasing of privately-owned space to accommodate Federal agencies.

It reinforces previous efforts by the Committee to assure that intensive use is made of the existing Government building inventory before space is sought elsewhere, and it reflects the Committee's longstanding efforts to have permanent Federal functions placed in Government-owned buildings. The policy of purchasing and adapting existing and particularly historic buildings, established by Congress in the Public Buildings Cooperative Use Act of 1976, is clarified and strengthened. The bill also establishes the goal that within 10 years 60 percent of Federal employees be housed in Government-owned space.

In the exercise of its John F. Kennedy Center jurisdiction, the Committee reported and the Senate passed, S. 1209, an original bill, authorizing $4,544,000 to the National Park Service for non-performing arts functions during fiscal year 1982.

The Committee on Environment and Public Works reported S. 1192, the Union Station Redevelopment Act of 1981. The bill provides authorizations to return the monumental Union Station building in Washington, D.C., to use as a rail terminal, while simultaneously promoting substantial investment to renovate the building for commercial purposes. The bill shifts responsibility for the facility to the Department of Transportation from the Department of the Interior and authorizes a one-year study of the building's structural integrity and potential for commercial development. Completion of the parking garage and ramps—using Interstate Highway funds appropriated to the District of Columbia—are also authorized. The Committee on Commerce, Science and Transportation reported the legislation on May 15.

DISASTER RELIEF

In July the Subcommitee on Regional and Community Development conducted oversight hearings to examine and assess various aspects of the disaster relief program and suggested amendments to the Disaster Relief Act of 1974. Particular attention was given to policy questions, particularly the appropriateness and applicability of implementation of the Act in situations which are not caused by nature. Attention was also given to issues related to the core assistance programs of housing, and replacement or restoration of destroyed or damaged public facilities.

These hearings serve as a basis for the development and consideration of amendments to the Disaster Relief Act which the Committee expects to act upon in the second session.

OVERSIGHT HEARINGS TENNESSEE VALLEY AUTHORITY

The Committee on Environment and Public Works held oversight hearings on the Tennessee Valley Authority (TVA) on March 16–17, 1981. The purpose of the hearings

was to gather information on the organization and operation of TVA and to conduct a critical review of the issues relating to increases in electric power rates. The hearings provided significant information and insight into TVA's operation.

Following a review of the hearing record, the Committee on Environment and Public Works adopted a number of recommendations for consideration by the TVA Board of Directors. Implementation of these recommendations is left to the Board and the management at TVA. The Committee believes that actions undertaken in support of these recommendations will lead to improving the TVA's credibility and enhance the operation and management of TVA. TVA will report to the Committee on their response to the specific recommendations.

EXECUTIVE BRANCH NOMINATIONS

During the First Session the Committee held hearings and approved the nominations of 24 persons to positions in the Executive Branch. They include:

G. Ray Arnett, Assistant Secretary for Fish & Wildlife and Parks, Department of the Interior.

Ray Barnhart, Administrator, Federal Highway Administration.

Paul Bazilwich, Jr., Member, California Debris Commission.

Kathleen Bennett, Assistant Administrator for Air, Noise & Radiation, Environmental Protection Agency.

Carlos Campbell, Assistant Secretary for Economic Development, Department of Commerce.

Charles Dean, Jr., Member, Tennessee Valley Authority Board of Directors.

Anne M. Gorsuch, Administrator, Environmental Protection Agency.

John W. Hernandey, Jr., Deputy Administrator, Environmental Protection Agency.

A. Alan Hill, Member, Council on Environmental Quality.

John Horton, Assistant Administrator for Administration, Environmental Protection Agency.

Rickey James, Member, Mississippi River Commission.

Robert Jantzen, Director, Fish and Wildlife Service, Department of the Interior.

Gen. Homer Johnstone, Jr., Member, California Debris Commission.

Col. Paul Kavanaugh, Member, California Debris Commission.

Brig. Gen. Richard Kem, Member, Mississippi River Commission

W. Ernst Minor, Member, Council on Environmental Quality.

Matthew Novick, Inspector General, Environmental Protection Agency.

Nunzio Palladino, Member, Nuclear Regulatory Commission.

Maj. Gen. William Read, Member, Mississippi River Commission.

Thomas Roberts, Member, Nuclear Regulatory Commission.

Maj. Gen. Hugh Robinson, Member, Mississippi River Commission.

John Todhunter, Assistant Administrator for Toxic Substances, Environmental Protection Agency.

Lee Thomas, Associate Director, Federal Emergency Management Agency.

COMMITTEE ON FINANCE

Among the outstanding achievements of 1981 were the passage of the Omnibus Budget Reconciliation Act of 1981 and the Economic Recovery Tax Act of 1981, and under the guidance of Chairman Robert Dole, the Committee on Finance played a critical role with respect to each of these acts.

The Reconciliation Act provides approximately $35 billion in budget savings in fiscal year 1982. Of this amount, nearly one-third, or slightly under $10 billion, comes from legislative changes made in programs within the jurisdiction of the Finance Committee. The Finance Committee and the Senate passed even larger savings, but these were reduced in conference.

Among the major changes enacted in Finance Committee programs are:

Tightened eligibility for the Trade Adjustment Assistance program, saving $1.2 billion in FY 1982;

Phasing out postsecondary students' benefits under social security, for savings of $915 million;

And reform of the "disregard formula" and other changes in Aid to Families with Dependent Children, for over $1 billion in savings.

Major savings were also achieved by cutting the extended benefits program for unemployment compensation, improving Child Support Enforcement, and scaling back Title XX Social Services Block Grants.

In the health area, approximately $1.4 billion was saved under Medicare and $944 million under Medicaid.

The Economic Recovery Tax Act of 1981 is the largest tax reduction bill in American history. The principal provisions of this legislation first took shape in the Finance Committee, and many features of the bill as enacted originated on the Senate floor. The Act not only provides a significant reduction and stabilization of tax rates, but an entirely new system of accelerated depreciation for corporate taxpayers. The legislation also gives new tax incentives for saving, reforms the estate and gift tax laws, reduces the tax burden on small business, and limits the possibility for tax avoidance through the use of commodity straddles.

The House and Senate have reached agreement on a modification of legislation reported by the Finance Committee to resolve the question of the minimum benefit under social security, and to allow interfund borrowing to ameliorate the near-term financial problems of the social security system. Much more remains to be done in this area, and social security will remain a concern for the balance of the 97th Congress.

ECONOMIC RECOVERY TAX ACT OF 1981

General reasons for the bill

The Senate enacted the Economic Recovery Tax Act of 1981 in the belief that a program of significant multi-year tax reductions was needed to ensure economic growth in the years ahead. The Senate believed that this tax reduction program would help upgrade the nation's industrial base, stimulate productivity and innovation throughout the economy, lower personal tax burdens, and restrain the growth of the Federal Government. Lower tax burdens on individuals and businesses, maintained over a period of years, would help restore certainty to economic decision-making and provide a sound basis for a sustained economic recovery. The Senate envisioned a program of broadly-based tax cuts that would restore incentives to work, produce, save, and invest.

SUMMARY OF PROVISIONS

I. Individual income tax provisions

A. Individual Income Tax Reductions

Across-the-board tax rate cut

The Act provides cumulative across-the-board reductions in individual income tax rates. The reduction in tax rates will be 1¼ percent in 1981, 10 percent in 1982, 19 percent in 1983 and 23 percent in 1984 and subsequent years.

The reductions in tax liability will be accompanied by a series of reductions in taxes withheld from workers' paychecks. The withholding reductions will be at a rate of 5 percent on October 1, 1981, a further reduction of 10 percent on July 1, 1982, and a final 10 percent reduction on July 1, 1983.

Senator Charles Grassley was noteworthy in his persevering efforts to have the tax cut enacted.

50-percent maximum rate on investment income

The Act reduces the maximum tax rate on all income from 70 percent to 50 percent for 1982 and subsequent years. This establishes a maximum rate on long-term capital gains of 20 percent because only 40 percent of long-term capital gains is included in income and will be taxed at no more than the 50-percent rate. The top rate under the alternative minimum tax also will be reduced from 25 to 20 percent, starting in 1982. In addition, there will be a special 20-percent alternative tax rate on long-term capital gains, under both the regular income tax and the alternative minimum tax, for sales and exchanges between June 10, 1981, and January 1, 1982.

Deduction for two-earner married couples

In order to reduce the marriage tax penalty and to provide an additional work incentive, the Act provides a new deduction for two-earner married couples equal to a percentage of the first $30,000 of earnings of the spouse with the lesser earnings. This deduction will be available both to itemizers and nonitemizers. For 1982, the deduction will be 5 percent (a maximum deduction of $1,500). For 1983 and subsequent years, the deduction will be 10 percent (a maximum deduction of $3,000).

Together with the across-the-board rate cuts, the deduction will reduce marriage tax penalties for most taxpayers subject to the marriage penalty by at least 50 percent.

Indexing

The Act provides that the income tax brackets, zero bracket amount, and personal exemption will be adjusted for inflation, as measured by the Consumer Price Index, starting in 1985. The first adjustment, for 1985 tax returns, will be based on price increases between fiscal year 1983 and fiscal year 1984.

Senator Charles Grassley was particularly active in helping move this section of the bill through the legislative process.

Child care credit, exclusion

The Act increases the maximum amount of employment-related expenditures eligible for the child care tax credit from $2,000 to $2,400 for each of the taxpayer's first two dependents. In addition, the Act increases the rate of the child care credit from 20 percent to 30 percent for taxpayers with incomes of $10,000 or less. The rate of the credit is reduced by one percentage point for each $2,000 of income, or fraction thereof, above $10,000 until it reaches a rate of 20 percent for taxpayers with incomes above $28,000. Phase-down of the credit percentage applies to remuneration paid after December 31, 1981.

Charitable contributions deduction for nonitemizers

The Act allows taxpayers to deduct charitable contributions even if they do not itemize personal deductions.

For 1982 and 1983, the deduction is limited to 25 percent of the first $100 of contributions ($25 maximum deduction). For 1984, the deduction is limited to 25 percent of the first $300 of contributions ($75 maximum deduction). For 1985, the deduction is allowed for 50 percent of contributions with no cap, and for 1986 the deduction is allowed for 100 percent of contributions. This provision expires after 1986.

Deduction for adoption expenses

The Act provides a new itemized deduction, beginning in 1981, for the expenses of taxpayers that are paid or incurred in connection with the adoption of a "hard to place" child. The new itemized deduction is limited to $1,500 of the taxpayer's adoption expenses.

Gain on sale of residence

The Act extends from 18 months to two years the replacement period during which taxpayers must reinvest the proceeds from the sale of their principal residence in a new principal residence in order to be eligible for rollover nonrecognition treatment on the gain from that sale. In addition the Act increases from $100,000 to $125,000 the maximum amount of capital gain on the sale of a residence excludible from gross income by a taxpayer age 55 or over.

B. Foreign Earned Income

The Act modifies the eligibility standards of present law and replaces the present system of deductions for excess living costs abroad with an exclusion of a portion of foreign earned income. An individual is eligible for the exclusion if he is present in a foreign country or countries for 330 full days in any period of 12 consecutive months (rather than 510 days in any period of 18 consecutive months as under present law). The taxpayer may elect to exclude foreign earned income attributable to the period of foreign residence or presence at an annual rate of 75,000 for taxable years beginning on or after January 1, 1982. This amount is increased $5,000 a year over the next four years to $95,000. In the case of a married couple, the exemption is computed separately for each qualifying individual.

Once a taxpayer has elected to exclude foreign earned income the election remains in effect for that year and all future years. The election may be revoked with the consent of the Commissioner of Internal Revenue.

In addition to the exclusion described above, an individual may elect to exclude a portion of his income or, in the case of housing amounts not provided by an employer, elect to deduct an amount for housing, based on his housing expenses. This exclusion is equal to the excess of the taxpayer's "housing expenses" over a base housing amount. "Housing expenses" must be reasonable and paid or incurred during the taxable year by, or in behalf of the individual. Housing expenses are not treated as reasonable to the extent they are lavish or extravagant under the circumstances.

The base housing amount is 16 percent of the salary of an employee of the United States whose salary grade is step 1 of grade GS–14. Currently, this salary is $37,871 so the current base housing amount would be $6,059.

Deductions and credits attributable to excluded income are not allowed. For example, foreign taxes paid on excluded income may not be credited against U.S. taxes.

As under present law, pensions, and annuities, and income from certain trusts are not excludable.

The Act retains the present rules under which an individual is allowed *pro rata* benefits in certain cases where civil unrest or similar adverse conditions require an individual to leave the foreign country before meeting the time requirements.

II. Business tax incentive provisions

A. Capital Cost Recovery Provisions

Depreciation and investment tax credit revisions

The Act completely revises the Federal income tax treatment of capital cost recovery and makes revisions in the investment tax credit. The Senate's Accelerated Cost Recovery System (ACRS) generally provides much faster recovery of the costs of capital expenditures than occurred under prior law. The changes made by the Act will encourage investment, which will improve productivity, and will simplify the tax law and tax administration. Additionally, the new system will distribute the incentives for capital investment more evenly than prior law.

Machinery and equipment

Tangible personal property (primarily machinery and equipment) is assigned to one of four classes with recovery periods of 3, 5, 10, or 15 years. The 3-year class consists of autos, light trucks, equipment used in research and experimentation, other short-lived property, racehorses over two years old, and other horses over 12 years old. The 5-year class includes most other equipment, except long-lived public utility property. The 10-year class consists of public utility property with an ADR guideline life greater than 18 and less than 25.5 years, railroad tank cars, theme park structures, mobile homes, and utility coalburning equipment used to replace or convert oil and gas-fired boilers. The 15-year class consists of public utility property with an Asset Depreciation Range guideline life above 25 years.

An accelerated method of cost recovery is provided for each of the four classes. Before 1985, these methods provide benefits approximating the 150-percent declining balance method for the early years of the recovery period with a switch to the straight-line method for the remainder of the recovery period (adjusted to take account of a half-year convention). In 1985, cost recovery is accelerated further and provides benefits approximating the 175-percent declining balance method for the first year of the recovery period with a switch to the sum of the years-digits method for the remaining years. After 1985, the permanent cost recovery schedules take effect, and these provide benefits approximating the 200-percent declining balance method for the first year of the recovery period with a switch to the sum of the years-digits method for the remaining years.

The investment tax credit is 6 percent for eligible property in the 3-year class and 10 percent for all other eligible property, without regard to extended recovery period elections that may be made.

Real property

Real property will be written off over a 15-year period. Taxpayers will use an accelerated method based on the use of the 175-percent declining balance method in the early years of the recovery period with a switch to the straight-line method in the remaining years. A taxpayer may, however, elect a straight-line method. Taxpayers will no longer be allowed to depreciate components separately but must use a composite method of cost recovery for the entire structure.

When a taxpayer disposes of nonresidential property for which the accelerated method of depreciation has been used, gain is treated as ordinary income to the extent of all prior cost recovery deductions. For residential real property, however, the gain is treated as ordinary income only to the extent of the excess of accelerated over straight-line cost recovery. There is no ordinary income recapture in the case of dispositions of real estate for which straight-line depreciation has been elected. The phase-out of recapture for low income residential housing of present law is maintained.

Other provisions

Businesses may elect to expense (i.e., write off for the taxable year for which the property is placed in service) up to $5,000 of qualifying property in 1982 and 1983, $7,500 in 1984 and 1985, and $10,000 after 1985. No regular investment credit is allowed for this expensed property. In general, property for which this election may be made is personal property eligible to be treated as recovery property if the property is acquired by purchase for use in a trade or business and which would otherwise be eligible for the investment credit.

As part of its complete restructuring of capital cost recovery, the Act provides a number of special rules. To provide flexibility in the use of depreciation deductions, taxpayers are allowed to make a number of elections to use longer recovery periods and straight-line methods of depreciation. Rules are also provided for the computation of earnings and profits, depreciation on assets used predominantly outside the United States, and the minimum tax. Rules under which transactions are characterized as leases for tax purposes are considerably liberalized.

The Act raises the amount of used property eligible for the investment credit from $100,000 to $125,000 for 1981 through 1984, and to $150,000 for 1985 and subsequent years.

The Act limits the amount of property eligible for the investment credit to the extent to which the taxpayer is "at risk", that is, has invested his own money or is personally liable for loans. There are, however, broad exceptions from this rule for loans from financial institutions and other commercial lenders and for the energy investment credit.

In addition, the Act extends the carryover period for unused net operating losses and investment tax credits from seven to 15 years.

Effective date

ACRS will be generally effective for property placed in service after December 31, 1980. However, rules are provided to prevent related parties from making used property eligible for ACRS through certain transactions.

Tax credit for rehabilitation expenditures

The Act replaces the present 10 percent credit for expenditures to rehabilitate industrial and commercial buildings (nonresidential structures) and the present 5 year amortization for expenditures to rehabilitate certified historic structures, and the accelerated depreciation applicable to substantial rehabilitation with a new tax credit, effective for 1982 and future years. The new credit is 15 percent of expenditures to rehabilitate industrial and commercial buildings 30 to 39 years old, 20 percent of expenditures to rehabilitate such buildings that are over 39 years old, and 25 percent of expenditures related to certified rehabilitations of both residential and nonresidential certified historic structures. In addition, taxpayers who make rehabilitations under this provision are limited to straight line depreciation. Finally, in the case of expenditures to which the 15 percent and 20 percent credits apply, the basis for determining cost recovery deductions will be reduced by the amount of the credit.

Tax credit for research and experimental expenditures

To encourage research and experimentation by industry, the Act provides a 25 percent income tax credit for certain research expenditures paid or incurred in carrying on a trade or business of the taxpayer. The credit only applies to the extent these expenditures exceed those in a 3-year moving base period. Qualified research expenditures include expenditures for direct wages, supplies, and expenditures for the right to use equipment, as well as 65% of amounts paid to research firms or universities for conducting research and experimentation on behalf of the taxpayer. To encourage corporate support of basic research, 65% of a corporation's grant to universities or certain research organizations for research with no specific commercial application in view when it is commenced as similarly creditable. Rules are provided to prevent the use of these tax credits for tax shelter purposes.

The measure, sponsored by Senator John Danforth, is designed to restore the attractiveness of R&D as an investment for Amer-

ican industry. Scientific knowledge has been the traditional cutting edge of American economic strength. Unfortunately, in recent years we have been spending less and less of our G.N.P. on research and development while our major trading competitors have been increasing their spending on R&D. The R&D tax credit should help increase American productivity and thereby aid in the fight against inflation.

The research and experimentation credit is effective for wages paid or incurred after June 30, 1981 and before 1986.

Charitable contributions of research equipment

The Act permits corporations which contribute newly manufactured scientific equipment to colleges and universities for research use to claim a charitable deduction equal to the taxpayer's basis plus 50 percent of the appreciation, but not to exceed twice the basis.

Allocation to U.S.-source income

For two years, taxpayers are required to allocate expenditures for research and experimentation conducted in the United States entirely to U.S.-source income.

Incentive stock options

The Act creates a special class of "incentive stock options". There will be no tax consequences when these options are granted or when they are exercised, and employees will be allowed capital gains treatment on any gain from the sale of the stock.

The aggregate amount of stock for which any employee may be granted such options in a calendar year is limited to $100,000. However, employees are allowed a three-year carryover of up to $50,000 per calendar year if they do not use the full $100,000 in any one year. In the case of options granted before 1981, the aggregate amount of stock for which an employee may be granted incentive stock options cannot exceed $50,000 per year and $200,000 in the aggregate.

C. Small Business Provisions

Corporate rate reduction

The Act reduces the tax rate on the first $25,000 of corporate taxable income from 17 percent to 16 percent in 1982 and 15 percent in subsequent years. The Act also reduces the rate on the next $25,000 of taxable income from 20 percent to 19 percent in 1982 and 18 percent in subsequent years.

Accumulated earnings credit

The Act generally increases the credit against the accumulated earnings tax from $150,000 up to $250,000, beginning in post-1981 taxable years.

Subchapter S corporations

The Act increases the maximum number of shareholders for a subchapter S corporation from 15 to 25 and allows certain trusts to be qualified shareholders of a subchapter S corporation.

Inventory accounting

The Act simplifies LIFO inventory accounting for small businesses. Businesses with average gross receipts of less than $2 million for the prior 3 years are allowed to use a single dollar-value LIFO pool. In addition, taxpayers electing LIFO will have three years (beginning with the year of election) to tack back into income inventory write-down taken in years prior to the year of the LIFO election. The Treasury Department also is directed to issue regulations that will simplify the use of dollar-value LIFO inventory accounting through the use of published government indexes, and to conduct a study of tax accounting methods for inventory with a view toward development of simplified methods.

IV. Windfall profits tax provisions

Royalty owner credit and exemption

For 1981, royalty owners are allowed a credit against the first $2,500 of windfall profit tax liability. For 1982 through 1984, the Act provides an exemption from the windfall profit tax for up to two barrels a day of royalty production (after 1984, for up to three barrels a day).

Stripper oil exemption

The Act exempts stripper oil produced by independent producers, starting in 1983. This measure received particular support from Senator Don Nickles, whose commitment to eliminate the tax will protect thousands of small royalty owners and independent producers from unfair confiscation of their oil income.

Newly discovered oil tax rate

The Act reduces the windfall profit tax rate on newly discovered oil from 30 percent to 27.5 percent in 1982, 25 percent in 1983, 22.5 percent in 1984, 20 percent in 1985, and 15 percent in subsequent years. Senator Don Nickles was a particularly adamant supporter of this measure.

Exemption for certain charities

The Act exempts from the windfall profit tax production owned by orphanages and similar charitable organizations.

V. Savings tax incentive provisions

Interest and dividend exclusion

The Act terminates the present $200 interest and dividend exclusion ($400 for a joint return) after 1981. After 1981, the law will revert to the prior $100 exclusion for dividends only with some technical modifications. Starting in 1985, taxpayers will be able to exclude 15 percent of interest income to the extent such income exceeds nonbusiness and nonmortgage interest deductions, up to a maximum interest net exclusion of $450 ($900 for joint returns).

This provision originally sponsored in slightly different form by Senator Harrison Schmidt, will allow the taxpayer to save without the burden of overtaxation on his or her interest earnings. The provision will increase the rate of saving, thus enlarging the capital pool needed for investment and revitalization.

Qualified savings certificates

The Act excludes from income interest, not to exceed an aggregate amount of up to $1,000 ($2,000 for a joint return), on qualified savings certificates.

These one-year certificates must be issued after September 30, 1981, and before January 1, 1983, and must have a yield equal to 70 percent of the yield on one-year Treasury bills. The certificates must be issued by certain financial institutions which invest in residential financing or agricultural loans.

Individual retirement accounts

Senator CHAFEE introduced several provisions of the IRA legislation which were included in the final committee tax bill.

The Act increases the limit on deductions for contributions to individual retirement accounts from the lesser of 15 percent of compensation or $1,500 ($1,750 for a spousal IRA) to the lesser of 100 percent of compensation or $2,000 ($2,250 for a spousal IRA). Also, the Act allows active participants in employer sponsored plans to deduct up to $2,000 of the taxpayer's voluntary contributions to the plan or to an IRA. These IRA changes are effective for taxable years beginning after 1981. The provisions sponsored by Senator CHAFEE stimulate savings for retirement by providing a tax incentive.

Self-employed retirement savings

The Act increases the maximum annual deduction for a contribution to a self-employed retirement plan (Keogh or H.R. 10 plan) from $7,500 to $15,000, and makes other changes in tax rules applicable to such plans. This provision is generally effective for taxable years beginning after 1981.

Employee stock ownership plans

The Act replaces the existing additional investment credit for employee stock ownership plans (ESOPs) with a credit to a percentage of payroll. For 1983 and 1984, the credit is one-half of one percent of compensation paid to employees under the plan, and the percentage increases to three-fourths of one percent after 1984. This payroll-based ESOP credit expires at the end of 1987. In addition the Act makes other changes in the rules applicable to ESOPs.

Dividend reinvestment plans

The Act excludes from income up to $750 ($1,500 for a joint return) of dividends from public utilities which are reinvested in the stock of the utility under a dividend reinvestment plan. The income generally will be treated as a capital gain when the taxpayer sells the stock. The exclusion applies for the taxable years 1982 through 1985.

VI. Estate and gift tax provisions

Unified credit

The 1981 Tax Act also makes major revisions in the estate and gift tax laws to reduce the tax burden on moderate size estates, particularly family farms and small businesses. Under the Act, the unified credit against estate and gift taxes is gradually increased from $47,000 to $192,800 over six years. The amount of the credit is $62,800 for gifts made, and decedents dying, in 1982, $79,300 in 1983, $96,300 in 1984, $121,800 in 1985, $155,800 in 1986, and $192,800 in 1987 and subsequent years. Thus, cumulative transfers exempt from gift and estate taxes increase from $175,625 under present law to $225,000 in 1982, $275,000 in 1983, $325,000 in 1984, $400,000 in 1985, $500,00 in 1986, and $600,000 in 1987 and subsequent years. Filing requirements are adjusted to reflect the higher levels of exempted transfers.

Rate reduction

The maximum gift and estate tax rates are reduced over a 4 year period in five percent increments from 70 percent to 50 percent. The maximum rate is 65 percent for gifts made, and decedents dying, in 1982, 60 percent in 1983, 55 percent in 1984, and 50 percent in 1985. The 50-percent tax rate will apply to taxable gifts and bequests in excess of $2.5 million.

Marital deduction

Prior to the Act, a gift tax marital deduction was allowed for the first $100,000 of gifts to a spouse and for 50 percent of gifts to a spouse in excess of $200,000. An estate tax marital deduction was allowed for transfer to a surviving spouse up to the greater of $250,000 or one-half the adjusted gross estate.

As the result of work by the Estate and Gift Tax Subcommittee, chaired by Senator Steven Symms) the Act removes the quantitative limits on both the gift and estate tax marital deductions and provides that certain terminable interests also qualify for those deductions. In general, a terminable interest may qualify at the election of the executor where the spouse receives a life interest, remainder to another party, with transfer tax imposed when the surviving spouse disposes of the interest or dies.

Current use valuation

a. Increase in maximum reduction in fair market value:

Under prior law, the fair market value of qualified real property could not be reduced by more than $500,000 as a result of current use valuation. The Act increases the maximum amount by which the fair market value of qualified real property may be reduced as a result of current use valuation to $600,000 for estates of decedents dying in 1981, $700,000 in 1982, and $750,000 in 1983 and thereafter.

b. Predeath qualified use requirement:

Under prior law, to be specially valued, real property had to be used or held for use as a farm or closely held business ("a qualified use") for five of the last eight years before the decedent's death and on the date of death.

The Act permits the qualified use requirement of present law, applicable to periods on or before the date of the decedent's death (sec. 2032A(b)(1)), to be satisfied if either the decedent or a member of the decedent's family uses real property otherwise eligible for current use valuation in the qualified use.

c. Pre-death material participation requirement:

Under prior law, the decedent or a member of his family had to materially participate in the farm (or other business operation) for periods aggregating five years of the eight years before the decedent's death. On the other hand, if the decedent materially participated in the farm operation, any income derived from the farm was treated as earned income for social security purposes and, could reduce social security benefits.

Under the Act, the material participation requirement has to be satisfied during periods aggregating five years or more of the eight-year period ending before the earlier of (1) the date of death, (2) the date on which the decedent became disabled (which condition lasted until the date of the decedent's death), or (3) the date on which the individual began receiving social security retirement benefits (which status continued until the date of the decedent's death).

An individual is considered to be disabled if the individual is mentally or physically unable to materially participate in the operation of the farm or other business.

d. Tacking to satisfy certain requirements in cases of certain pre-death involuntary conversions and like-kind exchanges:

The Act changes prior law to permit tacking of the ownership, qualified use, and material participation requirements in the case of replacement property acquired pursuant to like-kind exchanges under section 1031 and involuntary conversions under section 1033.

e. Election requirements:

Under prior law, an election to specially value qualified real property had to be made on a timely filed estate tax return. An agreement to the election, binding under local law, had to be signed by all parties having an interest in the property.

Under the Act, elections to specially value property must be made on the decedent's estate tax return rather than by the due date of the return as under prior law.

f. Use of share rentals in the formula valuation method:

Farm real property may be specially valued using a formula valuation method. Under the formula method, the value of qualified real property is determined by (1) subtracting the average annual State and local real estate taxes for tracts of comparable land used for farming from the average annual gross cash rental for the tracts of the comparable land, and (2) dividing that amount by the average annual effective interest rate for all new Federal land bank loans. Each average annual computation is made on the basis of the five most recent calendar years ending before the decedent's death.

The Act permits substitution of net share rentals for cash rentals in the formula valuation method for farm real property if the executor cannot identify actual tracts of comparable farm real property in the same locality as the decedent's farm property that are rented solely for cash.

g. Reduction in post-death recapture period:

Under prior law, if, within 15 years after the death of the decedent (and before the death of the qualified heir), specially valued property was disposed of to nonfamily members or ceased to be used for the farming or other closely held business purpose based upon which it was valued in the decedent's estate, all or a portion of the Federal estate tax benefits obtained by virtue of the reduced valuation was recaptured.

The Act reduces the 15-year recapture period to 10 years; the five-year phase-out period is repealed.

h. Increase in basis of property on which a recapture tax is paid:

Under prior law, if an election was made to value property based on its current use, the qualified heir's income tax basis in the property was the current use value. No adjustment was made to this basis if the recapture tax was imposed.

The Act permits a qualified heir to make an irrevocable election to have the income tax basis of qualified real property increased to the fair market value of the property as of the date of the decedent's death where the recapture tax is paid. If the heir elects this basis adjustment, the heir must pay interest on the amount of the recapture tax from the date which is nine months after the decedent's death until the due date of the recapture tax. If the heir does not make the election and pays the interest, no adjustment is made to the basis of the property.

i. Miscellaneous technical changes to post-death recapture period rules:

The Act retains the requirement that the qualified heir owning the real property after the decedent's death use it in the qualified use throughout the recapture period. However, the Act creates a special two-year grace period immediately following the date of the decedent's death during which failure by the qualified heir to commence use of the property in the qualified use will not result in imposition of a recapture tax. The new 10-year recapture period is extended by a period equal to any part of the two-year grace period which expires before the qualified heir commences using the property in the qualified use. This provision is retroactive to estates of certain decedents dying after December 31, 1976.

In the case of an eligible qualified heir, the Act provides that "active management" by the eligible qualified heir is treated as material participation for purposes of meeting the material participation requirement during the post-death recapture periods.

The Act also provides that an exchange pursuant to section 1031 of qualified real property solely for qualified replacement property to be used for the same qualified use as the original qualified real property does not result in imposition of the recapture tax.

j. Qualification of property purchased from a decedent's estate:

Under prior law, only that property which was acquired from a decedent was eligible for current use valuation. The Act expands the circumstances in which property is considered to be so acquired to include property that is purchased from a decedent's estate by a qualified heir as well as property that is received by bequest, devise, inheritance, or in satisfaction of a right to pecuniary bequest. If purchased property is specially valued, the qualified heir who purchases the property is limited to the current use value of the property as his income tax basis. This change is retroactive to estates of certain decedents dying after December 31, 1976.

k. Property transferred to discretionary trusts:

Under prior law, property owned indirectly through ownership of an interest in a partnership, a corporation, or a trust qualified for current use valuation to the extent that it would qualify if it were owned directly. However, trust property qualified for current use valuation only to the extent that an heir received a "present interest" in the trust property.

Treasury regulations defined the term "present interest" by reference to the gift tax law (sec. 2503), which precluded current use valuation of any property passing from the decedent to a trust in which the interest of the life tenant (or any other beneficiary whose interest becomes a present interest before expiration of the recapture period) was subject to discretion on the part of the trustee.

The Act provides that property meeting the other requirements for current use valuation can be specifically valued if it passes to a discretionary trust in which no beneficiary has a present interest (under sec. 2503) because of the discretion in the trustee to determine the amount to be received by any individual beneficiary so long as all potential beneficiaries of the trust are qualified heirs.

l. Definition of family member:

Under prior law, only real property that passed to qualified heirs was eligible for current use valuation. The term "qualified heir" meant a member of the decedent's family, but did not include members of a spouse's family.

Additionally, the pre-death qualified use and material participation requirement may be satisfied by the decedent or a member of the decedent's family. Likewise, the post-death material participation requirement may be satisfied by participation of the qualified heir or a member of the heir's family. Property can only be disposed of during the recapture period without imposition of a recapture tax if the transfer is to a member of the qualified heir's family.

The Act changes the definition of family member to include an individual's spouse, parents, brothers and sisters, children, stepchildren, and spouses and lineal descendants of those individuals.

m. Special rules for woodlands.

Under prior law, only real property used as a farm for farming purposes or in other closely held business operations ("a qualified use") was eligible for current use valuation. Timber operations are included in the definition of farming purposes. Standing timber, like other growing crops, was not treated as part of the qualified real property.

The Act continues treatment of timber operations as a farming use, but permits executors to elect to specially value the standing timber. If standing timber is specially valued, the recapture tax is imposed when the timber is disposed of or severed.

These changes to the current use valuation provision apply generally to estates of decedents dying after December 31, 1981.

Transfers within 3 years of death

Prior law generally required that gifts made by a decedent within 3 years of death be included in the decedent's gross estate at their value as of the date of death or alternate valuation date (sec. 2035(a)). Under the Act this rule does not apply to decedents dying after December 31, 1981, except for gifts of certain types of property covered by section 2036, 2037, 2038, 2041, and 2042. In addition, all gifts made within 3 years of death are included for purposes of qualifying for current use valuation (sec. 2032(a)), deferred payment of estate tax (sec. 6166), qualified redemptions to pay estate tax (sec. 303), and estate tax liens (subchapter C of chapter 64).

Time for payment of estate tax attributable to closely held businesses

The provisions of prior law sections 6166 and 6166A, relating to the deferred payment of estate taxes attributable to interests in closely held businesses, are combined into one provision. The new provision permits deferred payment if interests in closely held businesses exceed 35 percent of the adjusted gross estate. Conforming changes are made to section 303, which permits redemption of stock in a closely held business to pay certain estate taxes, funeral expenses, and administration expenses.

The Act also provides that the remaining unpaid tax balance will not be accelerated upon the death of the decedent's heir or a subsequent transferee provided the interest

in closely held businesses passes to a family member of the heir or subsequent transferee.

Disclaimers

The Act provides that a timely transfer of property to the person who would have received it had an effective disclaimer been made under the applicable local law is considered an effective disclaimer for purposes of Federal estate and gift taxes where the other Federal requirements of qualified disclaimers are met.

Basis rule for property received within 3 years of death

The Act provides that the basis of appreciated property acquired by gift within 1 year of death is not adjusted to its fair market value at date of death if it is returned to the donor (or donor's spouse).

Certain charitable contributions

Where a charitable transfer is an interest which is less than the donor's entire interest in proprety, prior law provided that no charitable deduction was allowable unless the split-interest gift was made in certain specified forms. Because an original work of art and a related copyright are considered interests in the same property, no deduction was allowed for the transfer of an original work of art to charity if the copyright was retained or transferred to a noncharity.

The Act provides that where a donor or decedent makes a qualified contribution of a copyrightable work of art, the work of art and its copyright will be treated as separate properties for purposes of the estate and gift tax charitable deduction.

The Act provides a special credit against the estate taxes imposed on the estate of D. M. Kunhardt. The amount of the credit is equal to the smallest of (1) the total estate tax imposed, (2) the fair market value of Matthew Brady glass plate negatives transferred by the estate to the Smithsonian, or (3) $700,000.

Certain bequests, etc., to minor children

The Act repeals the provisions of present law which permit a limited deduction for certain property passing to certain orphaned minor children.

Generation-skipping transfer tax

The Tax Reform Act of 1976 imposed a tax on generation-skipping transfers. A transitional rule exempts from the tax generation-skipping trusts created by wills or revocable trusts in existence on June 11, 1976, if (1) such wills and trusts were not amended after that date to create or increase the amount of the generation-skipping transfer, and (2) the testator or trust grantor dies before January 1, 1982.

Under the Act, the January 1, 1982, date contained in the transitional rule is extended one additional year to January 1, 1983.

Annual gift tax exclusion

The Act increases the amount of the annual gift tax exclusion from $3,000 to $10,000 per donee and provides an unlimited exclusion for amounts paid for the benefit of a donee for certain medical expenses and school tuition.

Annual payment of gift tax

Prior law required that gift tax returns must be filed, and any gift tax paid, on a quarterly basis if the sum of (1) the taxable gifts made during the quarter, plus (2) all other taxable gifts made during the taxable year (for which a return has not yet been required to be filed) exceeds $25,000. If annual gifts were less than $25,000, a return had to be filed for the fourth quarter.

The Act provides that all gift tax returns are to be filed, and any gift tax paid, on an annual basis.

VII. Commodity tax straddles

A major tax abuse which came to the attention of the Senate was the use of commodity straddles and similar transactions to defer income and to convert ordinary income and short-term capital gains into long-term capital gains. The Act changes the law to curtail these abuses.

Mark-to-market. Under the Act, regulated futures contracts are marked to market at the earlier of disposition or the end of the tax year. Under this rule, gains and losses in a taxpayer's futures account are recognized at the close of the year. Net gains on regulated futures contracts are treated as if 40 percent of the gain were short-term gain and 60 percent of the gain were long-term gain, thus providing a maximum tax rate of 32 percent on gains on regulated futures contracts after 1981. Furthermore, the bill provides a 3-year capital loss carryback for losses on regulated futures contracts. These losses can be deducted against gains from regulated futures contracts in three prior years. A generous 5-year averaging rule is provided for gains recognized in 1981 under this provision.

In the case of straddles which do not involve positions in regulated futures contracts, losses are deferred to the extent there are unrealized gains in offsetting positions. However, in the case of straddles which consist of one or more positions in regulated futures contracts, the taxpayer may elect either to have all positions marked to market, or alternatively, have the leg that is a regulated futures contract exempted from the mark-to-market rule and treated, along with the other positions making up the straddle, under the general loss deferral rule. The bill also authorizes regulations extending present law wash-sale and short-sale principles to straddle positions.

The Act requires the taxpayers to capitalize interest and carrying charges for certain "cash and carry" straddles, excluding ordinary hedges.

The Act broadly exempts most hedging transactions from the mark-to-market, loss deferral and capitalization rules.

Treasury bills and other short-term government obligations are treated as capital assets. The amount of ordinary interest income assumed to be earned in connection with the Treasury bill is based on a linear amortization of the difference between the taxpayer's basis and the price at which the bills are to be redeemed during the period which the taxpayer held the Treasury bill.

Broker-dealers are required to identify securities held for investment on the day the securities are acquired, except for exchange specialists who are given seven days to make the identification for certain stock.

To prevent certain other avoidance strategies, the Act provides that certain dispositions of capital assets which produce capital gain or loss on their sale or exchange are treated as resulting in capital gain or loss without regard to whether a disposition was entered into after June 23, 1981.

VIII. Administrative provisions

Interest on deficiencies and overpayments

Under prior law, the interest rate applicable to deficiencies and overpayments was set by Treasury regulations at 90 percent of the adjusted prime rate for September, and was effective on February 1 of the immediately succeeding year.

The Act provides that the interest rate is to be set annually at 100 percent of the prime rate. Starting in 1983, changes in the interest rate are to be effective on January 1, rather than on February 1, of the year immediately succeeding the year in which the rate is established. The Act also contains a number of provisions to improve compliance with the tax laws.

Penalties for false withholding allowance certificate

Under prior law, a civil penalty of $50 could apply for claiming withholding allowances based on false information (Code sec. 6682). The criminal penalty for willfully failing to supply information, or for willfully supplying false or fraudulent information, in connection with wage withholding was a fine of up to $500 and/or up to one year imprisonment. The Act increases to $500 the civil penalty for filing false information with respect to wage withholding. The Act also increases the criminal penalty for willfully failing to supply information, or for willfully supplying falsified information in connection with wage withholding to $1,000.

These provisions are effective for acts and failures to act after December 31, 1981.

Penalty for failure to file information returns

Taxpayers are required to file a variety of information returns with the Secretary. Generally, such returns relate to payments to, and transactions with, other persons. The penalty for failure to file most information returns was $1 per return, subject to a maximum of $1,000 for any calendar year (Code sec. 6652(b)). Taxpayers who must file an information return generally were not required to furnish a copy to the person to whom the payment relates.

The Act generally requires that information returns be furnished to the person to whom the payments on the return relate, and increases the penalty for failure to file most information returns with the Secretary. The increased penalty is $10 for each return, subject to a maximum penalty of $25,000 for any calendar year.

The provision is effective as to returns and statements required to be furnished after December 31, 1981.

Penalty for overstated tax deposits

Periodic deposits of various taxes are required prior to the close of the taxable year. Taxpayers who fail to comply with these depository requirements may be subject to a penalty of 5 percent of any amount not deposited on or before the prescribed date, unless it is shown that the failure is due to reasonable cause and not due to willful neglect (Code sec. 6656(a)). In addition, criminal penalties may apply with respect to taxpayers who make a false return claiming to have made deposits of tax (Code sec. 7206) or who fail to collect, account for or pay over collected taxes (Code sec. 7215, 7512).

The Act contains a specific penalty applicable to persons who make an overstated deposit claim. The penalty is 25 percent of the overstated deposit claim, and applies in addition to any other applicable penalty.

Penalty for valuation overstatements

An addition to tax, or penalty, is imposed with respect to certain tax underpayments due to negligence or civil fraud (Code sec. 6653). The penalty for negligence is 5 percent of any underpayment that is due to negligent or intentional disregard for rules and regulations but not with intent to defraud. The alternative civil fraud penalty is 50 percent of any underpayment.

The Act provides a graduated addition to tax applicable to certain income tax "valuation overstatements". The addition to tax applies only to the extent of any income tax underpayment which is attributable to such an overstatement, and only if the taxpayer is an individual, a closely held corporation, or a personal service corporation.

A valuation overstatement exists if the value of any property, or the adjusted basis of any property, claimed on any return exceeds 150 percent of the amount determined to be the correct amount of the valuation, or adjusted basis. If there is a valuation overstatement, the following percentages are used to determine the applicable addition to tax:

If the valuation claimed is the following percent of the correct valuation:	The applicable percentage is:
150 percent or more but not more than 200 percent	10
More than 200 percent but not more than 250 percent	20
More than 250 percent	30

The penalty is effective for returns filed after December 31, 1981.

Addition to negligence penalty

The Act imposes a new addition to tax equal to 50 percent of the interest (determined under Code sec. 6601) attributable to that portion of an underpayment which is attributable to negligent or intentional disregard of rules or regulations. The addition to tax is 50 percent of the interest for the period beginning on the last day for payment of the underpayment and ending on the date of the assessment.

As an addition to tax, amounts imposed under this new penalty are nondeductible.

Confidentiality of certain IRS information

The law restricts the disclosure of tax returns and return information. However, information that cannot identify any particular taxpayer is not protected under the disclosure restrictions. Because of this, questions were raised concerning whether the IRS could legally refuse to disclose information which is used to develop standards for auditing tax returns.

The Act provides that nothing in the tax law, or in any other Federal law, will be construed to require the disclosure of standards used, or to be used, for the selection of returns for examination (or data used, or to be used, for determining such standards), if the Secretary determines that such disclosure will seriously impair assessment, collection, or enforcement under the internal revenue laws. However, it is intended that nothing in this provision be construed to limit disclosure of statistical data or other information (other than of the type that could be used by the IRS to determine criteria for selecting returns for examination) to the extent permitted under present law. Thus, any information that is currently made available will continue to be available.

Tax court filing fee

Under prior law, the Tax Court was authorized to impose a fee of up to $10 for the filing of any petition. The Act authorizes the Tax Court to impose a filing fee of up to $60. This provision applies to petitions filed after December 31, 1981.

Cash management: Corporate estimated tax payments

The Act provides that corporations whose taxable income exceeded $1 million in any of the three preceding taxable years must pay estimated tax of at least 80 percent of current year's tax liability regardless of their prior year's tax liability, rather than the former 60 percent.

The 80 percent requirement is phased in over a three-year period. In 1982, large corporations will have to be at least 65 percent current with estimated tax payments. This will increase to 75 percent in 1983, and to 80 percent for 1984 and subsequent years. The provision is effective for taxable years beginning after December 31, 1981.

Declaration and payment of estimated taxes by individuals

Individuals whose tax liability, over amounts withheld during the year, is less than $100 have not been required to file declarations of estimated taxes. The act increases the tax liability threshold for the payment of estimated taxes from $100 to $500 over a four year period, as follows:

Taxable years beginning in:	*Threshold amount*
1982	$200
1983	300
1984	400
1985 and thereafter	500

Individuals whose tax liability in excess of withholding does not exceed the threshold amount would not be required to declare or pay estimated tax, nor would they be penalized for underpayment of estimated tax.

The increase in the tax liability threshold takes effect for taxable years beginning after December 31, 1981.

RAILROAD RETIREMENT TAXES

The Act includes these provisions:

Tier II taxes. There is imposed on railroad employers a tax on compensation paid in a calendar month, subject to a maximum limitation. Currently, the annual taxable compensation base is $22,200.

The Act, pursuant to a negotiated agreement between railway management and labor, provides for adjustments in the financing of the tier-II pension component. The tax on employers under section 3221 is increased from 9.5 to 11.75 percent. In addition, there is a new tax of 2 percent on the compensation of employees (as defined in section 3221).

The Act provides advanced, limited transfers to the Railroad Retirement Account from the general fund of the Treasury in amounts necessary to make monthly benefit payments. In no case will the amounts outstanding at any time for any fiscal year under this authority exceed the estimated interchange transfer from the Social Security Trust Fund for that fiscal year. The Board will pay the prevailing rate of interest currently being paid on short-term instruments of the Department of the Treasury on amounts transferred under this authority.

Payments of employee taxes by railroad employers. The Act provides that payments by an employer of employee railroad payroll taxes, without deduction from the employee's remuneration, will be included in taxable compensation for RRTA purposes. This change will conform the provisions of the Railroad Retirement Tax Act to the corresponding provisions of the recently amended Federal Insurance Contributions Act. The changes made by this provision will be effective with respect to compensation paid for services rendered after September 30, 1981.

Definition of compensation. The Act provides that compensation that is paid in one calendar month but that would be payable in a prior or subsequent taxable month but for the fact that the prescribed date of payment would fall on a Saturday, Sunday, or legal holiday will be deemed to have been paid in such prior or subsequent taxable month. The Act thus makes clear the treatment for RRTA purposes of compensation "bunched" in any month for services rendered in the preceding month.

The Act also provides that, in the absence of evidence to the contrary (e.g., the statutory presumption curing "bunching" of compensation problems in certain months, as clarified by the immediately preceding provision), payments by railroad employers shall be presumed to be compensation for services rendered as an employee in the period for which the payment is made. Also, for an employee receiving retroactive wage payments (such as lump sum retroactive wage payments and crew consists payments), such payments will be deemed under the provision to be compensation paid in the period for which the payment is made unless the employee requests in writing (pursuant to existing provisions in sec. 3231(e)(2) that such compensation was earned in a period other than the period in which it was paid.

This provision is effective for taxable years beginning after December 31, 1981. No inference is to be drawn from this clarification for taxable years beginning after 1981 as to Congressional intent with respect to prior legislation concerning the definition of compensation for the purposes of administrative or judicial proceedings.

IX. Miscellaneous provisions

Foreign investment in U.S. real property

The Act makes a series of technical changes to the tax on capital gains recognized by foreign investors on dispositions of U.S. real property to clarify the original intent of Congress to generally collect at least one tax on the transfer of U.S. real property interests by foreign investors.

Property requirement of private foundations

The Act reduces the required payout for private foundations, for taxable years beginning after 1981, so that private foundations must annually distribute for charitable purposes only 5 percent of the foundation's net investment assets.

Imputed interest rate on installment sales

The Act reduces from 10 percent to 7 percent the maximum rate of imputed interest on an installment sale of land, up to an annual aggregate sales price of $500,000 between members of the same family (within the meaning of Code section 267(c)(4)).

Bad debt deduction for commercial banks

Commercial banks compute their bad debt deductions under either the experience method or the percentage of outstanding loans method. For 1982, the Act increases from 0.6 percent to 1.0 percent the percentage of eligible loans which limits the bad debt deduction of commercial banks under the percentage of outstanding loans method. After 1982 and before 1988, the applicable percentage will be 0.6 percent.

Deductibility of gifts and awards

For taxable years ending on or after August 13, 1981, the Act generally increases to $400 per item the ceiling on the deductibility of certain employee awards and gifts, and expands the purposes for which such awards and gifts may be given.

Reorganizations involving financially troubled thrift institutions

The Act relaxes certain rules and imposes other rules relating to tax-free reorganizations of financially troubled thrift institutions.

Tax treatment of mutual savings banks that convert to stock associations

The Act contains rules to facilitate the conversion of mutual savings banks into stock associations.

Restricted property

For taxable years ending after 1981, the Act postpones the taxation of property transferred to an employee as compensation for services when the property is subject to certain securities laws restrictions on transferability.

Extension and modification of targeted jobs tax credit

To help deal with structural unemployment, the Act extends and modifies the targeted jobs credit.

Under the Act, the credit is available for wages paid or incurred before January 1, 1983. The provision limiting qualified first-year wages is changed so that such wages may be at least $25,000.

Targeted groups. AFDC recipients and WIN registrants are added as a targeted group, and the WIN credit is terminated. Eligible cooperative education students are limited to those who are economically disadvantaged, effective for wages paid after December 31, 1981. The age limitation for Vietnam veterans (formerly under age 35)

is eliminated, and employees laid off from public service employment funded by CETA are made eligible for the credit.

Changes in certification requirements. Certifications issued or requested after the individual begins work are invalid, effective for individuals who begin work after the date of enactment. A transition rule is provided for those who began work within 45 days before and after enactment. Certifications that individuals are members of economically disadvantaged families are valid for a minimum of 45 days; and certification and marketing are to be performed by State employment security agencies. Certifications based on false information are revoked prospectively, and the credit is not allowed for rehires.

Hiring of relatives. The credit is denied for hiring relatives of the employer.

Motor carrier operating rights

Under prior law, taxpayers were not allowed a loss deduction under section 165 for the diminution in the value of a license or permit (caused, for example, by an expansion in the number of licenses or permits that could be issued) if the license or permit continues to have value as a right to carry on a business.

The Act allows an ordinary deduction ratably over a 60-month period for the adjusted bases of motor carrier operating authorities held by the taxpayer on July 1, 1980 (the date of enactment of the Motor Carrier Act of 1980). The provision applies to taxable years ending after June 30, 1980.

State legislators business expenses

State legislators have been allowed an election to treat their residences within the district represented as their home for purposes of computing business deductions for expenses while away from home.

The Act extends beyond 1981, and modifies, the State legislator provision for taxable years beginning on or after January 1, 1976. Under the provision, an electing State legislator is deemed to have expended for business purposes an amount equal to the individual's legislative days multiplied by the greater of the Federal per diem or the State per diem (but not over 110 percent of the Federal per diem). This amount is deductible, except for legislators living within 50 miles of the capital building, without regard to the away-from-home rule.

Fringe benefit regulations

Prior to June 1, 1981, the Treasury was prohibited from issuing final regulations, under Code section 61, relating to the income tax treatment of fringe benefits. The Act extends this prohibition until December 31, 1983.

Campaign funds

Under Code section 527, a candidate's campaign organization generally is exempt from taxation. However, political organization taxable income, e.g., interest on account balances, etc., has been subject to the highest rate, rather than the graduated rates, of the corporate income tax. This rate is 46 percent for amounts over $100,000.

The Act applies the generally applicable corporate income tax rates to political organization taxable income of a candidate's "principal campaign committee," as defined under present law (2 USC 432(e)). Under regulations prescribed by the Secretary, candidates have to furnish the Secretary with the principal campaign committee's designation. No change is made to the present law rules applicable to other campaign or political organizations.

Under the Act, political organization taxable income of a candidate's "principal campaign committee" is taxed at the generally applicable corporate income tax rates. Thus, after 1982, the lowest rate would be 15 percent as to amounts of $25,000 or less, and the highest rate would be 46 percent on amounts over $100,000.

Tax-exempt bonds for the purchase of mass transit equipment

The Act provides that interest on obligations of a State or local government is exempt from Federal income tax, if substantially all of the proceeds of the obligations are used to provide qualified mass commuting vehicles. Qualified mass commuting vehicles are defined in the Act to mean any bus, subway car, rail car, or similar equipment which is leased to a mass transit system that is wholly owned by one or more governmental units and which is principally used by the mass transit system in providing mass commuting services to the general public.

Tax-exempt bonds for volunteer fire departments

In general, obligations issued by States or their political subdivisions are exempt from Federal income tax. Volunteer fire departments have not been considered to be political subdivisions and, thus, could not issue tax-exempt bonds on their own behalf.

The Act treats an obligation of a volunteer fire department as a tax-exempt obligation of a political subdivision of a State if certain conditions are met. The tax-exempt obligations may be issued as part of an issue substantially all of the proceeds of which are to be used for the acquisition, construction, reconstruction, or improvement of a firehouse or fire truck used or to be used by a volunteer fire department.

Modification of foreign investment company provisions

The Act provides that gain on the disposition of stock in a foreign investment company attributable to earnings and profits derived before the foreign corporation became a foreign investment company will not be subject to tax under section 1246 of the Code. Instead, that gain not covered by section 1246 because of the amendment is covered by section 1248 where that section is otherwise applicable. The amendment only applies to companies that became foreign investment companies because they met the requirements of section 1246(b)(2) of the Code.

Charitable contributions by corporations

The Act increases the limitation on a corporation's charitable contributions deduction from 5 percent to 10 percent of taxable income. The provision is effective for taxable years beginning after December 31, 1981.

Unemployment tax status for certain fishing boat services

The Act exempts for one year, for purposes of the Federal Unemployment Tax Act (FUTA), the services of fishing boat crew members which currently are exempt for purposes of FICA and income tax withholding. Thus, services by members of the crew on boats engaged in catching fish or other forms of aquatic animal life are exempt for purposes of FUTA if the remuneration for those services is a share of the boat's catch, or of the proceeds of the catch, and if the crew of such boat normally is made up of fewer than ten individuals. In the case of a fishing operation involving more than one boat, services are exempt for purposes of FUTA if the remuneration for services is a share of the entire fleet's catch or its proceeds, and if the operating crew of each boat in the fleet normally is made up of fewer than ten individuals.

2-year extension of telephone excise tax at 1 percent

The excise tax on communications services (local telephone, toll telephone, and teletypewriter services) was 2 percent for 1981 and 1 percent for 1982, with no tax as of January 1, 1983. The Act extends the 1-percent rate for two years, and thus delays the termination of the telephone tax until January 1, 1985.

Amortization of construction period taxes and interest

Under prior law, taxpayers other than most corporations, in general, were required to capitalize and amortize construction period interest and taxes (sec. 189). This rule will not be applicable to low-income housing until after December 31, 1981.

The Act provides that section 189 will not be applicable to low-income housing.

Amortization of low-income housing rehabilitation expenditures

The Act increases the amount of expenditures eligible for amortization under section 189 to $40,000 per unit if the rehabilitation is conducted pursuant to a program under which tenants who demonstrate home ownership responsibilities may purchase their units at a price that limits the profit to the seller. The program must be certified by the Secretary of Housing and Urban Development or by a State or local governmental unit and the tenants must occupy the units as their principal residence. The program must provide that the sum of the taxable income and the amount realized on sale must not exceed the excess of (1) the taxpayer's basis in the property (without adjustment for deductions under section 167) over (2) the new tax benefits from the section 167 deduction less tax on the taxable income from leasing.

The provision applies to amounts paid or incurred after December 31, 1980.

In separate action, Senator Chafee put through a separate resolution, expressing the sense of the Senate that the President should not recommend the demise of the energy tax credits which encourage investment in energy conservation measures had 63 cosponsors, and, under the Senator's guidance, was included in the first continuing appropriations bill.

Social Security Act Programs

Activities within this area of responsibility were directed almost entirely toward reduction in program costs. On February 18, 1981, President Reagan presented the outline of his Economic Recovery Program, which included substantial reductions in outlays in Social Security Act Programs.

The President's specific proposals, which were received on March 10, 1981, served as the initial basis for congressional consideration of spending reductions for FY 82. The proposal included $8.2 billion in reductions for programs under the Social Security Act. On May 5, 1981, the Senate Finance Committee approved the components of its spending reduction package. These were incorporated in the recommendations transmitted to the Senate Budget Committee on June 10, 1981 as required under the reconciliation process and were subsequently acted on by the Senate. Some of the President's recommendations were incorporated in modified form in either the House-passed and/or Senate-passed version of the "Omnibus Reconciliation Act of 1981." Both Houses, however, included many alternative cost-savings provisions in their bills. The substantial differences between the House and Senate versions were subsequently resolved in conference and the Reconciliation Act of 1981, P.L. 97-35, was signed into law on August 13, 1981.

Summary of Finance Committee Action on Health Programs

P.L. 97-35 contains a number of amendments to the medicaid and medicare programs. The Act provides for reductions in Federal medicaid expenditures, coupled with provisions giving States greater flexibility in implementing their medicaid plans. With respect to medicare, the law includes increases in beneficiary cost-sharing requirements and

modifications in provider reimbursement provisions. Further, the law makes a number of revisions to, but does not repeal, the PSRO program, as was proposed by the administration. The law also restructures the Maternal and Child Health program, at reduced funding, along the lines proposed by the administration as part of their block grant proposal.

Although not all of the Finance Committee provisions were included in the law, they were approved by the Senate, with the exception of a provision which would have made medicare the secondary payor for persons covered under the Federal Employees Health Benefits Program. The following is a summary of the committee bill as it relates to the Social Security Act health care programs.

I. Medicare:

1. Nursing Salary Cost Differential:

Committee amendment.—The bill provides for a reduction in the routine nursing salary cost differential to 4.5 percent beginning with the date of enactment. The bill further requests the Comptroller General to conduct a study to determine the extent (if any) to which the reasonable cost of efficiently providing routine inpatient nursing services to medicare patients exceeds the average cost of providing such services to other individuals. The committee intends to reconsider the appropriateness of a nursing differential following completion of the study.

2. Repeal of Certain Benefit Provisions Enacted in 1980:

Committee Amendment.—

(A) Repeal provision making occupational therapy a qualifying service for home health benefits.

(B) Repeal coverage of outpatient alcohol detoxification services.

(C) Repeal coverage of hospitalization in conjunction with a noncovered dental procedure where warranted by the severity of the procedure.

(D) Repeal the provision of law which provides for continuous open enrollment.

(E) Repeal the provision allowing States to "buy in" to medicare for their medicaid recipients.

(F) Repeal the one-time delay in the hospital periodic interim payment from medicare.

3. Pneumoccocal Vaccine:

Committee amendment.—Repeals the provision of P.L. 96-611, which provided medicare coverage for pneumococcal vaccine.

4. Authority for the Secretary to Impose Civil Money Penalties in cases of Medicare and Medicaid Fraud:

Committee amendment.—Authorizes the Secretary of Health and Human Services to assess a civil monetary penalty of up to $2,000 per claim against any person who the Secretary has filed a fraudulent claim under the medicare or medicaid programs. It also authorizes the Secretary to impose an assessment, in addition to the penalty, of up to twice the amount of the fraudulent portion of the claim in lieu of damages.

5. Less Frequent Surveys of Skilled Nursing Facilities:

Committee amendments.—Permits the Secretary to enter into agreements with skilled nursing facilities for periods in excess of 12 months.

6. Payments to Promote Closing and Conversion of Underutilized Facilities:

Committee amendment.—Provides for including in hospital reasonable cost payments, reimbursement for capital and increased operating costs associated with the closing down or conversion to approved use of underutilized beds or services in nonprofit short-term hospitals. In the case of for-profit hospitals, reimbursement would be limited to increased operating costs.

Prior to January 1, 1984, no more than 50 hospitals could be paid this transitional allowance.

The Secretary is also directed to establish a Hospital Transitional Allowance Board to consider requests for such payments.

7. Criteria for Determining Reasonable Charge for Physicians' Services:

Committee amendment.—Provides for the calculation of statewide median charges in addition to prevailing charges in the locality. To the extent any prevailing charge in a locality was more than one-third higher than the statewide median charge it would not be increased each year.

Provision permits new physicians in localities designated as physician shortage areas to establish customary charges at the 75th percentile of the local charges (rather than the 50th). Provision also permits established physicians in these areas to move up to the 75th percentile on the basis of their actual fee levels.

8. Limitation on Reasonable Cost and Reasonable Charge for Outpatient Services:

Committee amendment.—Requires the Secretary to issue regulations establishing limitations on costs or charges for outpatient services provided by hospitals, community health centers or clinics and by physicians utilizing these facilities.

9. Reduction in Payment for Inappropriate Hospital Services:

Committee amendment.—Effective upon enactment, the bill eliminates the 80-percent occupancy rate exception. Under the bill, a hospital's payments would be reduced by medicare if there is an excess of beds in the institution in which the patient is hospitalized, or an excess of hospital beds in the area, which could presumably be converted to long-term care use.

10. Increase in the Part B Deductible:

Committee amendment.—The Part B Deductible is increased from $60 to $75 beginning in calendar year 1982.

11. Deletion of Carryover Provision for Part B Deductible:

Committee amendment.—Effective with expenses incurred on or after October 1, 1981, the bill excludes medical expenses incurred during the last quarter of the preceding calendar year in determining whether the individual has satisfied the part B deductible in the current calendar year.

12. Increase in Part B Premiums:

Committee amendment.—Effective July 1, 1982, the bill provides for maintaining the beneficiary part B premium at 24 percent of total program costs.

13. Medicare Payments Secondary in Cases of End-Stage Renal Disease:

Committee amendment.—The bill changes the benefit coordination arrangements between the medicare end-stage renal program and any other health benefits to which an individual may be entitled by making any private coverage primary to medicare for an initial 12 months after the beneficiary is determined eligible for medicare coverage under the end-stage renal provisions of the law. During this period, medicare would not reimburse any expense to the extent that payment is made, or can reasonably be expected to be made (as determined by regulation), by any private health plan or policy of insurance. Medicare would become the primary payor (i.e., pay benefits without regard to any other coverage) beginning with the thirteenth month following the month in which entitlement to medicare end-stage renal benefits was established. This coordination provision would apply only in instances of patients entitled to benefits under the medicare renal program who are under age 65 and who are not in receipt of disability cash benefits.

14. Medicare Payments Secondary to Federal Employees Health Benefits Program Payments:

Committee amendment.—Effective January 1, 1982, the bill provides that for Federal employees and annuitants who have coverage under both the medicare and FEHB programs, the medicare program would become the secondary payor, paying only those bills for covered services which have not been paid by a FEHB plan.

II. Medicaid:

1. Limitation on Federal Medicaid Expenses:

Committee amendment.—Establishes a limit on the amount of Federal financial participation in the medicaid program. For fiscal year 1982, Federal expenditures would be allowed to increase 9 percent over the States' estimates for fiscal year 1981. For fiscal year 1983 and thereafter, Federal spending would be allowed to rise at the rate of inflation for that fiscal year as measured by the GNP Implicit Price Deflator.

Beginning in FY 1982 the bill increases from $30 million to $45 million medicaid payments to Puerto Rico.

2. Federal Medical Assistance Percentage:

Committee amendment.—The bill reduces the minimum Federal medical assistance percentage from 50 percent to 40 percent.

3. Allow Accelerated Collection of Unapproved State Medicaid Expenditures:

Committee amendment.—The bill provides that the Federal Government shall retain disallowed medicaid matching funds throughout the appeals process in all cases, including amounts in controversy that were denied in the past. If the appeal is successful, the funds (plus interest) will be returned to the States. The rate of interest is the same as the rate of interest which States pay under the "Omnibus Reconciliation Act" provision.

4. Cost Effective Service Arrangements:

Committee amendment.—The bill authorizes the States to establish limits and restrictions with respect to choice by recipients of any medical items and services covered under a medicaid plan. The bill further requires that any limitations or restrictions imposed by a State regarding recipient freedom of choice must (1) be cost effective and (2) assure that recipients have reasonable access to any covered services affected by such limitations or restrictions.

The bill further repeals section 1903(m) to permit a State to make payment on a prepaid capitation or other risk basis to vendors other than health maintenance organizations.

5. Reimbursement of Hospitals:

Committee amendment.—The bill provides States with additional flexibility in determining the payment rate for inpatient hospital services. The bill deletes the current provision requiring States to reimburse hospitals on a reasonable cost basis and substitutes a provision requiring States to reimburse hospitals at rates that are reasonable and adequate to meet the cost which must be incurred by efficiently and economically operated facilities in order to meet applicable laws and quality and safety standards.

6. Services for the Medically Needy:

Committee amendment.—The bill deletes most of the current requirements for required services for the medically needy, thereby giving States greater flexibility in designing their medicaid plans for this population group.

7. Optional Coverage for Students Receiving Aid to Families With Dependent Children:

Committee amendment.—Section 60a of the bill amends the definition of "dependent child" under AFDC to persons through age 17, or age 18 if they are completing high school in their 18th year. The bill provides that State medicaid plans may limit coverage to any person under age 19 who meets the definition of dependent child under AFDC. At State option, States may extend medicaid to all persons between the ages of 18-20 or any reasonable classification of such persons.

8. Time Limitation for Waiver Requests:

Committee amendment.—The bill requires the Secretary to approve or disapprove a pro-

posed State plan, plan amendment, or waiver request within 90 days after receiving the State request, or, if later, 90 days after receiving information needed to make a final determination.

9. Pneumococcal Vaccine Benefit:

Committee amendment.—The bill modifies the medicaid program to authorize Federal assistance for pneumococcal vaccines. The bill provides that for this benefit vouchers would be made available on a one-time basis in fiscal year 1982 to noninstitutionalized recipients of SSI payments who are age 65 or older.

10. Nonmedical Services for Certain Individuals:

Committee amendment.—The bill permits the Secretary to waive the current dennition of covered medicaid services to include certain nonmedical support services, other than room and board, which are provided pursuant to a plan of care to an individual otherwise at risk of being institutionalized and who would, in the absence of such services, be institutionalized.

III. Maternal and Child Health:

Committee amendment.—The bill amends title V of the Social Security Act to establish a Maternal and Child Health (MCH) block grant which would continue current MCH and Crippled Children's (CC) services and would consolidate the following programs into the block grant: hemophilia, lead-based paint poisoning prevention, genetic diseases, sudden infant death syndrome, and the supplemental security income for disabled children's program. Funds authorized for the consolidated program for fiscal year 1982 and each year thereafter would be $334,500,000. This amount is equal to 75 percent of the funds which were appropriated for the individual programs during fiscal year 1981.

Summary of Finance Committee Action on Income Security

P.L. 97–35 contains more than 40 amendments to social security, unemployment compensation, and the various Social Security public assistance programs. The Act phases out or tightens eligibility for less essential social security benefits, such as the student benefit, minimum benefit, and benefits for young parents. The unemployment compensation program is modified in several important respects to better target federal funds to States with more acute unemployment problems and to individuals with more significant work force attachment. Numerous changes in public assistance programs, such as Aid to Families with Dependent Children (AFDC), are included which tighten eligibility so as to better target scarce resources on those truly in need and encourage those able to work to do so. Virtually all of the Social Security Act amendments in income security, contained in P.L. 97–35, were recommended by the Finance Committee. All of the amendments recommended by the Finance Committee were adopted by the Senate.

IV. Social Security (OASDI):

1. Student Benefit:

Committee amendment.—Eliminates the social security student benefit for post-secondary students age 18–22 who first enroll in post-secondary school after the 1981–1982 school year. For currently enrolled students in post-secondary schools and those who enter during the 1981–1982 school year, summer benefits would be eliminated for the four months May through August, beginning in 1982. Monthly benefits for these students would be reduced 25 percent each year, beginning September 1982, and completely eliminated by September 1985. No further cost-of-living adjustments would be paid to these students after July 1981.

High school students would continue to receive child's benefits as under current law, except that effective August 1982, no high school student could receive child's benefits after his 19th birthday.

2. Minimum Benefit:

Committee amendment.—Eliminates the minimum benefit for both current and newly entitled beneficiaries. As of August 1981, no new beneficiaries would receive the minimum benefit and all beneficiaries who had been receiving benefits based on the minimum primary insurance amount would have their benefits recalculated. Benefit amounts for those persons who would have received the minimum under prior law would be recomputed to reflect their actual average earnings.

To ensure that any poor person in the age group 60–65—too young to be eligible for SSI—would not suffer a decline in income, this proposal would permit current minimum benefit recipients age 60–64 who meet the SSI eligibility conditions (regarding income and assets, for example) to receive a monthly SSI cash payment. This payment would be limited to an amount equal to the difference between the minimum benefit the individual previously received and his or her recalculated social security benefit. This payment would not be adjusted annually for changes in the cost-of-living. (People age 60–64) newly eligible for SSI because of this provision would not be eligible for any other SSI-related benefits such as medicaid.)

3. Lump-Sum Death Payments (LSDP):

Committee amendment.—Eliminates the LSDP in cases where there is no eligible spouse or entitled child, effective August 1, 1981. Under the proposal, a surviving spouse who is living with the worker at the time of his death would automatically receive the LSDP as under current law. If there were no eligible surviving spouse who had been living with the worker, the LSDP would be payable to a surviving spouse not living with the worker at the time of his death but eligible for benefits, or to any young child of the deceased worker who was eligible to receive monthly cash benefits as a surviving child. If there were no eligible surviving spouse and the worker's children were all over 18 (or over 21 if full-time students) then no one would be eligible to receive the LSDP.

4. Recency of Work Test for Disability Benefits:

Committee amendment.—Provides that, in addition to the insured status requirements already part of present law, a disabled worker coming on the rolls after June 1981 must have worked in covered employment during six of the 13 quarters immediately preceding the onset of disability.

5. Disability Reduction for Other Benefits:

Committee amendment.—Authorizes three related changes in the offset currently made to disability benefits on account of workers' compensation. Changes would only affect workers becoming disabled after December 1980 and would then only affect benefits beginning in July 1981:

(a) Expand the workers' compensation offset provision to include other disability benefits provided by Federal, State, and local Governments, except that needs-based benefits, Veterans Administration disability benefits, private insurance benefits, and benefits based on public employment covered by social security would not be taken into account. The amount of the reduction would be calculated as under the present law workers' compensation offset.

(b) Extend the offset to include benefits paid to disabled workers aged 62 through 64 and their families.

(c) Require that the offset be made sooner—not in the month after the SSA is notified of the other disability payment, but retroactively to the month when the non-social security disability payments are actually made.

6. Trust Fund Financing of Vocational Rehabilitation Services:

Committee amendment.—Repeals section 222(d) of the Social Security Act, effective October 1, 1981, and eliminates trust fund financing of VR for disabled beneficaries.

7. Round Social Security Benefits:

Committee amendment.—Require that the amount derived at each stage in the benefit computation be rounded to the nearest penny, except for the last step—the actual benefit amount payable per beneficiary. This would be rounded to the next lower dollar.

8. Pension Reform Act Cost Reimbursement:

Committee amendment.—Permits SSA to recover the full cost of retrieving and transmitting information for purposes of enabling pension plans to comply with the Pension Reform Act. Full payment would be required from requestors to the social security trust funds for expenses incurred in providing earnings information, making clear that reimbursement of these costs is not governed by the Freedom of Information Act or by the Privacy Act.

V. Unemployment Compensation:

1. National Trigger for the Extended Benefit Program:

Committee amendment.—Eliminates the national trigger for the extended benefits program, effective July 1, 1981.

2. State Trigger Calculation:

Committee amendment.—Excludes extended benefits recipients from the insured unemployed population used to calculate the State trigger insured unemployment rate, effective July 1, 1981.

3. State Triggers:

Committee amendment.—Raises the insured unemployment rate used for triggering the extended benefits program. The mandatory State trigger would be increased to 5 percent and the optional State trigger to 6 percent effective October 1, 1982. The "20 percent higher" provision for the mandatory trigger would be retained.

4. 20 Weeks of Work for Extended benefits:

Committee amendment.—Requires extended benefits claimants to have worked at least 20 weeks (or its equivalent in wages or hours) in the one-year base period to qualify for benefits, effective October 1, 1982. States that do not currently have a weeks of employment qualifying requirement could obtain weeks of employment information or calculate its rough equivalent in dollars or hours of work in order to administer this provision.

5. Benefits for those who voluntarily quit military service:

Committee amendment.—Disqualifies for unemployment compensation benefits those exservicemembers who voluntarily leave the service and refuse to reenlist, effective July 1, 1981.

6. Loan Reform.—Under existing law, the cost of unemployment benefits payable under regular State unemployment compensation programs (and half of the benefit costs arising from the Federal-State extended unemployment compensation program) are funded through payroll taxes imposed by each State. If tax revenues exceed benefit costs, the surplus amounts are retained by the State in an interest bearing account in the Unemployment Trust Fund. If benefit costs exceed revenues, State draw down on their accumulated surpluses from prior years. If those surpluses become exhausted, States are allowed to receive an interest-free loan from an account which is funded through the Federal unemployment tax (and is supplemented by borrowing from the general fund of the Treasury).

States are generally expected to repay such loans within 2 years. If a State has an outstanding loan at the beginning of two consecutive years and fails to make full repayment by November 10 of that year, the Federal Government commences to collect that loan by raising the Federal unemployment tax on employers in the delinquent State.

Until the loan is repaid, the Federal tax rate is increased by 0.3 percent each year (up to an ultimate maximum tax rate of 3.4 percent of taxable payroll).

Committee amendment.—Alters the ability of States to receive interest-free loans from the Federal Government to finance unemployment compensation. Interest would be charged at a rate of 10 percent on all new advances after May 5, 1981 unless (1) those advances are repaid by September 30 of the fiscal year in which they are made and (2) the Secretary of Labor certifies that the State will be able to meet benefit payments without the need for additional advances for at least 6 months. Interest payments could not be paid from the State unemployment trust fund directly or indirectly (for example, by use of an offsetting State employer tax credit). All repayments of loan principal would be first applied against the principal which had been longest outstanding.

The bill also provides for a "freeze" on the increased rate of Federal unemployment tax during any year in which a State meets a test of solvency. This test requires that the State engage in now new net borrowing and that it take no action, the net effect of which represents a relaxation of tax effort or a liberalization of benefits. The "freeze" would be set at 0.6 percent or the level of increased tax applicable in the preceding year, whichever is greater.

In States where the insured unemployment rate dropped to or below 80 percent of the level in the 2 prior years, an additional 0.3 percent increase in the Federal tax rate would apply. Conversely, in States with high unemployment, as reflected by at least 6 months of extended benefits, the freeze would be available even if the State did require some additional new borrowing. This waiver would be available only to States with State unemployment tax effort at least 50 percent higher than the national average and only for a maximum of two consecutive years with repayment of any new borrowing required 2 years after the State no longer qualified for the waiver.

Both the interest provision and the provision freezing increases in the Federal tax in delinquent States would expire on October 1, 1984.

VI. Aid to Families with Dependent Children (AFDC):

1. Earned Income Disregard:

Committee amendment.—Standardizes the work expense disregard at $75 per month, caps the child care disregard at $160 per month, per child and applies the disregards for recipients in the following order:

(a) The first $75 of the family's earned income (in lieu of itemized work expenses) is disregarded; then

(b) the cost of care for a child or incapacitated adult, up to $160 per child monthly, will be disregarded from income remaining after application of the preceding provisions; and

(c) finally, the $30, plus one-third of the remainder of earned income (not already disregarded) is disregarded.

As under current law, the $30 and one-third disregard would not apply if employment has been refused or terminated without good cause, and the work expense and child care disregards would also be denied.

2. $30 and One-Third Earned Income Disregard:

Committee amendment.—Permits the application of the $30 and one-third disregard only during the first four consecutive months in which a recipient has earnings in excess of the standard work expense and child care disregards; thereafter, the amount of payment would be determined without benefit of the $30 and one-third disregard each month that the family continues to receive AFDC and for twelve consecutive months after AFDC is terminated.

3. Allowable Resources:

Under current law, the equity value (rather than fair market value) of resources must be considered in determining AFDC eligibility. Regulations establish a maximum of $2,000 per recipient in real and personal property, including liquid assets which States may exclude. States may also exclude a home, personal effects, an automobile, and income-producing property.

Committee amendment.—Places a limit on allowable resources of $1,000 (equity value) per family, excluding the home and one automobile. The value of the automobile would be limited by regulations.

4. Offset for Food Stamps and Housing Subsidies:

Committee amendment.—Explicitly permits States to take into account the value of benefits received from food stamps or housing subsidies. This would be done by treating the value of the food stamp coupons or housing subsidy as income, up to the value for food or shelter that is included in the State standard.

5. Eligibility and Need Standard:

Committee amendment.—Limits eligibility for AFDC to families with gross incomes at or below 150 percent of the State's standard of need.

6. Lump-Sum Payments:

Committee amendment.—Requires that large payments, together with other income remaining after the application of disregards, be considered available to meet ongoing needs in the AFDC program. If such income exceeds the standard of need, the household would be ineligible for aid. Any amount of the income that exceeds the monthly needs standard would be divided by the monthly needs standard, and the household would be ineligible for aid for the number of months resulting from that calculation. Any remaining amount would be counted as income in the first month following the period of ineligibility.

7. Advance Payment of Earned Income Tax Credit (EITC):

Committee amendment.—Provides that in determining earned income for AFDC, the EITC advance payment that the individual is eligible to receive would be included, regardless of whether or not he has applied for the advance payment (i.e., if the individual does not receive advance EITC payments, an amount equal to what he could get as advance payment is imputed as earned income).

8. Income of Stepparent:

Committee amendment.—Requires that the income of a stepparent be counted in determining eligibility and benefit amounts for AFDC applicants or their children. Countable income would include any amount which exceeds (1) the first $75 of earned income (a smaller amount may be prescribed for less than fulltime work); (2) the amount specified in the State's standard as the amount needed by the stepparent to support himself and his dependents living in the same household; (3) amounts paid by the stepparent to dependents living outside the household; and (4) payments of alimony or child support to individuals not in the same household. The law would be amended to preclude prorating of shelter allowances with regard to persons to whom this provision applies.

9. Employment of AFDC Recipients:

Committee amendment.—Provides for a series of options to modify the current AFDC work requirements, allowing States broad flexibility to experiment with ways of encouraging work effort:

(a) Community Work Experience Program.—States would be authorized to establish community work experience programs for AFDC recipients. Under these programs, recipients could be required to work on useful public projects in return for their AFDC grants. The provision requires that the work provided meet appropriate standards with respect to health, safety and other conditions and that the amount of work required in relation to the family's AFDC payment be consistent with Federal or State minimum wage provisions. Persons exempt under present law from participation in the WIN program would also generally be exempt from participation in this program except that parents caring for children under age 6 (but not under age 3) could be required to participate if child care is available.

(b) Jobs as an Alternative to AFDC.—States would be able to use savings from reduced AFDC grant levels to make jobs available on an entirely voluntary basis. Under this approach, recipients would be given a choice between taking a job or depending upon a lower AFDC grant than now exists.

States would have flexibility to implement the amendment for particular areas within the State or for particular categories of recipients and would also have the flexibility to modify the rules for treatment of income so as to avoid situations which would undermine the proposal.

If a State elected to utilize this provision, its costs would be contained within the overall level of welfare cost as they would otherwise exist. The total amount of Federal funding for regular AFDC payments and for subsidies provided to employers under the voluntary jobs program could not exceed the present level of estimated AFDC spending in the States.

(c) Work Incentive Demonstration projects—States would be authorized to implement three-year demonstration projects of their own design to increase the employment of welfare recipients. Participation criteria would have to follow the Work Incentive (WIN) provisions and would have to be applied statewide. However, the components of the program could be varied in different regions or political subdivisions of the State. Earnings derived from participating in the project would not make a family ineligible for AFDC.

These demonstration projects would substitute for the regular WIN program, and each participating State would be funded at a level equal to its 1981 WIN allocation augmented by any other Federal funding which may be available for establishing AFDC work programs in the States.

10. AFDC Payments to Strikers:

Committee amendment.—Requires States to specify that striking workers must comply with all AFDC provisions concerning work registration and training. No AFDC would be payable to a family in which the caretaker relative is engaged in a strike on the last day of the month, and no individual participating in a strike could have his or her needs included in computing the amount of the AFDC grant.

11. AFDC Payments to Children 18 and Over:

Under present law, States have the option to define a dependent child to include students age 18 through 20 who are regularly attending primary, secondary, or vocational school, and even college. For other purposes, Federal and State laws generally recognize persons age 18 and above as adults.

Committee amendment.—Modifies the definition of "dependent child" to provide assistance to children through age 17, or 18 if they are completing high school in their 18th year.

12. AFDC for Pregnant Women:

Committee amendment.—Prohibits States from increasing the AFDC payment level for pregnant women already receiving welfare until the last 3 months of pregnancy. However, AFDC-eligible pregnant women with no children would be covered under medicaid from the determination of pregnancy.

13. AFDC Eligibility for Unemployed Parent (AFDC–U):

Committee amendment.—Limits AFDC–U eligibility to those families in which the prin-

cipal earner is unemployed. The principal earner would be the parent who earned more income during the two years preceding the application for benefits. Also, the law would clearly state that the entire family will be ineligible for AFDC if the principal earner is not registered for work or training.

14. Work Requirements for AFDC Parents Attending College:

Committee amendment.—Limits the exemption from work requirements to children who are attending, full-time, an elementary, secondary, or vocational school. Also, the exemption for caretakers would be limited to a parent or relative who is personally caring for a child with only brief or infrequent absences from the child.

15. Require Retrospective Accounting and Monthly Reporting:

Committee Amendment.—Requires States to adopt a system of retrospective accounting along with monthly reporting. Prospective budgeting would be used in the first month after application to prevent hardship and in the final month to prevent payment of benefits to those whose circumstances have changed and who thus no longer meet the needs requirements.

16. Eliminate Payment of Less than $10:

Committee amendment.—Prohibits States from issuing AFDC checks in amounts less than $10 a month. Individuals denied a benefit as a result of this provision would be considered recipients for all other purposes, including medicaid eligibility.

17. Vendor Payments:

Committee amendment.—Removes all restrictions on the number of cases in which vendor payments are made by a State, and allows recipients to choose to have vendor payments made even though they could otherwise receive payments directly. There would not have to be a determination that the household cannot manage funds for those who elect to receive vendor payments

18. Overpayments and Underpayments:

Committee amendment.—Requires States to correct overpayments and underpayments in all instances. Recovery of overpayments would be made from current assistance payments, available income and resources, and, for an individual who no longer receives assistance, through the legal process. In any month when overpayments are being recovered, the AFDC payment, together with the reicipent's liquid resources and all income, must equal at least 90 percent of the payment a family would receive if there were no disregards from earned income.

19. Federal Match for Training:

Committee amendment.—Provides that all expenses related to AFDC administration, including training expenses, be matched by the Federal Government at a 50 percent rate, rather than the current 75 percent.

VII. Child Support Enforcement:

1. Collection of Past-Due Child Support and Alimony:

Committee amendment.—Provides for additional use of the IRS to collect delinquent child support payments. Upon receiving notice from a State child support agency that an individual owes past-due support which has been assigned to the State as a condition of AFDC eligibility, the Secretary of the Treasury would be required to withhold from any tax refunds due the individual, an amount equal to any past-due support. States would be required to reimburse the Federal Government for the cost of the procedure.

2. Collection of Support for Adults:

Committee amendment.—Makes State child support agencies responsible for collecting support for a child's parent (with whom the child is living) as well as for the child himself.

3. Collection Fee for Non-AFDC Families:

Committee amendment.—Requires States to charge a fee equal to 10 percent of the support collected for non-AFDC recipients who use the child support enforcement agency services. This 10 percent fee would be charged against the absent parent and added to the amount of the collection. The fee would be retained by the State.

4. Child Support Obligations Not Discharged by Bankruptcy:

Committee amendment.—Reinstates the provision previously in effect declaring that a child support obligation assigned to a State as a condition of AFDC eligibility is not discharged in bankruptcy.

VIII. Supplemental Security Income:

1. Retrospective Accounting:

Committee amendment.—Provides that SSI eligibility and benefit amount would, in general, be determined on a one-month basis, as under current law. However, for the first month of eligibility (the month in which the application is filed) eligibility and benefit amount would both be determined on a prospective basis.

2. Funding of Rehabilitation Services:

Committee amendment.—Repeals the authority of the Secretary of HHS to reimburse States for vocational rehabilitation services provided under SSI.

IX. Social Services:

Committee amendment.—Establishes a social services block grant consolidating the present social services program and certain other programs under the Social Security Act.

Under the Committee proposal, the existing portions of the Social Security Act relating to child welfare services (title IV, part B) and foster care and adoption assistance (title IV, part E) would be repealed effective October 1, 1981. The existing Title XX social services grant program would be replaced by a social services block grant that would incorporate the present social services, day care, social service training, foster care, adoption assistance, child welfare services, and child welfare training programs. An estimated $3.519 billion will be spent on these programs in fiscal year 1981; a total entitlement of $2.539 billion would be provided for the new social services block grant for fiscal year 1982 and subsequent fiscal years. This figure represents a 25 percent reduction from the amounts available in fiscal year 1981. There would be no requirement of non-Federal matching funds. Day care offered under the block grant program would be subject to applicable State and local standards but not to federal standards (States are exempted from Federal standards under present law until July 1981).

A State's share of the $2.639 billion for the social services block grant would be based on the total amount to which the State was entitled under the various programs listed above as a portion of the total amount to which all States were entitled under these programs.

A State's share would be reduced by an amount related to foster care, adoption assistance, and child welfare services if the State failed to meet certain requirements related to those services. Specifically, the State would be required to have a child welfare, foster care, and adoption assistance program as under titles IV–B and IV–E. A State subject to the penalty would have its social services block grant reduced by 75 percent of the Federal funds for foster care, adoption assistance, and child welfare services that it received in Fiscal Year 1981.

CHRONOLOGY OF EVENTS

The following is a capsule summary of the legislative history of the Finance Committee medicare, medicaid, and income security provisions.

February 18, 1981.—President Reagan announced his economic recovery program, including proposals to establish a medicaid "cap", eliminate the PSRO program, eliminate the Social Security minimum benefit, and reform the AFDC earned income disregard formula.

March 10, 1981.—President Reagan announced further details of his Economic Recovery Program.

March 17, 1981.—The Senate Finance Committee began hearings on the President's proposals.

March 23, 1981.—The Senate Finance Committee held hearings on the President's PSRO proposal.

May 6, 1981.—Senate Finance Committee approved spending reduction proposals.

Summary of estimated savings as agreed to by the Senate Finance Committee

[In millions]

	Fiscal year 1982	Fiscal year 1983	Fiscal year 1984
Medicare	$1,631	$1,839	$2,354
Medicaid	1,002	1,629	2,229
Maternal and child health	46	123	169
AFDC	1,011	1,240	1,288
CSE	112	123	137
SSI	50	78	75
Social Security	2,110	3,673	4,457
Social services block grant	993	1,166	1,319
Unemployment insurance	1,690	1,092	851

Other legislative activity

Social security financing

On May 12, the President announced a series of social security proposals designed to ensure the solvency of the system both in the short and the long-term. The package included a wide variety of propoals ranging from tightening the disability insurance program to restraining the growth of future benefits.

Two months later, the Social Security Board of Trustees released its annual report underscoring the critical financial condition of the trust funds. Shortly thereafter, (on July 7, 9, and 10) the Subcommittee on Social Security and Income Maintenance Programs held three days of hearings on Social Security financing and options for the future. Forty witnesses were heard, including the Secretary of Health and Human Services, the Commissioner of the Social Security Administration, one former commissioner, and various members of Congress. Additionally, testimony was received from panels of labor and business representatives, actuaries, the insurance industry, women's groups, and religious organizations.

In early September, a report prepared by the Finance Committee staff was issued detailing the financial condition of the Social Security trust funds. On September 23 and 24, the Finance Committee met to consider major funding options for effecting significant improvement in the long-range stability of the trust funds. Also, the Committee considered H.R. 4331, a House-passed bill to restore the minimum benefit.

On September 24, the Committee passed, by a vote of 20 to 0, a series of amendments to H.R. 4331. The amendments provided for: reallocation of tax income among the three trust funds, interfund borrowing between the OASI and DI trust funds, partial restoration of the minimum benefit; and two small program changes to finance the minimum benefit restoration. Whereas H.R. 4331 had a five year cost of $6.6 billion, the Committee amendment provided for savings of $200 million to the trust funds over the five years. The Committee amendments were approved by the Senate on October 15 by a unanimous vote.

On November 4, the House disagreed to the Senate amendments and requested a con-

ference to reconcile the differences between the House-passed and the Senate-passed versions. The Conference began the following day.

In December, the House and Senate reached agreement on provisions of H.R. 4331 to restore the social security minimum benefit. After several weeks of negotiations, the conferees agreed to fully restore the minimum benefit for all current recipients, partially financing this change by extending the payroll tax on covered workers to the first six months of certain sick pay. Interfund borrowing on a temporary basis was authorized to ensure that the retirement and survivors' insurance trust fund can remain solvent throughout 1982 by drawing on the resources of the disability and hospital insurance trust funds. Finally, several amendments offered on the Senate floor were accepted that should lead to improvements in the administration of the social security program.

Under the Reconciliation Act, the minimum benefit will be eliminated for all present beneficiaries in March and is eliminated for all future beneficiaries. No person becoming eligible for old-age or disability benefits after October 1981 will be entitled to the minimum benefit. Benefits payable to new beneficiaries will be based on their actual earnings.

The conference agreement on H.R. 4331 restores the minimum benefit for all people who are eligible for benefits before January 1982 or whose benefits are based on a worker's eligibility or death before January 1982. Also, the elimination of the minimum benefit for future recipients applies to members of religious orders who have taken a vow of poverty, who were first covered under the social security program prior to the date of enactment, and who became eligible after December 1991.

With respect to interfund borrowing, guidance is provided to the Managing Trustee in the statement of manager instructs for determining when borrowing is appropriate in order to best meet the need for financing benefits. The Managing Trustee is instructed to consult with the other trustees in making such determination no less frequently than on a monthly basis. Moreover, in no case should interfund borrowing make adjustments in the trust funds that insure benefit payments for a period of more than six months beyond the date of such determination. It was the view of the conferees that interfund borrowing was a safety mechanism to ensure benefit payments could be paid next year, but that it should not substitute for more comprehensive financing legislation in the near and long term.

Although all of the Senate amendments to H.R. 4331 had merit, the conferees ultimately agreed to just four. First, to facilitate the denial of benefits to prisoners, as enacted in 1980, the conference agreement would waive any contrary Federal or State laws to require Federal, State, or local government agencies to furnish the name and social security number of prisoners convicted of a felony. Second, to improve the situation with regard to incorrect or overpayments, a provision is included that would require the Secretary of HHS to report to Congress within 90 days on actions being taken to prevent payments to deceased social security beneficiaries. Third, it would make it unlawful to alter, buy, sell, or counterfeit social security cards; increase the classification of card violations from misdemeanors to felonies; and increase the maximum penalty to $5,000 or 5 years in prison.

Finally, the Secretary of HHS would be required by January 1, 1982, to enter into agreements with at least 7 states for demonstration projects to train AFDC recipients as home health aides. The Secretary is currently authorized to approve up to 12 such projects.

COMMITTEE ON FOREIGN RELATIONS

This year has been very productive in the Senate Foreign Relations Committee under the leadership of the distinguished chair, Senator Charles Percy. This was possible because of a real desire on both sides of the aisle to have a bipartisan approach to the issues before the Committee.

With the change in the White House the Foreign Relations Committee had the responsibility to hold hearings on the Administration's new foreign policymaking team. This involved hearings on 156 nominations including 25 assistant secretaries or higher, 69 ambassadors, 22 appointments to independent agencies, seven appointments to the U.S. Mission to the U.N., five appointments to the multilateral lending institutions, 16 appointments to U.S. delegations to international organizations and negotiations, and 12 appointments to various boards and commissions. One nominee, Ernest Lefever, was rejected by the Committee. (There will be about 10 to 20 additional ambassadorships to consider after the turn of the year.)

In addition, the full Committee as of October 20 held a record high 143 open hearings, and its subcommittees held 19 of their own. For issues which could not be considered in open session, there were 27 executive sessions and 19 briefings and consultations.

The subjects included arms limitation and nuclear proliferation issues; arms control and foreign policy implications of the President's strategic weapons modernization program; Middle East matters including the Iranian agreements, instability in Lebanon, Libya's role in sub-Saharan Africa, the situation in the Persian Gulf, nuclear cooperation with Egypt, the Israeli strike on the Baghdad reactor, the downing of Libyan jets by United States planes, and the sale of airborne warning systems and fighter enhancements to Saudi Arabia; and a host of international economic issues.

In addition, the committee kept close watch on the situations in Poland and Central America, and systematically followed foreign trips made by the President, Secretary of State and other officials of the State Department by various forms of briefings.

The committee's major piece of legislation, the Foreign Assistance authorization (S. 1196), was acted on after extensive hearings. During the markup, Chairman Percy introduced a bipartisan budget reduction of $900 million with Senator Pell which was subsequently adopted by the Administration in its revised budget request. The committee was therefore able to gain support for the foreign military and economic assistance bill on the floor without further significant cuts.

In its other major piece of legislation, the Committee reported its authorization for the Department of State, the International Communication Agency, the Board for International Broadcasting, the Arms Control and Disarmament Agency, the Asia Foundation and the Inter-American Foundation. The bill was reported without objection in the committee and was upheld on the floor.

Both bills significantly reflect the national demand for fiscal austerity. The aid bill also reflected committee majority opinion that the President requires increased flexibility in his daily conduct of foreign policy. The Senate, with few modifications, upheld the committee's recommendations in this regard for aid to Pakistan, Angola, Chile, Argentina and El Salvador. As of December 11, the aid bill was headed for a conference with the House.

The Committee has considered the following nominations:

Assistant Secretaries of State or higher	25
Ambassadors (Chief of Mission and at Large)	69
Appointments to independent agencies	22
Appointments to the United Nations	7
Appointments to multilateral lending institutions	5
Appointments to international organizations and negotiations	16
Appointments to various boards and commissions	12
Subtotal	156
Promotion lists for Career Ministers, Foreign Service and Senior Foreign Service	1,878
Total	2,034

The committee found time during the year to meet on highly successful and informative sessions on 46 occasions with officials and delegations from foreign countries, again a record number. Heads of state from Jamaica, Korea, Great Britain, the Netherlands, Japan, Germany, Egypt, Israel, El Salvador, Niger and Spain met with the committee, as did the President-designate of Argentina.

As the only Committee in Congress to have jurisdiction over treaties, the Committee handled 47 treaties, reporting 33 of them to the full Senate for advice and consent, recommending six for return to the President, and conducting initial hearings on eight others. Included among the reported to the Senate were a number of agreements which, because of their complexity or controversy, had remained in the Committee for two years or more.

Chairman PERCY. It gives me great pleasure to acknowledge the contribution of all the members of the committee. In particular those new members who assumed chairmanship of subcommittees, performed admirably in all of the tests which they faced during the session. I especially thank the ranking minority member, Senator Pell, for his wise counsel and the atmosphere of bipartisanship which we together sought to achieve. That spirit will surely continue in the second year of this session and will help us manage a very heavy workload.

The Committee met on 46 occasions with distinguished foreign officials and delegations. Among the visitors were: Prime Minister Edward Seaga of Jamaica, President Chun Doo Hwan of Korea, Prime Minister Margaret Thatcher of Great Britain, President-designate Roberto Viola of Argentina, Prime Minister Andreas van Agt of the Netherlands, Prime Minister Zenko Suzuki of Japan, Chancellor Helmut Schmidt of Germany, President Anwar Sadat of Egypt, Prime Minister Menachem Begin of Israel, President Jose Napolen Duarte Fuentes of El Salvador, President Seÿni Kountche of Niger, and King Juan Carlos of Spain. In addition there were foreign ministers and other officials from 17 counties and delegations from the United Nations, the British-American Parliamentary Group, African Development Bank, European Parliament, Federal German Parliament and the International Red Cross.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Under the chairmanship of the distinguished Senior Senator from Delaware Senator ROTH, the primary objective of the Committee on Governmental Affairs in this first session of the 97th Congress was to concentrate its resources and energy in a sustained effort to expose and examine wasteful, inefficient or fraudulent spending of taxpayer dollars in government programs and to seek legislative and administrative reforms to correct these problems wherever possible.

One of the most important means of ensuring more efficiency and effectiveness in the management of federal programs is through increased use of the tool of Committee oversight hearings. Oversight of the management of government programs is not often very attractive because it involves pains-taking research on often times detailed and uninteresting subjects. Yet, only through "continuous watchfulness" over the expenditure of taxpayer resources by Congressional Committees, as mandated by the Legislative Reorganization Act of 1946, can the public be assured that Government programs are operated as efficiently as possible.

The Governmental Affairs Committee has been given the unique assignment by the Senate to study and evaluate the "economy, efficiency and effectiveness of all agencies and departments of the Government." In addition to its own resources, the Committee has nine subcommittees, including a special Subcommittee on Investigations, which can pursue oversight activities within their areas of concern. These subcommittees, as part of the full committee, were asked to make a special effort to scrutinize programs and policies in their areas to highlight ineffective or fraudulent activities in government and pursue necessary reforms.

The Committee this first session did devote a substantial share of its time and resources to carefully overseeing the operations of a wide variety of government programs. Fraud and mismanagement in government was revealed by both full committee and subcommittee hearings.

At the full committee level, oversight hearings were convened to examine the effectiveness of agency efforts to curb unnecessary travel by federal employees and to explore the reasons for excessive cost overruns in Defense Department programs. Hearings were also held to explore the extent of fraud existing in federal programs and to review what changes agencies are making to prevent illegal or fraudulent activities.

In the subcommittees, oversight hearings were held to review the management of federal grant-in-aid programs, to review the effectiveness of federal contracting procedures and to examine the management of postal programs. In addition, the Permanent Subcommittee on Investigations examined fraudulent or illegal activities in the federally supported home health care program, in federal employee health benefits programs and recently highlighted serious illegal drug smuggling activities.

As these highlights make clear, the Committee acted to fulfill the major objective set by Chairman Roth by conducting intensive oversight hearings on a range of government programs. To back up these efforts, the Committee considered various pieces of legislation designed to improve the efficiency of federal programs and reduce instances of mismanagement or fraud. Such bills include regulatory reform legislation, federal aid management reform legislation, legislation to create a citizens commission to recommend major improvements in the structure of government, legislation designed to improve agency accounting and internal control systems and measures intended to improve federal efforts to collect debts from those who have defaulted on their government loans. In short, the Committee considered many measures to make government operate more effectively and with less waste.

The Governmental Affairs Committee, both because of the unique role assigned to it by the Senate and because of the objective set for it by its chairman at the beginning of this year, aggressively moved to improve the management and efficiency of various federal activities. The need to ensure that every tax dollar is used in the most effective way possible is now more pressing than ever and the Committee's efforts this year have been designed to fulfill this need.

The first session of the 97th Congress was one of the most productive periods in the history of the Governmental Affairs Committee. The Committee moved aggressively to fulfill its duties as one of the primary oversight Committees of the Congress and intensified its efforts to improve the management of federal programs.

The Committee concentrated its efforts on:

(a) Bringing to light the problems of waste, fraud and mismanagement in Federal programs and finding solutions to those problems:

(b) Reducing federal budget expenditures by carefully and responsibly lowering the costs of government programs within the Committee's jurisdiction;

(c) Reducing the cost and improving the management of the federal regulatory process;

(d) Laying the ground work for sustained improvements in the operation of federal programs and the federal system;

(e) Improving the management of federal-aid programs;

(f) Examining potential improvements in the management of the acquisitions process in the Defense Department;

(g) Reviewing the operation of the congressional budget process to ascertain its strengths and weaknesses; and

(h) Intensively reviewing the management of federal employee resources to ensure that those who have responsibility for federal programs are able to effectively manage them.

Among the more important legislative actions in the Committee were consideration of the following bills:

(1) The Regulatory Reform Act of 1980 (S. 1080, introduced by Senator Laxalt) which is intended to improve and reduce the cost of the federal regulatory process by (a) requiring most federal agencies to perform a regulatory cost analysis of each major regulation before final approval of the rule; (b) certifying that the costs of each major rule are reasonably justified by its benefits; (c) requiring all agencies to publish annual agendas of upcoming regulations to inform the public of agency activities; (d) mandating that all agencies review existing major rules to ensure that they are cost-effective; and (e) strengthening oversight mechanisms to ensure the regulatory agencies are more accountable to the public.

(2) The Omnibus Reconciliation Act of 1981 (Title XVII of S. 1377, Public Law 97–35) was signed into law on August 13, 1981. The Act is designed to reduce federal spending for a saving of approximately $35 billion in fiscal year 1982 and more than $100 billion in fiscal year 1983 and 1984. The Committee on Governmental Affairs, as its contribution to the efforts to reduce spending, enacted changes in program under its jurisdiction amounting to saving of more than $5 billion in fiscal year 1982 and further spending reductions in fiscal year 1983 and 1984. The Committee also acted to ensure adequate public participation in state-level spending decisions on new block grant funds created under the Reconciliation Act. In addition, the Committee adopted legislative provisions designed to ensure that the proposed nine-digit Postal Service zip code is cost-effective and not a burden to the public.

(3) The Federal Assistance Improvement Act of 1981 (S. 807, introduced by Senator Roth) was reported out of the Government Affairs Committee and is designed to (a) encourage the consolidation of grant programs to improve the efficiency of federal aid; (b) encourage more effective audits of federal aid programs and mandate greater federal rules and regulations concerning grant programs; and (d) provide greater flexibility to state and local governments in their use of federal funds. This bill originated in the subcommittee on Intergovernmental Relation, which under the leadership of Senator Durenberger, examined the structure of many of the programs in the $85 billion intergovernmental grant system, with an eye toward reducing mandated red tape for state and local governments.

(4) Legislation to Create a Commission on More Effective Government (S. 10) was considered and passed by the Committee in July of this year. The bill authorizes the creation of a national commission to make recommendations for improving governmental performance at the Federal level and throughout the intergovernmental system. Members of the Commission would be appointed by the President, the Speaker of the House and the President Pro Tempore of the Senate. The Commission is modeled after the two Hoover Commissions of the 1940's and 50's and its bipartisan makeup would help to ensure that its recommendations for improved and more cost-effective government would be supported by the Congress and the American people.

(5) Debt Collection Practices Act of 1981 (S. 1249) establishes a comprehensive framework to increase the efficiency and effectiveness of federal debt collection practices. Currently, some 120 billion is owed to the federal government by those taking advantage of federal loans and other aid programs. These uncollected debts cost taxpayers some $10 million a day in interest. S. 1249 would authorize greater use of private collection agencies in collecting debts, would encourage information procedures regarding those who owe money to the federal government, and would provide more effective penalties for those who default on their federal loans.

(6) Reorganization Act of 1981 (S. 893, introduced by Senator Roth), reauthorizes the authority provided to most past Presidents to propose plans for reorganizing government agencies in an effort to enhance program effectiveness and improve efficiency. The Committee on Governmental Affairs has been endowed by the Senate with broad authority over the organization and structure of the federal government and the Committee has long been concerned with methods of reducing overlaps between agencies and ensuring that agencies are structured so that they are made more accountable to the public. The Reorganization Act is intended to encourage Congress and the President to work together to improve the organization of government. The Committee reported S. 893 to the full Senate in May.

Aside from legislative activities, the Committee conducted several inquiries and analyses on important aspects of governmental operations.

In a study prepared by the Permanent Subcommittee on Investigations entitled "Home Health Care Fraud and Abuse", the operations of five non-profit home health care agencies, which received federal Medicare funds, were investigated. Based on these investigations, the Subcommittee, under Chairman Roth, concluded that the home health care program lends itself to fraud, waste and abuse and enables unscrupulous operators to profit substantially at the expense of the taxpayer. The Subcommittee also found that the current method used by the federal government to reimburse home health care operators provides no incentive to contain costs. The Subcommittee made numerous recommendations, based on its findings, including more careful auditing and alternative methods of payment under the program to reduce opportunities for fraud.

A report prepared by the Oversight of Government Management Subcommittee examined the government's use of so-called debarment and suspension authority in its contracting activities. Debarment is a procedure designed to insure that government agencies not contract with a supplier who has a record of misrepresentation or fraud, and the suspension process is designed to protect government interests when a contractor is

suspected of fraudulent activities. Both procedures are designed to protect taxpayer dollars in federal programs from unscrupulous operators.

The Subcommittee, chaired by Senator Cohen of Maine, investigated four specific contracting cases and found that federal agencies routinely contract with firms which have had a bad record in the past. The Subcommittee recommended several actions to ensure that federal agencies do not rely on companies with questionable reputations in contracting for goods and services.

The Intergovernmental Relations Subcommittee held 25 hearings, under leadership of Senator Durenberger, to design the road we must travel in 1982 to help the President establish a new Federalism. The desired goal is a new partnership between States, cities, the Federal Government, the individual, and his/her private institutions. The Subcommittee's work should prove helpful in furthering that goal.

During the 1st Session of the 97th Congress, the Committee also received and reviewed 37 nominations, including the following: the Director and Deputy Director of the Office of Management and Budget; the Administrator for the General Services Administration; the Administrator for the Office of Federal Procurements Policy; the Director of the Bureau of the Census; 15 Inspectors General; the Director and Deputy Director of the Office of Personnel Management; the Director and Associate Directors of the Federal Emergency Management Agency, and the Comptroller General of the United States.

Of the 37 nominations, 33 had been approved as of October 20th; three had been withdrawn by the President; and one remained under review by the Committee.

BILLS AND RESOLUTIONS REFERRED AND CONSIDERED

During the 1st Session of the 97th Congress, 131 Senate and House bills and resolutions and 37 nominations were referred to the Committee for consideration (as of October 1st 126 Senate bills, 5 House passed bills and 16 joint, concurrent or simple resolutions were referred). Of the total, fifteen were reported by the Committee to the full Senate and three were enacted into laws.

HEARINGS

During the 1st Session of the 97th Congress, the Governmental Affairs Committee held 66 hearings covering 92 days. The subjects of these hearings, in addition to nominations and legislative proposals pending before the Committee, included:

(1) Corruption in the International Longshoremen's Association;

(2) Oversight of the Congressional Budget Process;

(3) Oversight of the Acquisitions Process in the Department of Defense;

(4) Review of the Extent of Waste, Fraud and Mismanagement in Government Programs;

(5) Examination of the Effectiveness of the Federal Government's Management of Employee Travel and Review of Efforts to Control Unnecessary Travel;

(6) Fraud in the Home Health Care Industry;

(7) Fraud and Misrepresentation in Claims Filed for Disability by Federal Employees;

(8) Review of the Reasons for and Extent of the Loss of Top Management in the Federal Government;

(9) Review of Energy Conservation Strategies for the 1980's;

(10) Examination of State Implementation of Federal Regulatory Programs;

(11) Examination of Various Factors Affecting the Federal System;

(12) Oversight of the Use of Consultants by the Defense Department; and

(13) Examination of the Federal Government's Refusal to Pay Debts Owed to Private Citizens in a Timely Manner.

REPORTS FILED IN THE SENATE

The Committee, and its subcommittees, prepared 23 reports and studies during the 1st Session of the 97th Congress. Fourteen of these accompanied legislative proposals considered and acted on by the Committee. The remaining 12 included the results of special studies and inquiries which were issued as Committee prints or Senate documents.

Among the special studies were a special report from the Permanent Subcommittee on Investigations concerning the Labor Department's Investigation of the Teamters Union's Central States Pension Fund and a report from the Permanent Subcommittee on Investigations Concerning the Effectiveness of the Department of Energy's Gasoline Allocation Program.

COMMITTEE ON THE JUDICIARY

Chairman Thurmond reorganized the Committee on the Judiciary at the beginning of the 97th Congress so that each of its subcommittees would have substantial legislative and oversight jurisdiction with Committee operations organized along functional lines. The Chairman emphasized during the reorganization process that efficiency in Committee operations and the public interest should be overriding considerations in all Committee activities. He noted the paramount interest of the American people in criminal and civil justice and set goals for the Committee which reflected a commitment to a strict construction of the Constitution and a desire to maximize individual freedom.

This functional reorganization resulted in nine subcommittees instead of seven in the previous Congress. The new subcommittees and their Chairmen are Criminal law (Mr. Mathias), Regulatory Reform (Mr. Laxalt), the Constitution (Mr. Hatch), Courts (Mr. Dole), Immigration and Refugee Policy (Mr. Simpson), Separation of Powers (Mr. East), Agency Administration (Mr. Grassley) Security and Terrorism (Mr. Denton), and Juvenile Justice (Mr. Specter). The subcommittee organization reflects the jurisdictional responsibility of the committee over criminal law, regulatory and administrative law, oversight of the Department of Justice, antitrust, patent, copyright and trademark law, the Constitution, federal courts, immigration and refugee policy, and internal security.

In addition to its legislative and oversight roles, the Committee passes on a large number of judicial and executive nominations. The Committee recommended the approval of the first woman to be nominated to the United States Supreme Court. In providing the background and recommendation on which the Senate could fulfill its Constitutional duties, the Committee held three days of hearings and considered the views of a wide range of witnesses. On the recommendation of the Committee, the Senate unanimously confirmed the nomination of Sandra Day O'Connor to be an Associate Justice of the Supreme Court. The Committee also considered the nominations of eight Courts of Appeal judges, over thirty District Court judges, over sixty of the United States Attorneys positions and all of the principal officers of the United States Department of Justice.

The structure and capabilities of the federal judiciary have been the focus of much of the Committee's work during the First Session. The Committee gave considerable attention to a bill to reorganize the appellate structure of the federal courts in the patent, trademark, copyright, and claims against the United States areas by consolidating the Court of Customs and Patent Appeals and the Court of Claims into a new United States Court of Appeals for the Federal Circuit. The Subcommittee on Courts has taken up bills to establish a National Court of Appeals and to provide greater flexibility for the Supreme Court to decide what cases it will hear from among the 5,000 petitions annually filed.

In passing the Federal Courts Improvement Act of 1981, S. 1700, as reported by the Judiciary Committee, the Senate made substantial improvements in two areas of vital concern to our people and to the progress of the economy. First, the Act provides for speedy and complete relief for parties with legitimate claims against the Government. Second, it establishes a system to achieve definitive, consistent, and expeditious rulings on questions of patent law. Transmuted into a single appellate court are the Court of Claims and the Court of Customs and Patent Appeals. Created as an Article I court is a Claims Court. Citizen claims against the Government will be processed and decided in timely and just fashion. And the problems of disparate and inconsistent interpretations of the patent laws, with consequent harm to successful technological innovation, will be done away with. Additionally, the Act made certain incremental improvements in the operations of all federal courts of benefit to the Nation.

During the course of the year, the Committee also engaged in intense efforts to examine and improve the laws that provide law enforcement and criminal justice authorities the necessary tools to wage an effective war against crime. Approving a resolution, S. Res. 141, that combatting violent crime should be a national priority was no symbolic gesture but a fervent commitment for the members of the Committee. Some critical decisions by the Chairman determined the strategy that the Committee's efforts should take. Criminal code reform was to be a goal but controversial subjects such as capital punishment, modification of the exclusionary rule, and reconsideration of the insanity defense, were to be removed from the omnibus criminal code reform proposals and offered separately. Critical areas such as considering methods of protecting the public from crime committed by dangerous persons already under indictment for other offenses, examination of the problem of juvenile crime, review of laws deterring persons from repeating violent offenses by means of firearms, and review of the procedures by which convicted felons may have their cases presented again and again to the federal courts, were examined independent of the criminal code reform legislation.

Senator Thurmond, thus, introduced measures to modify the Hobbs Act, S. 613, to limit the availability of federal habeas corpus relief for state prisoners, S. 653, to permit federal courts to detain without bail defendants adjudged to be dangerous to community safety, S. 1554, and to modify the insanity defense in federal criminal cases, S. 1558; and Senator Hatch introduced S. 751 to modify the exclusionary rule. Hearings have been held during which the ramifications of these proposals were extensively and thoroughly aired. Mark-up was held on S. 751. The work done in the subcommittees and in full committee on these important proposals should provide the basis for considerable legislative initiative in the second session.

On November 18, the Committee approved S. 1630, the Criminal Code Reform Act of 1981, introduced with bipartisan support from the Members of the Committee, and altered only minimally in mark-up session. This is basically the same bill that was reported by the Committee in the 96th Congress and sponsored by Senator Kennedy. It does include some changes: money bail is eliminated and authority is included for pretrial detention for defendants deemed dangerous to others by the court; sentence ranges are slightly increased; federal jurisdiction would be extended to cover both bribery and graft with regard to an agent of a State or local government who is charged with administering monies or properties derived from a Federal program; federal Hobbs

Act jurisdiction could be invoked in labor management dispute related violence; and the obscenity instructions would include an objective standard on the issue of appeal to prurient interest.

While the need for reform of the body of Federal criminal law is compelling because it contains too many archaic and difficult-to-locate provisions, too many gaps, and too much redundancy, inconsistency, and sentencing disparity, the Committee investigated other areas that also cry out for reform.

Hearings were held in July on violent crimes committed by juveniles, a problem that is now receiving nationwide attention. In the budget reconciliation process, Senator Specter, the Chairman of the Subcommittee on Juvenile Justice took the lead in maintaining an adequate level of funding for the Office of Juvenile Justice and Delinquency Prevention, with the full Senate approving his recommended $70,000,000 in the Department of Justice Authorization bill, S. 951, H.R. 416, rather than the $50,000,000 sought by the Department of Justice.

Close cooperation between Senator Specter and Senator Mathias, Chairman of the Subcommittee on Criminal Justice, allowed hearings on state and local court adjudication of drunk driving, victimization of children, means of identifying violent criminals early during the juvenile delinquency stages, mandatory life sentencing for career criminals, and federalizing repeated commission of firearm related violent crimes. Senator Specter introduced two related pieces of legislation, S. 1688 and S. 1689, that would permit the federal courts and the federal prison system to incarcerate state and federal repeat offenders whose career is violent crime involving firearms. Senator Mathias' Subcommittee conducted hearings on these bills, during which considerable testimony was entered concerning the importance of removing the small number of such repeat offenders from society in terms of preventing the tremendous number of violent offenses they are responsible for.

On December 10, 1981, the Subcommittee on Criminal Law held the first hearings devoted solely to proposed amendments to the Hobbs Act, which prohibits robbery and extortion in interstate commerce. This issue had been treated in the past in the context of criminal code reform. The Hearings focused on S. 613, introduced by Senator Thurmond, which would create two new offenses making it a Federal crime to inflict major personal injury or property damage in a labor dispute, and would reverse the Supreme Court's Enmons decision holding that the Hobbs Act does not reach violence or threats of violence in the course of an otherwise legitimate labor dispute.

Other related hearings include oversight and authorization review of Department of Justice operations, including confirmation hearings of the Attorney General, William French Smith, and the Associate Attorney General, Rudolph Guiliani, and acceptance of the Report of the Attorney General's Task Force on Violent Crime. The Attorney General and the Department of Justice criminal law personnel have been exceedingly cooperative with the Committee. Evidence of this is in the close cooperation experienced in collaborating on S. 1630, the proposed Criminal Code Reform Act of 1981. Continuation of this working relationship is predicted for the second session during which the Committee is expecting to be reporting substantive criminal law legislation for consideration by the Senate.

In the economic area, the Committee emphasized an approach designed to free American business from unwarranted or unnecessary Federal intervention. The Committee reported to the Senate several measures designed to enhance free competition in the marketplace and to restrict governmental overregulation. Chief among these reported by the Committee is S. 1080, the Regulatory Reform Act of 1981, a product of Senator Laxalt's Subcommittee on Regulatory Reform. The design of the provisions of S. 1080 is to supply a rational framework for agency analysis and decisionmaking that is lacking in the current rulemaking process and to ensure that all interested parties can participate fully in that process. Toward those ends S. 1080 requires a "regulatory analysis" of all rules with major impact. Regulatory analysis, based upon concepts of cost-benefit analysis, will secure a rational weighing of regulatory proposals by requiring agencies to publicly identify the effects of proposed regulations, to consider public comments about those effects, and to make determinations whether the benefits of the proposed regulations justify their costs. To ensure the fairness and reliability of the process and to expose the agencies to the benefits of the experience and expertise of all citizens, the bill proposes that agencies be required to give the public more information about a proposed regulation and that the opportunities for public participation in rulemakings be expanded.

To assure effective Executive Branch oversight of agency compliance with the new procedures the President is authorized to provide guidance for the effective coordination and implementation of the revised process. Finally, S. 1080 seeks to further ensure the propriety and accountability of agency action by directing the reviewing courts to play a more active role in construing statutes which transfer regulatory power to agencies by taking a hard look at assertions of regulatory jurisdiction or authority.

S. 1080 was introduced on April 30 of this year and referred to the Committees on the Judiciary and Governmental Affairs. Both have made significant improvements in the bill as introduced. Both Committees also favorably reported the bill and any differences that have arisen are technical in nature. This leaves only the most significant issues open for further resolution. Floor consideration for S. 1080 is now scheduled for late January 1982.

The Committee also began to address a number of social issues that have been matters of continuing public controversy, specifically the issues of abortion, busing, and school prayer. In three days of hearings (May 20–21 and June 22) the Subcommittee on the Constitution, under the chairmanship of Mr. Hatch, heard extensive scholarly testimony addressed to the question of Congress' power to restrict the jurisdiction of the federal courts, including the appellate jurisdiction of the Supreme Court, to adjudicate these issues.

On November 3, the Constitution Subcommittee reported S. 1760, a bill to prohibit the lower Federal courts from requiring racially based assignment or transportation of students to the public schools. That measure would permit existing court orders to be reviewed in Federal court and vacated unless the reviewing judge made specific findings required by the bill to support the order. A second Judiciary subcommittee has also cleared the way for full committee consideration of busing legislation this Congress. The Separation of Powers Subcommittee, under the chairmanship of Mr. East, on November 16 reported S. 1647 which, in addition to barring forced busing orders, would prohibit lower Federal courts from ordering school closings or the transfer of teachers to desegregate the schools. As reported, that bill would allow any State or local "educational agency" affected by a court decree requiring forced busing, school closings or teacher transfers to seek dissolution of the order in Federal district court. An almost identical measure, S. 1743, is presently on the Senate Calendar and could be called up at any time.

In the abortion area, the Committee reviewed several alternative approaches to the issue. Senator East's Separation of Powers Subcommittee held 8 days of hearings on S. 158, the Human Life Statute. S. 158 would declare that human life begins at conception and would allow the states to enact laws protective of fetal life. The bill was reported favorably by the Subcommittee and awaits full Committee consideration. Senator Hatch's Subcommittee on the Constitution has considered several constitutional amendments respecting abortion, including S. J. Res. 110, the Human Life Federalism Amendment, a proposal which would make clear that the Constitution does not secure a right to abortion and would vest concurrent authority in Congress and the States to restrict or prohibit abortions. Comprehensive hearings have been held on these proposals and Subcommittee consideration is expected to be concluded early in the next session.

Early in the Congress, Chairman Thurmond indicated to the Committee his view that immigration and naturalization statutes have become excessively complex and are enforced with a low degree of certainty. The Committee, through its Subcommittee on Immigration and Refugee Policy, Chaired by Senator Simpson, undertook a comprehensive review of the substance and implementation of several major provisions of the immigration laws.

In April, the Subcommittee conducted oversight hearings on the Immigration and Naturalization Service. The following month it held joint hearings with the House Committee on the Judiciary on the Final Report of the Select Commission on Immigration and Refugee Policy. In another joint hearing, held July 30, 1981, the Subcommittee examined the Administration's immigration and refugee policies. Oversight hearings on the Cuban-Haitian asylum program were conducted the following day. More recently, the subcommittee has considered proposed sanctions on employers who hire illegal aliens and reviewed current procedures for adjudicating actions to exclude or deport aliens and for determining claims for asylum.

This review of immigration laws, policies, and procedures is nearing completion and the Committee hopes to accomplish a major revision of the immigration laws during the Second Session of the 97th Congress. In so doing, the Committee has been, and will be guided by the principle that the American people have a right to expect the Federal government to provide secure borders.

Americans have also become increasingly and justifiably alarmed at the rise in terrorist activity around the globe. Internal security concerns of this country, which must always be considered of critical importance, have taken on even greater significance as terrorists and their activities more directly touch the United States and its interests. The Committee, through its Subcommittee on Security and Terrorism, has undertaken a detailed study of the origins and direction of international and domestic terrorism. Under the chairmanship of Senator Denton the Subcommittee has developed in the public record substantial information concerning the nature and root causes of the terrorism menace. The work of the Subcommittee will continue and intensify during the Second Session of the Congress and will maintain focus on the terrorist threat. The Subcommittee will also be examining the apparent inability of the United States to adequately deal with the "technology transfer" problem, a phenomenon which has resulted in significant transfers of high technology to the Soviet Union and other countries of the Communist bloc. Such transfers, some legal and others already illegal under present law, may seriously work to the detriment of our national interests.

In a related area, the Subcommittee on Criminal Laws examined in detail the need to extend Federal laws protecting the President, the Vice President, and Members of Congress from assassination and other crim-

inal acts to other Federal officials. Senator Mathias and his Subcommittee took extensive testimony on the advisability of creating Federal crimes for the commission of such acts against cabinet officers and their deputies, White House staff, and justices of the Supreme Court.

COMMITTEE ON LABOR AND HUMAN RESOURCES

The Senate Labor and Human Resources Committee is as extensive in breadth of jurisdiction as any other committee of the Senate. Legislation from the committee touches the lives of every American. Under the guidance of Chairman Orrin G. Hatch, the committee is charged with overseeing programs that involve government in pre-natal and neonatal care of infants and mothers; overseeing federal efforts to improve the quality of education of our youth through high school, and federal efforts to assist college and other secondary students earn advanced educations; working to help the handicapped and disabled lead fulfilling lives; dealing with vocational education and job training for workers entering the job market for the first time, or re-entering the market. In addition, the committee is concerned with the safety and health of workers on the job and provides the framework upon which pension plans are built for retired workers. Chairman Hatch and the committee is currently involved in efforts to improve services to the aged who are unable to lead a fully active life, and to provide income assistance to those who are unable to meet inflated costs of home heating in winter. The committee also works with the ways in which these many programs interact to affect families, which consist of Americans from very young to very old.

Chairman Hatch has opened new frontiers in the 97th Congress First Session, in almost all of these fields. The committee's efforts during the novel budget reconciliation process this past summer have literally restructured the federal-state and federal-local government relationships, passing major responsibilities for the health and well-being of Americans to those levels of government closest to the people who need the services. Not coincidentally this committee made a milestone effort to control and reduce runaway federal spending, while at the same time preserving critical services for those people who have no other source of aid in times of great need. The committee was charged by the Senate to make almost 25 percent of the total budget savings required over the next four fiscal years and met that target.

At the same time, the Labor and Human Resources Committee worked to make many of these programs work better, and often at a reduced cost. Congressional oversight is considered a very serious responsibility by this committee—we created this year a subcommittee dedicated solely to investigations and oversight, and we have conducted in all subcommittees and the full committee thorough oversight proceedings on several federal agencies. The committee concerns are that those employed by the government recognize fully their responsibilities to their fellow citizens to spend public moneys with great care and consideration.

Members of the committee represent an extremely wide divergence of political thought, but have been able to work together many times under very trying circumstances, and much of the legislation they reported out reflects the great care exercised in looking out for their constituents and all other Americans.

SUBCOMMITTEE ON INVESTIGATIONS AND GENERAL OVERSIGHT

During the first session of the 97th Congress the Subcommittee on Investigations and General Oversight chaired by Senator Paula Hawkins, has initiated inquiries into several areas of governmental operation that fall under the jurisdiction of the Committee on Labor and Human Resources.

National war on cancer

On May 21, 1981, the Subcommittee conducted hearings to examine the progress made by the National Cancer Institute toward the treatment and cure of cancer. The Subcommittee's investigation disclosed a problem in the Institute's ability to successfully inform and educate the community physicians and hospitals in the most recent development in research and treatment. The testimony revealed that 85 percent of the cancer patients in this country are treated at the community and local level. The critical appraisal of the Institute's ability to disseminate information and scientific research was echoed by community physicians from cancer treatment centers across the country.

Also questioned in the May 21st hearing was the National Cancer Institute's failure to report kidney failure among several patients receiving the cancer drug methyl-CCNU to the Food and Drug Administration. The reporting of such adverse drug reactions has been the focus of the Subcommittee's continuing investigation of the National Cancer Program. Additional hearings on this subject are scheduled.

At the conclusion of the hearing, Chairman HAWKINS called on Health and Human Services Secretary Richard Schweiker to develop a special study commission to recommend improvements in the transfer of research and treatment breakthrough to community hospitals and physicians. Secretary Schweiker responded by naming a Committee on Community Oncology and Technology Transfer. This committee met first in July of this year and continues to meet on a regular basis. The Subcommittee will continue to monitor the progress of the study commission and to work with the Secretary to ensure that all cancer patients in this country have the benefit of the most advanced treatments.

In November the Subcommittee continued its inquiry with two days of hearings to examine the National Cancer Institute's experimental new drug program. The testimony disclosed serious problems in the information given to cancer patients when they participated in the use of new methods of chemotherapy. In addition, the Subcommittee disclosed the Institute's inability to promptly report the adverse side effects which some patients experienced. In some cases the patients died from the toxic side effects of the cancer drugs.

The Food and Drug Administration, charged with the responsibility of investigating these adverse drug reactions, was frustrated in its efforts to monitor and report the dangerous side effects of the cancer chemotherapy. Individuals deep within the Agency testified to a special relationship with the National Cancer Institute which prevented them from carrying out their investigative responsibilities. An FDA chemist who had testified before the subcommittee reported harassment from her superiors as a result of her statements.

These serious allegations were given a full and complete airing at the November hearings. Responsible officials from the National Cancer Institute and the Food and Drug Administration gave detailed testimony regarding the efforts made by the respective agencies to address these serious concerns. Physicians from the leading regional cancer centers disclosed new safeguards to protect patient safety and procedures to guarantee the patient the most complete and reliable data before being asked to participate in an experimental drug program.

The Subcommittee's inquiry is expected to be continued in 1982. The problems disclosed at the hearings held in 1981 will be monitored for the expected improvements and new procedures.

Employment and training programs

On August 7, 1981, the Subcommittee targeted the Comprehensive Employment and Training Administration programs and practices in the state of Florida. At an Orlando field hearing investigators and auditors from the federal, state and local levels disclosed to Chairman HAWKINS and members of the Subcommittee incidents of wrong-doing and fraud in the expenditures of federal CETA dollars. Testimony disclosed CETA funds being paid to a psychologist who had no degree in psychology and whose address was determined to be a vacant lot; thousands of dollars in loans to various individuals in the programs which were never paid back; one organization director who received a salary under his real name from one source of funding and was simultaneously receiving a salary as a clerk-typist under an assumed name; and the purchase of hundreds of thousands of dollars of farm equipment that was never located.

Additional testimony revealed several incidents of abuse of program funds. Witnesses related examples of self-dealing between funded CETA corporations and private companies actually established by the same individuals who were in control of federal CETA funds. The Subcommittee was assured that proper controls and reviews are now in place to prevent this wrong-doing from reoccurring in the future.

Occupational safety and health

On September 23, 1981, the Subcommittee focused its attention on the practices and procedures of the Occupational Health and Safety Administration.

In a joint hearing with the Subcommittee on Labor, Assistant Secretary Thorne G. Auchter presented his plans and proposals for the Administration of OSHA. Assistant Secretary Auchter was able to address specific concerns of business and labor and to report to the Congress the directions for Occupational Safety and Health under the new Administration. The Subcommittee also heard testimony from concerned officials representing a variety of business, labor, and industry sectors.

Missing children

On October 6, 1981, the Subcommittee conducted a formal inquiry into the problem of missing children in America. Dramatic evidence of the extent of this problem and its impact on those involved was received in the form of testimony from parents actually affected by this tragedy. The Subcommittee was impressed by the obvious impact and devastation felt by the family of a missing child.

Additional testimony was received from two separate local law enforcement agencies who have been effectively dealing with the problem. They explained to the Subcommittee the techniques and tools that they employ to locate missing children in their community. Finally, testimony was received from the information director for a nation-wide citizen action group dedicated to the recovery and safe return of missing children. All of the witnesses spoke in dramatic terms of the need for a national clearing-house of information on missing persons and a similar system to track and identify the remains of deceased individuals. Legislation to initiate these programs, authored by Senator Hawkins of Florida, is currently before the Juvenile Justice Subcommittee of the Judiciary Committee.

Additional areas of inquiry

In addition to the subject areas discussed above, Chairman Hawkins and the Subcommittee also initiated specific inquiries into

the practices of the Equal Employment Opportunity Commission, the paperwork involved in the education of handicapped children, and the Food and Drug Administration.

SUBCOMMITTEE ON THE HANDICAPPED

In this, the International Year of Disabled Persons, the Subcommittee's major efforts, led by Subcommittee Chair Lowell Weicker, have been to assist the Full Committee in shaping those parts of the Omnibus Reconciliation Act which deal with federal discretionary programs serving handicapped people. These programs include the Education for All Handicapped Children Act (PL 94–142) and the Rehabilitation Act of 1973 (PL 93–112, as amended) which constitute the backbone of the federal government's commitment to allow disabled Americans to grow to their maximum functioning potential in our society. The Committee recognized the vital nature of these programs by reauthorizing PL 94–142 through FY 1984, and PL 93–112, as amended through 1983.

In addition to maintaining the categorical nature of these laws, the Committee authorized funding levels slightly above FY 1981 pre-recission levels for FY 1982 and beyond. Thus, while faced with the tortuous task of reducing federal expenditures for human service programs in general, the Committee was able to carefully craft a package which assured that the present commitment to the disabled would be at least maintained.

The full Congress has concurred with the Committee's recommendations in these areas.

While the Developmental Disabilities Assistance and Bill of Rights Act was reauthorized through the Reconciliation Process described above, the Subcommittee conducted a public hearing, and received testimony concerning the value of this law. The Subcommittee favorably reported out S. 1132, which in the absence of the Reconciliation Act, would have been the vehicle to continue the DD program.

The Subcommittee also conducted two days of field hearings in Connecticut on the subject of the proper level of care for retarded citizens. When published, the record of those hearings will provide a most valuable guide for the Congress in making judgments on the mix of services which can best allow retarded citizens to reach their greatest potential for independence.

SUBCOMMITTEE ON AGING, FAMILY AND HUMAN SERVICES

The Subcommittee on Aging, Family and Human Services, chaired by Senator Jeremiah Denton, handles legislation dealing with a broad range of issues, including anti-poverty programs, child and family development, social service and employment, programs for the elderly, and domestic volunteer programs. During the first session of the 97th Congress, the Subcommittee held eleven days of hearings and prepared eight legislative proposals, seven of which were enacted through the vehicle of the 1981 Omnibus Budget Reconciliation Act: Domestic Volunteer Services Act, Child Abuse Prevention and Adoption Opportunities, Community Services block grant, Low-Income Energy Assistance block grant, Adolescent Family Life Act, Head Start Act, and the Native American program. The Subcommittee took the remaining piece of legislation—the Older Americans Act—to the Senate floor where it was passed. During the Reconciliation process, savings of over $500 million in FY '82 and over $1 billion in FY '83 were achieved in programs under the jurisdiction of the Subcommittee.

Legislation

Child Abuse Prevention and Treatment and Adoption Reform:

As part of the Omnibus Budget Reconciliation Act, the Congress made provisions for child abuse prevention and treatment and adoption reform activities. An amendment offered by Subcommittee Chairman Senator Jeremiah Denton, provided that $7 million be made available for grants to states for child abuse programs, and $12 million be included in a discretionary program for a National Center for Child Abuse and Neglect and Adoption Opportunities, for activities which require a national focus. The Conferees agreed with this proposal, with the further provision that adoption opportunities activities should be funded at a minimum of $2 million from the discretionary fund, and that the Secretary would continue to operate the National Center on Child Abuse.

Community Services Block Grant:

A proposal for a Community Services Block Grant was included in the Omnibus Budget Reconciliation Act of 1981. This block grant authorizes funding for the next five years at $389,375,000 for each year. The legislation provides that each state must submit an application as required by the Secretary of Health and Human Services in order to receive funds. In addition, a discretionary authority for the Secretary of HHS makes provisions for certain activities including special emphasis programs for technical assistance and training programs in rural housing and community facilities development, programs designed to promote economic self-sufficiency, assistance for migrants and seasonal farmworkers, and national or regional programs for low-income youth. The Community Services Administration was terminated by this legislation, and a new Office of Community Services was established in the Department of Health and Human Services.

Native Americans Program:

S. 1088, the Native American Act, was introduced in the Senate on April 30, 1981, by Senator Jeremiah Denton. With some simple modifications to increase tribal participation in the administration of the program, the bill provided for a two-year extension of the existing program. Because this bill proposed a free-standing Native American Program, separate from the Economic Opportunity Act, it was referred to the Select Committee on Indian Affairs. At the request of the Chairman of the Select Committee on Indian Affairs, the Subcommittee on Aging, Family and Human Services included a two-year extension of the current program in the Omnibus Budget Reconciliation Act.

Domestic Volunteer Services Act:

S. 1087, the Domestic Volunteer Service Act Amendments of 1981, was incorporated into P.L. 97–35, the Omnibus Budget Reconciliation Act of 1981. This legislation reauthorized the programs under ACTION, the federal agency for voluntary service, through FY '83. It eliminated the set-aside for the University Year for Action Program, freeing up funds to be used for the National Center for Service Learning and demonstration projects in community service.

Adolescent Family Life Act:

S. 1090, the Adolescent Family Life Act, was incorporated into P.L. 97–35, the Omnibus Budget Reconciliation Act of 1981. The Act authorizes a three-year program of services and research in the area of adolescent sexual activity, including pregnancy. Grants for services would target two adolescent groups. First, pregnant teenagers and their parents could benefit from a wide range of services, such as pre- and post-natal care, infant day-care, parenting skills, vocational education and job training. For this group, adoption would also be presented as a positive option for pregnant girls, along with parenthood. Current federal programs simply do not do enough to encourage counseling and referral to adoption services, particularly for very young teens. Second, through education and outreach, grantees could also help adolescent boys and girls and their parents realize the consequences of premarital sexual activity and encourage those teens to refrain from pre-marital sexual relations. For all services, grantees must involve parents and the community—through religious, charitable and voluntary groups—and in most instances of services to unemancipated minors, parental notification and consent are mandated. Services are targeted to teenagers under the age of seventeen. Finally, the research section focuses on the consequences of premarital adolescent sexual relations, with particular attention to operations research to determine what services or combination of services best work to achieve the objectives of the program.

Low-Income Home Energy Assistance Block Grant:

As passed in the Omnibus Budget Reconciliation Act of 1981, the Low-Income Home Energy Assistance block grant is authorized for the next three years at $1,875,000,000 for each year. For the first time, this program has a multi-year authorization. This will promote stability and consistency, as well as eliminate waste, in a program which has been plagued by annual revisions and uncertainty as to a continued federal commitment. Furthermore, the federal government is prohibited from issuing regulations to instruct the states how to run their respective programs.

States are required to submit an application for funds to the Secretary of Health and Human Services. As part of the application, the state must make certain assurances and include a plan detailing how these assurances would be carried out. However, the Secretary is not authorized to approve or disapprove any state's application.

Head Start Act:

The Congress enacted legislation to reauthorize the Head Start program as part of the Omnibus Budget Reconciliation Act. Head Start has an authorization level of $950,000,000 for fiscal year 1982, $1,007,000,000 for fiscal year 1983, and $1,058,357,000 for fiscal year 1984.

A new formula for the distribution of funds is provided. Thirteen percent of the funds would be placed in a Secretary's reserve with the remaining 87 percent distributed to the States with two-thirds based on the number of children age 0–5, who live with families with incomes below the poverty line, and one-third based on the number of children age 0–18 on whose behalf Aid to Families with Dependent Children (AFDC) benefits are paid. This formula serves two purposes. First, it more adequately targets the children who are intended to be served by the Head Start program. Second, the percentage by which funding to the states is increased under the bill, is more equitable than in current law. Under the new formula, all of the states, except for three (Alaska, Arizona and Mississippi) receive an increase between 10 and 20 percent, which is more comparable to the overall authorization increase, whereas under current law, the majority of states fall either below 10 percent or above 20 percent.

Another notable change is that provisions of the Davis-Bacon Act have been dropped from the Head Start reauthorization. Davis-Bacon is currently part of 77 Federal programs. The Head Start reauthorization is the first of these programs to have Davis-Bacon eliminated from it.

Hearings

Oversight of Head Start:

On March 10, 1981, the Subcommittee on Aging, Family and Human Services held a hearing on the Head Start program. This hearing formed the basis for reauthorization legislation, which was subsequently introduced, and then included in the Omnibus Budget Reconciliation Act.

Legislation to Extend the Older Americans Act:

On March 17, 1981, the Subcommittee held an oversight hearing on the programs au-

thorized by the Older Americans Act—social services, senior centers, congregate and home-delivered meals, community service employment, etc. Witnesses discussed the implementation of the 1978 amendments to the Older Americans Act and issues concerning the 1981 amendments to the Act, which were soon to be introduced.

Low-Income Energy Assistance:

On March 24, 1981, the Subcommittee on Aging, Family and Human Services conducted a hearing on the Low-Income Energy Assistance block grant. Witnesses included the Under Secretary of Health and Human Services, two United States Senators, three Governors, and a representative from the National Council of Senior Citizens. Subsequent to this hearing, legislation to reauthorize this program was introduced and later included in reconciliation.

Oversight of Family Planning, Title X of the Public Health Services Act, part I:

On March 31, 1981, the Subcommittee, in conjunction with the Full Committee, held the first of a series of hearings on the problem of adolescent sexual activity. The purpose of this hearing was to look at the services portion of the Title X family planning program. Witnesses discussed findings by the General Accounting Office regarding inappropriate and ineffective services provided by certain Title X grantees, the role of the federal government in birth control, and the impact Title X has had on adolescents in terms of increased sexual activity, unwanted pregnancy, illegitimate births, and other social indicators. This hearing provided the basis for legislation authorizing the Adolescent Family Life Act.

Oversight of the Domestic Volunteer Service Act of 1981:

An April 9, 1981, the Subcommittee held an oversight hearing on the programs authorized by the Domestic Volunteer Service Act—VISTA, National Center for Service Learning, Citizen Participation Demonstrations, Foster Grandparent Program, Senior Companion Program, and the Retired Senior Volunteer Program. Witnesses discussed issues concerning the 1981 amendments to the Act, which were soon to be introduced.

Oversight on Community Services Administration, Child Abuse Prevention and Treatment of Adoption Opportunities, and Native Americans Program Act:

On April 23, 1981, the Subcommittee on Aging, Family and Human Services conducted a hearing on the Administration's proposals for the Community Services Administration, the Native American Programs Act, Child Abuse Prevention and Treatment and Adoption Reform, and related issues. Testimony was received from representatives of the Administration, State and local government, GAO, interest groups and various service providers.

This hearing provided the background for development of the Community Services Block Grant, provisions for child abuse prevention and adoption reform, and Native Americans Program, which were later included in the Omnibus Budget Reconciliation Act.

Oversight of Family Planning, Title X of the Public Health Services Act, part II:

On June 23, 1981, the Subcommittee held the second hearing on the problems of adolescent sexual activity. This hearing continued the oversight of the Title X, Family Planning Services Program. Witnesses discussed types of birth control, other than drugs or devices, the history and development of the Title X program, and the plans of the Administration with regard to its future.

Adoption in the United States:

On July 23, 1981, the Subcommittee held the third hearing on the problems of adolescent sexual activity. The purpose of this hearing was threefold: to discuss the ways the government and society can promote adoption as a positive option for unmarried pregnant adolescents; to discuss ways in which minorities can be encouraged to adopt minority children; and to discuss legislative proposals to establish a federal, computerized adoption registry that would help "reunite" adult adoptees and their biological parents.

Fighting Poverty: Private Initiative and Public Assistance:

On August 25, 1981, the Subcommittee held a field hearing to examine federal programs designed to prevent or ameliorate poverty—programs which are recognized as being highly successful, as well as those programs which are recognized as needing improvement. In addition, witnesses discussed the contribution of business and private charitable organizations to solving the problems of unemployment and poverty.

Primary Intervention in Societal Problems: The Role of the Family:

On September 17, 1981, the Subcommittee on Aging, Family and Human Services conducted the second in a series of hearings addressing the problem of poverty and social welfare policy. Witnesses at this hearing discussed research into how public policy influences primary support groups, particularly the family. In addition, some witnesses presented initiatives undertaken by the private sector in addressing the needs of individuals and families in the context of the community. Additional hearings on social welfare are planned for the next session of the 97th Congress.

Oversight Hearing on Title X: Sex Education Curricula Guides:

On September 28, 1981, the Subcommittee held the fourth hearing on the problems of adolescent sexual activity. This hearing focused on material produced under Title X of the Public Health Service Act on family life and sex education. This material was distributed to three mental health professionals, who critiqued it on the basis of educational merit; appropriateness for the designated age groups; psychological implications; and overall quality of both content and design. The witnesses raised questions as to the appropriateness and quality of some of the materials and suggested alternative approaches to provide family life and sex education.

SUBCOMMITTEE ON ALCOHOLISM AND DRUG ABUSE

The Subcommittee on Alcoholism and Drug Abuse, chaired by Senator Gordon J. Humphrey, has worked during the 97th Congress to refine the role of the federal government in alcohol and drug abuse research, prevention, and treatment programming.

Comprehensive Alcoholism and Alcohol Abuse Prevention, Treatment and Rehabilitation Act and the Drug Abuse Prevention, Treatment, and Rehabilitation Act

On March 23, 1981, Senator Humphrey introduced a bill, S. 755, to revise and extend the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act and the Drug Abuse Prevention, Treatment and Rehabilitation Act.

Although the bill extended for one year certain programs under these Acts, it redefined the federal role in alcohol and drug abuse treatment by repealing formula grants to the states and instituting in their place a block grant to the states for the provision of prevention and treatment services.

S. 755 reauthorized the National Institute on Drug Abuse and the National Institute on Alcohol Abuse and Alcoholism to continue with research, demonstration programming, technical assistance to the states and information dissemination. Research for the National Institute on Alcohol Abuse and Alcoholism was authorized at $25 million, and research at the National Institute on Drug Abuse was authorized at $45 million. In addition, each Institute was allotted $15 million to demonstrate new and more effective approaches to prevention and treatment of abuse problems.

Public hearings were held on this legislation on March 25 and 30, 1981, in Washington, D.C. by the Subcommittee. The March 25 hearing focused on the Federal effort in alcohol abuse and alcoholism, with representatives from various national and state alcoholism programs expressing their concerns over the direction of future programming.

On March 30, the Subcommittee's hearing focused on drug abuse prevention, treatment, rehabilitation, and research programs. Testimony was received from various representatives of federal and state programs as well as students and representatives of parents groups working together to curb abuse by youth.

On May 8, 1981, the Subcommittee met in open executive session to consider S. 755. The bill was amended and ordered reported, by voice vote, to the Committee on Labor and Human Resources. On June 24, 1981, the Committee on Labor and Human Resources ordered the bill favorably reported (Senate Report 97–145). The major programs in the bill were ultimately included in the Omnibus Budget Reconciliation Act of 1981 (P.L. 97–35).

The Act authorized the research and demonstration program funding levels of S. 755 and provided for an Alcohol, Drug Abuse, and Mental Health Block Grant for the allotment of prevention and treatment funding to the states.

Alcohol and Drug Abuse Education Act

On April 6, 1981, the Subcommittee held an oversight hearing on the Alcohol and Drug Abuse Education Act. The program authorized by the Act has, in its 10-year history, worked to train local school and community leaders to initiate local programs for alcohol and drug abuse prevention.

The Subcommittee received testimony from the program's director, regional trainers, and individuals who had been trained in the program and who had initiated local prevention programming as a result of their training.

The Alcohol and Drug Abuse Education program was ultimately reauthorized in the Omnibus Budget Reconciliation Act of 1981. Beginning in Fiscal Year 1983, the program will be included in the Education Block Grant. For Fiscal Year 1982, it was placed in the Secretary's discretionary authority section of the Block Grant with its funding protected at not less than the Fiscal Year 1981 level.

Research Oversight

On July 27, 1981, the Subcommittee held a hearing in Washington, D.C. to explore the research activities of the National Institute on Alcohol Abuse and Alcoholism and the National Institute on Drug Abuse.

The hearing included representatives from the Institutes as well as researchers in the field who addressed such issues as the most appropriate structure for the Institutes, the efficacy of the grant review process, and the focus of future research efforts.

Marijuana and youth

On October 21, the Subcommittee held a hearing on the Health and Educational Effects of Marijuana and Youth.

At earlier hearings, Dr. Pollin, the Director of the National Institute on Drug Abuse, mentioned that the Annual High School Survey had indicated something of a leveling off of use of marijuana by high school seniors. He indicated that although it was always difficult to assess causes for this behavior, two of the possible factors were the growth of the parents movement and the attention which has been paid to recent research findings which indicate that marijuana is not safe, as had been previously thought.

The Subcommittee, therefore, convened a hearing to discuss the latest research findings on the health and educational hazards of marijuana. In addition to Dr. Pollin, the hearing included research scientists, clinicians, and educators.

Parents movement

In the last couple of years, a grass roots parents movement has taken hold to create a peer group for parents who want their children drug free. The movement has played a major role in changing behavior and is continuing to gain momentum. The Subcommittee has worked to disseminate information to these groups and to help make communities aware of them. In addition, the Subcommittee has worked with NIDA in trying to keep the most current drug information available to parents and educators.

Alcohol abuse prevention campaign

The Subcommittee has been following the nationwide alcohol abuse prevention campaign sponsored by NIAAA. The campaign, which constitutes a coordinated effort between local government, private organizations, and media, promises to have a significant impact on its target audiences: youth, women, and pregnant women. The Subcommittee looks forward to continued cooperation on this project.

SUBCOMMITTEE ON EDUCATION, ARTS AND HUMANITIES

Led by Subcommittee Chairman Senator Robert Stafford, the Senate Education, Arts and Humanities Subcommittee spent a good deal of the time of its members during the first session of the 97th Congress discussing the proper levels at which to set new authorization caps for the programs within its jurisdiction. Many members of the Subcommittee expressed concern over the funding reductions recommended by the Administration for education, arts and humanities programs. Because of this the overall reduction for education programs set by the Subcommittee, while substantial, was not at the level requested by the Administration.

The members of the Subcommittee recommended an overall funding reduction of 11 percent, and this reduction was ratified by the full Senate. The feeling of many Republican members was that a cut of this nature was the most which our vitally important education programs should sustain.

This funding reduction was not accomplished by lowering authorization caps uniformly, but rather the Subcommittee members reviewed each program on its merits and then set the new spending caps. Level or modestly increased funding was recommended for programs which were considered to be of the highest funding priority, such as Title I of the Elementary and Secondary Education Act. Much larger reductions than those proposed by the President were recommended for those programs which Subcommittee members felt should be low priority in a year when the Congress was substantially reducing federal spending.

Elementary and secondary education

The Subcommittee on Education, Arts and Humanities initiated the most extensive revision of the Elementary and Secondary Education Act since that law was passed in 1965. The product of the Subcommittee's work became the Education Consolidation and Improvement Act. Its effect is the simplification of pages of existing law, the consolidation of numerous programs into a new block grant, and the promotion of genuine reform of education regulation.

For years, state and local educators voiced their complaints about the prescriptiveness of federal education law and the burdens of complying with increasing regulation. Under Senator Stafford's leadership, the Subcommittee simplified much of Title I, compensatory education for disadvantaged children, and combined thirty different programs from ESEA and other laws into block grant giving almost total discretion to states and local school districts on how these funds are to be used.

At the same time it accomplished these reforms, the Subcommittee preserved the essence of federal aid to education: the promotion of equality in and access to education. It is here, in the assistance provided to disadvantaged and handicapped children, that the federal dollar makes the biggest, and the best, difference.

Higher education

The Subcommittee on Education, Arts and Humanities amended the Higher Education Act of 1980 in order to restrain the growth of student financial assistance programs, while at the same time assuring that students from lower and middle income families receive much-needed student aid. Concerned about the substantially increased costs of the Guaranteed Student Loan program since the 1978 passage of the Middle Income Student Assistance Act, the Congress in the budget process passed a new spending target for the Guaranteed Student Loan program which necessitated substantive changes in the authorizing legislation. The members of the Education Subcommittee recommended reestablishing an income threshold for the GSL program, requiring those with incomes above $25,000 to qualify through a needs test before they could receive a loan in the amount of remaining need.

The final decision by the conferees on the Reconciliation Act was to ratify the income suggestion and to raise that income threshold to $30,000. The new GSL program thereby protects the ability of the neediest families to borrow up to $2,500 annually, while simultaneously allowing borrowing, in the amount of need, by higher income families demonstrating financial need.

At the same time, the Subcommittee recommended level funding for the campus-based student assistance programs and a modest increase for the Pell Grant program for Fiscal Years 1983 and 1984. These programs continue to be targeted to the neediest students, and were considered to be a high priority in a difficult budget year.

Arts and humanities

The Subcommittee members reiterated their support for the National Endowments for the Arts and Humanities and the Institute for Museum Services during the first session of the 97th Congress. The members did feel that the Endowments and the Institute needed to improve internal operations and target funding for programs more carefully than in the past, but the Administration's recommendation to reduce funding for the Endowments by 50 percent and eliminate IMS was rejected. The final authorization caps represented a 25 percent reduction in funding for each of these important cultural agencies.

SUBCOMMITTEE ON EMPLOYMENT AND PRODUCTIVITY

The Subcommittee on Emp'oyment and Productivity has concentrated its efforts on a complete restructuring of the employment and training programs that were authorized under the CETA legislation. During the reconciliation process, the Subcommittee proposed amendments that eliminated the public service employment program and gave new discretion to the nations' governors for the design of programs within their states.

Based on extensive hearings, the Subcommittee will develop new legislation to replace the CETA system. The Subcommittee Chairman, Senator Dan Quayle, published an extensive statement in the Congressional Record outlining the new approach which is based on the following principles:

The first need for a new program is to strengthen the involvement of the private sector. It may be a hackneyed truth that 85 percent of all jobs are in the private sector—but it is a truth and no program designed to train people for jobs can ever be unmindful of that fact.

Second, the Federal government is not the repository of all wisdom nor of all good intentions. This is a nation of incredible diversity and no program can be successful that does not fully recognize that diversity by giving to the States a preponderant voice in designing programs to meet their needs as they are perceived locally.

Third, training programs are designed to prepare people for jobs and if that orientation is lost they become a disquised and inefficient form of income maintenance.

Fourth, a system must be result-oriented rather than one in which the Federal Government is concerned with form rather than substance. Outcomes must be measured and nonproductive concern with process and procedure be avoided.

Last, a system must be devised in which the various parts are integrated rather than a panoply of separate systems that run without proper coordination.

SUBCOMMITTEE ON LABOR

During the first session of the 97th Congress the Senate Labor Subcommittee chaired by Senator Don Nickles held hearings on eight separate issues (list attached) and proceeded to markup bills on three of these issues.

The Subcommittee has also been working closely with the Administration on the development of new regulations in many subject areas. Among them are Davis-Bacon, affirmative action and OSHA.

The principal difficulty encountered by the majority in moving legislation through the Full Committee and onto the floor of the Senate is the absence of a working majority. The minority all too frequently acts to obstruct even the most common sense type of proposal, e.g., Senator Armstrong's bill amending the Walsh Healey Act, S. 398.

As the result of hearings chaired by Senator Nickles, new regulations were issued implementing needed changes in Davis-Bacon administration. Senator Nickles also advocated a Davis-Bacon reform measure which would increase the present $2,000 threshold amount substantially and codify some of the proposed Administration regulatory changes.

Health

Effective with the 97th Congress, the health and scientific research responsibilities of the Labor and Human Resources Committee became a full committee function. The health agenda of the Committee during the first session has been a particularly full one because over two-thirds of federal programs in this area were due for renewal. The Committee also played a critical role in carrying forward the President's plan to devolve major health responsibility to the states through block grants.

The availability of basic health care to the American people, and the quality of that care, are of major concern of this Committee. Legislation initiated or considered by the Committee has been responsible for many of the developments in the health service and preventive health areas in the past 30 years. Those are the years that have seen Federal health expenditures grow from less than 1 percent to 10 percent of the total Federal budget.

Today, the Nation finds itself obliged to reappraise the policies of the past. Not only has the general economy undergone a serious reversal, but there is deep concern over the degree of control exercised in Washington over both the conduct of local government and the activities of the private sector. Accordingly, four major themes mark the

Committee's health work this year: fiscal responsibility, increased state involvement, program assistance to those groups and projects most in need of federal help, and commitment to biomedical research.

The categorical grant programs established during the last thirty years addressed many of the perceived shortcomings of private and State/local government systems of health care, both in regard to underserved population groups and to specific health concerns. Frequently it was argued that these shortcomings could be overcome only by a Federal stimulus. Indeed, many of the grant programs established during these years were justified as providing "seed money." Some of these initiatives have been successful, others have not, but taken together they have resulted in a broader, more accessible mix of health services for a greater number of Americans. At the same time, they have contributed to the expansion of Federal Government and the Federal budget, and to the parallel erosion of responsibility on the State and local levels. The Committee was able to preserve these vital health programs, trim others, and achieve savings through health block grants and other programs at a net savings of $800 million to the Federal Government. This kind of fiscal responsibility, tempered by concern about assuring the continuation of important health programs, marked the committee's work throughout the session.

The Committee believes the block grant is the appropriate vehicle for continuing needed health care assistance and preventive health care activities while at the same time reducing overall expenditures and alleviating the problems engendered by categorical programs. The Committee adopted three health block grants:

1. Health Prevention and Services Block Grant. This grant consolidates eight categorical programs which include: Home health, rodent control, fluoridation, health education/risk reduction, health incentive grants, emergency medical services, rape crisis and hypertension.

2. Alcohol, Drug Abuse, and Mental Health Block Grant. This grant consolidates: Mental health services, alcohol abuse services, and drug abuse services.

3. Primary Care Block Grant. This grant includes Community Health Centers. For fiscal year 1982, the centers will remain categorical with planning grants given to the states for conversion to state administration.

The block grants are designed to address the problems of inflexibility, lack of coordination, redundancy, and uncertainty with respect to funding that have been experienced in the categorical grant system.

Reappraisal and restructuring of the health programs of the past marked the Committee's activities. However, continuity was achieved with regard to the Committee's past concern for the sick and dependent, and the health care system they rely upon. The mission of programs for community health, medically underserved areas, and alcoholism and drug abuse were essentially preserved albeit with new structure and fewer inflexible requirements. In addition, the Committee held hearings on home health care and preventive health initiatives, both of which promise great benefits in the near future to the health of the American people.

The Committee supported through legislation the promotion of biomedical research as a proper and essential function of the Federal government. During this year, the essential work of biomedical research was continued while we eliminated or consolidated those aspects that unnecessarily perpetuate our Federal bureaucracy or which offer no real hope of improving health care or scientific research in the future.

Health programs have been and will continue to be a primary responsibility of the Labor and Human Resources Committee. In the First Session of the 97th Congress, a proud record of accomplishment has been started. Intense activity in the health area can be expected to continue into the Second Session.

COMMITTEE ON RULES AND ADMINISTRATION

Under the chairmanship of the distinguished Senior Senator from Maryland, Charles Mathias, the Rules Committee's main objective in 1981 was to save money for the Senate, as well as to make the Senate operations more efficient and open.

A major cost-saving activity of the Committee was the 10-percent reduction in authorized committee expenditures for this year. With the active cooperation of other Senate committees, the Rules Committee approved committee budgets for 1981 which were $4,633,297 below authorized committee expenditures for 1980 or a 10-percent reduction.

In addition, the Rules Committee, with the assistance of the General Services Administration, provided for Senate participation in the government discount airfare program. There are now 154 awarded airline city-pairs on which Senate travelers can obtain substantial discounts. This will save the Senate many thousands of dollars in travel expenses.

To make the Senate more efficient, the Committee approved increased capacity for the Correspondence Management System (CMS) to provide more rapid response time to Senate users. The Committee continues to work with the Sergeant at Arms to update and modernize all Senate equipment and facilities.

In an effort to make the Senate more open and accessible, the Rules Committee approved S. Res. 20 sponsored by Senator Howard Baker, which would provide radio and television coverage of Senate proceedings. If enacted by the Senate, the Senate would be available on a daily basis to missions of Americans who would be able to see the Senate in action.

The Committee on Rules and Administration held three days of hearings in 1981 on the Federal Election Commission and the Federal Election Campaign Act of 1971, as amended.

In connection with an Office of Management and Budget Authorization request of $9,746,000 for the Federal Election Commission for fiscal year 1982, the Committee received testimony on April 23 from representatives of the Commission, including its chairman and vice-chairman. The Commission's modified budget request was in the amount of $11,143,285. During the authorization hearing, the Committee also received testimony from a panel of attorneys who commented on Commission enforcement procedures and from political science professors and political consultants who presented their views on the effects on the political process of the Federal Election Campaign Act. The hearing record has been printed.

On April 29th, the Committee met and ordered favorably reported an original bill (S. 1078) to authorize appropriations for the Federal Election Commission in the amount of $9,746,000, the level recommended by the Office of Management and Budget. The report (No. 97–47) to accompany S. 1078 was ordered printed on April 30, 1981 and placed on the Calendar.

On November 20 and November 24, Senator Mathias led continued oversight hearings on the Federal Election Commission, and the committee also received testimony on bills to amend the Federal Election Campaign Act of 1971. The bills introduced at the time of these hearings were S. 1851, a bill introduced by Senator Mathias to change contribution limitations, reduce reporting and recordkeeping details and provide modifications of review, enforcement and other procedures of the Federal Election Commission; S. 1550, a bill introduced by Senator Helms to prohibit the use of compulsory union dues for political purposes and S. 1766, a bill introduced by Senator Cranston, to amend the Federal Election Campaign Act of 1971 to provide for the waiver of limitations on contributions to candidates in elections in which any candidate spends more than $35,000 from personal funds.

Proposals to amend the Federal Election Campaign Act will be the subject of additional hearings in the second session of Congress.

The Committee on Rules and Administration has supervised the contract under which the Senate has engaged the Campaign Finance Study Group of Harvard to provide an analysis and study of the financing of Presidential Campaigns. The Campaign Finance Study Group will report in January. After receipt and review of the Presidential Campaign Finance Report, the Committee will hold hearings on Presidential Election Laws.

On May 7, 1981, the Committee on Rules and Administration held a one-day hearing on election night media projections and legislation concurred with these projections. House and Senate members testified on the reasons for various proposals introduced providing for changes in the dates and times of holding polling places open and also imposing prohibitions against disclosure of Presidential election results until all polls are closed. (S. 55, S. 56, S. 57, S. 58, introduced by Senators Hayakawa and DeConcini.)

Representatives of four news networks offered their views on the effect of the early night projections of the Presidential results and explained their news coverage techniques.

COMMITTEE ON SMALL BUSINESS

Under the leadership of the Honorable Lowell Weicker, Jr., the Small Business Committee reflected the views of small business in its policy considerations. The primary legislative responsibility of the Senate Small Business Committee is to authorize programs administered by the Small Business Administration. In Chairman Weicker's and the Committee's view, that means something more than just allocating funds or designing programs. It means making sure that SBA is truly serving its constituency of small business men and women across the country.

Under the new Republican leadership, this Committee has embarked this session on a strong course of oversight over the SBA and its programs. Rather than think up new programs for the Agency to administer, the Small Business Committee is looking closely at the old ones, making sure they are fulfilling their mandate and serving those they are designed to serve.

In five comprehensive hearings already this year, this Committee has let it be known that it will demand accountability, that it will search out fraud and abuse where they exist, and that it will not rest until the Small Business Administration is giving its vital small business constituency the kind of effective, efficient representation that it deserves.

Just as important as its oversight function is the Committee's role as an advocate for the small business community.

Whether deliberating over tax policies, regulations, contracting procedures, or innovation Chairman Weicker and this Committee have tried at all times to keep in mind the millions of small business men and women across the country and act as their advocate.

For too long, the voice of small business has been lost, both in the Executive Branch and in the Congress. Despite the fact that small businesses are responsible for 43 percent of the Gross National Product, 58 percent of private employment, and 75 percent

of all new jobs in this country, they have been rarely considered in the Federal policy making process.

Small businesses right now are facing a definite crisis. High interest rates, inflation, unavailability of credit, impact on us all, but nowhere is their impact greater than on the small business owner. Unless the Federal Government can begin now to address some of the real and pressing problems that every day are dragging more and more small businesses into bankruptcy, there is a real possibility that the competitive nature of our economic systems will fundamentally change. The real loser, unfortunately, will be the American consumer—who will pay more and get less.

In this 97th session of the Congress, the Small Business Committee under the new Republican leadership has attempted to change that, by bringing the small business viewpoint into consideration when policy debates take place. The specifics of this ongoing effort are outlined in the following pages.

COMMITTEE STATUS

One of the first tasks the Committee members set for themselves at the beginning of this year was to change the name and status of the Small Business Committee.

The Senate Small Business Committee was created as a "Select" committee by the 81st Congress to study and survey "by means of research and investigation all problems of American small business enterprises, and to obtain all facts possible in relation thereto which would not only be of public interest, but which would aid the Congress in enacting remedial legislation." At the time the Committee was created, it was not given any legislative authority, but was empowered from time to time to report to the Senate, by bill or otherwise, its recommendations on matters within its jurisdiction.

Unlike most Select committees, the Select Small Business Committee was not given a termination date, and in fact, as time went on, it became more and more established as a force in the Senate. In 1976, the Senate passed Resolution 104, giving the Committee legislative authority over the Small Business Administration.

That action, for all intents and purposes, gave the Committee all the powers and authority of a full, standing Committee. Further recognition of the growing importance of the Committee came in 1978, when the membership, originally set at nine, nearly doubled to 17 to accommodate requests from Senators wishing to be members. Nonetheless, the "select" designation remained. While this designation was in name only, and did not limit the Committee's legislative authority in any way, Committee members felt it implied an impermenance unbefitting a Committee with such a large and vital constituency.

On March 25, 1981 the Senate unanimously approved a resolution sponsored by Majority Leader Howard Baker and Minority Leader Robert Byrd, and the entire membership of the Small Business Committee, striking the 'select' designation and awarding the Small Business Committee full, permanent status.

By adopting this Resolution, said Chairman Weicker, "the Senate has sent a clear signal to the American people that the problems of small business are not to be ignored or forgotten, but that small business and its advocate, the Senate Small Business Committee, are here to stay."

RECONCILIATION

Consistent with the effort to reduce spending in this Congress, the Small Business Committee, through the Reconciliation process, passed cost-saving legislation that reduced the Small Business Administration's program levels by over 40 percent.

The bill that emerged from the House/Senate Conference, and which was adopted by the full Senate, was a carefully drafted piece of legislation designed to reallocate resources, reestablish priorities, and set a new direction for the Agency.

The bulk of the cuts were made in the Direct and Disaster Lending programs, in concordance with the Committee's desire to shift the emphasis of the Agency away from making individual loans, to more productive, non-lending programs. In keeping with this desire, the '503' program, which promotes economic development in urban areas, the Small Business Investment Center program, and the guaranteed lending program, were all preserved.

By refocusing the activities of the SBA in this manner, the Committee believes that dollar for dollar, more jobs will be created, more expansion of healthy businesses will be undertaken, and more help will be directed where it is really needed. Ultimately, the Committee believes these structural changes will make the SBA a stronger, more effective Agency.

A summary of the major legislative changes in SBA programs follows:

On disaster lending:

For all intents and purposes, SBA was removed from farm disaster lending, and the principal responsibility will rest with FmHA.

Homeowners, as well as business, must now comply with a credit-elsewhere test when applying for disaster loans. For homeowners unable to receive credit elsewhere, the interest rate will be set at one-half the government's cost of money, plus up to 1 percent, but not to exceed 8 percent. Homeowners who can get credit elsewhere will pay interest at the full cost of money, plus up to 1 percent.

Previously, disaster loans to homeowners were given at 3 percent interest, with no credit-elsewhere provision.

Businesses able to get credit elsewhere will now pay the prevailing market rate on interest for a maximum term of three years. For businesses not eligible for credit elsewhere, disaster loans will be given at a rate not to exceed 8 percent. Businesses will be eligible for up to 85 percent of uninsured loss.

Previously, interest rates for businesses unable to get credit elsewhere were set at 5 percent. Businesses able to get credit borrowed at an interest rate of government's cost of money, plus up to 1 percent. Businesses were eligible for up to 100 percent of uninsured loss.

The following changes were made in SBA business lending programs:

Interest rates on all direct business loans would be set at the government's cost of money, plus up to 1 percent, except in the case of loans to handicapped individuals or organizations for the handicapped. That rate remains at 3 percent.

A uniform maximum limit of $500,000 per borrower has been established on guaranteed loans. Maximum maturity of loans was set at 25 years, with longer periods set for loans used for construction or to acquire real estate.

A mandatory 90 percent guarantee was imposed for guaranteed loans of $100,000 or less. Guaranteed loans of more than $100,000 up to $715,000 must be guaranteed between 70 percent and 90 percent, and guaranteed loans over $715,000 must receive a guarantee of less than 70 percent.

Authorization levels for fiscal years 1982, 1983 and 1984 were set at the following:

[Dollar amounts in millions]

	1982	1983	1984
Direct loans	230	230	230
Guaranteed loans	3,300	3,300	3,300
Pollution bond guarantees	250	250	250
Surety bond guarantees	1,400	1,400	1,400
Salaries and expenses	227	233	239

The cumulative impact of this cost-saving legislation is to reduce SBA's program levels by over 40 percent from current policy in fiscal year 1982.

SBA OVERSIGHT

At the start of the 97th Congress, Senator Weicker announced that one of his top priorities as Chairman would be continued, aggressive oversight of the Small Business Administration and its programs. As of this date, the Committee has held six days of oversight hearings, all of which pointed up problems and deficiencies in the Agency. It is the Chairman's belief that SBA has a definite, needed role to play for the small business community, but that it can only fulfill that role when mismanagement and abuse are eliminated and it is operating effectively and efficiently. Already, under new Administrator Michael Cardenas, steps have been taken to resolve some of the problems uncovered during the Committee's investigative hearings. It is the Committee's hope that as these hearings continue, working in tandem with the Administrator, we can make the Agency a true advocate for small business.

Thus far, the Committee has looked at problems within the SBA's Farm Disaster Loan Program, the Direct Lending Program, the 8(a) Army Pilot Program, and Agency contracting procedures and policies.

SMALL BUSINESS CAPITAL FORMATION

One of the major priorities of the Small Business Committee in this Congress is to help bring about a change in our nation's tax laws in order to create tax equity for small business, and to promote capital investment, productivity and enhanced private sector job creation.

Starting in February with the introduction of S. 360, the Small Business Omnibus Capital Formation Act of 1981, Chairman Weicker and cosponsors sought major improvements in the tax laws to enable small businesses to attract and retain capital. Specifically, the Committee concluded that small business was having difficulties both in attracting long term capital for new investments in plants and equipment and in retaining capital generated internally.

S. 360 addressed this dual concern by proposing (1) significant new tax credits, rollovers, and other incentives to encourage investors to make long-term equity capital available to small business; and (2) important new tax deductions to permit greater earnings retention. The bill would reduce corporate tax rates, accelerate and simplify depreciation deductions, reduce inventory accounting burdens, and reform estate and gift tax laws.

This bill became the point of departure for Senate consideration of small business tax legislation during the first session of the 97th Congress, as numerous other bills were subsequently introduced in the Senate or the House. Chairman Weicker and Ranking Minority Member Nunn testified in behalf of S. 360 before the Finance Committee as part of the Committee's on-going collaboration with the tax-writing Committee and made some specific recommendations drawn from the bill.

As a result, when the Economic Recovery Tax Act reached the Senate floor, it contained several provisions adapted directly from S. 360, including accelerated depreciation and estate and gift reform. Chairman Weicker offered an amendment to make a modest reduction in the corporate tax rates paid by small business, and this amendment passed by a vote of 92–0.

While the new tax law does contain several provisions to encourage greater capital investment in small business, there is a substantial unfinished S. 360 agenda, particularly with respect to the attraction of long-term capital. In this climate of extraordinarily high interest rates, the Committee believes special measures are required to reopen the capital pipeline to small business. The

Chairman has directed the Committee staff to delete the appropriate capital formation provisions from S. 360 and prepare a new bill for introduction early in the next session of this Congress. In this way, attention can be concentrated on the need to create new financing techniques for small business to permit them to participate in the reindustrialization of America.

INTEREST RATE

Just as inequitable tax policies have impinged upon the small business owner's ability to continue to do business, so too, have high interest rates. Nowhere has the impact of nigh interest rates been more fiercely felt than with the small business entrepreneur whose day to day cash flow determines his failure or success.

The Committee held numerous hearings on the impact of high interest rates on smaller business. Testimony has come from labor groups, agricultural representatives, Wall Street economists, and small business men and women in the field.

The Committee will continue to study the question of high interest rates, and to search for answers to what has become the most dire problem now facing the nation's business.

While interest rates have begun recently to moderate somewhat, there is concern that that relief will be too little, too late, or that the curative will be a very deep recession. The Committee has focused attention on the need to reduce the Federal budget deficit, which is preempting large amounts of available credit and will continue to do so unless sharply reduced. Consideration is being given to specific proposals to brake federal spending growth and to close the accelerating revenue gap caused by the tax cut of this year.

FEDERAL RESERVE BOARD

In connection with the interest rate problem, the Chairman recommended that a person with small business experience be named to fill the next vacancy on the Federal Reserve Board.

The Chairman has been concerned about the Federal Reserve monetary policy, which has been extremely restrictive for most of 1981. Weicker expressed the fear that the interest-sensitive sectors of the economy, including home-building, automobile dealers, and other small business firms, have been bearing too much of the brunt of the Fed's tight credit policy.

Weicker's recommendation was reinforced in October, when the National Advisory Council to the Committee on Small Business passed a unanimous resolution urging the Committee to "take a leadership role in assuring that a small business person is appointed to the vacancy that will be created on the Board of Governors for the Federal Reserve System when Board Vice Chairman, Frederick H. Schultz's term expires on January 31, 1982."

On November 25, Weicker introduced a sense of the Senate resolution advocating that a small business person be named to the Board. Subsequently, on December 8, a Republican alternative to a Byrd amendment, offered by Senators Baker, Jepsen and Weicker, and expressing the sense of the Senate that a person with small business, agricultural or other small business experience be named to the Federal Reserve Board, passed the Senate, by a vote of 90–0.

PROCUREMENT ASSISTANCE

Federal procurement policies are a major concern to the Small Business Committee. The Federal Government is the world's largest purchaser of goods and services; in 1980 alone, the Federal procurement budget exceeded $100 billion. Yet, all too often, small businesses miss out on opportunities to penetrate this vast Federal marketplace. Many small firms simply do not understand how to break through the maze of procurement rules and regulations. Other firms do not know how to market their products to Federal agencies. And other small companies simply avoid the Federal market due to the statutory and regulatory requirements related to Federal contracts.

The Committee on Small Business recognizes that it is in the national interest to encourage small firms to contract with the Federal Government. In fact, the Small Business Act of 1953 states that encouraging free competition and developing the capacity of small business is basic not only to the economic well-being of the country, but also to the security of this nation. Accordingly, this Committee is dedicated to simplifying government contracting procedures for small businesses. To date, Members of the Committee have taken several actions, that, if passed, would encourage small firms to do business with the Federal Government.

DELINQUENT PAYMENTS

On May 6, 1981, Senators Weicker and Danforth co-introduced S. 1131, "The Delinquent Payments Act of 1981." This legislation would require the Federal Government to pay interest on its overdue bills and prohibit Federal agencies from taking early payment discounts long after the discount period has expired.

The Small Business Committee learned first-hand about the Federal Government's tendency to pay its bills late—during its March 9 hearing on the Role of Small Business in the Nation's Economy. Witness Ron Chainey, the owner of a cleaning business in Connecticut, told the Committee that his firm had been trying for five months to collect $10,000 for services delivered to the U.S. Navy. Mr. Chainey pointed out that many companies like his are forced to borrow money at outrageous interest rates to cover their obligations while they wait for the Federal Government to pay its bills. He added that the $10,000 owed his firm was accumulating no interest, meeting no payroll, nor covering any of his other operating expenses. In fact, GAO studies show that nearly one-third of the government's bills are paid late.

On May 13, Chairman Weicker testified about the severe economic impact of late payments on the small business community during hearings held by the Governmental Affairs Subcommittee on Federal Expenditures, Research and Rules to consider S. 1131. The Subcommittee also received testimony from several small business trade associations in support of the Delinquent Payments Act, and on December 9, S. 1131 was favorably reported by the Government Affairs Committee. On December 15, it was passed in the Senate.

GOVERNMENT COMPETITION WITH SMALL BUSINESS

The Subcommittee on Advocacy and the Future of Small Business, chaired by Senator S. I. Hayakawa, has taken an active role in examining the extent of government competition with the private sector. Many small business owners believe that the Federal Government should rely on the private sector to supply its commercial goods and services. Further, they maintain that the government should not compete with the private sector by accomplishing these efforts with their own non-profit personnel and facilities. Several leading Small Business organizations and the SBA Advocacy Task Group on Government Competition have called on Congress to legislate such a problem.

On June 22, Senator Hayakawa introduced S.J. Res. 93, a resolution that reaffirms a long-standing executive policy (OMB Circular A–76) of reliance on the private sector for supply of the commercial and industrial goods and services needed by the Federal Government. In his floor statement on S.J. Res. 93, Senator Hayakawa pointed out that his proposal does not reflect a shift in government policy; rather, it is a clarification of an existing policy that has been subject to varied interpretations and shifts in emphasis over the years.

To date, the Subcommittee on Advocacy and the Future of Small Business has held three hearings on the issue of government competition with small business. At its June 24 hearing, the Subcommittee heard from several small business owners about their personal experiences with Federal competition in their industries. The hearing also focused on the SBA Office of Advocacy Task Force report entitled "Government Competition: A Threat to Small Business." The Subcommittee also received testimony about the extent of the competition problem from the GAO and the Office of Management and Budget.

On August 27, 1981, the Subcommittee held a field hearing in Los Angeles, California and again heard from a number of small business persons who had had negative experiences with government competition. The most recent hearing was held by the Subcommittee on November 4, 1981. During the hearing, the Subcommittee received testimony from the Department of Defense, the General Services Administration, GAO and small business representatives. Senator Hayakawa also read a recent letter from David Stockman expressing the Administration's total support for S.J. Res. 93. The Resolution is currently pending in the Government Affairs Subcommittee on Federal Expenditures Research, and Rules.

INNOVATION

On April 7, Senators Rudman and Weicker introduced S. 881, the Small Business Innovation Research Act. (The reasons for introducing the bill were simple.)

Over the past decade the rate of productivity increase in the United States has been well below that of all leading industrial nations, most notably Japan and Germany. While this relative decline in American productivity stems from many factors, one of the chief causes is certainly the slowdown in American innovation.

As other nations have been accelerating their research efforts, our Federal investment in research and development (R.&D.), in constant dollars, has remained virtually unchanged for the past decade.

Numerous studies have shown that small businesses are our Nation's most efficient and fertile source of innovations. Yet only 3.5 to 4 percent of the Federal R.&D. dollar is spent with small firms. This underutilization of small businesses in Federal R.&D. is especially regrettable when considering the highly successful track record of small firms in generating jobs, tax revenues, and other economic and societal benefits.

On September 22, the Committee ordered the bill favorably reported on a roll call vote of 16–0.

In an October 6 letter to Senator Rudman, President Reagan expressed his support for the legislation. "Your concerns that small firms be able to participate equitably in Federal Research and Development is shared by the Administration," the President wrote. "In the long run, all sectors of the economy are likely to benefit from the increased competition and research incentives your legislation would provide. I congratulate you on the leadership you have shown in advancing the interests of those small businesses which are the job-producing lifeblood of our economy."

The Committee is happy to note that S. 881, sponsored by Senator Rudman, passed the Senate with only minor amendment on December 8, 1981, by a roll call vote of 90 to 0.

FINANCING SMALL BUSINESS IN URBAN AREAS

The Committee has paid special attention to the promotion of local economic development through small business incentives. It has become clear that the cultivation of a healthy small business community is central to neighborhood economic development and private sector job creation. In this vein, the Committee has looked at ways to foster small business, including tax and other locational incentives.

The Committee has become deeply involved in the issue of tax-exempt Industrial Development Bonds (IDBs), principally because these are an important instrument of reasonable-cost financing for small and medium-sized businesses. In most cases, the tax-exempt status acccorded small-issue IDBs is responsible for attracting small business participation in major economic development strategies.

The Chairman spearheaded the effort to suspend the implementation of IRS Ruling 81–216, which prohibits the pooling of small-issue IDBs, arguing that the ruling is punitive for small business and that it comes at the worst possible time—with record-high interest rates and the curtailment of many federal aid programs for economic development. Senator D'Amato's subcommittee hearing on IDB's produced valuable testimony supporting a continuation of the pooling of IDB's and a rejection of the IRS ruling.

In addition, Senator D'AMATO successfully introduced and passed a last minute amendment to the Continuing Resolution, which served the IDB program for small business.

The Committee also intends to initiate an examination of the concept of broad-scale tax abatement for businesses located in distressed area "enterprise zones." While there has been a recognition of the importance of Federal/local tax incentives in promoting the location and expansion of small business in distressed areas, the Chairman is concerned that such tax relief, by itself, may be of only marginal utility. Location and expansion decisions are influenced by a host of important considerations, of which tax abatement is only one. To be sure, tax reduction may be a necessary consideration in investment decisions, particularly in some distressed areas, but it may not be a decisive factor.

The Chairman has decided to accord a top priority to examining the factors influencing small business expansion and location decisions in enterprise zones. Senator Weicker intends to study the factors in terms of their relative importance for small business investment and to be able to make recommendations as to the provision of appropriate incentives and the removal of any disincentives.

CONCLUSION

Small business encompasses just about all parts of human life. Owners of small business are mothers, fathers, grandmothers, sons and daughters. For some, a small business is their whole life and they spend their whole life making it better. For others, it is a part-time effort, a weekend occupation or a retirement activity. But all small business owners have one thing in common: an independent spirit; a desire to build something on their own that they can call their own. Small Business owners do not want a hand-out or a bail-out by the Federal Government. What they do want are Federal policies that give them room to breathe, freedom from unrealistic regulations, and tax and procurement policies that make it possible for them to compete on an equal basis with large firms.

The Small Business Committee does not envision its role as one of making more policy, creating more programs and designating more regulations for small business. Rather, it is to examine the problems affecting small business and to bring them to light, so that more than just the small business community is aware of them. The fact is that when small business is hurting, we all are hurting, and the sooner Congress realizes that, the better.

As the small business advocate in the Senate, the Committee plans to look at all areas that impact on small business and affect their chances for success.

Where the Committee can, it will bring the problems of small business owners, and the solution they need to the attention of the Congress and the nation. This is our role, and it is this that we will concentrate on in the coming months.

COMMITTEE ON VETERANS' AFFAIRS

The Committee on Veterans' Affairs, under the able Chairmanship of Alan K. Simpson, has sought this year to structure a legislative program that will be responsive to the needs of Nation's veterans, especially those suffering service-connected disabilities. For example P.L. 97–66 which the Committee reported favorably increases compensation benefits for service-connected disabled veterans by varying rates with 100 percent disabled veterans and survivors of veterans who died from service-connected causes receiving an 11.2 percent increase.

Chairman Simpson and the Committee have sought at the same time to be responsive to the realities of President Reagan's economic program. In these times of constrained resources, for example, the Committee has attempted to limit the granting of new entitlements. The question of eligibility for those entitlements already on the books will be addressed in the future.

The Committee has faced squarely the most difficult issues within its jurisdiction. The exposure of Vietnam-era veterans to Agent Orange in southeast Asia is one of the most complex and emotion-fraught of these problems. The Senate Committee reported bills which led to the Veterans' Health Care, Training and Small Business Loan Act of 1981 (P.L. 97–72). This law provides eligibility for the provision of basic health-care services by the VA for a veteran's disability if it is found that the veteran, during active duty, may have been exposed in Vietnam to any toxic substance in a herbicide or defoliant. As the first Vietnam veteran elected to the U.S. Senate, Senator Pressler successfully introduced an amendment to S. 921 on June 15, 1981 which would require the Veterans' Administration to study and report on any genetic and psychological effects suffered by veterans who were exposed to Agent Orange, the defoliant widely used in Vietnam. As enacted, this legislation authorizes the Administrator of the VA to expand the scope of a VA Agent Orange epidemiological study to include additional factors such as exposure to other herbicides, chemicals, medications, or environmental hazards or conditions.

The Committee took leadership in getting this and other legislation enacted which contains provisions to provide benefits specifically for Vietnam veterans with special needs:

The Vietnam-era veterans readjustment counseling centers were extended for three years (through September 30, 1984).

The period of entitlement of a Vietnam-era veteran whose GI bill eligibility would otherwise have expired, has been extended through December 31, 1983 for the pursuit of a program of apprenticeship, on-the-job training, or a program of secondary education if the veteran has entitlement remaining and the VA Administrator determines that the veteran is in need of such programs in order to achieve a suitable occupational or vocational objective.

A Veterans Business Loan Program is to be established in the VA for veterans rated 30 percent or more disabled due to service-connected disabilities and for all Vietnam-era veterans. Veterans are eligible for either a direct or guaranteed loan up to $200,000.

The veterans' readjustment appointments program, through which the Federal Government may hire, on a noncompetitive basis, disabled and disadvantaged Vietnam-era veterans who have completed up to 14 years of education, has been extended for 2 years (through September 30, 1983).

The increasing health needs of the World War II veteran population whose average age is now 62, also command the Committee's special attention. Assuring necessary health care for aging veterans—especially when care for older Americans is among the most expensive in the health field—is a challenge the Committee intends fully to meet. It is a greater challenge, however, in this era of fiscal constraint. As an example, P.L. 97–72 provides authority for the VA to recover costs of health care provided to veterans from certain other parties if the veterans would have been eligible for such other benefits. Reimbursement to the VA would come through workers compensation, "no fault" motor vehicle insurance provisions, and "victims of crimes" provisions of State law. This can provide the same health services to veterans but with cost savings. The Committee is studying through hearings and other ways, additional possible ways to cut costs without cutting essential services.

Ten versions of a "GI bill" to provide educational benefits to veterans have been introduced and are now before the Committee. These derive from different philosophies and would accomplish different goals. The Committee will address these bills early next year. If enacted, the new GI bill would provide a new entitlement.

SENATE SPECIAL COMMITTEE ON AGING

The Senate Special Committee on Aging chaired by Senator John Heinz, was established in 1961. A non-legislative Committee, it is charged with the responsibility of engaging in the continuing study, oversight and investigation of "any and all matters pertaining to the problems and opportunities of older people. . ." Committee activities include conducting hearings, submitting recommendations for legislation to the Senate and publishing informational materials.

This year there has been an extraordinary and rapid movement to restrict the growth of the Federal budget. Older Americans have a large stake in the effort to control inflation and in the size and scope of federal domestic programs, since spending for these programs which serve the elderly totals approximately one-third of all federal expenditures. Much of the Special Committee's time this year was devoted to analyzing the effects on the elderly of proposals offered by the Administration and the Senate to achieve this goal.

In March and April the Committee held three hearings focusing on the impact of the Administration's income security, health and social services proposals. During the following months, 8 additional oversight hearings were held on energy and the aged, the Older Americans Act, Medicare reimbursement issues and various policy issues with respect to the social security system. As a result of information gathered during these hearings and additional analysis, the Committee was able to make recommendations to other standing Committees as well as the entire Senate on pending legislative measures. Recommendations ultimately accepted by the Senate to assure the well-being of the elderly include:

Maintenance of the minimum benefit for social security recipients now receiving that benefit.

Adoption of S. Res. 87 reaffirming the Senate's long standing policy that social security benefits should not be taxed and that the

97th Congress will not enact legislation to subject these benefits to Federal taxation.

Inclusion of $10 million for the congregate housing services program in the HUD and Independent Agencies Appropriations bill passed by the Senate.

Amendments to the Older Americans Act maintaining funding levels for senior centers and nutrition programs, expanding State flexibility to spend federal dollars, increasing emphasis on employment opportunities and permitting the use of federal funds for crime prevention and victimization assistance programs. Senator Jeremiah Denton was especially prominent in his support of this measure.

Chairman Heinz and the Committee also held two investigative hearings on crime and fraud against the elderly as well as general oversight hearings on rural access to aging programs and employment opportunities for senior citizens.

A special effort was made by the Committee this year to develop a number of timely resource publications for elderly individuals, practitioners in the field of aging, policymakers and others concerned with the quality of life for the aged. Excluding Committee hearings, a total of 8 documents were published as follows:

An Information Paper on the Proposed Fiscal Year 1982 Budget.

Developments in Aging: 1980.

Energy and the Aged.

An Information Paper on the Omnibus Budget Reconciliation Act of 1981.

1981 Federal Income Tax Legislation: How it Affects Older Americans and Those Planning for Retirement.

Crime and the Elderly—What You Can Do.

Toward a National Older Worker Policy.

Social Security in Europe: The Impact of an Aging Population.

SELECT COMMITTEE ON INDIAN AFFAIRS

Chairman William S. Cohen, the distinguished Senator from Maine, heads the Select Committee on Indian Affairs. The Committee has made remarkable progress this session in a number of vital areas.

The Select Committee on Indian Affairs was established by the Senate in 1977 and given the broad mandate to investigate "any and all matters pertaining to problems and opportunities of Indians . . ." In discharging its responsibilities, the Select Committee is ever mindful that Article I, Section 8, Clause 3 of the United States Constitution, which authorizes Congress to regulate commerce with the Indian tribes, places primary authority over Indian affairs in Congress. This primacy of responsibility has been consistently upheld by the Supreme Court of the United States which has described Congressional power in the field as "plenary."

In assuming its role in the fulfillment of Congress' constitutional duties in the field of Indian affairs, the Select Committee acts not only for the benefit of Native Americans but with responsibility to all Americans whose lives are touched by Federal Indian policy. It serves, in short, as a forum where diverse views on Indians affairs may be aired and given weight and where accommodations may be wrought.

In considering the disparate issues that have come before it in the First Session of the 97th Congress, Chairman Cohen and the Committee have given particular attention to the difficult problem of lessening the dependency of Indian tribes on Federal financial and professional assistance without diluting the trust relationship between them and the United States. This is a problem of long-standing in Indian affairs and it can be resolved only through an appreciation of the practical and legal disabilities that have to this day prevented the development of strong on-reservation economies.

The Select Committee on Indian Affairs began the 97th Congress by voluntarily reducing its budget by 10 percent. This cut was sustained even though the membership of the Committee had increased by 40 percent and it prompted a significant reduction in Committee staff. Nevertheless, the Committee has handled the issues that have confronted it and handled them well.

Since the beginning of the year, 20 bills have been referred to the Indian Affairs Committee. The Committee has held 15 hearings, four of which were in the field, and three bills it has reported have passed the Senate. One has become a public law.

Pursuant to its mandate to ". . . conduct a study of any and all matters pertaining to problems and opportunities of Indians . . ." the Indian Affairs Committee undertook a comprehensive review of federal budget for Indian programs. This inquiry began with a hearing on March 23 and culminated in a report entitled, "An Analysis of the Budget Pertaining to Indian Affairs: Fiscal Year 1981." The compilation of data for this report required an intense and sustained effort from the Committee because many programs for the benefit of Indians are found in programs available to the general populace. Such programs are not within the direct jurisdiction of this Committee and, in some instances, had been strictly scrutinized by it. The Committee anticipates that, because of its breadth and depth, this report will become the model for all future budget analyses of federal Indian programs.

In its budget analysis, the Committee addressed an apparent oversight in the recommended elimination of Titles II–D and VI of the Comprehensive Employment and Training Act (CETA). The elimination of funding for these two titles was recommended without reference to the effect it would have on the General Assistance line item in the budget of the Bureau of Indian Affairs (BIA). The Department of the Interior informed the Committee that this oversight would force it to return to Congress for a supplemental appropriation.

To meet this problem, the Indian Affairs Committee approved an amendment to S. 1088, the Native American Programs Act, that added a new section to the bill. This new section would have established a program that recognized the need for tribal government support. The funding for the new section was set only after commitments had been received from the Chairmen of the Appropriations and Budget Committees, the distinguished Senators Mark Hatfield and Peter Domenici, that it would not violate the Administration's ceiling on that budget function.

The provisions of the additional section to S. 1088 were precedent making. Although the existence of a functioning tribal government has been described by the current Assistant Secretary of the Interior for Indian Affairs as essential to the development of strong reservation economies, the BIA has no program specifically tailored for this purpose and never has. Moreover, the new section was drafted in full awareness of the legal and practical impediments that have prevented the attraction of private capital onto Indian reservations and inhibited their development.

Finally, the section set forth criteria for the distribution of federal assistance that would have required the United States to take cognizance of the relative wealth of the tribe, its population, its location, the minimum needs of the tribe with respect to governance and administration, and so forth. The formulation of these criteria was intended to ensure greater equity in the distribution of federal services. At present, government assistance to tribes is offered without reference to such criteria with the result that the wealthier, more sophisticated tribes tend to receive a disproportionately greater share of the services.

The immediate need for the section which the Committee added to S. 1088 was obviated when a second approach, the redirection of unspent, carryover funds from the CETA program to Indian tribes, was adopted by the Appropriations Committee. Nevertheless, innovations contained in the new section are not promising and merit the Committee's most serious consideration for upcoming fiscal years in the Second Session of this Congress.

The Indian Affairs Committee under Mr. Cohen's chairmanship, also spent a great deal of time during the current session on investigating the practices used by the U.S. Geological Survey for monitoring oil and gas production on Indian reservations. This investigation followed reports of large scale thefts of oil from the Wind River Reservation in Wyoming. The Committee viewed these allegations with the utmost gravity because they concerned wasting assets of Indian tribes and individual Indian allotees. These assets, for many tribes, offer the best and most immediate hope to lessen their financial dependence on the federal government and to take greater control of their destinies. Once stolen, these assets and the opportunity they offer cannot be replaced.

To date, the Indian Affairs Committee has held four hearings on the thefts. These hearings revealed that the problem was present on all oil and gas producing reservations and, in fact, extended to the public lands of the United States. The problem is of such magnitude that the Chairman of the Committee, Mr. Cohen recommended that Secretary of the Interior, James Watt, establish a Commission to examine it. Secretary Watt agreed and established the Commission on Fiscal Accountability of the Nation's Energy Resources. A final report from this Commission is expected in February of next year. In the meantime, the Indian Affairs Committee has continued its investigation. The Committee will ultimately issue a final report on the matter with recommendations for a larger tribal role in the protection of on-reservation resources.

ACCOMPLISHMENTS OF THE SENATE SELECT COMMITTEE ON INTELLIGENCE; 97TH CONGRESS

The Senate Select Committee on Intelligence, under the distinguished leadership of Chairman Barry Goldwater, holds a unique position among current Senate committees. Although a "select" committee, it holds authority that normally resides only with standing committees, such as reporting legislation, authorizations, and nominations affecting the U.S. intelligence community to the floor of the Senate. Moreover, the Select Committee has an express statutory oversight mandate through the Intelligence Authorization Act for Fiscal Year 1981 (P.L. 96–450), providing that it and its House counterpart be kept "fully and currently informed of all intelligence activities . . . including any significant anticipated intelligence activity. . . ." Because of the sensitive and frequently classified nature of its work, the Select Committee has adopted detailed rules of procedure to prevent the unauthorized release of information. Those rules were most recently amended on February 27, 1981, for the first time in nearly four years. Finally, the Select Committee's membership—which is composed, in part, of two Senators (representing both political parties) from each of four other standing committees (Appropriations, Armed Services, Foreign Relations, and Judiciary)—reflects a jurisdiction that crosses that of other committees and has a clear bipartisan character. With regard to the latter point, Senators Baker and Byrd as the Senate Majority and Minority Leaders are ex officio members of the Select Committee, while its minority party members are designated as Vice Chairmen of the full

Committee (a position Senator Goldwater held in the 96th Congress and which Senator Moynihan occupies presently) and of its four subcommittees.

During the first session of the 97th Congress, the Senate Select Committee on Intelligence has engaged in numerous activities and hearings related to nominations, proposed legislation and authorizations, and oversight of the U.S. intelligence community. Immediate attention was focused on President Reagan's nominations of William J. Casey as Director of Central Intelligence and Admiral B. R. Inman as the Deputy Director, both of which were overwhelmingly approved by the Senate.

Subsequent press revelations questioned some of Director Casey's personal business activities and raised concerns about his appointments of Max Hugel, first as a special assistant to the DC. and later as Deputy Director for Operations, following Hugel's resignation under allegations of financial irregularities. The Select Committee initiated an intensive examination of Mr. Casey's private business dealings, his activities while in previous government service and while the beneficiary of a blind trust, his financial disclosure forms filed with the Office of Government Ethics and with the Select Committee on Intelligence, and his appointments involving Mr. Hugel. Requesting and receiving additional funds for the investigation, the Select Committee appointed a Special Counsel to take charge, following its preliminary inquiry. From July 29 through October 31, 1981, thirteen staff members, including the Minority Staff Director and Minority Counsel to the Select Committee, worked on the investigation with the Special Counsel. In its report on the matter, the Select Committee concurred with DCI Casey's admission that his appointment of Max Hugel was a "mistake" for which he took "full responsibility," but determined that "no basis has been found for concluding that Mr. Casey is unfit to hold office as Director of Central Intelligence."

One of the most important regular duties of the Senate Select Committee on Intelligence is the annual authorization of appropriations for U.S. intelligence activities, a responsibility with which it shares sequential jurisdiction with the Senate Committees on Armed Services, Judiciary, and Governmental Affairs. Fiscal Year 1982 authorizations (P.L. 97–89) were no exception. In recommending passage of the conference committee report, Intelligence Budget Subcommittee Chairman Malcolm Wallop emphasized that the FY 82 authorization "continues the committee's goal of revitalizing our intelligence capabilities . . . and [we] have taken the initiative to insure new capabilities are available to deal with emerging problems. . . ." However, two significant proposals that had been incorporated in the Senate version were deleted in conference. Senator Wallop noted that these matters—regarding assaults on intelligence agents and strengthened civilian personnel management within the Defense Intelligence Agency—would be considered later in separate legislation.

No other bills were reported by the Select Committee during the 97th Congress, but hearings were held on proposals to amend the Central Intelligence Agency Act of 1949 (S. 1273). And in compliance with the Congressional Budget Act of 1974, the Select Committee approved S. Res. 128, with respect to consideration of authorizing supplemental appropriations for FY 1981; after referral to the Budget Committee, the resolution passed the Senate on July 16, 1981.

Much of the oversight work of the Committee is classified and occurs in executive session. Notices of briefings from intelligence community officials, of hearings on particular developments, and of staff inquiries and investigations, may appear in the public record but details are either sketchy, unauthoritative, or nonexistent. However, the requirements of the 1980 authorization act (P.L. 96–450), noted above, demand executive compliance in keeping the Committee "fully and currently informed," thereby giving it the opportunity to conduct extensive oversight.

Other important matters affecting the intelligence community to which the Select Committee contributed were President Reagan's Executive Orders 12333, on U.S. Intelligence Activities, and 12334, on the Intelligence Oversight Board. Although such Orders are issued exclusively by the President and require no congressional concurrence, these were promulgated only "after detailed consultation with the Select Committee on Intelligence," according to Senator Schmitt, Chairman of the Intelligence Subcommittee on Legislation and Rights of Americans that reviewed the draft order. He elaborated on the consultative process as it applied here, noting that DCI Casey had committed himself to prior consultation during his confirmation hearings, and that on Sept. 23, 1981, the Administration forwarded copies of its proposed Executive Orders to the Select Committee. The recorded meetings and written correspondence between the committee and the intelligence agencies on the Executive Orders, according to Senator Schmitt, "has provided the committee and the Congress with a history of the intent of the provisions . . . [which] will assist the committee in discharging its oversight duties . . . [and] expects to be consulted on the procedures that will implement the order."

JOINT ECONOMIC COMMITTEE

The Joint Economic Committee, along with the President's Council of Economic Advisers, was established by the Employment Act of 1946. Just as the Council of Economic Advisers is the economic counseling body to the President, the Joint Economic Committee is the advisory economic arm of Congress, advising on a broad spectrum of issues. Its many functions include a statutory responsibility to make an annual report to the Congress on the president's economic program.

The Joint Economic Committee under the joint Chairmanship of Senator Roger Jepsen and Congressman Henry Reuss, has faced a unique challenge and opportunity in the 97th Congress because of the equal representation of both political parties on the Committee. The Committee has responded favorably to this situation; meaningful and productive cooperation between the Democratic Chairman, Mr. Reuss and the Republican Vice Chairman Mr. Jepsen and between Democratic and Republican members generally has been the rule. For example, Senator Jepsen and Representative Reuss reorganized three subcommittees and now have three subcommittees chaired by Republicans and three subcommittees chaired by Democrats. They have produced two bipartisan, consensus reports. The Joint Committee has also held field hearings in six states under Chairmen from both parties to give citizens a better opportunity to contribute to economic debate.

In addition, Senator Jepsen and Representative Reuss have conducted 75 hearings involving 227 witnesses conducted on Capitol Hill.

Productivity was the subject of the unanimous Committee Midyear Report. The recommendations of Senator Jepsen and Mr. Reuss included (1) liberalized depreciation rates, (2) new incentives for research and development, (3) expansion of the Targeted Jobs Tax Credit, (4) measures to increase savings, (5) measures to lower interest rates, (6) increased investment in infrastructure, (7) cutbacks in regulations and paperwork, and (8) improved productivity in government. A second bipartisan, consensus report was issued in the autumn, recommending development of an American high-speed passenger rail system. Future cooperative efforts are being planned.

Cooperation between the Democratic and Republican professional staffs, now equal in number, has produced numerous bipartisan hearing panels. At the Joint Committee recent hearing on trucking deregulation, for example, witnesses included a Republican ICC commissioner and economist and a Democratic ICC commissioner and economist, as well as ICC Chairman Reese Taylor.

Hearings, committee reports and staff studies have contributed to a better understanding and provision of more useful information on many varied economic topics. These include:

The reliability of economic statistics and efforts to improve statistical data.

Productivity practices of American Management.

Monetary growth targets by the Federal Reserve Board.

U.S.-Japan trade relations.

Industrial, energy and income policies.

Supply bottlenecks in military procurement.

Skilled labor shortages.

The effect of interest rate movements on the economy.

The consequences of the Administration's economic program.

Lessons to be learned from monetary and credit policies in European countries.

The role of small business in economic development.

The fiscal condition of American cities.

Economic conditions in Eastern Europe and the Soviet Union.

The relationship between marginal tax rates, savings and deficits.

State and local development strategies.

AN OUTSTANDING YEAR OF LEADERSHIP

Mr. DOLE. Mr. President, as the first session of the 97th Congress draws to a close, I would like to take this opportunity to express my appreciation to the Senate leadership and to my colleagues on both sides of the aisle for their cooperation in dealing with a very full and complex legislative agenda.

This is the first time in 26 years that the Republican Party has led the Senate. By any standard of measurement, it has been an extraordinary year. The largest package of spending reductions ever enacted by the Congress has reversed the trend toward ever-larger Government. The largest tax reduction bill ever passed gives greater promise of real economic growth than we have known in many years. Most importantly, we have agreed that the tax burden must be stabilized, and that we ought to be obliged to vote for tax increases if we want to support higher levels of spending.

Mr. President, these are the major accomplishments of this year in domestic policy, although they represent only part of the achievement of this session of Congress. Such major changes in economic policy and the rule of the Federal Government would not have been possible without the extraordinary dedication, patience, and hard work of the majority leader. Those of us who worked with Senator BAKER in the minority are not surprised at his success. His exceptional ability to forge consensus, move

forward the legislative process, and keep lines of communication open on all sides has earned him our deepest respect, and his considerable accomplishments deserve recognition as the legislative year ends.

THE FINANCE COMMITTEE

As the first Republican chairman of the Finance Committee since 1954, I find myself in a somewhat new role. The transition from minority to majority would not have been nearly so smooth without the aid of Senator RUSSELL LONG, who chaired the Finance Committee for 15 years. I learned much from Senator LONG when I served as ranking Republican on the committee; I continue to learn from him. Our tradition of bipartisan cooperation on the Finance Committee is largely due to the leadership of Senator LONG. I hope that in this first year of Republican leadership we have upheld that tradition—I believe that we have.

My job as chairman has been made considerably more rewarding because of the contributions of the freshman Republicans who serve on the Finance Committee. CHARLES GRASSLEY of Iowa was instrumental during consideration of the tax bill in securing a modification of the retirement savings provisions that allow more equitable treatment of homemakers who participate in IRA's. In addition, Senator GRASSLEY has, in the Subcommittee on Oversight of the Internal Revenue Service, focused on a number of issues that merit public attention—including the award of attorney's fees in taxpayer disputes, standards for disclosure of tax return information, and improved debt collection procedures.

Mr. President, Senator STEVE SYMMS of Idaho also has made a significant mark in his first year on the Finance Committee. It is fair to say that without the leadership of Senator SYMMS, the major revision of the estate and gift tax undertaken in the Tax Act would have been difficult to achieve. As chairman of the Subcommittee on Estate and Gift Taxation, STEVE SYMMS continues to do his best to focus on inequities in our transfer tax system and deal with them in a reasonable fashion. I would add that both Senator GRASSLEY and Senator SYMMS have been fervent advocates of the President's tax reduction plan, and their efforts on both the tax bill and the reconciliation bill were important to the success of those measures, both in the committee and on the Senate floor.

COMMITTEE ON AGRICULTURE

Mr. President, I am also privileged to serve as chairman of the Nutrition Subcommittee of the Committee on Agriculture. The Agriculture Committee has had an exceptionally active year, and has played a major role in the reconciliation process and in securing final passage of the farm bill. The distinguished chairman of that committee, JESSE HELMS, has demonstrated his leadership by moving these matters to a successful conclusion. Without his patience and determination, any number of controversial issues could have impeded progress on the farm bill. The fact that we completed that legislation and achieved major reforms is a tribute to Senator HELMS and to Senator HUDDLESTON, the ranking minority member of the committee, who has helped us reach agreement on both sides of the aisle.

The two freshman Republicans on the Agriculture Committee definitely have shown their abilities as legislators. Senator MARK ANDREWS, of North Dakota brings to the committee 20 years of experience as a Member of the House of Representatives and a strong background in farming.

Senator ANDREWS has distinguished himself in his understanding of farm issues and has been a strong defender of the rural electrification program and other programs that contribute to making this the most productive agricultural Nation.

Senator PAULA HAWKINS, of Florida is another strong voice for American agriculture, and she is also an advocate for the hard-pressed American consumer.

Senator HAWKINS has made a considerable contribution this year as we dealt with nutrition issues, the school lunch and food stamp programs, and the WIC program.

I am proud to serve with these very able representatives of the Republican freshman class.

COMMITTEE ON THE JUDICIARY

Mr. President, Senator STROM THURMOND has waited longer than most of us to become a committee chairman, and in his leadership as chairman of the Judiciary Committee and President pro tempore of the Senate, he has proven that experience counts. With the bipartisan cooperation of the ranking Democrat on that committee, Senator BIDEN, Senator THURMOND has moved forward legislation on bankruptcy reform and judicial improvements.

The committee also expedited action on the nomination of the first woman justice to serve on the Supreme Court, Sandra O'Connor, and the Senate vote on that nomination reflected the strong endorsement the committee gave to Justice O'Connor.

In addition, this year the Judiciary Committee made major progress on criminal code revision by reporting legislation to refrom the code. The committee also recommended that the Senate approve Senate Joint Resolution 58, a proposed constitutional amendment that responds to the demands of the States for fiscal reform at the Federal level.

I have had the honor to serve on the Judiciary Committee with three other members of our freshman class, in addition to Senator GRASSLEY. Senator ARLEN SPECTER of Pennsylvania, besides being a a native of Russell, Kans., like myself, chairs the Subcommittee on Juvenile Justice.

In that capacity he has focused attention on the problems of juvenile delinquency, and the relationship between juvenile violence and television. Senator JOHN EAST of North Carolina has reviewed extensively a number of significant issues in the Subcommittee on Separation of Powers, including the proposed human life bill that has generated some controversy.

Senator JEREMIAH DENTON of Alabama, as chairman of the Subcommittee on Security and Terrorism, has reviewed policy on terrorism in Latin America and FBI procedures for dealing with the problem of terrorism. He has also been instrumental in securing Senate consideration of the agents identities bill.

Mr. President, I have mentioned a number of the Republican members of the freshman class who have been active with a wide range of issues. I would like to add that this is a distinguished freshman class, Democrat and Republican alike.

This is an activist, enthusiastic group of new Senators, each of whom has made a vital contribution to this legislative session. They know how the Senate works: They have helped it work throughout one of the most difficult and active legislative years I can recall. As a freshman chairman, I am grateful to every one of them for their patience and support in the budget reconciliation process, in the tax debate, and in other legislative matters.

Of course our legislative achievements this year reflect the leadership and determination of the President of the United States to reform our domestic and foreign policies and restore America's strength at home and abroad.

But the President's successes would have been difficult, if not impossible, without the contributions of the freshman class in the Senate. They are as able, balanced, and effective a group as we have had. They are distinct individuals, and we will see how their various interests diverge in the years ahead.

But they are a strong, responsible group, and speaking as a committee chairman, I assure you that we are glad to have them. They help reaffirm my confidence that the leadership of the United States is in good hands, and I look forward to many years of service with my new colleagues. The Senate has never been in better shape, and 1981 is a year we can all be proud of.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have a fair amount of calendar work to do this morning and as soon as the minority leader is prepared to approach that task, I am prepared to do it. Otherwise, I have no further need for my time under the standing order.

Mr. President, so that we might have a longer period for the transaction of routine morning business before we proceed to the consideration of H.R. 5159, the black lung bill, I am prepared now to either yield back my time under the standing order or to yield it to the minority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

DECEMBER 26, 1979—A DAY OF INFAMY

Mr. ROBERT C. BYRD. Mr. President, December 26, 1981, will mark the second anniversary of the brutal invasion of Afghanistan by 85,000 Soviet troops. As such, December 26 ranks as a day of infamy in the annals of the civilized world.

It is apparent the Soviets had hoped that a quick strike into Afghanistan would be all that was required to consolidate the control of their Marxist-imposed puppet regime over the rest of the country. However, history was against them. They totally underestimated the fierce pride of the Afghans in fighting for their own independence.

Therefore, I think it is appropriate to take this opportunity and summarize the 2-year history of the Soviet occupation of Afghanistan.

The Afghanistan Army is nearly decimated by desertions—so much so that the Soviets have had to shoulder an increasing burden of fighting the nationalist forces themselves. Efforts at forced conscription of military-age Afghans have failed miserably, resulting in literally thousands joining the ranks of the rebels.

The rebels have become more effective in carrying out coordinated attacks on Soviet troops and the remnants of the Afghan Army. Although the Soviets still maintain the capacity to take temporary control of rural districts, the rebels quickly return once they have left. Soviet convoys can travel the main roads only if they are heavily defended.

The international community has three times condemned the Soviet invasion of Afghanistan by overwhelming margins in the United Nations. The latest vote come on November 18, 1981, when 116 nations voted in support of a resolution calling for the withdrawal of Soviet troops, with only 23 opposing and 12 abstaining.

On November 24, the United States unanimously passed Senate Concurrent Resolution 45 placing the Congress on record in expressing our deep concern over the continued occupation of Afghanistan by the Soviet Union. Passage of the resolution, of which I was a sponsor, demonstrated to all that the people of the United States have not forgotten, nor will we forget, this infamous deed perpetrated on the people of Afghanistan.

Mr. President, the people of Afghanistan deserve our unswerving moral support in their fight against subjugation. They have demonstrated a remarkable resolve against the occupation of their country by a foreign nation which holds values completely alien to all Afghans.

The Soviets should realize that the world will not forget this invasion and occupation of a nonaligned, moslem nation, nor will the international community refrain from expressing its sense of outrage until the last Soviet troop is withdrawn from that nation and the Afghans are left in peace to determine what form of government best suits them.

In the meantime, December 26, 1981 will mark the second anniversary of another day of infamy.

Mr. President, I yield back the remainder of my time.

Mr. BAKER. Mr. President, I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time remaining now between this moment and 10:15 be dedicated to the transaction of routine morning business in which Senators may speak.

The PRESIDING OFFICER (Mr. WARNER). Without objection, it is so ordered.

ONE MORE STEP TOWARD RATIFICATION OF GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, I call the attention of my colleagues to an article on the long history of Senate consideration of the Genocide Convention that recently appeared in the Near East Report.

The article was written by Ralph Nurnberger, a legislation liaison for the American Israel Public Affairs Committee. Dr. Nurnberger also teaches diplomatic history and international relations at Georgetown University, where he is a Fellow at the Center for Strategic and International Studies. He previously served as a foreign policy adviser to former Senator James Pearson and as a staff member of the Senate Foreign Relations Committee.

What makes this article particularly poignant is Dr. Nurnberger's personal involvement with the issue. His parents are refugees from Hitler's Germany, and in fact, his father was the only member of the Nurnberger family to survive the Holocaust.

Dr. Nurnberger's personal commitment to the ideals of the Genocide Convention are reflected in this article, which I urge my colleagues to read.

I ask unanimous consent that Dr. Nurnberger's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SENATE HEARING ON GENOCIDE CONVENTION

(By Ralph Nurnberger)

On December 3, the Senate Foreign Relations Committee held hearings again on the Genocide Convention. Members and witnesses expressed the hope that, after nearly 30 years, the Senate would finally ratify it.

Chairman Charles Percy (R-Ill.) noted that the Convention had been an American initiative, and argued that ratification would reaffirm this country's commitment to international law and human dignity.

Ranking minority member Claiborne Pell (D-R.I.) emphasized that the Senate's continued failure to ratify raises doubts as to whether the U.S. has learned the lessons of the Holocaust.

Witnesses included Sen. William Proxmire (D-Wis.); former Sen. Jacob Javits; American Bar Association (ABA) representatives; Richard Gardner, Columbia University international law professor.

Proxmire, who has delivered over 2,500 speeches for ratification, stressed that no subject has been pending before the Senate as long as this one. Until it is ratified, he asserted, the world would question America's commitment to its principles.

Sen. Strom Thurmond (R-S.C.) testified against the treaty, claiming that "where it should restrain atrocity it is not observed, and where it would be observed it is unnecessary." He also raised Constitutional objections. The ultra-right wing Liberty Lobby provided the only other hostile testimony.

OPPOSITION TO THE TREATY

Two groups have traditionally been opposed to the treaty. Some Constitutional scholars have questioned whether a treaty is a proper vehicle to deal with crimes of murder, which they believe should be handled by the states, not the federal government by means of an international agreement. Other objections focused on certain ambiguous language in the treaty. For example, Article II outlaws "acts committed with an intent to destroy, in whole or in part, a . . . group". The phrase "in part" might be applied to a limited form of race violence, such as lynchings. These ambiguities were ultimately resolved by adding a series of "reservations" to the treaty.

The legal and Constitutional opposition to the treaty was originally led by the ABA. When these objections were satisfactorily answered, the ABA altered its position in 1976, thereby stripping the last vestige of respectability from the opposition.

The second source of opposition comes from extreme right-wing groups, whose arguments reflect strong hints of racism and anti-Semitism. They attempt to hide behind legalisms such as "states rights", but their most effective approach has been to misrepresent the treaty and play upon the fears of their followers.

HISTORY OF THE GENOCIDE CONVENTION

The rationale for the Genocide Convention emerged from the need to punish the Nazis who had conducted the policy of deliberate and systematic annihilation of the Jews and others. At their trials before the Nuremberg Tribunals, many Nazis claimed that their actions had not been against the law in Germany and were not punishable in international law. The Tribunals took the position that these crimes were beyond their jurisdiction, as they did not directly relate to the planning and waging of aggressive war. In rejecting this reasoning, President Harry Truman stated that there were certain crimes against humanity that must be punished whether or not they were sanctioned by domestic law. These crimes include persecutions on political, racial or religious grounds.

The effort to codify these "crimes against humanity" in international law was led by Raphael Lemkin, a lawyer from Warsaw who lost over 70 relatives in the Holocaust. Lemkin coined the phrase "genocide" from the Greek word *genos* (race) and the Latin word *cide* (to kill).

Lemkin convinced the U.S. Government to play an active role on this issue at the U.N. and to sponsor the effort that resulted in U.N. Resolution 96(I), which declared "that genocide is a crime under international law which the civilized world condemns and for the commission of which principals and accomplices are punishable." The U.N. General Assembly adopted it on December 11, 1946.

The U.N. resolution set the stage for the adoption of the Genocide Convention on December 9, 1948. Again, the U.S. played the major role in drafting and sponsoring the Convention. It attempts to prevent the destruction of any national, ethnic, racial or religious group by defining genocide, outlawing it, and establishing procedures for trying and punishing violators. The U.S. signed the Convention two days after it was unanimously approved by the General Assembly.

President Truman submitted the treaty to the Senate in June 1949 and urged its speedy passage. A specially constituted subcommittee of the Foreign Relations Committee held

hearings and recommended Senate approval, with "reservations" clarifying potentially ambiguous phrases. These "reservations" have always been considered when the issue has come before the Senate.

Powerful opposition caused the treaty to languish throughout the 1950s.

While Presidents John Kennedy and Lyndon Johnson gave half-hearted support to the treaty, it was Richard Nixon who, on February 17, 1970, became the first President since Truman actively to urge Senate ratification.

Four times thereafter, the Committee endorsed the treaty. The successful opposition was led by Sam Ervin (D-N.C.), who based his arguments on a strict construction of the Constitution.

The Carter Administration's strong support for human rights and for the Genocide Convention, Ervin's retirement, the ABA's changed stance, and the recommendations of Carter's Commission on the Holocaust all held out the promise that the treaty might be passed in the late 1970s. But it has still never come to a vote.

The Percy-Pell-Proxmire initiative is based on the conviction that it is essential for the U.S., through ratification of the Convention, to reaffirm its support for international law. Failure to ratify has undermined the effectiveness of our national human rights advocacy.

As Proxmire put it, "It is an important moral statement, and a strong diplomatic tool in the hands of the world's most powerful and influential country."

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

JAPANESE DEFENSE SPENDING

Mr. LEVIN. Mr. President, early last month, I introduced Senate Concurrent Resolution 46, a resolution expressing the sense of the Congress that Japan increase its contributions to our common defense by increasing its defense spending to at least 1 percent of its gross national product.

This resolution noted Japan's position as one of the world's strongest nations in economic terms—indeed it is a veritable economic superpower—and stated it was shirking its defense responsibilities to its own citizens and to the people of the United States through insufficient defense spending.

Today, Mr. President, I am pleased to announce that a bipartisan group of 27 Senators have joined with me to cosponsor this statement of strong concern and deep dissatisfaction with present Japanese contributions to our mutual security.

I would point out that among us now are represented many members of the Senate Committees most concerned with U.S. Government decisions on defense policy, foreign relations, international trade, the economy, and the Federal budget.

There are 10 members of the Armed Services Committee, on which I serve, two members of the Foreign Relations Committee, four members of the Defense Appropriations Subcommittee, six members of the Budget Committee, and six members of the Finance Committee.

Other distinguished committees and subcommittees are represented among the 14 Demorcats, 12 Republicans, and 1 Independent who have cosponsored Senate Concurrent Resolution 46.

I ask unanimous consent that the following be added as cosponsors of Senate Concurrent Resolution 46: Senators THURMOND, JACKSON, NUNN, HOLLINGS, WARNER, COHEN, CANNON, HARRY F. BYRD, JR., QUAYLE, BOSCHWITZ, PRESSLER, ROTH, BENTSEN, BUMPERS, GORTON, KASTEN, GRASSLEY, WALLOP, BURDICK, PROXMIRE, EAGLETON, WILLIAMS, BAUCUS, RIEGLE, DIXON, and DENTON.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEVIN. Mr. President, it should be emphasized that the cosponsors of Senate Concurrent Resolution 46 come from all regions of the United States, and, as such, this resolution does not reflect the interests of one particular area of the country.

Instead, those reading Senate Concurrent Resolution 46 should regard it as the expression of a growing sentiment among all Americans that our Japanese allies must devote more effort and resources to the all-important task of protecting our mutual security in the Far East.

There should be no misconceptions among Japanese political leaders or the Japanese public on this score.

They should not believe that it is only the autoworkers of Michigan and Indiana who have lost their patience with Japan's failure to meet adequately its commitments embodied in the United States-Japan Treaty of Mutual Cooperation and Security.

Mr. President, unless Japan fully understands this and increases its defense spending, I believe that American impatience will grow, and will be reflected in legislative actions of the representatives of the American people in Congress.

The American people have been asked to make significant and continuing sacrifices in needed domestic programs to finance an improvement in our defense capabilities. This improvement will directly benefit the Japanese people.

Without Japanese recognition of this, as exemplified by an increase in their own defense efforts, our citizens will more and more view Japan as an unfaithful ally whose concerns for its own selfish economic well-being eclipse what should be a more important consideration—maintenance of the mutual security, peace, and democracy of both nations.

I do not want Americans to reach this conclusion, Mr. President, nor do I think the Japanese wish for such an outcome. But I fear it is inescapable unless the Government of Japan is willing to ask its own citizens to make sacrifices in the name of mutual defense similar to those being sought from every American.

When this conclusion is reached, and I believe that this time is not far distant, Congress—with or without the concurrence of the executive branch—will be forced by its constituents to make some difficult decisions regarding our future defense relationships with Japan.

I hope we can avoid this sensitive juncture, and it is this hope which prompted me to originally introduce Senate Concurrent Resolution 46 to reinforce this message to our Japanese allies.

Despite repeated statements by members of the Senate and House and some efforts by the executive branch, this message has yet to be fully comprehended in Japan.

Instead of appropriately increasing its defense spending, the Japanese Government has responded with conflicting signals and the prospect that its defense improvement program will falter, rather than accelerate. On one day its defense agency says it will accelerate its procurement programs. On another day the Finance Ministry lets it be known it will restrain the growth of the defense budget in 1982 to a level incapable of supporting even past Japanese promises to increase defense endeavors.

On one day, Japan's Prime Minister Zenko Suzuki tells President Reagan his country will undertake "even greater efforts" to improve its defenses. On another, we learn that there is a strong possibility that the 1982 defense spending increase will be even less than that agreed to for 1981—itself an insufficient level.

Mr. President, the Japanese Government is in the final phases of deciding the size and shape of its 1982 defense budget, and an announcement is expected later this month.

We expect a disappointing outcome to these deliberations. Knowledgeable observers have predicted to me that, rather than increasing the percent of GNP devoted to national defense, there is a good chance that the Japanese will decide on a 1982 growth rate representing a decline in this measurement from about 0.9 percent to about 0.88 percent of GNP. In the meantime, at least 5.4 percent of our GNP goes to defense.

This decrease might not seem like a large sum, but it is symbolically significant, and, because of the size of Japan's GNP, it does represent hundreds of millions of dollars which could be used to improve the Japanese armed forces.

The Japanese Government, earlier this year, made much of the fact that it was permitting its defense agency to request an increase of 7.5 percent above last year's budget while it held other departments to smaller, or no, increases.

Even this percentage increase would mean a further delay in Japan's previously announced defense improvement program.

There now is a good possibility that even this insufficient increase will not be realized in the budget to be announced in a few weeks, according to knowledgeable observers and the Japanese press.

If the 1982 growth rate does not even reach 7.5 percent, Japan's defense budget might not grow at all after inflation is considered. This would be in stark contrast to our own defense budget, which could grow by at least 5.7 percent in "real terms" after inflation in 1981.

Japan's efforts to improve its antisubmarine warfare and sea control capabilities, air defenses, logistics support

and war reserve stockpiles will suffer a further setback.

I hope that the Japanese Government will heed the strong support for Senate Concurrent Resolution 46 and reverse the course it apparently has embarked upon for 1982.

There is no question that Japan has the economic capabilities to increase its defense spending as a percentage of gross national product.

This point was stated in a recent report by the Library of Congress Congressional Research Service entitled "Japan's Defense Expenditures and Policy: Recent Trends and Comparisons with the United States." The report stated:

> Considering that Japan's economy is the third largest in the world and still enjoying relatively high rates of growth, Japan appears to have the capacity to channel considerably more resources into defense.

This same report, written by Dick K. Nanto of the Library of Congress's International Trade and Finance Economics Division, showed that Japan's economy as measured by its GNP, grew by significantly larger rates than did the U.S. economy in the last 2 years.

In fact, while the United States undertook greater mutual defense responsibilities after the Soviet invasion of Afghanistan, this report shows that our GNP grew by only 3.2 percent after inflation in 1979 and actually fell by 0.2 percent in 1980. Japan's economic growth rate in real terms was 5.5 percent in 1979 and 5 percent in 1980.

By calling on the Japanese to increase their defense spending to at least 1 percent of GNP, our resolution does not present an unreasonable demand. Senate Concurrent Resolution 46 is not urging a particularly large increase in Japan's defense budget in 1982.

Given the size of Japan's GNP, and of its present defense budget as a percent of that total, our resolution calls for about a $1 to $1.3 billion increase above the 7.5 percent growth in defense initially postulated earlier this year. This is certainly a sum that one of the world's strongest economies can afford.

I would add that the 1 percent of GNP figure is a number established by longstanding Japanese Government policy as the acceptable limit for its defense spending efforts. Our resolution simply urges the Japanese to spend at least up to that limit which they themselves have set but have so far never reached.

There also can be no dispute that Japan's present defense capabilities are seriously deficient in several major areas and can be improved markedly without giving the country the offensive military power which might threaten its neighbors or violate its "peace" constitution.

These conclusions are presented in a recent article in the monthly Asian Affairs by Larry A. Niksch, the Congressional Research Service's ranking specialist on East Asia.

Entitled "Defense Burden-Sharing in the Pacific: U.S. Expectations and Japanese Responses," this article is a comprehensive discussion of the continuing American disappointment with the level of Japanese defense efforts.

I commend this thoughtful overview to my colleagues and ask that it be placed in the RECORD at the conclusion of this statement, after the text of Senate Concurrent Resolution 46, which I also ask be reprinted following my remarks.

Mr. Niksch concludes that for Japan to make reasonable increases to its defense efforts "would require political leadership from the Prime Minister and success by the Defense Agency in convincing the Finance Ministry to support the necessary budget provisions."

The Japanese Government should exert this leadership by heeding the sense of the Congress as stated in Senate Concurrent Resolution 46 and thus announce later this month a significant increase in Japanese defense spending.

Lastly, Mr. President, it is my understanding that the distinguished chairman of the Foreign Relations Committee, Senator PERCY, intends to hold hearings early next year on U.S. foreign policy and the issue of fair and equitable sharing of the common defense burdens among the United States and its allies.

I commend the chairman for his interest in this most important topic and would hope that Senate Concurrent Resolution 46, based on the strong support it already has among our colleagues, could be a focus of these deliberations.

I ask unanimous consent that the text of Senate Concurrent Resolution 46 and the article by Mr. Niksch be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. CON. RES. 46

Whereas current international developments indicate the need for greater efforts on the part of the United States and its allies in defending democratic values and ideals;

Whereas the joint communique recently signed by Japan's Prime Minister Suzuki and President Reagan recognizes that the alliance between the United States and Japan is built upon shared values of democracy and liberty;

Whereas the United States-Japan Treaty of Mutual Cooperation and Security states that the parties will maintain and develop their capacities to resist armed attack;

Whereas, in the joint communique recently signed by Prime Minister Suzuki and President Reagan, the Prime Minister stated that Japan will seek to make even greater efforts for improving its defense capabilities; and

Whereas Japan has demonstrable economic strength and yet contributes less of its national resources for defense expenditures than any country of comparable economic base: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that both the United States and Japan should exert maximum efforts to resist Soviet challenges to security and democracy in Asia.

SEC. 2. It is further the sense of the Congress that Japan should make a greater contribution to its own defense so that a full partnership and closer cooperation in sharing the burden on common defense can be achieved, thereby enhancing the combined effectiveness of Japanese and United States defense forces in preserving peace and security in Asia.

SEC. 3. It is further the sense of the Congress that, as a tangible sign of commitment to these aims, the Government of Japan should increase its defense expenditures to the level of at least 1 per centum of that country's gross national product.

[Asian Affairs, July–August, 1981]

DEFENSE BURDEN-SHARING IN THE PACIFIC: U.S. EXPECTATIONS AND JAPANESE RESPONSES

(By Larry A. Niksch)

The Reagan-Suzuki summit meeting of May 1981 and the resultant controversy in Japan over it have pointed up the emergence of defense burden-sharing as a key issue in US-Japanese relations. After President Nixon enunciated the Guam Doctrine in 1969 calling for US allies to bear a greater responsibility for their own defense, some Americans expressed the view that Japanese defense capabilities were inadequate. Nevertheless, it was not until the Soviet invasion of Afghanistan that the US government put concerted pressure on Japan to enhance its military strength. Carter Administration officials pressed the Japanese government throughout 1980 to undertake a "steady and significant" buildup of the Japan Self-Defense Forces, beginning with increases in defense spending, in order to complete a five-year defense plan (1980–84) one year ahead of schedule. The Carter Administration urged the Japanese to raise spending in fiscal year 1981 (April 1981–March 1982) by at least the 9.7 percent tentative increase (minus personnel costs) set by the Japanese government itself. US officials subsequently criticized the final budget, which set an increase of only 7.6 percent including personnel costs.

Some observers, both Japanese and American, questioned this approach. They asserted that US emphasis on Japan's defense expenditures was excessive involvement in the Japanese budgetary process, exacerbated differences on the defense issue, and ignored the more substantive questions of capabilities, missions, and division of responsibilities between US and Japanese forces. Many of these observers have called for a more private US approach stressing capabilities and missions.

Early signs suggest that the Reagan Administration has adopted the views of these critics. Secretary of State Alexander Haig declared in his confirmation hearings that the United States should not berate Japan in public over the defense issue.[1] Several meetings between US and Japanese officials have taken place since then and Reagan Administration officials reportedly have not called for specific levels of Japnese military spending.

If the nature of the US-Japanese dialogue is changing, this raises a series of questions that heretofore have been hidden behind the budget question. The most important of these appear to be: What kind of military role does the Reagan Administration want Japan to play to counter the Soviet Union in the Pacific? What capabilities would Japan have to develop in order to fulfill this role effectively? Finally, what is the likely or possible Japanese response?

The most explicit assertion of Reagan Administration views came during the visit to Washington of Japanese Foreign Minister Ito Masayoshi in March 1981. Caspar Weinberger, U.S. Secretary of Defense, made several far-reaching proposals to Ito. He suggested that the government of Japan "review" the 1976 Japanese National Defense Program Outline in view of the changed military situation in the Western Pacific and Indian Ocean. Weinberger cited the new military responsibilities which the United States has undertaken in the Indian Ocean and Persian Gulf since the Soviet invasion of Afghanistan. He further proposed that Japan develop the military

---

Footnotes at end of article.

capability to assume responsibility for the defense of a large area of the Northwest Pacific, including but going far beyond the protection of sea transport routes. This would encompass the waters between Japan and the Philippines, swinging east from the Philippines to Guam, and north from Guam toward Japan.[2]

This approach contrasts with that of the Carter Administration, but has its origins in a strategic concept that emerged during the Carter presidency among Department of Defense specialists. This concept assumed that the Persian Gulf had become a third potential military theater vital to the West, in addition to the West European and Northeast Asian theaters. As the United States deployed forces into the Indian Ocean, a new division of defense responsibilities would have to be established between the United States and its chief allies. Pentagon experts developed the view that such a division of labor would require Japan to build a conventional military force capable of defeating conventional Soviet air and naval forces in the Pacific within a zone approximately 1,000 miles from Japan's shores.[3] The Pentagon specialists did not advocate U.S. military withdrawals from Northeast Asia and the Western Pacific. They seemed to believe, however, that the United States might have to shift forces from there into the Indian Ocean sometime in the early 1980s, or at least that Persian Gulf requirements would limit the strengthening of American forces in the Western Pacific while the Soviets continued their steady military buildup.

The Reagan Administration's own emerging strategic view appears to place even greater weight on the military role of allies like Japan. According to senior Department of Defense officials, this concept envisages a war with the Soviet Union as possibly a long-term conflict fought with conventional weapons in several parts of the world. They cite Northeast Asia as a likely theater of war, but point to the Persian Gulf as a potential theater where American forces might be introduced in large numbers. Secretary Weinberger asserted in a speech of May 5, 1981, that a conventional conflict of this nature would require a substantial contribution from the armed forces of allied nations, since U.S. resources would be committed to several fronts. U.S. flexibility, he said, could depend on the successful execution of missions by allied forces.[4]

II

As of this writing, it is uncertain to what extent the Reagan Administration has proposed the types of missions that the Japan Self-Defense Forces would have to carry out in wartime in order to defend such a zone of the Northwest Pacific. The nature of Soviet forces and the geography of the region, however, indicate at least three missions for which primary responsibility would fall to Japanese naval and air forces.

1. Sea control, which would involve protection of the sea transport routes within the defense zone, including the convoying of merchant shipping to Japan. It would also require effective offensive and defensive actions against Soviet submarines, surface ships, and aircraft over a wide ocean area.

2. Mining and blockading the Tsushima, Tsugaru, and Soya straits connecting the Sea of Japan with the open waters of the Pacific, thus preventing access by Soviet naval vessels from bases in eastern Siberia into the Pacific. An effective blockade could have a telling impact in a long conflict, as Soviet naval vessels at sea would be denied access to their home bases and ships at these bases would be bottled up.

3. The establishment of an air defense screen in the Japanese home islands and over part of the Sea of Japan that could inflict long-range bombers, including the Backfire bomber. An effective air defense screen would facilitate the task of sea control by weakening Soviet air strike capabilities against US and Japanese bases, and against naval vessels and merchant ships south and southeast heavy losses on Soviet tactical fighters and of Japan.

US forces would still have sole responsibility for two missions under the Reagan concept: offensive operations against eastern Siberia and the defense of South Korea. The United States apparently would also extend military support to the People's Republic of China without a direct Japanese role.

The view within the Department of Defense is that the Japan Self-Defense Forces currently fall far short of being able to carry out the three missions cited above. A Pentagon team headed by Assistant Secretary of Defense David MacGiffert asserted at a US-Japanese security conference in July 1980 that Japan did not possess even a minimum deterrent and could not defend against even a small-scale attack.[5] Japanese principles governing defense missions indicate the accuracy of this perception. Japanese defense policy statements, including the annual defense white papers, emphasize that the Self-Defense Forces should be able to repel "limited and small-scale aggression" without external assistance. If aggression occurs on a scale that they cannot cope with alone, Japanese forces are expected to resist until American forces come to their aid.

The current assets of Japanese forces do not go beyond these limits. The Maritime Self-Defense Force is built around some 33 destroyers and 15 frigates. It has no cruisers or aircraft carriers. Japanese observers, in and out of the government, have acknowledged that the Maritime Self-Defense Force is ill-equipped to deal with Soviet nuclear submarines and attacks from enemy aircraft and surface ships. Japanese naval vessels lack surface-to-air and surface-to-surface missile assets as well as modern electronic equipment. The MSDF air arm is an antisubmarine force with no interceptor or attack aircraft. The Air Self-Defense Force has not been integrated into an air defense scheme for Japanese surface ships, and there is little coordination between the two branches. The Japanese surface fleet thus is dependent on US air superiority even in the seas nearest to Japan.[6] As a result, Defense Agency officials acknowledged in 1980 that in wartime, the Maritime Self-Defense Force could protect at most only half of the 400 merchant ships per month required to supply Japan with minimum import needs.[7] The minelaying and blockade assets of the Maritime Self-Defense Force are also limited. It has only one minelaying vessel. Most of the mines and torpedoes in Japan's arsenal are obsolete and not ready for immediate use in an emergency. Hara Toru, Director of the Defense Bureau of the Defense Agency, stated in parliament in 1980 that Japanese forces could take as long as six months to lay mines in the Tsushima, Tsugaru, and Soya straits. Hara and the Director of the Defense Agency acknowledged that Japanese naval and air forces could not prevent a hostile power from using the straits.[8]

The Air Self-Defense Force has over 350 combat aircraft, including ten interceptor squadrons consisting of 150 F-104DJ fighters and 130 F-4EJ fighters. Both are dated, particularly the F-104s. The defense white paper for 1980 described the defense facilities for air bases as a "striking deficiency," citing in particular a lack of modern surface-to-air missile defenses and outdated radar sites. Japanese air bases would appear to have a minimum survivability in war time. It is therefore unlikely that the Air Self-Defense Force could control the skies over Japan and adjacent waters in the face of attacks by modern Soviet MIG-27s, MIG-23s, and SU-19s which have become the backbone of the Soviet attack fighter force in eastern Siberia. Moreover, the Air Self-Defense Force undoubtedly would have little effectiveness against the Backfire bomber.

It is generally recognized that all branches of the Self-Defense Forces suffer from shortages of ammunition, spare parts, and other logistics problems. The MSDF and ASDF have no reserves to speak of. The Self-Defense Forces have no system for integrated command and control of ground, air, and sea forces. The Prime Minister's study group on national security issues estimated in its report of July 1980 that only half of the assets of the Self-Defense Forces could be counted as "actual combat power" in an emergency.[9]

Japanese plans to remedy some of these deficiencies are embodied in the 1976 National Defense Program Outline. This document set certain objectives for qualitative improvements in the Self-Defense Forces, but did not establish timetables for attaining these goals. Three years later, the Defense Agency set a timetable for some of the major targets in drawing up the Mid-Term Program Estimate for the five-year period, FY 1980-84. Under the Mid-Term Program Estimate, the Maritime Self-Defense Force will receive 16 new destroyers. Two will be guided missile destroyers, and five others will have surface-to-surface missiles. Six current destroyers will be equipped with short-range surface-to-air missiles and surface-to-surface missiles. The Maritime Self-Defense Force will also procure 37 P-3C antisubmarine aircraft (in addition to the eight ordered in 978) and 51 antisubmarine helicopters (in addition to 99 purchased so far).

Procurement plans for the Air Self-Defense Force emphasize 77 F-15 fighters to supplement 23 already purchased. The ASDF will form four F-15 squadrons by 1986 and will retire the five squadrons of F-104s. The Air Self-Defense Force also plans to acquire four E-2C early warning aircraft and form its first early warning aircraft squadron of eight E-2Cs in 1983. The squadron will cover the northern part of Japan and the northeastern sector of the Sea of Japan. The air defense system around air bases is to be modernized, including the deployment of new surface-to-air missiles.

The Reagan proposals, however, bypass the Mid-Term Program Estimate. The issue between Japan and the United States now is the extent to which Japan will alter existing defense policies and adopt new programs in line with the US concept of a Northwest Pacific defense zone.

III

The Japanese response to the Reagan Administration's concept of Pacific defense burden-sharing is the newest facet in the debate in Japan over defense policy. One must be aware of the factors that shape Japanese attitudes toward defense and security issues in order to understand the Japanese response now and in the future. Four factors have been especially influential; Japan's democratic environment, the legacy of post-World War II attitudes, the government's financial situation, and awareness of changes in the balance of power in the Pacific since 1975.

The Democratic Political Environment. Japan's democratic political environment produces a variety of institutions and groups whose views help to shape defense policy. Within the government, this includes the ruling Liberal Democratic Party and the ministries where senior bureaucrats wield great power in policymaking. The Finance Ministry has authority over budgetary matters, including the defense budget; and it is considered the most influential ministry in the hierarchy of ministerial power. The Defense Agency, which is responsible for defense policy, is not even a ministry and stands at the bottom of that hierarchy.

Footnotes at end of article.

Important groups outside the government are big business, which has ties with the LDP; the opposition parties, which often reflect certain strains of public opinion on defense and foreign policy issues; newspapers, which are the heart of mass communications; and intellectuals, including those who have established private research organizations on defense and security issues. The views of the public are an important influence on policy. The Japanese frequently resort to public opinion polls in order to survey national sentiment on defense policy, and the government conducts annual surveys on the issue.

Post-World War II Attitudes. Four themes dominated Japanese attitudes toward military and security issues in the 30-year period following World War II, and they remain strong factors of influence today: pacifism, reliance on the United States for defense, the absence of an external threat, and the priority on economics.

Pacifism grew out of the mass destruction in Japan during World War II, culminating in the atomic bombing of Hiroshima and Nagasaki and the period of American occupation after the war. American occupation authorities disarmed and demilitarized Japan, and supervised the Japanese officials who drafted the 1947 constitution which, in Article IX, stated that "the Japanese people forever renounce war as a sovereign right," and that "land, sea, and air forces, as well as other war potential, will never be maintained." The government maneuvered around Article IX when it created the Self-Defense Forces in 1954. But pacifist sentiment persisted into the 1970s, and was reinforced by political opposition on the left and the editorial views of the major newspapers. Consequently, until the last few years, there has been little sentiment for strengthening the Self-Defense Forces beyond the manpower and weaponry levels authorized in 1954. The government placed various constraints on the Self-Defense Forces in terms of missions and armaments. It prohibited them from acquiring weapons of an "offensive" nature and forbade them from operating outside of Japan. The government also set the principle that defense spending should not exceed one percent of gross national product.

The second theme, reliance on the United States for the defense of Japan, emerged during the occupation and is embodied in the 1960 U.S.-Japan security treaty. Unlike other defense treaties to which the United States is a party, the security treaty does not provide for a mutual obligation. It states only that the United States will act if Japan is attacked. Japan bears no similar obligation. Thus, during the long postwar period of American military dominance in the world, Japan felt secure behind the American shield and perceived no need to bolster its own defenses. The treaty today remains the bedrock of Japanese defense policy.

The absence of an external threat constituted a third theme of influence. No power other than the United States maintained sizable military forces near Japan until the late 1970s, and Japan has had no military confrontation with another nation since 1945. Compare this with the German experience after World War II, in which West Germany has lived through two Berlin crises and has had massive Soviet forces continually deployed along its border. Thus it was natural for the Japanese to assume that they were in little danger of being attacked by another country. Contemporary opinion surveys indicate that the Japanese have not developed a consensus on the meaning of the Soviet military buildup in the Pacific. The preponderant opinion appears to be that the Soviets do not represent an immediate military threat to Japan, and that Soviet motives for the buildup are political and psychological.

Japan's success in becoming an economic superpower helped to shape the view that the government should emphasize the promotion of the economy rather than shift more resources toward an increase in military power. This perception has been reinforced by Japanese awareness that the economy is dependent on imports of fuels, raw materials, and food. Successive governments have applied the principle of "economics over politics" to foreign and security policies. The Japanese have a strong predilection toward economic instruments as the most suitable means of dealing with other nations, whether friendly or unfriendly.

Changes in the Pacific Balance of Power. The government's financial problems and the awareness of changes in the Pacific balance of power emerged in the late 1970s and coalesced after the Soviet invasion of Afghanistan to produce the intensive debate in 1980 over the defense budget. The Japanese government had grown apprehensive since 1975 over actual and planned U.S. military withdrawals from East Asia as the Soviet Union established a formidable military presence in the region. The Defense Agency responded with three measures that have been important to the U.S.-Japanese dialogue. It announced in late 1977 that the Self-Defense Forces would undertake responsibility for the security of sea transport routes 1,000 miles out from the Japanese home islands. This was the basis upon which Pentagon experts developed the concept of a Japanese sphere of security in the Northwest Pacific. Japan and the United States announced guidelines in November 1978 to strengthen their military cooperation. The Defense Agency also drew up the Mid-Term Program Estimate, which envisaged an increase in the ratio of defense spending to GNP from 0.9 percent in FY 1980 to about one percent in 1984, but not to exceed that limit.[10]

The Government's Financial Situation. On the other hand, the Finance Ministry has opposed higher expenditures for defense. It has restrained overall budget increases since the early 1970s in order to reduce large budget deficits, which had resulted in a situation in which debt repayment took 40 percent of annual expenditures. Finance Ministry officials argued that the defense budget had to sacrifice equally with other sectors of the budget.

These pressures and perceptions following the Soviet invasion of Afghanistan produced a direct clash between the Finance Ministry and the Defense Agency in 1980 over the FY 1981 defense budget. With some support from the Foreign Ministry, the Defense Agency proposed a 15 percent increase in the FY 1981 defense budget in order to meet demands by the Carter Administration to complete the Mid-Term Program Estimate one year ahead of schedule. The Finance Ministry, on the other hand, established a 7.5 percent ceiling for growth of each category of the budget, and therefore opposed the proposal.

The Defense Agency at first appeared to win a victory when a compromise accord was reached in July 1980 which provided for a 9.7 percent hike in defense spending plus 2.2 percent in personnel costs. The Finance Ministry, however, set out to undermine the accord. All of the major opposition parties except the Democratic Socialists opposed it. Two of the three mass circulation newspapers (Asalu Shimbun and Mainichi Shimbun) criticized the accord, while the third (Yomiuri Shimbun) gave only qualified support. Business organizations and research groups specializing in defense issues endorsed a higher defense budget. Nevertheless, public opinion polls showed that a greater number of Japanese (40 to 60 percent, depending on the poll) opposed major increases in defense spending than supported such hikes (25 to 30 percent). Prime Minister Suzuki and other LDP leaders wavered under pressure from the Finance Ministry and other ministries dealing with trade and economic issues, and from other opponents. Suzuki finally approved an increase of 7.61 percent, including personnel costs, for an overall defense budget of $12 billion. This was only slightly above the Finance Ministry's 7.5 percent guideline, and it represented an important victory for that ministry.

The 1980 budget debate showed that the Japanese government continued to give economic and financial considerations a higher priority than defense policy. It also pointed up the limited parameters of disagreement between the pro-spending forces led by the Defense Agency and the anti-spending forces led by the Finance Ministry. The disagreement focused on whether or not to increase the defense budget over four years by less than one-tenth of one percent of GNP—up to, but not to exceed, one percent of GNP by the mid-1980s. Even modest proposals for more spending produced opposition in the press, the opposition parties, and the general public. This indicated that pacifism and other postwar attitudes continued to be influential outside the government.

The Defense Agency and other pro-defense elements made some gains. Defense received a higher priority in the national budget than in previous years. The Defense Agency obtained greater support from the Foreign Ministry, and its views received more publicity than ever before. Nevertheless, the outcome of the debate left the Carter Administration dissatisfied, and it failed to establish a foundation for future action in line with the Pacific defense concept of the Reagan Administration.

The Japanese government's response to the Reagan proposals has yet to be completely spelled out. But it has already become the subject of intense domestic debate, as indicated by the resignation of the Foreign Minister and Vice Foreign Minister over the language of the defense clauses of the Reagan-Suzuki communique in May 1981. The government currently appears to have adopted a cautious response based on its decision in April 1981 to set 1987 as the target date for completion of all the objectives of the 1976 Defense Outline. Prime Minister Suzuki indicated before and during his visit to Washington that Japan would not undertake major departures from existing defense policies other than the establishment of the 1987 target date. He reiterated the policy of patrolling sea transport routes 1,000 miles from Japan, but emphasized that the Self-Defense Forces would not undertake extensive missions "beyond our immediate territorial land and peripheral waters." He asserted that his administration would not raise taxes to finance future defense expenditures, and would continue its tight budgetary policies. These policies, he said, were necessary to avoid political difficulties for the LDP, as the Japanese people opposed drastic increases in military strength.[11]

Indeed, the Finance Ministry has projected no increase in already planned defense budget hikes over the next three years. Its "medium-range financial outlook," presented in March, 1981, projects 6.2 percent growth in FY 1982, 7.9 percent in FY 1983, and only 3.2 percent in FY 1984.[12] Suzuki and other officials have stated that the government would adhere to the policy of keeping military expenditures below one percent of GNP, despite skepticism in the Defense Agency that the goals of the 1976 Outline can be met by 1987 unless the one percent limit is exceeded.[13] The Finance Ministry has obtained the Defense Agency's agreement that the 1987 deadline will be only for authorizing purchases of weapons and equipment rather than actually having them on line.[14] If this principle holds, the government could retain the spending limits, but much of the weaponry to be acquired might not be delivered until the early 1990s.

Even without these qualifications, it is un-

Footnotes at end of article.

likely that completion of the Mid-Term Program Estimate and the 1976 Defense Outline will give Japan a war-fighting capability commensurate with the responsibilities envisaged for it under the Reagan Northwest Pacific defense zone concept. The Japanese will make improvements, but there will undoubtedly be shortfalls. The destroyer force will continue to have limited antiair and antiship missile assets. An adequate antiair capability for surface ships also would require construction of aircraft carriers or air bases on Japanese islands along the sea transport routes, especially the southern Ryukyus extending to Taiwan and Iwo Jima along the route to Guam. Such a program is not planned. Some U.S. experts question whether an antisubmarine air capability built around 45 P3–Cs will be sufficient to cover an extensive ocean area. It also is doubtful whether Japan will improve its minelaying assets to the extent necessary to close the three straits.

The Maritime Self-Defense Force has a deficient logistics system, especially shortages of ammunition, oil tankers, and spare parts. The 1980 defense white paper pointed out that the Defense Agency had not improved logistics assets because of its emphasis on the procurement of front-line equipment. The Japanese have emphasized procurement of equipment and weaponry in the 1981 defense budget, and this emphasis probably will continue in the future in accordance with the 1987 target deadline, especially if the Finance Ministry's projections hold firm.

Defense of the Japanese home islands from air attack undoubtedly will have some of the same problems as at present. The government has yet to plan a defense system for air bases to replace the BADGE systems.[15] It has not selected a ground-to-air missile to substitute for the NIKE, which was installed in 1962. These deficiencies may reduce the effectiveness of the eight E–2C early warning aircraft that will come on line by 1985. Neither the ASDF nor the MSDF has a defense capability against the Backfire bomber. This will increasingly become a problem, if the Soviets proceed with a deployment of Backfires in eastern Siberia.

The intensity of the U.S.-Japanese dialogue on defense since January 1981 makes an objective assessment of the future Japanese response very important to American policy in East Asia and the state of the U.S.-Japanese alliance in the 1980s. Inaccurate or unrealistic American expectations could alter presently favorably attitudes in this country toward Japan. On the other hand, Japanese failure to take American proposals seriously and to seek accommodation with the United States may increase American frustration over the defense issue. This could result over time in American depreciation of Japan's value as an ally, and could reinforce the already existing view in Washington that the United States should base its Asian security policy on a military realtionship with China.

This leads to a basic question. What can Japan reasonably be expected to do in the 1980s to assume a larger defense role? Events could make any answer to this question obsolete. This would be especially true of such scenarios as a confrontation between Japanese and Soviet forces or a war in Korea. If these do not occur, however, and if current trends hold, several observations can be made.

The first is that Japan probably will not develop a military force structure capable of fulfilling the role envisaged for it by the Reagan Administration. This would appear to be unrealizable. Japan would have to alter drastically its defense policy in order to procure the weaponry, develop the logistics, and establish reserve forces necessary for a multifunctional Self-Defense Force that could assume primary responsibility for a Northwest Pacific defense zone. This is most certain with respect to the mission of sea control, which would require an across-the-board expansion and upgrading of the Maritime Self-Defense Force, a much larger role for the Air Self-Defense Force including the construction of island bases, and steps to improve logistics and create reserve forces where none currently exist. The government undoubtedly would have to raise the defense budget to well over two percent of GNP, and it conceivably would have to consider conscription. Opposition within the government to such proposals would be formidable, especially from the Finance Ministry and other ministries dealing with economic and social issues. Even the Defense Agency does not think in these terms. Outside the government, these proposals would split the emerging pro-defense coalition of the Democratic Socialist Party, the defense-oriented think tanks, business groups, and the smaller newspapers. The majority of the public would oppose such a policy. In short, it would be difficult for any political leadership to embrace this kind of defense policy.

This does not mean, however, that one should expect Japan to limit itself to the 1976 Defense Outline by the late 1980s. By shifting priorities, Japan could develop by 1987 effective blockade and mining assets to close the straits. The government probably could accomplish this within general spending guidelines. The mission falls within Prime Minister Suzuki's proscription of major missions beyond immediately peripheral waters and could be justified within constitutional limits.

The establishment of a more effective air defense system for the Japanese home islands and the Sea of Japan could also be realized. The government would have to give greate priority to expanding and upgrading the surface-to-air missile system and early warning assets. Air bases would have to be hardened, and the government might have to procure additional aircraft, particularly interceptors. This would necessitate increases in defense spending probably to the range of one to two percent of GNP—roughly the spending levels advocated by most elements of the pro-defense coalition. Thus, it would potentially have support from such groups. An upgraded air defense system would be congruent with the confinement of the Self-Defense Forces to Japanese territory and nearby waters. Nevertheless, one could expect opposition from "antidefense" groups. A move in this direction would require political leadership from the Prime Minister and success by the Defense Agency in convincing the Finance Ministry to support the necessary budget provisions.

If the above assessment is basically correct, what does this mean for future US security policy? It would appear, first, that only US naval and air forces can fulfill the responsibility for sea control in the Northwest Pacific and maintain a satisfactory balance of military power with the Soviets well into the 1990s. If the United States retains these objectives, it may require additional carrier deployments or home-port arrangements in the region. Secondly, the United States undoubtedly will have to work with the Japanese through the defense cooperation guidelines in order to influence movement toward one or two priority missions for the Self-Defense Forces and increase the Japanese public's consciousness of the defense issue. Some American support role for priority Self-Defense Force missions would appear to be necessary. Finally, a US security policy that reinforces the alliance must avoid sharp changes, arising from frustration over the defense issue, that would weaken Japanese confidence in the American commitment to Japan's security and create distrust on both sides of the Pacific.

GEORGE KENNAN ON UNITED STATES-SOVIET RELATIONS AND THE DANGERS OF NUCLEAR WAR

Mr. CRANSTON. Mr. President, George Kennan made a remarkable speech about United States-Soviet relations and about nuclear war on the occasion of his receiving the Grenville Clark Prize in Hanover, N.H., on November 16. This speech deserves the most careful reading and thought by every American concerned about United States-Soviet relations and about the dangers of nuclear war. Indeed, it deserves the same careful consideration by every Soviet citizen concerned about relations about our two countries and about the dangers of nuclear war.

Grenville Clark was a most remarkable man, a mentor and friend of mine. He is quoted by George Kennan as predicting decades ago that a great reaction of public opinion against the dangers of nuclear conflict would eventually develop. Clark described it very acutely as something that would be related to "not fear, in the ordinary sense, but rather to a growing exasperation over the rigidity and traditionalism which prevent the formulation of adequate plans to remove so obvious a man-made risk."

I urge my colleagues and all others who are interested in this absolutely vital topic to read the statement by George Kennan. I ask unanimous consent that the entire statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ADDRESS BY THE HONORABLE GEORGE KENNAN

Nearly a quarter of a century ago, as many of you will recall, Grenville Clark and Louis B. Sohn put forward, in a monumental work entitled World Peace through World Law, their ideas for a program of universal disarmament and for a system of world law to replace the chaotic and dangerous institution of unlimited national sovereignty upon

---

which international life was then and is now based.

To many of us, these ideas looked, at the time, impractical, if not naive. Today, two decades later, and in the light of what has occurred in the interval, the logic of them is more compelling. It is still too early, I fear, for their realization on a universal basis; but efforts to achieve the limitation of sovereignty in favor of a system of international law on a regional basis are another thing; and when men begin to come seriously to grips with this possibility, it is to the carefully thoughout and profoundly humane ideas of Grenville Clark and Louis Sohn that they will have to turn for inspiration and guidance.

However, my purpose tonight is not to deal with the historical significance of this vision of the future, in its entirety, but rather to recall one passage of it which has obvious relevance to this present moment. This is a passage which occurred in the final sections of Grenville Clark's preface to the substantive parts of the book; and it concerned nuclear weaponry. After describing the appalling dimensions of the nuclear weapons race, even as it then existed, he went on to express his belief that if the various governments did not find ways to put a stop to this insanity, the awareness of the dangers it presented would some day, as he put it, "penetrate the general masses of the people in all nations" with the result that these masses would begin to put increasing, and indeed finally irresistible, pressure on their governments to abandon the policies that were creating this danger and to replace them with more hopeful and constructive ones. And the dominant motivation for this great reaction of public opinion—the reason why people would feel this way—would be, as he saw it (and here, I am quoting his words) ". . . not fear, in the ordinary sense, but rather a growing exasperation over the rigidity and traditionalism which prevent the formulation of adequate plans to remove so obvious a man-made risk."

How prophetic these words were, as a description of what we are witnessing today. The recent growth and gathering strength of the anti-nuclear-war movement here and in Europe is to my mind the most striking phenomenon of this beginning decade of the 1980's. It is all the more impressive because it is so extensively spontaneous. It has already achieved dimensions which will make it impossible for the respective governments to ignore it. It will continue to grow until something is done to meet it.

Like any other great spontaneous popular movement, this one has, and must continue to have, its ragged edges, and even its dangers. It will attract the freaks and the extremists. Many of the wrong people will attach themselves to it. It will wander off in many mistaken directions. It already shows need of leadership and of organizational centralization.

But it is idle to try to label it, as some in our government seem to be trying to do, as a Communist-inspired movement. Of course, Communists try to get into the act. Of course, they exploit the movement wherever they can. These are routine political tactics. But actually, I see no signs that the Communist input into this great public reaction has been of serious significance.

Nor is it useful to portray the entire European wing of this movement as the expression of some sort of vague and naively neutralist sentiment. There is some of that, certainly; but where there is, it is largely a reaction to the negative and hopeless quality of our own Cold War policies, which seem to envisage nothing other than an indefinitely increasing political tension and nuclear danger. It is not surprising that many Europeans should see no salvation for themselves in this sterile perspective and should cast about for something that would have in it some positive element—some ray of hope.

Least of all does this neutralist sentiment represent any timorous desire to accept Soviet authority as a way of avoiding the normal responsibilities of national defense. The cliché of "better red than dead" is a facile and clever phrase; but actually, no one in Europe is faced with such a choice, or is likely to be. And we will not be aided in our effort to understand Europe's problems by distortions of this nature. Our government will have to recognize that there are a great many people who would accept the need for adequate national defense but who would emphatically deny that the nuclear weapon, and particularly the first use of that weapon, is anything with which a country could, or should, try to defend itself.

No—this movement against nuclear armaments and nuclear war may be ragged and confused and disorganized; but at the heart of it lie some very fundamental, reasonable and powerful motivations. Among them these motivations are a growing appreciation by many people for the true horrors of a nuclear war; a determination not to see their children deprived of life, and their entire civilization destroyed, by a holocaust of this nature; and finally, as Grenville Clark said, a very real exasperation with their governments for the rigidity and traditionalism that causes those governments to ignore the fundamental distinction between conventional weapons and the weapons of mass destruction and prevents them from finding, or even seriously seeking, ways of escape from the fearful trap into which the nuclear ones, in particular, are leading us.

Such considerations are not the reflections of Communist propaganda. They are not the products of some sort of timorous neutralism. They are the expression of a deep instinctive insistence, if you don't mind, on sheer survival—on survival as individuals, as parents, and as members of a civilization.

And our government will ignore this simple fact at its peril. This movement is too powerful, too elementary, too deeply embedded in the human instinct for self-preservation, to be brushed aside. Sooner or later, and the sooner the better, all the governments on both sides of the East-West division will find themselves compelled to undertake the search for positive alternatives to the insoluble dilemma which any suicidal form of weaponry presents, and can only present.

Do such alternatives exist?

Of course they do. One does not have to go far to look for them. One could accept, as a starter, a temporary freeze on the further build-up of nuclear arsenals. There could be deep cuts in the long-range strategic missilery. There could be a complete denuclearization of Central and Northern Europe. One could accept a complete ban on nuclear testing. None of this would undermine anyone's security.

These alternatives, obviously, are not ones that we in the West could expect to realize all by ourselves. I am not suggesting any unilateral disarmament. Plainly, two—and eventually even more than two—will have to play at this game.

And even these alternatives would be only a beginning. But they would be a tremendously hopeful beginning. And what I am suggesting is that one should at least begin to explore them—and to explore them with a good will and a courage and an imagination the signs of which I fail, as yet, to detect on the part of those in Washington who have our destinies in their hands.

This, then, in my opinion, is what ought to be done—what will, in fact, some day have to be done. But I must warn you that for our own country such an alteration will not come easily, even in the best of circumstances. It is not something that could be accomplished in any simple one-time decision, taken from one day to the next. What would be involved for us here would be a fundamental and extensive change in official outlooks on a number of points, and an extensive restructuring of our entire defense posture.

We would have to begin by accepting the validity of two very fundamental appreciations. The first is that there is no issue at stake in our political relations with the Soviet Union—no hope, no fear, nothing to which we aspire, nothing we would like to avoid—which could conceivably be worth a nuclear war, which could conceivably justify the resort to nuclear weaponry. And the second is that there is no way in which nuclear weapons could conceivably be employed in combat that would not involve the possibility—and indeed the prohibitively high probability—of escalation into a general nuclear disaster.

If we can once get these two truths into our heads, then the next thing we would have to do would be to abandon the option—the option to which we have stubbornly clung for over 30 years—the option of the first use of nuclear weapons in any military encounter. This flows with iron logic from the two propositions I have just enunciated. You cannot logically recognize that there is no way that nuclear weapons could be usefully employed in combat and then reserve to yourself the option of initiating their use and base your military plans on this possibility. The insistence on this option of first use has corrupted and vitiated our entire policy on nuclear matters ever since such weapons were first developed. I am persuaded that we shall never be able to exert a constructive leadership in matters of nuclear arms reduction or in the problem of nuclear proliferation until this pernicious and indefensible position is abandoned.

And once it has been abandoned, there will presumably have to be a far-reaching restructuring of our armed forces. The private citizen is of course not fully informed in such matters; and I make no pretense of being so informed. But from all that has become publicly known, one can only suppose that nearly all aspects of the training and equipment of our armed forces, not to mention the strategy and tactics underlying their operation, have been affected to some extent by the assumption that we might have to fight—indeed, would probably wish to fight—with nuclear weapons, and that we might well be the ones to inaugurate their use. A great deal of this would presumably have to be turned around—not all of it, but much of it, nevertheless. We might, so long as others retained such weapons, have to retain them ourselves for purposes of deterrence and reassurance to our people. But we could no longer rely on them for any positive purpose even in the case of reverses on the conventional battlefield; and our forces would have to be trained and equipped accordingly. Personally, this would cause me no pain. But let no one suppose that the change would come easily. An enormous inertia exists here and would have to be overcome; and in my experience there is no inertia, once established, as formidable as that of the armed services.

But there is something else, too, that will have to be altered, in my opinion, if we are to move things around and take a more constructive posture; and that is the view of the Soviet Union and its peoples to which our governmental establishment and a large part of our journalistic establishment have seemed recently to be committed.

On this point, I would particularly like not to be misunderstood. I do not have, and have never had, sympathy for the ideology of the Soviet leadership. I recognize that this is a regime with which it is not possible for

us to have a fully satisfactory relationship. I know that there are areas of interaction where no collaboration between us is possible, just as there are other areas where one can collaborate. There are a number of Soviet habits and practices which I deeply deplore, and which I feel we should resist firmly when they impinge on our interests. I recognize, furthermore, that the Soviet leadership does not always act in its own best interests—that it is capable of making mistakes, just as we are, and that Afghanistan is one of those mistakes, and one, incidentally, which it will come to regret, regardless of anything we may do to punish it.

Finally, I recognize that there has recently been a drastic and very serious deterioration of Soviet-American relations—a deterioration to which both sides have made their unhappy contributions. And this, too, is something which it will not be easy to correct; for it has led to new commitments and attitudes of embitterment on both sides.

The almost exclusive militarization of thinking and disclosure about Soviet-American relations that now pervades the Washington atmosphere and a good portion of our media communication—a militarization which, it seems to me, could not be different if we knew for a fact that we were going to be at war with the Soviet Union within a matter of months: this in itself is a dangerous state of affairs, which it is not going to be easy to correct. So I don't think I underestimate the gravity of the problem.

But, all this being said, I must go on and say that I find the view of the Soviet Union that prevails today in these governmental and journalistic establishments so extreme, so subjective, so far removed from what any sober scrutiny of external reality would reveal, that it is not only ineffective but dangerous as a guide to political action. This endless series of distortions and oversimplifications; this systematic dehumanization of the leadership of another great country; this routine exaggeration of Moscow's military capabilities and of the supposed iniquity of its intentions; this daily misrepresentation of the nature and attitudes of another great people—and a long-suffering people at that, sorely tried by the vicissitudes of this past century; this ignoring of their pride, their hopes—yes, even of their illusions (for they have their illusions, just as we have ours; and illusions, too, deserve respect); this reckless application of the double standard to the judgment of Soviet conduct and our own; this failure to recognize the communality of many of their problems and our problems as we both move inexorably into the modern technological age; and this corresponding tendency to view all aspects of the relationship in terms of a supposed total and irreconcilable conflict of concerns and aims: these are not the marks of the maturity and realism one expects of the diplomacy of a great power; they are the marks of an intellectual primitivism and naivity unpardonable in a great government—yes, even naivity, because there is a naivity of cynicism and suspicion just as there is a naivity of innocence.

And we shall not be able to turn these things around as they should be turned, on the plane of military and nuclear rivalry, until we learn to correct these childish distortions—until we correct our tendency to view the Soviet Union only as a mirror in which we look for the reflection of our own superior virtue—until we consent to see there another great people, one of the world's greatest, in all its complexity and variety, embracing the good with the bad—a people whose life, whose views, whose habits, whose fears and aspirations, whose successes and failures, are the products, just as ours are the products, not of any inherent iniquity but of the relentless discipline of history, tradition and national experience.

Above all, we must learn to see the behavior of the leadership of that people partly as a reflection of our own treatment of it. For even rivals and opponents influence each other. And if we insist on demonizing these Soviet leaders—on viewing them as total and incorrigible enemies, consumed only with their fear or hatred of us and dedicated to nothing other than our destruction—that, in the end, is precisely the way we shall have them—if for no other reason than that our view of them allows for nothing else—either for us or for them.

These, then, are the changes we shall have to make—the changes in our concept of the relationship of nuclear weaponry to national defense, in the structure and training of our armed forces, and in our view of the distant country which our military planners seem to have selected as our inevitable and inalterable enemy—if we hope to reverse the dreadful trend towards a final nuclear conflagration. And it is urgently important that we get on with these changes. Time is not waiting for us. The fragile nuclear balance that has prevailed in recent years is being undermined, not so much by the steady build-up of the nuclear arsenals on both sides (for they already represent nothing more meaningful than absurd accumulations of overkill), but rather by technological advances that threaten to break down the verifiability of the respective capabilities and to stimulate the fears, the temptations, and the compulsions, of a "first strike" mentality.

And this is not the only reason why it is important that we get on with these changes. For beyond all this, beyond the shadow of the atom and its horrors, there lie other problems—tremendous problems—that demand our attention. There are the great environmental complications now beginning to close in on us: the question of what we are doing to the world oceans with our pollution, the problem of the greenhouse effect, the acid rains, the question of what is happening to the topsoil and the ecology and the water supplies of this and other countries. And there are the profound spiritual problems that spring from the complexity and artificiality of the modern urban-industrial society—problems that confront both the Russians and ourselves, and to which neither of us has as yet responded very well. One sees on every hand the signs of our common failure. One sees it, for example, in the cynicism and apathy and drunkenness of so much of the Soviet population. One sees it in the crime and drug abuse and general decay and degradation of our city centers. To some extent—not entirely but extensively—these failures have their origins in experiences common to both of us; and we could perhaps learn something from each other about their possible solutions.

And these problems, too, will not wait. Unless we both do better in dealing with them than we have done to date, even the banishment of the nuclear danger will not help us very much. Can we not cast off our preoccupation with sheer destruction—a preoccupation that is costing us our prosperity and preempting the resources that should go to the progress of our respective societies—is it really impossible for us to cast off this sickness of blind military rivalry and to address ourselves at long last, in all humility and in all seriousness, to setting our respective societies to rights?

For this entire preoccupation with nuclear war is—believe me—a form of illness. It is morbid in the extreme. There is no hope in it—only horror. It can be understood only as some form of subconscious despair on the part of its devotees—a readiness to commit suicide for fear of death—a state of mind explicable only by some inability to face the normal hazards and vicissitudes of the human predicament—a lack of faith, or perhaps a lack of the very strength that it takes to have faith, where countless generations of our ancestors found it possible to have it.

I decline to believe that this is the condition of the majority of our people. Surely there is among us, at least among the majority of us, a sufficient health of the spirit—a sufficient affirmation of life, of its joys and excitements together with its hazards and uncertainties, to permit us to sluff off this morbid preoccupation, to see it and discard it as the sickness it is, to turn our attention to the real challenges and possibilities that loom beyond it, and in this way to restore a sense of confidence in ourselves and of hope for the future of our civilization.

THE ALL-SAVERS CERTIFICATES

Mr. COCHRAN. Mr. President, I would like to bring to the attention of my colleagues a problem which I foresee in the implementation of section 301 of the Economic Tax Recovery Act, the "All-Savers" certificates provision.

This provision, passed by the Congress last summer as a tax incentive to help financial institutions and the housing and agriculture industries, may fail to accomplish these goals because of bureaucratic neglect.

Last month, at the behest of several concerned constituents, I wrote to the Secretary of the Treasury to determine what action, if any, will be taken to make sure that the financial institutions do make the investments in residential housing and agriculture as contemplated by the law. The essence of the response to my inquiry was that the executive branch agencies have no plan to carry out the enforcement of section 301 of the Economic Tax Recovery Act.

Section 301 provides that qualified savings institutions issuing tax-exempt savings certificates must provide qualified residential financing during the succeeding calendar quarter. If an institution issues "All-Savers" certificates, then they must invest qualified residential financing no less than the lesser of 75 percent of face amount of certificates issued during quarter, or 75 percent of the qualified net savings for the quarter.

The penalty for failure of the institution to comply is that no more certificates can be issued.

Since section 301 only went into effect on October 1, the savings institutions do not have to provide the qualified residential financing until March 1982.

After writing Secretary Regan and receiving a reply from Mr. Gordon Eastburn of the Depository Institutions Deregulation Committee, I feel even more strongly that we must seek either an administrative remedy or a legislative remedy to insure that the intent of Congress is carried out.

We included section 301 in the Economic Tax Recovery Act to encourage savings. In the process, we also wanted to assist the struggling housing industry and farmers. Continued high interest rates make this section even more vital to these industries than before.

I asked Secretary Regan what tax consequences would follow for the depository institution and the investor when certificates have been issued during a period of time when the institution failed to pro-

vide the required amount of residential financing.

In the letter I received I was informed that the Treasury Department "has no regulatory framework by which to keep timely watch over depository institutions." The DIDC was empowered by the Economic Tax Recovery Act with authorizing depository institutions to issue All-Savers certificates. According to the DIDC's own words, it has "no enforcement staff of its own." Therefore, enforcement is being left to the primary regulatory agency for each institution and to the IRS.

Leaving the responsibility to the primary regulatory agency may be logical but impractical. In many cases Regulators visit the depository institutions less than once a year. Thus, numerous institutions who have been recently reviewed, may not be reviewed for compliance with the All-Savers provision until the provision becomes obsolete.

We have an opportunity and a responsibility to make a timely clarification of the All-Savers provision. I hope that the Finance Committee can look into this matter as soon as reasonably possible when Congress reconvenes in January of 1982.

I ask unanimous consent that my letter to Treasury and the reply be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD as follows:

U.S. SENATE,
Washington, D.C., November 10, 1981.

Hon. DONALD T. REGAN,
Secretary of the Treasury,
Washington, D.C.

DEAR SECRETARY REGAN: I have been contacted by persons in the building and housing industry about the effectiveness of the "All-Savers" certificates program under the Economic Tax Recovery Act. Serious questions have been raised about what steps will be taken on a timely basis to make sure that the financial institutions do make the investments in housing as contemplated by the law.

How will the Treasury Department determine at the end of each quarter whether a financial institution has made the qualifying amount of investments? What tax consequences will follow for the depository institution and the investor when certificates have been issued during a period of time when the institution failed to provide the required amount of residential property financing?

I am concerned that if the Treasury Department does not take steps now to enforce the law, there may be little or no improved investment in housing as was intended in the Economic Tax Recovery Act. Additionally, institutions and investors may be penalized as a result of erroneous interpretation of the Act.

Your assistance in clarifying this situation for me will be appreciated.

Sincerely,

THAD COCHRAN,
U.S. Senator.

DEPOSITORY INSTITUTIONS
DEREGULATION COMMITTEE,
Washington, D.C., December 3, 1981.

Hon. THAD COCHRAN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR COCHRAN: Chairman Regan has asked me to thank you for your letter of November 10, in which you expressed your concern that depository institutions may not use as much of the proceeds from All Savers Certificates (ASCs) for investment in the building industry as is mandated by the Economic Tax Recovery Act.

The Treasury Department has no regulatory framework by which to keep timely watch over depository institutions to ensure that they follow Congressional intent in ASC investments. But the Secretary of the Treasury is also a member and the Chairman of the Depository Institutions Deregulation Committee (DIDC), which was empowered by the Tax Recovery Act with authorizing depository institutions to issue ASCs. The DIDC is a rule-issuing body with no enforcement staff of its own, the enforcement function being left to the primary regulatory agency for each depository institution and to the Internal Revenue Service. But from the very beginning of its authorization of ASCs the DIDC has been careful to ensure that depository institutions carry out the law's intent regarding appropriate investment in housing.

In its initial September 3 regulation the DIDC explained how institutions should meet the statutory requirement for residential investment (qualified residential financing), and that a depository institution's executive officer would have to certify in writing, with appropriate documentation, that the institution had satisfied those requirements. Press releases dated September 21, October 1 and October 8 gave further details about the timing and calculation of qualified residential financing. I have attached copies of these DIDC regulations and issuances.

The above information has been widely disseminated both by the DIDC and through the financial press. Please rest assured that there is no indication that depository institutions issuing ASCs are not adequately informed on this subject, or that they do not intend to fully cooperate in carrying out the mandate of the law by making the appropriate residential investments.

Thank you for writing us on this question, and please write again if we can be of further help.

Sincerely,

GORDON EASTBURN,
Policy Director.

WATER SUPPLY AT BENBROOK LAKE, TEX.

Mr. ABDNOR. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 779, and that the bill be laid before the Senate.

The PRESIDING OFFICER. Is there objection?

Mr. CRANSTON. Mr. President, I momentarily reserve the right to object.

The PRESIDING OFFICER. Objection is heard.

Mr. ABDNOR. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended until the hour of 10:30 a.m., and the time for the consideration of H.R. 5159, as previously ordered, also be extended to the hour of 10:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I ask unanimous consent that Senators may speak in the period so provided for not to exceed 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

FREDERICK SCHULTZ, VICE CHAIRMAN, FEDERAL RESERVE BOARD

Mr. PROXMIRE. Mr. President, on January 31, 1982, Frederick H. Schultz' term as a Governor of the Federal Reserve System will come to an end.

I remember when he was nominated. I opposed him. I opposed him because I felt he was not qualified for the job. He is a man with solid political experience, but very little experience or no training in monetary policy. He is a man with very considerable commonsense, good judgment, energy, and, in general, I think he has done a good job.

Mr. Schultz, who was appointed by President Carter on July 27, 1979, to fill an unexpired term, leaves at a time when the Fed, the Reagan administration, and the Congress are confronted with very serious economic problems.

Governor Schultz has been Paul Volcker's able right arm for the past 2 years, not only acting as chief administrative officer for the Fed but, more importantly, he has been an articulate spokesman for the Fed.

Fred Schultz has blown holes in the myth that Fed Governors never leave their building to communicate with the people who live with the results of Fed monetary policies. He has traveled out of Washington to meet and talk with homebuilders, thrift officials, farmers, small businessmen, and realtors. He has met with individual Congressmen and Senators and congressional delegations. He has testified on Capitol Hill more than a dozen times.

I think all of us know that these are the toughest times for anybody at the Fed who administers monetary policy to meet with the victims of that monetary policy because of how deeply people feel about high interest rates.

In my opinion, Fred Schultz has done a fine job in a very difficult time.

With much discussion today over whom the President should name to fill the Board's next vacancy, President Reagan would do well to note the qualities that have helped Fred Schultz handle his responsibilities: intelligence, energy, loyalty, and, as one national columnist wrote recently, "consistent commonsense."

U.S. News & World Report recently conducted an interview with Governor Schultz. I think Governor Schultz' comments on the economy, unemployment, and the role we in the Congress must play—as well as the responsibilities of the Fed and the White House—make valued reading for my colleagues.

Once again I concede that I did oppose Mr. Schultz. I would oppose other nom-

inees with his limited qualifications in the future. But I am delighted that he proved me wrong in this particular case.

I ask unanimous consent that the U.S. News interview of Governor Schultz be printed in full in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

FOR THE FED: "THE MOMENT OF TRUTH IS HERE"

(The nation's central bank—and the Reagan administration—must rein in inflation quickly or the U.S. is in for fresh trouble, warns Schultz, who sizes up big changes now taking shape in the 1982 business outlook.)

Q. Mr. Schultz, do you agree with the administration's forecast that the recession will end by spring?

A. Indications point that way. A price factor in this recession has been very high interest rates. They are coming down rapidly. Next year, the stimulating effect of rising defense expenditures and tax cuts comes into effect. So I believe the recession will end perhaps in the second quarter, and certainly no later than the third quarter of 1982.

Q. Do you think that unemployment, now at 8 percent, will reach 9 percent, as it did in 1975?

A. Yes, that's possible. I get a weekly report of bad news in the economy—the problems companies are having and plant closings. Looking at that, there are more layoffs to come.

Q. Bankruptcies are 52 percent higer than last year. Will some major corporations go under?

A. We monitor that very closely, as you can imagine. Some larger companies are in trouble. Chrysler and International Harvester come to mind. But we don't see any bankruptcies out there large enough to shock the economy, like the Penn Central railroad in 1970 or the Franklin National Bank in 1974.

We worry much more about small businesses. It's not so much a Goliath out there that may keel over and die as it is a lot of Davids.

Q. White House officials now are talking about a mere 1 percent improvement in the real gross national product next year. What sort of overall growth do you expect?

A. That depends on the budget deficits. Under ordinary circumstances, the bigger the budget deficit, the more stimulative it is to the economy. That may not be true this time. If you want to stimulate this economy, the important thing is to get interest rates down.

Q. But isn't the Federal Reserve Board the key factor in what happens to interest rates?

A. We don't think so. We believe inflationary expectations play the biggest part. Clearly, if the economy weakens, as it is, and inflation improves, as it is, then interest rates will come down. Short-term rates are falling. But we think it's critical that long-term rates, such as for mortgages and bonds, come down and stay down.

We must get the long-term capital markets working again. If the recovery begins and the government continues to be a very heavy borrower, then interest rates certainly will move up again. That could damage both the recovery and the anti-inflation effort.

Q. Are you saying that unless the Reagan administration's January budget does something to close those deficits for future fiscal years, interest rates may shoot up again and threaten the recovery?

A. Yes, I am. Fiscal 1982 now under way really doesn't matter much because, in a period of economic weakness, there's a large enough savings pool to accommodate very high government demands for credit. But in a period of recovery, private credit demands increase, and that, combined with high government demands, puts upward pressure on interest rates. If lenders view large deficits as adding to inflation in future years, then even more upward pressure is put on interest rates. If rates move back up to high levels, that indeed will threaten the recovery.

Q. When you say "high levels," do you mean higher than those we've had over the past couple of years?

A. I don't think so, because inflation will still be coming down. That will prevent interest rates from reaching new highs. But we will have a sputter-and-spurt economy, and that's not the best way for the economy to operate.

Q. How far will inflation fall?

A. I'm an optimist on inflation. The consumer price index should drop to the 6 to 7 percent range in 1982 from about 10 percent this year.

Q. What about interest rates?

A. We at the Fed don't forecast interest rates. But surely short rates will be coming down, and, as I said, long rates will depend largely on inflationary expectations. If we pump too much liquidity into the system to bring short rates down quickly, that might have the perverse effect of holding long rates up by adding to inflationary fears.

Q. How much inflation is acceptable in a healthy economy?

A. Zero to 3 percent. Anytime inflation gets up to 3 percent, we ought to be exercising restraint. Anytime it gets down to zero, we ought to be pumping reserves in.

Q. So, even with the deepening recession, the Fed will stick to its money-growth targets—

A. We really don't have a choice. The most unfair thing we could do would be to move away from those targets. They give plenty of room for good growth if inflation settles down. We've put the economy through a lot of pain for two years now. The worst thing we could do would be to back off now and let inflation soar and interest rates go up to 25, 30, 40 percent. We must get inflation under control this time. The moment of truth is here for the central bank of the United States.

Q. In this moment of truth for the Fed, what happens if you don't get help from the administration and Congress?

A. Our job becomes harder and more painful. Next year is a political year and, if interest rates are rising, the pressures become enormous on candidates to junk the anti-inflation effort. That'll be a tough, tough situation. It could jeopardize the Fed's independence by increasing demands that the Federal Reserve become part of the Treasury or something, and that's kissing goodbye to any chances of controlling inflation.

Q. What should be done to reduce the deficit? Cut more spending or raise taxes?

A. I'd much prefer spending cuts. We need to move toward "supply side" economics in the sense of providing more tax incentives for savings and investment. If you can't find enough spending cuts, then I'd look on the tax side—particularly energy or consumption taxes. But Congress hasn't cut much entitlement or defense spending. With budget authority for defense up 55 percent between 1980 and 1982 and spending in the area of 200 billion dollars a year, one does wonder if the money could be spent a shade more efficiently.

Q. In retrospect, do you feel the President's three-year tax cut for individuals was too large?

A. Look at what the financial markets have been saying. When Congress was cutting the budget, the markets acted very well. When the tax cut was introduced, they weakened. As more baubles were hung on the Christmas tree, the markets got even weaker.

Q. Should the tax cut now be scaled back?

A. I don't know that I'd favor cutting back the bill's basics. But the tax-free all-savers certificate and other provisions just weren't sensible on a cost-benefit basis.

I do think that if you're going to encourage savings, you need to cut taxes for those people who are in a position to save. So I think the cut from 70 to 50 percent in unearned income has some real rationale to it.

Q. Was Budget Director David Stockman right, then, when he called the Reagan tax cut for everyone a "Trojan horse" to reduce taxes for upper-income people?

A. Mr. Stockman made an unfortunate choice of terms, but there's a lot of truth in what he said. If you read that magazine article, you see a man realizing that purity of theory is dangerous. I don't see him as losing faith in the Reagan program. I see him as gaining wisdom, beginning to understand that "true believers"—in supply-side or any other economic theory—don't have all the answers.

Q. Is the President under the spell of the "true believers"?

A. I don't know. I worry about the approach of some of his economic policymakers. The supply-siders say all you have to do is unleash the basic forces of America. The monetarists say all you have to do is keep firm control of the money supply.

Both groups ignore a lot of things. I wish they'd stop bickering and work together.

Q. Is that your only quarrel with the Reagan program?

A. The economic forecasts have been too optimistic. The President is an optimistic fellow. Maybe he has to be that way to get Americans to respond. But I think he gave the impression there was a simple, easy way to make the transition from rising to falling inflation without economic pain. I don't think that's possible.

Q. Would some form of gold standard help lick inflation?

A. A gold standard is no magic wand. Many people say: "All you need is a gold standard, and inflation will go away." What they overlook is that a gold standard produces periods of inflation and deflation. Our debt structure couldn't stand deflation, which would require debtors to repay loans with more-expensive dollars than they borrowed. It's impractical and dangerous.

Q. What about direct controls to ease inflation?

A. History shows they'd make the situation worse, not better. You put controls on. When you take them off, you've exacerbated the inflation problem. If you don't take them off, you've got dictatorship.

I come back to my basic point that the best way to bring inflation down is to contain federal spending. Somebody asked me recently: "My God, have you no heart?" And I said: "Yes, I do have a heart. There will be less pain for more Americans if we make those cuts, reduce inflation and get the economy working properly."

Q. Given your concern about deficits, what about the President's postponement of a balanced budget beyond 1984?

A. Americans have heard so much talk over the last 15 years about balancing the budget and controlling inflation, yet nothing has happened. They want action. I hold no special brief for a particular year in which the budget must be balanced. But the President must have a believable program. He must show he's bringing the deficit down. He must be ready to use his veto. Not only is this the moment of truth for the Fed, it's also the moment of truth for the President.

Q. What's the administration's reaction to this advice?

A. Some of the "true believers" don't believe me. They say: "Look, interest rates haven't always moved up when past recessions ended." And I say: "Yes, but you've never had a Federal Reserve holding to a quantity-of-money approach when a recession ended before, either. It's a different ball

game now. If there's a limited amount of money and you have strong public and private credit demands, interest rates are going back up and you'll have a serious problem on your hands."

Q. Could rising interest rates turn the recession into a depression?

A. I don't think so. I doubt that rates will get high enough to cut off growth in the second half of 1982. The real issue is whether you control inflation so future growth will be a lot better.

Q. Won't reducing inflation raise unemployment?

A. That's the old rule of thumb, which may be valid at low levels of inflation. But the 1970s showed us that at high levels of inflation, more inflation gives you more unemployment, not less. With the cost of investment so high, you don't get job creation. So you have both rising inflation and rising unemployment. That's the bind we must get out of if our economy is to work right.

Q. When will we know if your policy of managing the money supply, rather than managing interest rates, is working?

A. It is working. You can't compare the past two years with the previous two years. You have to compare with what would have been if we had been controlling interest rates. Inflation would have been worse. To hold interest rates stable, you would have had to increase the money supply. People see that and decide inflation's going to get worse. You're in a vicious circle, which we had to break.

Now you might argue that we could have done a better job of managing the money supply, but the policy is correct.

Q. If Reagan cuts the deficit, inflation eases and the recovery begins on schedule, what lies ahead for 1983 and beyond?

A. We could have the greatest boom in our history.

U.S. CAPITOL GROUNDS REGULATIONS

Mr. STEVENS. Mr. President, I introduce a bill and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

There being no objection, the Senate proceeded to consider the bill (S. 1976) to amend the act of July 31, 1946, as amended (40 U.S.C. 193a), which was read the first time by title and the second time at length.

Mr. STEVENS. Mr. President, I will point out to the minority leader that this is the bill I discussed with him last evening concerning the Capitol Police. This bill has been cleared on both sides of the aisle.

Mr. President, this bill is intended to clarify the authority of the U.S. Capitol Police. The bill also clarifies the authority of U.S. Capitol Police to extend protection beyond the Capitol Grounds subject to the direction of the Capitol Police Board.

We want to eliminate any ambiguity or question concerning their authority in their law enforcement work. I ask unanimous consent that the bill be given immediate consideration and passed.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1976) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1976

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Act entitled "An Act to define the area of the United States Capitol Grounds, to regulate the use thereof, and for other purposes", approved July 31, 1946, as amended (40 U.S.C. 193a), is amended by inserting immediately after section 9 thereof the following new section:

"SEC. 9A. (a) Subject to the direction of the Capitol Police Board, the United States Capitol Police is authorized to protect, in any area of the United States, the person of any Member of Congress, officer of the Congress, as defined in section 431 of the Act of October 26, 1970 (2 U.S.C. 60–1(b)), and any member of the immediate family of any such Member or officer, if the Capitol Police Board determines such protection to be necessary.

"(b) In carrying out its authority under this section, the Capitol Police Board, or its designee, is authorized, in accordance with regulations issued by the Board pursuant to this section, to detail, on a case-by-case basis, members of the United States Capitol Police to provide such protection as the Board may determine necessary under this section.

"(c) In the performance of their protective duties under this section, members of the United States Capitol Police are authorized (1) to make arrests without warrant for any offense against the United States committed in their presence, or for any felony cognizable under the laws of the United States if they have reasonable grounds to believe that the person to be arrested has committed or is committing such felony; and (2) to utilize equipment and property of the Capitol Police.

"(d) Whoever knowingly and willfully obstructs, resists, or interferes with a member of the Capitol Police engaged in the performance of the protective functions authorized by this section, shall be fined not more than $300 or imprisoned not more than one year, or both.

"(e) Nothing contained in this section shall be construed to imply that the authority, duty, and function conferred on the Capitol Police Board and the United States Capitol Police are in lieu of or intended to supersede any authority, duty, or function imposed on any Federal department, agency, bureau, or other entity, or the Metropolitan Police of the District of Columbia, involving the protection of any such Member, Officer, or family member.

"(f) As used in this section, the term 'United States' means each of the several States of the United States, the District of Columbia, and territories and possessions of the United States.".

(b) Section 1114 of title 18, United States Code, is amended by inserting immediately after "any officer or employee of the Secret Service or of the Drug Enforcement Administration," the following: "any officer or member of the United States Capitol police".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the enrolling clerk be directed to immediately process that bill. The House is going to act on it today.

The PRESIDING OFFICER. Is there objection? There being no objection, it is so ordered.

WATER SUPPLY AT BENBROOK LAKE, TEX.

Mr. ABDNOR. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 779 and that it be laid before the Senate.

Mr. ROBERT C. BYRD. Mr. President, this request has been cleared on this side of the aisle and there is no objection.

The PRESIDING OFFICER. Is there objection? Without objection, the bill will be stated.

The assistant legislative clerk read as follows:

A bill (H.R. 779) to authorize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District Numbered 1 and the city of Weatherford, Texas, for the use of water supply storage in Benbrook Lake, and for other purposes.

UP AMENDMENT 797

(Purpose: To modify certain authorities under the responsibility of the Army Corps of Engineers)

Mr. ABDNOR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. ABDNOR) proposes an unprinted amendment numbered 797.

Mr. ABDNOR. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new sections:

"SEC. 2. (a) The third sentence of section 205 of the Flood Control Act of 1948 (33 U.S.C. 701s) is amended to read as follows: 'Not more than $4,000,000 shall be allotted under this section for a project at any single locality.'

"(b) The amendment made by this section shall not apply to any project under contract for construction on the date of enactment of this Act.

"SEC. 3. Section 164 of the Water Resources Development Act of 1976 (Public Law 94–587) is amended by deleting the figure "$21,000,000" and inserting in lieu thereof "$23,200,000".

"SEC. 4. The Secretary shall relocate the water supply intake facility on the Missouri River at Springfield, South Dakota, which facility is subject to severe sedimentation, at an estimated cost of $2,190,000.

"SEC. 5. (a) The proviso of section 2 of Public Law 84–485 shall not be construed to prohibit the storage of San Juan-Chama project water acquired by contract with the Secretary of the Interior pursuant to Public Law 87–483 in any reservoir, including the storage of water for recreation and other beneficial purposes by any party contracting with the Secretary for project water.

"(b) The Secretary of the Army, acting through the Chief of Engineers, is authorized to enter into agreements with entities which

have contracted with the Secretary of the Interior for water from the San Juan-Chama project pursuant to Public Law 87-483 for storage of a total of two hundred thousand acre-feet of such water in Abiquiu Reservoir. The Secretary of the Interior is hereby authorized to release San Juan-Chama project water to contracting entities for such storage. The agreements to thus store San Juan-Chama project water shall not interfere with the authorized purposes of the Abiquiu Dam and Reservoir project and shall include a requirement that each user of storage space shall pay any increase in operation and maintenance costs attributable to the storage of that user's water.

"(c) The Secretary of the Interior is authorized to enter into agreements with entities which have contracted with the Secretary of the Interior for water from the San Juan-Chama project pursuant to Public Law 87-483 for storage of such water in Elephant Butte Reservoir. The Secretary of the Interior is hereby authorized to release San Juan-Chama project water to contracting entities for such storage. Any increase in operation and maintenance costs resulting from such storage not offset by increased power revenues resulting from that storage shall be paid proportionately by the entities for which the San Juan-Chama project water is stored.

"(d) The amount of evaporation loss and spill chargeable to San Juan-Chama project water stored pursuant to subsections (b) and (c) of this section shall be accounted as required by the Rio Grande compact and the procedures established by the Rio Grande Compact Commission.

"SEC. 6. Notwithstanding any other provision of law, no houseboat, floating cabin, marina (including any with sleeping facilities), or lawfully installed dock or cabin and appurtenant structures shall be required to be removed before December 31, 1989, from any Federal water resources reservoir or lake project administered by the Secretary of the Army, acting through the Chief of Engineers, on which it was located on the date of enactment of this Act, if such property is maintained in usable condition, and, in the judgment of the Chief of Engineers, does not occasion a threat to life or property."

Mr. ABDNOR Mr. President, earlier this year, the House passed H.R. 779, a modest bill to resolve a local water supply problem in Texas at no cost to the Federal Government.

My amendment would resolve several other small, but pressing, water-related issues. These changes either have costs of about $2 million or less, or impose no cost to the Federal Government. In fact, the one change involving water storage in New Mexico will actually bring the Federal Government revenues. since the non-Federal agencies will pay for storage space at Federal reservoirs.

Section 2 in the amendment raises the level that the corps is permitted to spend on small flood control projects, without specific congressional authorization. The figure was increased 5 years ago to $2,000,000. Considerable inflation has occurred since justifying this increase to $4,000,000. This amendment does not raise the overall funding limit for this program.

The amendment also adds a new section 3 raising the limit on the cost for the reconstruction of a bridge connecting Lewiston, Idaho, with Clarkston, Wash. This is necessary because a funding delay occurred after the bridge was originally authorized. The bridge is presently under construction. This money is needed to complete work on a ramp on the Idaho side.

Section 4 directs the corps to relocate a water supply intake facility at Springfield, S. Dak., at a total cost of $7,190,000. The existing facility silted up several years ago and the community has experienced difficulty maintaining its municipal water supply.

This amendment adds a new section 5 permitting, at no Federal cost, the public owners of certain water in New Mexico, such as the city of Albuquerque, to store that water in two reservoirs in New Mexico. This applies only to water from the San Juan-Chama project, permitting its storage, if that storage can be accomplished without detrimental effects on the operation of the Federal storage projects. I am confident that substantial storage space can be made available. This is a technical change necessitated because of an interpretation that storage in the reservoir was never specifically authorized. It is now authorized.

Finally, section 6 of this amendment includes modified "houseboat" language, concerning measures to continue to allow houseboats, floating cabins, and legal docks and piers to be located at corps lakes during the next 8 years.

Personally, I find this provision, as it was sent to the Senate in another bill, very unsound. That other language would have allowed illegal structures and encroachments the protection of law for 8 years. This alternative provision allows similar protection, but only for structures that were legal at some point, by permit or lease.

Should that other provision be written into law, I am hopeful that this language would prevail. It is intended to. But if not, I urge the corps to let us know so we can resolve it as quickly as possible.

Mr. President, while these items are small, they do merit the support of the Senate.

● Mr. SYMMS. Mr. President, I thank Senator ABDNOR for his consideration and help in providing this opportunity to correct a situation which needs our immediate action. The amendment is to assure the completion of a Corps of Engineers project constructing a bridge across the Snake River between Lewiston, Idaho, and Clarkston, Wash.

Due to delays and the impact of inflation, an additional $2.2 million is needed to complete the approach ramps to the bridge on the Idaho side. Passage of this amendment will achieve this goal.

The need for this new Lewiston-Clarkston Bridge is a result of the completion in the mid-1970's of the Columbia-Snake River Waterway as far as Lewiston. Because the waterway project raised the level of the river and attracted new waterway traffic, the existing drawbridge link between Lewiston and Clarkston was no longer adequate to handle traffic between the two cities.

In order to remedy this problem the Congress in the 1976 Omnibus Water Resources legislation included section 164 which authorized a new, high-level bridge a mile upriver from the existing drawbridge. The cost set in that bill was "not to exceed" $21,000,000.

The corps went to contract on the bridge in January 1980. Because of inflation, however, the corps was unable to obtain bids low enough to enable it to complete the bridge as had been originally envisioned by the Congress. In an effort to deal with this situation the corps divided up the contract, leaving work on the Lewiston ramp to the future.

I am convinced that this change in the 1976 act, proposed by this amendment is necessary, and fully justified in view of the ongoing nature of the project and the earlier commitment by Congress to the people of the area.

In addition, I believe this change needs to be achieved as soon as possible, so that the work can be accomplished in harmony with the existing construction scheduled to be completed in September 1982.

Mr. President, I am pleased to have the support of Senators GORTON and JACKSON of Washington, whose State is also affected by this bridge project, and I am particularly pleased that Senator MCCLURE has joined me in sponsoring this legislation. It was his initiative that led to Senate passage of the original provision in 1976.●

Mr. DOMENICI. Mr. President, I wish to express my support for passage of this bill, as amended by language offered by the Senator from South Dakota (Mr. ABDNOR).

While I believe that each of these provisions is important and necessary, I would like to focus my attention on section 5 in the amendment. This section contains an important, if technical, change to the law, one that is needed to resolve a water storage issue in New Mexico. I must emphasize that this provision imposes no cost on the Federal Government, and actually could produce offsetting revenues to the Government as local public owners of water pay a portion of the operations and maintenance costs required for the storage. This payment, of course, would not involve construction costs.

This section authorizes the storage of water from the Federal San Juan-Chama project in various New Mexico reservoirs by the owners of the water. This would assist the cities of Albuquerque and Santa Fe by providing storage locations for contract water that they have bought and paid for over a number of years.

The cities now lack adequate storage facilities, while extra space is available at Abiquiu and Elephant Butte Reservoirs. Some time ago, the city of Albuquerque contracted to store water at the Elephant Butte project in southern New Mexico. It has since been ruled that this storage had not been specifically authorized by Congress, so that it could not take place. Now that the issue has been forced, the cities believe it would also be appropriate to permit further storage at Abiquiu, north of Albuquerque, in addition to small amounts now stored there, as well as at Elephant Butte.

This section authorizes such storage, when the storage does not interfere with the authorized purposes of the projects, such as flood control. Thus, the storage is to be allowed only if it proved compatible with authorized project purposes.

I recognize that some may oppose this

proposal. The Committee on Environment and Public Works held extensive hearings in Albuquerque on this provision earlier this year. The public had a full opportunity to evaluate and comment on its merits.

I am convinced that the provision is valid and necessary. I am pleased that the Senate is considering it. I urge its passage.

Mr. ABDNOR. Mr. President, we have worked this out very carefully with the committee here and also with the other body. We think what we have come up with meets everybody's approval. If the Senator from New Mexico has nothing to say, I move adoption of the amendments.

The PRESIDING OFFICER. The Chair recognizes the Senator from New Mexico.

Mr. DOMENICI. Mr. President, I commend the distinguished chairman of the Water Resources Subcommittee for working this matter out. There is a matter in it that affects one of my cities and it has no cost to the Federal Government. I urge the Senate to adopt the amendment.

Mr. ABDNOR. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 797) was agreed to.

Mr. ABDNOR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOMENICI. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BENTSEN. Mr. President, I urge the Senate to pass H.R. 779 so that the unused water of Benbrook Lake can be effectively utilized by the cities of Weatherford and Granbury, Tex., and the Tarrant County Water Control and Improvement District. Benbrook Lake was authorized by the Rivers and Harbors Act of 1945 for flood control and navigation purposes. This bill would allow Weatherford, Granbury, and the Tarrant County Water Control and Improvement District to contract for water from Benbrook Lake that has been set aside, unused, for navigation purposes.

Because the lake's water has never been used for its original purpose, the 72,500 acre-feet of water stored for the project is surplus until it is developed for navigation use. The act has previously been modified three times to permit the cities of Fort Worth and Arlington, and the Benbrook Water and Sewage Authority, to use the surplus water for their water supplies. This measure would allow Weatherford, Granbury, and the Tarrant County Water Control and Improvement District to contract for water unused by the other three entities until it is needed for navigation purposes.

Mr. President, this provision will allow these entities to provide needed water to their consumers. I believe the time is present to act on this issue. Contracts to develop the facilities to use the water need to be executed as soon as possible in order to expeditiously utilize this water that is now going to waste.

Mr. ABDNOR. Mr. President, I move passage of the bill as amended.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and to be read a third time. The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 779) was passed.

Mr. ABDNOR. I ask unanimous consent to have H.R. 779 enrolled and sent to the House as soon as possible.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UPDATE ON SCHEDULE FOR TODAY

Mr. BAKER. Mr. President, I rise to respond to an inquiry by the distinguished minority leader. It is my hope that we can do today the black lung bill, perhaps another tax bill to come from the Finance Committee, the Nuclear Regulatory Commission measure, the agents identities bill, perhaps a bill from the Commerce Committee, routine matters including the executive calendar, then the consideration by the Senate of the adoption of the sine die adjournment resolution. I announced earlier that I thought we could finish by 3 o'clock this afternoon. I must say I do not now think we can do that. The House of Representatives is not scheduled to begin debate, as I understand it, on the farm bill until 3 p.m. today. So we shall be somewhat later than that.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, it is within 3 minutes of the time to which we extended the time for transaction of routine morning business. I suggest that the Chair inquire as to whether there is further morning buiness to be transacted.

The PRESIDING OFFICER. The Chair inquires if there is further morning business.

There being none, morning business is closed.

BLACK LUNG BENEFITS REVENUE ACT OF 1981

The PRESIDING OFFICER. Under the previous order the clerk will state H.R. 5159.

The assistant legislative clerk read as follows:

A bill (H.R. 5159) to amend the Internal Revenue Code of 1954 to provide a temporary increase in the tax imposed on producers of coal, and for other purposes.

UP AMENDMENT NO. 798

(Purpose: Amendment in the nature of a substitute)

Mr. DOLE. Mr. President, I send to the desk an amendment in the nature of a substitute to H.R. 5159 and ask for its immediate consideration, and that the bill as thus amended be considered as original text.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment in the nature of a substitute numbered 798.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert the following:

TITLE I—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

Subtitle A—Black Lung Benefits Revenue Provisions

SEC. 101. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This subtitle may be cited as the "Black Lung Benefits Revenue Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this subtitle or subtitle B an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 102. TEMPORARY INCREASE IN AMOUNT OF TAX.

(a) GENERAL RULE.—Section 4121 (relating to tax on coal) is amended by adding at the end thereof the following new subsection:

"(e) TEMPORARY INCREASE IN AMOUNT OF TAX.—

"(1) IN GENERAL.—Effective with respect to sales after December 31, 1981, and before the temporary increase termination date—

"(A) SUBSECTION (a) SHALL BE APPLIED—

"(i) by substituting '$1' for '50 cents', and

"(ii) by substituting '50 cents' for '25 cents', and

"(B) subsection (b) shall be applied by substituting '4 percent' for '2 percent'.

"(2) TEMPORARY INCREASE TERMINATION DATE.—For purposes of paragraph (1), the temporary increase termination date is the earlier of—

"(A) January 1, 1996, or

"(B) the first January 1 after 1981 as of which there is—

"(i) no balance of repayable advances made to the Black Lung Disability Trust Fund, and

"(ii) no upaid interest on such advances.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to sales after December 31, 1981.

SEC. 103. BLACK LUNG DISABILITY TRUST FUND.

(a) GENERAL RULE.—The Internal Revenue Code of 1954 is amended by adding at the end thereof the following new subtitle:

"Subtitle I—Trust Fund Code

"SEC. 9500. SHORT TITLE.

"This subtitle may be cited as the 'Trust Fund Code of 1981'.

"CHAPTER 98—TRUST FUND CODE

"Subchapter A. Establishment of Trust Funds.

"Subchapter B. General provisions.

"Subchapter A—Establishment of Trust Funds

"Sec. 9501. Establishment of Black Lung Disability Trust Fund.

"SEC. 9501. ESTABLISHMENT OF BLACK LUNG DISABILITY TRUST FUND.

"(a) CREATION OF TRUST FUND.—

"(1) IN GENERAL.—There is established in the Treasury of the United States a trust

fund to be known as the 'Black Lung Disability Trust Fund', consisting of such amounts as may be appropriated or credited to the Black Lung Disability Trust Fund.

"(2) TRUSTEES.—The trustees of the Black Lung Disability Trust Fund shall be the Secretary of the Treasury, the Secretary of Labor, and the Secretary of Health and Human Services.

"(b) TRANSFER OF CERTAIN TAXES; OTHER RECEIPTS.—

"(1) TRANSFER TO BLACK LUNG DISABILITY TRUST FUND OF AMOUNTS EQUIVALENT TO CERTAIN TAXES.—There are hereby appropriated to the Black Lung Disability Trust Fund amounts equivalent to the taxes received in the Treasury under section 4121 or subchapter B of chapter 42.

"(2) CERTAIN REPAID AMOUNTS, ETC.—The following amounts shall be credited to the Black Lung Disability Trust Fund:

"(A) Amounts repaid or recovered under subsection (b) of section 424 of the Black Lung Benefits Act (including interest thereon).

"(B) Amounts paid as fines or penalties, or interest thereon, under section 423, 431, or 432 of the Black Lung Benefits Act.

"(C) Amounts paid into the Black Lung Disability Trust Fund by a trust described in section 501(c)(21).

"(c) REPAYABLE ADVANCES.—

"(1) AUTHORIZATION.—There are authorized to be appropriated to the Black Lung Disability Trust Fund, as repayable advances, such sums as may from time to time be necessary to make the expenditures described in subsection (d).

"(2) REPAYMENT WITH INTEREST.—Repayable advances made to the Black Lung Disability Trust Fund shall be repaid, and interest on such advances shall be paid, to the general fund of the Treasury when the Secretary of the Treasury determines that moneys are available in the Black Lung Disability Trust Fund for such purposes.

"(3) RATE OF INTEREST.—Interest on advances made pursuant to this subsection shall be at a rate determined by the Secretary of the Treasury (as of the close of the calendar month preceding the month in which the advance is made) to be equal to the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the anticipated period during which the advance will be outstanding.

"(d) EXPENDITURES FROM TRUST FUND.—Amounts in the Black Lung Disability Trust Fund shall be available, as provided by appropriation Acts, for—

"(1) the payment of benefits under section 422 of the Black Lung Benefits Act in any case in which the Secretary of Labor determines that—

"(A) the operator liable for the payment of such benefits—

"(i) has not commenced payment of such benefits within 30 days after the date of an initial determination of eligibility by the Secretary of Labor, or

"(ii) has not made a payment within 30 days after that payment is due,

except that, in the case of a claim filed on or after the date of the enactment of the Black Lung Benefits Revenue Act of 1981, amounts will be available under this subparagraph only for benefits accruing after the date of such initial determination, or

"(B) there is no operator who is liable for the payment of such benefits,

"(2) the payment of obligations incurred by the Secretary of Labor with respect to all claims of miners or their survivors in which the miner's last coal mine employment was before January 1, 1970,

"(3) the repayment into the Treasury of the United States of an amount equal to the sum of the amounts expended by the Secretary of Labor for claims under part C of the Black Lung Benefits Act which were paid before April 1, 1978, except that the Black Lung Disability Trust Fund shall not be obligated to pay or reimburse any such amounts which are attributable to periods of eligibility before January 1, 1974,

"(4) the repayment of, and the payment of interest on, repayable advances to the Black Lung Disability Trust Fund,

"(5) the payment of all expenses of administration on or after March 1, 1978—

"(A) incurred by the Department of Labor or the Department of Health and Human Services under part C of the Black Lung Benefits Act (other than under section 427(a) or 433), or

"(B) incurred by the Department of the Treasury in administering subchapter B of chapter 32 and in carrying out its responsibilities with respect to the Black Lung Disability Trust Fund,

"(6) the reimbursement of operators for amounts paid by such operators (other than as penalties or interest) before April 1, 1978, in satisfaction (in whole or in part) of claims of miners whose last employment in coal mines was terminated before January 1, 1970, and

"(7) the reimbursement of operators and insurers for amounts paid by such operators and insurers (other than amounts paid as penalties, interest, or attorney fees) at any time in satisfaction (in whole or in part) of any claim denied (within the meaning of section 402 (i) of the Black Lung Benefits Act) before March 1, 1978, and which is or has been approved in accordance with the provisions of section 435 of the Black Lung Benefits Act.

For purposes of the preceding sentence, any reference to section 402 (i), 422, or 435 of the Black Lung Benefits Act shall be treated as a reference to such section as in effect immediately after the enactment of this section.

"Subchapter B—General Provisions

"Sec. 9601. Transfer of amounts.
"Sec. 9602. Management of Trust Funds.

"SEC. 9601. TRANSFER OF AMOUNTS.

"The amounts appropriated by any section of subchapter A to any Trust Fund established by such subchapter shall be transferred at least monthly from the general fund of the Treasury to such Trust Fund on the basis of estimates made by the Secretary of the Treasury of the amounts referred to in such section. Proper adjustments shall be made in the amounts subsequently transferred to the extent prior estimates were in excess of or less than the amounts required to be transferred.

"SEC. 9602. MANAGEMENT OF TRUST FUNDS.

"(a) REPORT.—It shall be the duty of the Secretary of the Treasury to hold each Trust Fund established by subchapter A, and (after consultation with any other trustees of the Trust Fund) to report to the Congress each year on the financial condition and the results of the operations of each such Trust Fund during the preceding fiscal year and on its expected condition and operations during the next 5 fiscal years. Such report shall be printed as a House document of the session of the Congress to which the report is made.

"(b) INVESTMENT.—

"(1) IN GENERAL.—It shall be the duty of the Secretary of the Treasury to invest such portion of any Trust Fund established by subchapter A as is not, in his judgment, required to meet current withdrawals. Such investments may be made only in interest-bearing obligations of the United States. For such purpose, such obligations may be acquired—

"(A) on original issue at the issue price or

"(B) by purchase of outstanding obligations at the market price.

"(2) SALE OF OBLIGATIONS.—Any obligation acquired by a Trust Fund established by subchapter A may be sold by the Secretary of the Treasury at the market price.

"(3) INTEREST ON CERTAIN PROCEEDS.—The interest on, and the proceeds from the sale or redemption of, any obligations held in a Trust Fund established by subchapter A shall be credited to and form a part of the Trust Fund.".

(b) REPEAL OF SUBSECTIONS (A), (B), AND (C) OF SECTION 3 OF THE BLACK LUNG BENEFITS REVENUE ACT OF 1977.—Subsections (a), (b), and (c) of section 3 of the Black Lung Benefits Revenue Act of 1977 are hereby repealed.

(c) CLERICAL AMENDMENTS.—

(1) Clause (iii) of section 501(c)(21)(B) is amended by striking out "established under section 3 of the Black Lung Benefits Revenue Act of 1977" and inserting in lieu thereof "established under section 9501".

(2) The table of subtitles for such Code is amended by adding at the end thereof the following new item: "Subtitle I. Trust Fund Code.".

(d) EFFECTIVE DATE.—

(1) IN GENERAL.—The amendments made by this section shall take effect on January 1, 1982. Section 9501(c)(3) of the Internal Revenue Code of 1954 (as added by subsection (a)) shall only apply to advances made after December 31, 1981.

(2) SAVINGS PROVISIONS.—The Black Lung Disability Trust Fund established by the amendments made by this section shall be treated for all purposes of law as the continuation of the Black Lung Disability Trust Fund established by section 3 of the Black Lung Benefits Revenue Act of 1977. Any reference in any law to the Black Lung Disability Trust Fund established by such section 3 shall be deemed to include a reference to the Black Lung Disability Trust Fund established by the amendments made by this section.

SEC. 104. AMENDMENTS TO SECTION 424 OF THE BLACK LUNG BENEFITS ACT.

(a) INTEREST ON OPERATOR LIABILITIES.—

(1) RATE OF INTEREST.—Subsection (b) of section 424 of the Black Lung Benefits Act is amended by adding at the end thereof the following new paragraph:

"(5) The rate of interest under this subsection—

"(A) for any period during calendar year 1982, shall be 15 percent, and

"(B) for any period after calendar year 1982, shall be the rate established by section 6621 of the Internal Revenue Code of 1954 which is in effect for such period.".

(2) CLARIFYING AMENDMENT.—The first sentence of section 424(b)(1) of the Black Lung Benefits Act is amended by inserting "plus interest thereon" after "attributed to him".

(3) EFFECTIVE DATE.—The amendment made by paragraph (1) shall take effect on January 1, 1982, and shall apply to amounts outstanding on such date or arising thereafter.

(b) CONFORMING AMENDMENTS.—

(1) Section 402(h) of the Black Lung Benefits Act is amended to read as follows:

"(h) The term 'fund' means the Black Lung Disability Trust Fund established by section 9501 of the Internal Revenue Code of 1954.".

(2) Section 415(a)(1) of the Black Lung Benefits Act is amended by striking "section 424 of this title" and inserting in lieu thereof

"section 9501(d) of the Internal Revenue Code of 1954".

(3) Section 422(a) of the Black Lung Benefits Act is amended by striking "section 424" and inserting in lieu thereof "section 9501(d) of the Internal Revenue Code of 1954".

(4) Section 422(1)(4) of the Black Lung Benefits Act is amended by striking "section 424" and inserting in lieu thereof "section 9501(d) of the Internal Revenue Code of 1954".

(5) Section 422(j) of the Black Lung Benefits Act is amended by striking "section 424 shall" and inserting in lieu thereof "section 9501 of the Internal Revenue Code of 1954 shall"; and by striking "section 424(a)(1)" and inserting in lieu thereof "section 9501(d)(1) of the Internal Revenue Code of 1954".

(6) Section 424(a) of the Black Lung Benefits Act is amended to read as follows:

"(a) For purposes of this section, the term 'fund' has the meaning set forth in section 402(h).".

Mr. DOLE. Mr. President, I think I can explain this substitute within a very short period of time. I know this matter is of particular interest to the Senate minority leader (Mr. ROBERT C. BYRD) and others. I shall certainly yield at any time Senator BYRD wants the floor.

Mr. President, this amendment is essentially identical to the committee bill, S. 1957, that was ordered reported Monday, December 14, and is substantially identical to H.R. 5159. It is also very similar to the tax portions of the black lung bill drafted by the administration and supported by a broad coalition of labor, coal producers, and insurers. The amendment in the nature of a substitute makes a few technical and conforming changes to the committee bill and it deletes one Finance Committee amendment to the bill that would limit future borrowing by the black lung trust fund from the general fund of the Treasury. That was the amendment offered in the committee by Senator LONG. He has agreed to remove that amendment so the substitute does not contain that amendment.

HATCH AMENDMENT A NECESSITY

This is only one-half of the complete black lung bill the Senate should act on, however. H.R. 5159 and the substitute amendment is the tax-increase portion—the cut on the benefits side of the program, an essential change that is the quid pro quo for this tax increase, is the other half and will be offered by Senator HATCH. The two halves are inseparable—the tax-increase portion would not have been reported by the Finance Committee without the promise of benefit reform. If the benefit-reform amendment to be offered is not accepted, I intend to ask that further consideration of this bill be postponed.

I, for one, am not satisfied with the benefit-reform amendment. I see no reason, for instance, why we should not reopen cases—I am not sure how many there are, but there are some—where a miner has been disabled by obesity or accident and, because of the presumptions in the law, is receiving black-lung benefits. There are such cases, according to GAO, and they should be reexamined. This bill will not do that. We should correct this now, instead of next year or the following year, but I am informed that the House will accept no other reform at this time. Because of this, I am willing to support a bill that is primarily a tax increase.

PROVISIONS OF THE COMMITTEE BILL

The Finance Committee bill—the tax provision—does several straightforward things. First, it doubles, temporarily, the excise tax imposed upon coal producers—from 50 cents per ton for underground coal to $1, and from 25 cents per ton on surface-mined coal to 50 cents. The cap on the tax is raised from 2 percent of the sales price to 4 percent.

Second, the committee bill transfers the provisions of the black lung disability trust fund to the Internal Revenue Code. This will codify all the tax-related provisions of the program in one spot and simplify the process of amending those provisions.

Third, certain claims denied prior to March 1, 1978, but rereviewed and approved under the 1977 amendments and which had been assigned to operators would be transferred to the trust fund. This will reverse an inequitable effect of the 1977 amendments when claims that were not specifically insured against by operators, because pre-1977 law excluded them, were suddenly thrown in their laps.

Fourth, the committee bill would eliminate the present law obligation of the trust fund to pay retroactive lump sum benefits when an initial determination of eligibility is made but is contested by the operator.

Fifth, the committee bill alters interest rate charges, both on advances from the general fund of the Treasury and on reimbursements by operators, to a rate closer to a fair market rate.

NEED FOR PROMPT ENACTMENT

Enactment of this bill, this session, with both the tax increase and the benefit reforms offered by Senator HATCH, is imperative to stop the hemorrhaging of this program. At present, the black lung trust fund is approximately $1.5 billion in the red. At the rate it is going, it could be $9 billion in the red by 1995. If we do nothing, the taxpayers will continue to bear the cost of a wasteful program. If we enact this bill, the program will become a little less wasteful, the cost will be borne by producers and consumers of coal, and the trust fund should be solvent. I would like to do more to end the waste in this program, but this is a step in the right direction.

I would like to adopt a medically sound definition of black lung and reopen some of the closed cases. But, that cannot be done at this time. For this reason, I urge that we support this small step today to, at the least, get the program moving in the right direction.

II. PRESENT LAW

EXCISE TAX ON COAL

Under present law, a manufacturers excise tax is imposed on domestically mined coal, other than lignite, which is sold or used by the producer—code sections 4121 and 4218. The rate of tax is the lesser of: First, 50 cents per ton for coal from underground mines and 25 cents per ton for coal from surface mines; or second, 2 percent of the price for which the coal is sold.

Amounts equal to the revenues from this excise tax, plus any revenues from the penalty tax on certain expenditures from a coal mine operator self-insurance trust, described below, are automatically appropriated to the black lung disability trust fund.

BLACK LUNG DISABILITY TRUST FUND

The black lung disability trust fund was created in 1978 pursuant to the Black Lung Benefits Revenue Act of 1977, Public Law 95–227. The trustees of the fund are the Secretary of the Treasury, the Secretary of Labor and the Secretary of Health and Human Services. The Secretary of the Treasury is the managing trustee.

Amounts in the fund are available pursuant to appropriation acts to pay for benefits to certain coal miners who are totally disabled by pneumoconiosis—black lung disease—arising out of coal mine employment and to their survivors. Generally, the fund is required to pay benefits with respect to claims filed after June 30, 1973, and in which the miner's last coal mine employment was before January 1, 1970.

Also, the fund pays benefits if there is no coal mine operator among the miner's employers who is responsible for paying such benefits, a responsible operator, or if the responsible operator is in default. When an operator is determined to be responsible for the payment of benefits which in fact have been paid out of the fund, then the operator is obligated to reimburse the fund for those amounts plus interest computed at the rate of 6 percent per annum.

When receipts of the trust fund are less than its expenditures, advances are appropriated from the general fund of the Treasury to the trust fund. These advances are repayable, and interest on such advances is charged at a rate equal to the average rate of interest, computed as of the end of the calendar month preceding the month in which the advance is made, borne by all marketable interest-bearing obligations of the United States then forming a part of the public debt.

The expenses of the Department of Labor and the administrative expenses of the Department of Health and Human Services for the claims program financed through the trust fund are paid out of trust moneys. The fund also bears the cost of its own administration as well as the costs of administering collection of the excise tax on coal.

COAL MINE OPERATORS' SELF-INSURANCE TRUSTS

Present law provides that a responsible operator may fund its liability for black lung benefits through deductible contributions to a qualified tax-exempt trust, Code section 501(c)(21). To qualify, this trust must be established for the sole purpose of satisfying the operator's liability under Black Lung Acts, paying

premiums for insurance exclusively covering such liability and paying administrative expenses of the trust. Moneys of a qualified trust that are not needed to satisfy current liability may be invested only in Government securities or insured savings deposits.

Misuse of a trust due to self-dealing, Code section 4951, expenditures for an improper purpose, Code section 4952, or excessive contributions to the trust, Code section 4953, triggers certain excise taxes. Amounts collected under these provisions, which in the past have been very small, are deposited in the general fund, except that amounts equal to the taxes collected under the operation of Code section 4952 are appropriated to the black lung disability trust fund.

CONDITION OF THE BLACK LUNG DISABILITY TRUST FUND

For fiscal year 1981, it is estimated that the fund expended $644 million for benefits payments net of reimbursements, $36 million for administrative expenses and $109 million for interest, or a total expenditure of $789 million. Coal excise tax collections for fiscal year 1981 are estimated to have been $237 million, producing a deficit of $552 million for the year. Annual deficits of the fund were $19 million in fiscal year 1978, $401 million in 1979 and $536 million in 1980. Thus, the cumulative deficit of the fund at the close of fiscal year 1981 is estimated to be approximately $1.5 billion.

III. EXPLANATION OF THE BILL

EXCISE TAX ON COAL

Under the committee bill, the manufacturers excise tax on coal would be doubled to the lesser of: First, $1 per ton for coal from underground mines and 50 cents per ton for coal from surface mines; or second, 4 percent of the price for which the coal is sold. These rates would revert to present law rates on January 1, 1996, or, if earlier, on the first January 1 after 1981 as of which there is no balance of repayable advances made to the black lung disability trust fund and no unpaid interest on such balances.

The committee bill would also appropriate to the black lung disability trust fund amounts equal to the excise taxes collected under the operation of sections 4951, relating to self-dealing, and 4953, relating to excess contributions, in addition to the amounts appropriated under present law under the operation of section 4952, relating to taxable expenditure by a coal mine operator's self-insurance trust.

OBLIGATIONS OF THE TRUST FUND

Under the committee bill, certain claims which had been assigned to individual coal operators would be transferred to the black lung disability trust fund. In general, these are claims which had been denied prior to March 1, 1978, but which had been rereviewed and approved under the liberalized eligibility criteria and evidentiary standards of the Black Lung Benefits Reform Act of 1977, Public Law 95–239.

In addition, the committee bill would eliminate the present law obligation of the fund to pay retroactive lump sum benefits when an initial determination of eligibility is made but the responsible operator contests the award. However, the committee bill would not affect the present law obligation of the fund to pay benefits that accrue after this initial determination.

METHODS OF COMPUTING INTEREST

Under the committee bill, interest for any period charged by the black lung disability trust fund on amounts which the fund has paid and for which a mine operator is liable would generally be computed at the interest rate that applies for the period to tax deficiencies and overpayments under section 6621. However, for any period during calendar year 1982, this interest rate would be 15 percent.

In addition, the committee bill would amend the method for computing interest payable by the fund to the general fund on repayable advances. Under the committee bill, the interest rate that would be applied is a rate determined by the Secretary of the Treasury, as of the close of the calendar month preceding the month in which the advance is made, to be equal to the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the anticipated period during which the advance will be outstanding.

TRANSFER OF TRUST FUND PROVISIONS TO THE INTERNAL REVENUE CODE

Under the committee bill, provisions which establish the black lung disability trust fund and relate to its management and provisions by which amounts appropriated to the fund are transferred from the general fund of the Treasury would become provisions of the Internal Revenue Code of 1954. The black lung disablity trust fund that would be established by the bill would be treated for all purposes of law as the continuation of the black lung disability trust fund established by section 3 of the Black Lung Benefits Revenue Act of 1977.

GENERAL FUND BORROWING AUTHORITY

Mr. President, under existing law, there is permanent open ended authority for the black lung benefits trust fund to borrow from the general fund of the Treasury whenever the trust fund revenues are insufficient to meet benefit obligations. With the substantial tax increases provided for in the committee bill, it is estimated that no further borrowing will be needed after fiscal year 1985. Accordingly, the committee bill repealed the borrowing authority effective October 1, 1985. I have been authorized by Senator LONG, the author of this amendment to modify the committee amendment to delete this limitation on new borrowing authority.

EFFECTIVE DATES

In general, the provisions of the bill would take effect on January 1, 1982. Thus, the increased excise tax on coal would be effective for sales or use by a producer after December 31, 1981. The modified method for computing interest payable on repayable advances would apply to advances made after December 31, 1981. The modified method for computing interest on operator liabilities would take effect on January 1, 1982, and would apply to amounts outstanding on such date or arising thereafter.

IV. REVENUE EFFECT

The increased excise tax on coal is estimated to increase receipts of the black lung disability trust fund by $193 million in fiscal year 1982, $299 million in 1983, $313 million in 1984, $327 million in 1985 and $349 million in 1986.

The increased excise tax on coal is estimated to increase net tax receipts, after deduction for income tax purposes, by $141 million in fiscal year 1982, $218 million in 1983, $228 million in 1984, $239 million in 1985 and $255 million in 1986.

Mr. PROXMIRE. Mr. President, will the Senator yield for a question?

Mr. DOLE. I yield.

Mr. PROXMIRE. Did the Senator from Kansas say that this would double the tax on coal from 50 cents to $1?

Mr. DOLE. That is correct.

Mr. PROXMIRE. And would this be all coal or just coal that is deep-mined and therefore plays a part in causing black lung?

Mr. DOLE. From 50 cents a ton for underground coal to $1, and from 25 cents a ton for surface-mined coal to 50 cents.

Mr. PROXMIRE. What is the reason for the increase in surface-mined coal, since it does not make a contribution to black lung?

Mr. DOLE. I understand that it is part of the broad agreement reached by the operators and the insurers and those from coal States, and it is the one agreement that the administration is supporting. I was not privy to those discussions. I understand, however, that the surface mining of coal does contribute to black lung disease, though, of course, not as much as the underground mining of coal.

Mr. PROXMIRE. I ask the Senator what the total increase in tax burden will be as a result of this measure.

Mr. DOLE. The dollar amount of the increase?

Mr. PROXMIRE. The dollar amount.

Mr. DOLE. It is estimated to increase receipts in the black lung trust fund by $193 million in fiscal year 1982, $299 million in fiscal year 1983, $313 million in 1984, $327 million in 1985, and $349 million in 1986.

Mr. PROXMIRE. Does the Senator have any estimate of the inflation effect, if any, of this measure—increasing the price of coal and therefore having an effect on the cost of living?

Mr. DOLE. The Senator from Kansas understands that it is negligible, but it certainly will have some impact on consumer prices.

Mr. PROXMIRE. But it will be modest?

Mr. DOLE. Modest.

Mr. PROXMIRE. I thank the Senator.

Mr. CHAFEE. Mr. President, this is a classic case of the chickens coming home to roost.

I can recall in 1977 when that black lung program came out of the Human Resources Committee. At that time, the program was costing the Federal Government $700 million a year. That program came out with the most outrageous exemptions, and as a result, everybody who has ever seen a coal mine is now entitled to collect the black lung payments.

I recall that we had a colloquy on this. The then chairman of the Finance Committee and I discussed it, and he pointed out the dangers that would come from passage of that legislation. We did what we could, but we were steamrolled, and on it went.

The President held a signing ceremony in the Rose Garden to commemorate the great feat that had taken place, and the great feat that had taken place is that they opened wide the doors of the Treasury of the United States, and everybody collects.

When the present chairman of the Finance Committee says that we cannot make reforms now, at this time, we all know they will not ever be done if they are not done in connection with this piece of legislation.

Let me give some illustrations of who collects under this program.

At the time the legislation came up, it had a provision in response to objections to the delay that was taking place in the payment of the benefits. There was never a question that maybe these people were not entitled to benefits. So they provided in the legislation, in the Human Resources Committee, that the Federal Government, which makes the payment, would not have a chance to read the X-rays that came in from the minefields.

In other words, a miner would shop around and go to a doctor and say, "Do I have black lung?"

The doctor might say, "No, you do not."

So the miner would go to another doctor, and the doctor finally would say, "Yes, you have black lung." Up you come with the X-rays.

Under the then existing law, prior to 1977, the Federal Government had some people who would review the X-rays, and they found in something like 60 percent of the cases that the person did not have black lung. So they changed that. Why keep somebody from collecting the benefits?

So, under the 1977 bill when the X-ray came in from the minefield, the Federal Government, which was paying the bills, did not have the right to read the X-ray.

That was outrageous, and we made valiant efforts to change it. We had a rollcall vote, as the distinguished senior Senator from Louisiana remembers well. We lost by a vote of something like 47 to 45.

We changed it a little and said, "If you had less than 25 years in the mine fields, at least the Federal Government should have a chance to look at the X-rays. Please save a few nickles." That was finally defeated too.

Let me give another illustration. You work in a coal mine. You are hit in the head by a beam and are killed. Your wife is entitled to black lung payments. Why is she entitled to black lung payments if you are hit with a beam and killed? If you work in Louisiana or Rhode Island and you are hit in the head by a beam, you collect workmen's compensation payments, not black lung payments. But under this law you are entitled to black lung payments.

The rationale is that if you had not been hit in the head by that beam, you would have gotten black lung, and therefore you are entitled to the benefits.

I ask the distinguished manager of this legislation this question: What is the program costing now? Can the Senator tell us? It is not costing $700,000. If it is not costing a couple of billion dollars, I will be surprised.

Mr. DOLE. Let me give the exact dollar figure, so the Senator probably will not be surprised.

For fiscal year 1981, it is estimated that the fund expended $644 million for benefit payments, $36 million for administrative expenses, and $109 million for interest, or a total of $789 million.

The coal excise tax collections for fiscal year 1981 are estimated——

Mr. CHAFEE. Wait a minute. When we started this program I guessed it was costing $300 million. Now the Senator says it is costing about $800 million.

Mr. DOLE. In round numbers $800 million. I wish to finish.

Mr. CHAFEE. There must be some others in there.

Mr. DOLE. I wish to complete this recitation because it helps make the case the Senator is making and with which I am in sympathy.

Coal excise tax collections for fiscal year 1981 are estimated to have been $237 million, producing a deficit of $552 million for the year. Annual deficits of the fund were $19 million in fiscal year 1978, $401 million in 1979 and $536 million in 1980. Thus, the cumulative deficit of the fund at the close of fiscal year 1981 is estimated to be approximately $1.5 billion.

Mr. CHAFEE. There you have it. I wonder if there is anyone in the coal districts who is not collecting.

Mr. DOLE. Maybe Mr. PERKINS is not collecting.

Mr. CHAFEE. Everyone collects under this program. I take it under the so-called——

Mr. RANDOLPH addressed the Chair.

Mr. CHAFEE. Let me finish if I might. Under the so-called reforms, there is no review of past cases I take it.

Mr. DOLE. That is my understanding. The reform man has not arrived yet. He is Senator HATCH.

Mr. CHAFEE. That is an integral part of the legislation we are considering here today.

Mr. DOLE. Without that, without even those little steps, the Senator from Kansas is not about to pass just a tax increase. I say to the Senator from Rhode Island I have been visited by the Secretary of Labor and called by the Vice President. The Senator from Kansas was not too pleased with the legislation because I listened to the arguments last year of the Senator from Rhode Island and the Senator from Louisiana and others, and it seemed to me without some benefit changes we should not be passing tax increases, but I was persuaded we are at least moving in the right direction and would not be foreclosed from doing some of the things at a later time that the Senator from Rhode Island has been advocating.

Mr. CHAFEE. I do not know when we will get our chance to get the answers. Will it be when Mr. HATCH arrives with the so-called reforms?

Mr. DOLE. I may be able to answer. What is the other one?

Mr. CHAFEE. My question is, Under this legislation does the Federal Government that makes the payment get a chance to look at the X-rays?

Mr. DOLE. My understanding is that is not one of the reforms, at least for those beneficiaries already on the rolls.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. CHAFEE. I am glad to yield. Is this for a question or a statement?

Mr. RANDOLPH. Mr. President, I am grateful that my able colleague from Rhode Island permits me at this time to make a brief observation. I shall speak later in reference to the pending measure. I just came into the Chamber. I understand that the Senator from Rhode Island believes that everyone in the congressional district of Representative CARL PERKINS of Kentucky is receiving black lung payments. I may have heard that wrong as I came in the Chamber. I am not certain.

But I do wish to say that as of the latest figures there are 68 persons living as citizens in the State of Rhode Island who are receiving payments under black lung. So it is not confined to Representative PERKINS district. It is not confined to West Virginia. This is a nationwide program to compensate miners, their families, widows, and surviving children, including orphan minors. So as we discuss this matter today I am sure we will realize that we are not just zeroing in on a particular portion of the country that is engaged in coal mining, be it in Appalachia, the Midwest, the far West, or the Southeast.

Mr. President, I ask unanimous consent that a table showing the number of beneficiaries and the monthly amount, by State, be included in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

BLACK LUNG BENEFITS TO MINERS, WIDOWS, AND DEPENDENTS IN CURRENT-PAYMENT STATUS

[Number and monthly amount by State, September 1981][1]

State	Number				Monthly amount		
	Total	Miners	Widows	Dependents	Total	Miners	Widows
December, total:							
1970	111,976	43,921	24,889	43,166	$12,515,000	$8,785,000	$3,730,000
1971	231,729	77,213	67,358	87,158	27,250,000	16,430,000	10,820,000

[1] Benefits payable under the black lung program established by the Federal Coal Mine Health and Safety Act of 1969. The program is administered by the Social Security Administration but is from the general funds of the Treasury.

Mr. CHAFEE. I am grateful for the comments of the distinguished senior Senator from West Virginia about who is collecting where.

When we debated this in 1977 I made it very clear that those who are entitled to black lung payments should receive black lung payments. There is no argument over that.

But the trouble is that this program has become a compensation program for the dangers that are inherent in coal mining.

If we want to recognize that, let us do it. Let us say this is an extremely dangerous occupation, that coal miners die from a whole series of accidents, and we in Congress feel there should be some type of compensation for the widows and orphans of those who so die. Let us recognize that. I do not mind that. Let us proceed down that path.

But let us not say we are going to provide universal compensation for everyone associated with the coal business under the guise of saying they have black lung disease or that someone associated in their family has. That is what this program has become, as illustrated by the fact that if one dies from an accident in the mine after serving x number of years, his widow is entitled to black lung payments when there is no causal connection whatsoever with black lung disease.

Now we are in this deep trouble. So we are extending the payments, the levy, as was pointed out by the senior Senator from Wisconsin, to strip mining which is not all associated with black lung.

Black lung comes from those who are in the deep mines, not from those who are in strip mining.

It seems to me this is the classic case of a program that has gotten out of control, and it was recognized at the time it would get out of control.

I am not here to say we told you so, but an awful lot of Senators did stand up at the time and say this is exactly what would happen.

I am anxious to hear what the junior Senator from Utah will say in connection with the reforms that he will present.

Thank you, Mr. President.

Mr. RANDOLPH. Mr. President, will

my colleague yield for a further quick observation?

Mr. CHAFEE. I yield.

Mr. RANDOLPH. I may not have heard correctly, but I believe the Senator from Rhode Island said that as to the program of payments to those who have been afflicted in this hazardous industry with pneumoconiosis, or black lung, this does not apply to surface mining, just deep mining. Is that what he just said?

Mr. CHAFEE. That is my suggestion, yes. Certainly I am prepared to stand corrected on that if the Senator from West Virginia has other information.

Mr. RANDOLPH. It does apply to surface mining as well as to deep mining. I just want the record to be clear. Surface miners are eligible to apply for compensation.

I understand the feeling of the energetic opponent of this legislation who has spoken, I respect his judgment and his conscience. But during this debate I think we must make it very clear that in the Labor and Human Resources Committee in 1969, when we were to consider the occupational safety and health legislation, we decided that priority should be given to the coal mining industry from the standpoint of health and safety of the miners and those who might survive them. We delayed, as it were, the occupational health and safety legislation to 1970 and moved forward with the Coal Mine Health and Safety Act in 1969.

So at that time there was the realization by Congress in a nonpartisan way of the hazards of mining.

I am very ready to admit that I have seldom found any program that has come into being by congressional enactment, that has not had abuse—I use the word advisedly. Certainly errors and mistakes have been made in connection with the administration of the black lung legislation which is upon the books.

I am appreciative of the comments made by my colleague and I know they are made in good conscience and judgment.

But we must think in terms of those who are in the mining of coal in this country and what this product has meant to the fueling of America, to the contribution of energy and to the mobility of our Nation, the movement of products from the fields, the mine, and the factory.

This is a very important consideration. I will do it earnestly, but I will do it vigorously, and that is to give the facts as I understand them in connection with this worthwhile program.

Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, as a matter of general principle, protection against occupational injury and disease falls within the responsibility of the workers' compensation programs established by the States. When the black lung program was first enacted, the Congress did not intend to depart from this general principle on a permanent basis. The program was designed only to fill a temporary void in State workers' compensation coverage. Ongoing Federal responsibility was to be limited to claims filed before 1972. For all other claims, Federal responsibility was to cease as of 1976.

Although the program was enacted on this theory, the actual practice proved far different. The original 1969 provisions were liberalized in 1972, and the cut-off date for Federal payments was extended to 1981. Benefits proved more costly than originally projected. No State workers' compensation programs were found to meet the Federal standards. I would like the Senator from Rhode Island to hear this point: No State workers' compensation programs were found to meet the Federal standards. Most claims against mine operators were protested by the mine operators.

As a result of all these factors, this supposedly modest and supposedly temporary Federal measure became a very large charge against the Federal Treasury.

In 1977, an attempt was made to place the program on a self-supporting basis. Instead of funding the program out of an open-ended commitment of general revenues, the 1977 amendments proposed to fund the program out of a tax on coal. The proceeds from this tax were to be placed in a trust fund and used to meet all benefit costs. In return for removing this program as a charge on the general treasury, however, the sponsors of the 1977 amendments obtained agreement to several program liberalizations. These liberalizations required that some general fund advances be provided to cover the costs of the program in the first few years.

However, the Congress was assured that the program would soon be on a totally self-supporting basis. During the House consideration of the conference report on the 1977 liberalizations, the bill manager assured the House that there woull be no shortfall—that over the years 1978 to 1982 the legislation would generate revenues which would exceed benefit costs over the same period by more than $100 million.

In fact, however, this optimism proved totally unfounded. In practice, the revenues did not come close to meeting the costs of the program. Far from having a $100 million surplus by the end of 1982, the program is now projected to have a deficit totaling nearly $2 billion by then.

And the situation under present law would not get any better in the future. By 1985, a deficit of over $3 billion is projected and by 1990 the deficit will exceed $5 billion.

Now, however, we are presented with legislation which, we are promised, will cure this situation. Mostly, this legislation "cures" the problem by doubling the taxes involved. The bill also makes a few modest benefit reforms which achieve some savings, but those savings are more than offset by transferring certain mine operator liabilities to the trust fund.

As in 1977, the Congress is being asked to rely on estimates which purport to show that the fund will become self-sustaining. As in 1977, the proponents of the legislation indicate that some general fund borrowing will be needed but "only for the next few years." Perhaps, this time the estimates are more accurate than in 1977. I certainly hope they are.

Because of my concern about the financing of the black lung program, I proposed and the Finance Committee approved an amendment which would repeal the general fund borrowing authority at the point where it is estimated to be no longer needed. Under present law, annual advances from general revenues of the magnitude of $400 million are required. The proponents of this legislation project that the loan requirements will be reduced to about $200 million next year, $40 million by 1984, and only about $8 million in fiscal 1985. After that point, they project that no general fund borrowing authority will be needed.

The amendment allows the borrowing to continue for as long as it is projected to be needed—through fiscal 1985. At that point, however, since the borrowing authority would not be needed, it would be repealed.

Mr. President, I feel strongly about this matter and I feel that the amendment is needed. But in view of the pressures brought to bear by the White House and Senators who say that the amendment will prevent the bill from being enacted this year, I have agreed not to include the amendment in the pending black lung bill.

However, it is my intention to pursue this matter, and I will raise the amendment again next year.

I ask unanimous consent that there be printed in the RECORD at this point two tables relating to the black lung trust fund.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 1.—ACTUAL EXPERIENCE UNDER BLACK LUNG PROGRAM, FISCAL YEARS 1978–81

[Dollar amounts in millions]

Year	Local tax revenues [1]	General fund advances	Benefit and administrative expenditures	Interest on advances
1978	$93.2	$18.9	$112.1	----------
1979	221.7	400.8	614.2	$7.7
1980	272.3	535.8	756.0	52.5
1981	236.6	554.8	696.1	109.5
Total	823.9	1,510.3	2,178.4	169.7

[1] Includes $1,300,000 in interest payments by mine operators to the fund.

Source: Department of Labor.

TABLE 2.—COMPARISON OF CURRENT LAW AND LEGISLATIVE PROPOSAL

[In millions of dollars]

	Total obligations			Advances needed			End-of-fiscal year cumulative fund balance	
	Current law	Proposed [1] legislation	Savings	Current law	Proposed [1] legislation	Difference	Current law	Proposed [1] legislation
Fiscal year:								
1982	733.2	753.2	[2] −20.0	425.4	226.8	[3] 198.6	−1,952.1	−1,753.5
1983	721.7	692.4	29.3	394.2	59.1	335.1	−2,346.3	−1,812.6
1984	773.4	703.9	69.5	421.4	40.3	381.1	−2,767.7	−1,852.9
1985	823.6	712.0	111.6	451.7	7.5	444.2	−3,219.4	−1,860.4
1986	869.3	728.3	141.0	476.2	0	476.2	−3,695.7	−1,853.3
1987	903.5	731.0	172.5	484.3	0	484.3	−4,180.0	−1,803.9
1988	941.0	737.8	203.2	506.7	0	506.7	−4,686.7	−1,711.6
1989	985.9	739.9	246.0	546.8	0	546.8	−5,233.5	−1,583.6
1990	1,035.7	736.5	299.2	569.8	0	569.8	−5,803.3	−1,394.5
1991	1,085.9	726.0	359.9	593.4	0	593.4	−6,396.8	−1,142.3
1992	1,136.2	706.2	430.0	615.6	0	615.6	−7,012.3	−814.9
1993	1,186.3	675.6	510.7	635.9	0	635.9	−7,648.2	−398.1
1994	1,235.9	630.8	605.1	653.9	0	653.9	−8,302.1	+125.6
1995	1,284.7	619.5	665.2	669.4	0	669.9	−3,971.5	+119.4

[1] Assumes $0.50 (surface) and $1 (underground) coal excise taxes effective Jan. 1, 1982, through Sept. 31, 1994. Proposal provides for possible return to present rates at time of solvency, if sooner; this would be sometime in 1994 under these projections. Impact of 4-percent FOB tax cap could not be simulated directly; may delay retirement of total debt 1–2 years.

[2] Proposal costs more in 1st year due to impact of transferring 10,200 responsible operator cases to fund (of which an estimated 1,000 cases would not already have been in interim pay status).

[3] Even though trust fund obligations are higher in fiscal year 1982 under the proposal, fiscal year 1982 advances are smaller because of higher tax yield.

Source: Department of Labor, revised Oct. 30, 1981.

Mr. LONG. Mr. President, the problem here is very similar to the problem we have in regard to the disability insurance program. When we enacted that program we assumed that the costs would be well within the tax we levied. A few years later we found the costs were exceeding the original estimates by about four to one, and the reason was not that there was anything wrong with the estimates; the reason was that both the administrators and the courts had combined to place all sorts of people on those disability rolls whom Congress had never intended to put there.

They are tightening up on the program, tightening up on the administration, and in doing so they have brought that program within the revenues that are being raised.

It is impossible to have a program of this sort without bankrupting the Government, unless someone takes the hard-nosed position—I say hard-nosed, by that I mean it is a tough position—about this matter, that we are not going to pay the benefits where they were not intended, as has the Senator from Rhode Island, and as I have tried to do. Not that I do not have complete sympathy with those who have a marginal impairment to their health; but unless one carefully considers the views of the taxpayers and the problems of those paying the cost, these social welfare programs can be extended to all sorts of people whom no one ever intended be placed on those rolls.

That is the problem. There is no doubt that even under this bill, in my judgment, this program will continue to have more beneficiaries for the size of the program than Congress ever intended to fund or finance as compared with any other program in Government.

I hope when we take a look at this matter next year and in succeeding years we will insist, as the Finance Committee has tried to insist in regard to disability, that this program be limited to what Congress had in mind when it became involved in this.

Mr. CHAFEE. Mr. President, if I might ask a question, Are we not letting the horse out of the barn? What chance do we have to impose any restraints in the program once we have consented to the tax increase? In other words, we have let the inducements, as it were, be granted at this time without imposing the so-called reforms or sufficient reforms.

I personally have difficulty understanding it. Maybe we should let the program go along and run up these fearful deficits. So that there is at least some incentive to bring us to the table to try to enact some reforms. But if you give the benefits without enacting the reforms, the incentive for the reforms, of course, is gone.

Mr. LONG. Mr. President, the reason I have felt that I would not pursue the matter at this point is because the Reagan administration which is headed by a President who is economy-minded, even though it has been very, very tough with regard to a great number of these measures to try to put the genie back inside the bottle, just appears to have run out of political courage when they got to this point. But I think we would nevertheless give the administration credit for the efforts it has made in a great number of areas where it has tried to tighten up on the programs.

I hope that in future years the administration will play a strong hand in helping us to do the sort of thing that the Senator has advocated and the kind of thing the Senator from Louisiana has advocated to try to limit this program to the people that we had in mind when we voted for it.

But I say to the Senator that he is welcome to try, if he wants to; but he is going to find that unless he has the support of the administration in this matter, he is not going to get very far with it. He will be leading the charge of the light brigade, and although I may vote with him, I am here to tell the Senator that I believe these modest reforms that have been achieved are about the best that can be accomplished at this time.

Mr. CHAFEE. Mr. President, I recognize that there is a juggernaut assembled here—we have the administration, we have the industry, we have the unions. That is a formidable frontline. I always worry, when you see an alliance like that, how the public is making out in the deal.

I think one of the benefits, one of the reasons, as I understood from the brief description that the distinguished Senator gave is that coal mine operators are able to transfer some of their obligation? Is that correct? Are they getting out of something here?

Mr. LONG. Yes, there is a transfer of obligations here.

Mr. CHAFEE. I guess they are very enthusiastic about this program. They are enthusiastic about these reforms.

Mr. DOLE. They like these reforms, yes.

Mr. LONG. They will vote for it for that same reason, I assume. By the same token, that when these insurance companies and business groups no longer have their coattails caught in the wringer, I hope they would be the first to support your effort to try to limit the cost of the program

Mr. CHAFEE. The Senator has an optimism that I do not completely share.

I would like to ask the manager of the bill how this works. If you pass this, how are we going to have assurance that we will pass the reforms?

Mr. DOLE. Let me assure the Senator from Rhode Island that when I finish the tax portion of this proposal there will be a "reform" amendment offered by the distinguished Senator from Oklahoma or the Senator from Utah, if he is present. If for some reason that does not pass, then the bill comes down. We are not going to just pass a tax increase without any perception of reform, I can assure the Senator from Rhode Island.

Mr. CHAFEE. I am just curious mechanically how it works. We do not vote on this first?

Mr. DOLE. No; it is all one bill. It will be a nice package when it is completed, Christmas wrapped.

Mr. CHAFEE. No question about that. It will be a lovely package.

Mr. RANDOLPH. Will the able Senator from Kansas yield?

Mr. DOLE. Yes; I yield such time as the Senator wants; hopefully not much.

Mr. RANDOLPH. It will not be much.

I agree with the knowledgeable Senator from Louisiana (Mr. LONG) that there should be a tightening. As I said earlier, I have not found any measure passed by the Congress of the United States, in which there have not been abuses in its administration. There is always the need in all legislation and law to make modifications, to make changes, and to use the Senator's language, tighten it up. And we are ready and eager to do just that.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER (Mr. SYMMS). The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I cannot support this measure. From what I have been able to analyze, we have a black lung benefit program that was supposed to be an occupational disease or occupational illness compensation act. From what I can tell, it resembles a retirement program and I think it would be even far better called a retirement program for Eastern coal miners.

I do not like to deny anyone in this country what they are entitled to and I do not like to balkanize things, but obviously, strip coal miners do not get black lung. The benefits as distributed would clearly indicate that, even under this retirement program, we, in New Mexico, do not get the money and we are not asking for it. We do not get sick strip mining, so we do not ask for the benefits.

The problem is that many of the miners that are getting this retirement program are not sick either. The way we drafted this law, with all the various presumptions, it is indeed not an occupational disease benefit program; it is precisely what I have called it. Its cost is incredible and growing astronomically.

All of those reforms that we made in 1977, when we refused to accept the amendment of the distinguished Senator from Rhode Island (Senator CHAFEE)—I think it lost by one or two votes here in the Senate—they were all made in the name of unclogging this tremendous backlog of cases. Well, that is all good and something we should try to do.

But what we did is, we said so that we will not have any delays in finding out whether there is indeed somebody who is entitled to an occupational benefit, we should build in presumptions of the illness. We said people are sick if they are not sick and they will get the benefit and we do not have the time to do anything about it.

From my standpoint, to double the tax right now, in my State in the West, it will go from 25 to 50 cents per ton. If I saw some light at the end of the tunnel regarding the program's cost, I might even vote for this. But there is not any evidence here that this fund is going to be self-sufficient. We are still borrowing from the general fund even with a doubling of the tax. I just do not think in these times that we ought to do that.

You know who is going to pay for all of this. It just does not disappear, a dollar a ton and 50 cents a ton respectively. Those who consume electrical energy in this country are going to pay for it. They are going to pay for it in spades.

I think the best approach is to reform benefits. And then, if you reform them, get some authentic cost as to what they will be and then take a look at what we ought to do to increase the very logical source of revenue which is this tax on coal tonnage.

I hope the Senate understands that this program is indeed in need of reform, not just raising the base of taxation. I thank the Senator for yielding.

Mr. RANDOLPH. Will my colleague from New Mexico yield?

Mr. DOMENICI. I am pleased to yield to my good friend.

Mr. RANDOLPH. I have, earlier today, in a brief colloquy with Senator CHAFEE, indicated that not only is deep mining involved here, but surface mining is involved as well. And now I must say to my colleague from New Mexico that surface mining is a part of the coverage and has been, in reference to the Coal Mine Health and Safety Act.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, we are going to get into the reform section a little later. I would like to finish the tax side and let the reformers have their day, because I know they made a lot of great reforms, prospectively, and that will be discussed by the distinguished Senator from Oklahoma and others.

We did our work on the tax side. We increased taxes as part of the revenue enhancement program.

But I did want to respond to a question raised by the Senator from Wisconsin on surface mining, because I am advised that the current structure of the tax established the differential of 2 to 1 between deep mining and surface-mined coal.

In testimony before the subcommittee on July 27, 1981, Dr. Donald Marlar, of the National Institute of Occupational Safety and Health, stated:

> It is twice as likely that a miner would contract black lung from working in an underground mine as opposed to a surface mine.

So it is about a 2-to-1 ratio. I am sorry I did not have that information earlier.

I know of no other debate on the tax side. I certainly join with others who have indicated a need for more reforms. I must say, as I have indicated earlier, that when I was asked by the administration to move quickly on this proposal, I indicated I would certainly consider it, but I felt, as others stated on the floor, that unless we had some reform, we should not be increasing taxes or bailing out some insurers or whatever we were doing.

I was prevailed upon, as others have been, by the Vice President and by other Senators who have deep interests in this. I want to compliment the distinguished Senators from West Virginia and Kentucky and others who built this empire. It is fantastic.

I wish we could find something like it in Kansas.

In any event, the Vice President asked me on Saturday if I would be willing to try to get the Finance Committee to agree on the tax provision. We have done that and we are now in a position, I think, to support that proposal.

MODIFICATION TO UP AMENDMENT NO. 798

Mr. President, I send a modification to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Senator has the right to modify his amendment.

Mr. RANDOLPH. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. RANDOLPH. I do not wish to be provincial. However, in the Senate I have often voted for assistance and funds to make the corn grow taller in Kansas. Those of us who are intensely interested and knowledgeable in the coal mining industry also have records of helping throughout this country in reference to the production not only of foodstuffs but of other products of this Nation.

Mr. DOLE. Do not misunderstand me. I say it in complimentary fashion. I am not certain which Senator initiated the proposal, but I think it has been very effective. But having said that, I do believe, as others have indicated, that there are certainly some areas which have gotten out of hand. I do not suggest that anybody is advocating abuses of the program, but I suggest that it is a very generous program and, I think, one that we should be looking at. It is one that we have some responsibility for.

Under these changes, I might add, the provision which established the black lung disability trust fund in relation to the management provision, by which amounts appropriated to the fund would be transferred from general revenues, was a provision inserted by the Ways and Means Committee to assure that our committee has some ability to maintain the broader jurisdiction. We will be working with those who have a direct interest because they are from coal mining States and those who have other interests because of their committee assignments or budget chairmanships, whatever.

It is our hope that certainly those who need this benefit should have it and it should be generous for those who suffer from that dread disease. It is a very confining and difficult task that they perform. But as in any other case, we just cannot cover everyone. Again, that is the reform side or the benefit side which the Senator from Kansas is not an expert on.

Mr. DOMENICI. Will the Senator yield?

Mr. DOLE. Let me get to the amendment. I have modified my amendment.

The PRESIDING OFFICER. The Senator's amendment is modified.

The modification is as follows:

At the end thereof, insert the following:

Subtitle B—Miscellaneous Revenue Amendments

SEC. 111. ADDITIONAL 2-YEAR DELAY IN APPLICATION OF THE NET OPERATING LOSS RULES ADDED BY THE TAX REFORM ACT OF 1976.

Paragraphs (2) and (3) of section 806(g) of the Tax Reform Act of 1976 (relating to effective dates for the amendments to sections 382 and 383 of the Internal Revenue

Code of 1954) are amended by striking out "1982" each place it appears and inserting in lieu thereof "1984".

SEC. 112. INFORMATION RETURNS WITH RESPECT TO SAFE HARBOR LEASES.

(a) REQUIREMENT OF RETURN.—

(1) IN GENERAL.—Except as provided in paragraph (2), paragraph (8) of section 168 (f) of the Internal Revenue Code of 1954 (relating to special rule for leases) shall not apply with respect to an agreement unless a return, signed by the lessor and lessee and containing the information required to be included in the return pursuant to subsection (b) has been filed with the Internal Revenue Service not later than the 30th day after the date on which the agreement is executed.

(2) SPECIAL RULES FOR AGREEMENTS EXECUTED BEFORE JANUARY 1, 1982—

(A) IN GENERAL.—In the case of an agreement executed before January 1, 1982, such agreement shall cease on February 1, 1982, to be treated as a lease under section 168 (f) (8) unless a return, signed by the lessor and containing the information required to be included in subsection (b), has been filed with the Internal Revenue Service not later than January 31, 1982.

(B) FILING BY LESSEE.—If the lessor does not file a return under subparagraph (A), the return requirement under subparagraph (A) shall be satisfied if such return is filed by the lessee before January 31, 1982.

(3) CERTAIN FAILURE TO FILE.—If—

(A) a lessor or lessee fails to file any return within the time prescribed by this subsection, and

(B) such failure is shown to be due to reasonable cause and not due to willful neglect,

the lessor or lessee shall be treated as having filed a timely return if a return is filed within a reasonable time after the failure is ascertained.

(b) INFORMATION REQUIRED.—The information required to be included in the return pursuant to this subsection is as follows:

(1) The name, address, and taxpayer identifying number of the lessor and the lessee (and parent company if a consolidated return is filed);

(2) The district director's office with which the income tax returns of the lessor and lessee are filed;

(3) A description of each individual property with respect to which the election is made;

(4) The date on which the lessee places the property in service, the date on which the lease begins and the term of the lease;

(5) The recovery property class and the ADR midpoint life of the leased property;

(6) The payment terms between the parties to the lease transaction;

(7) Whether the ACRS deductions and the investment tax credit are allowable to the same taxpayer;

(8) The aggregate amount paid to outside parties to arrange or carry out the transaction;

(9) For the lessor only: the unadjusted basis of the property as defined in section 168(d)(1);

(10) For the lessor only: if the lessor is a partnership or a grantor trust, the name, address, and taxpayer identifying number of the partners or the beneficiaries, and the district director's office with which the income tax return of each partner or beneficiary is filed; and

(11) Such other information as may be required by the return or its instructions.

Paragraph (8) shall not apply with respect to any person for any calendar year if it is reasonable to estimate that the aggregate adjusted basis of the property of such person which will be subject to subsection (a) for such year is $1,000,000 or less.

(c) COORDINATION WITH OTHER INFORMATION REQUIREMENTS.—In the case of agreements executed after December 31, 1982, to the extent provided in regulations prescribed by the Secretary of the Treasury or his delegate, the provisions of this section shall be modified to coordinate such provisions with the other information requirements of the Internal Revenue Code of 1954.

SEC. 113. EXPENSES IN CONNECTION WITH BUSINESS USE OF A HOME, ETC.

(a) RENTAL TO FAMILY MEMBERS AND SHARED EQUITY AGREEMENTS PERMITTED.—

(1) IN GENERAL.—Subsection (d) of section 280A (relating to disallowance of certain expenses in connection with business use of home, rental of vacation homes, etc.) is amended by redesignating paragraph (3) as paragraph (4) and by inserting after paragraph (2) the following new paragraph:

"(3) RENTAL TO FAMILY MEMBER, ETC., FOR USE AS PRINCIPAL RESIDENCE.—

"(A) IN GENERAL.—A taxpayer shall not be treated as using a dwelling unit for personal purposes by reason of a rental arrangement for any period if for such period such dwelling unit is rented, at a fair rental, to any person for use as such person's principal residence.

"(B) SPECIAL RULES FOR RENTAL TO PERSON HAVING INTEREST IN UNIT.—

"(i) RENTAL MUST BE PURSUANT TO SHARED EQUITY FINANCING AGREEMENT.—Subparagraph (A) shall apply to a rental to a person who has an interest in the dwelling unit only if such rental is pursuant to a shared equity financing agreement.

"(ii) DETERMINATION OF FAIR RENTAL.—In the case of a rental pursuant to a shared equity financing agreement, fair rental shall be determined as of the time the agreement is entered into and by taking into account the occupant's qualified ownership interest.

"(C) SHARED EQUITY FINANCING AGREEMENT.—For purposes of this paragraph, the term 'shared equity financing agreement' means an agreement under which—

"(i) 2 or more persons acquire qualified ownership interests in a dwelling unit, and

"(ii) the person (or persons) holding 1 or more of such interests—

"(I) is entitled to occupy the dwelling unit for use as a principal residence, and

"(II) is required to pay rent to 1 or more other persons holding qualified ownership interests in the dwelling unit.

"(D) QUALIFIED OWNERSHIP INTEREST.—For purposes of this paragraph, the term 'qualified ownership interest' means an undivided interest for more than 50 years in the entire dwelling unit and appurtenant land being acquired in the transaction to which the shared equity financing agreement relates.".

(2) DEFINITION OF QUALIFIED RENTAL PERIOD.—Subparagraph (B) of section 280A(d)(4) (defining qualified rental period), as redesignated by paragraph (1), is amended by striking out "to a person other than a member of the family (as defined in section 267(c)(4)) of the taxpayer".

(b) TREATMENT OF EXPENSES WHILE AWAY FROM HOME IN PURSUIT OF TRADE OR BUSINESS.—Subsection (f) of section 280A is amended by adding at the end thereof the following new paragraph:

"(4) COORDINATION WITH SECTION 162(a)(2), ETC.—Nothing in this section shall be construed to disallow any deduction allowable under section 162(a)(2) (or any deduction which meets the tests of section 162(a)(2) but is allowable under another provision of this title) by reason of the taxpayer's being away from home in the pursuit of a trade or business (other than the trade or business of renting dwelling units).".

(c) PRINCIPAL PLACE OF BUSINESS APPLIES TO ANY TRADE OR BUSINESS.—Subparagraph (A) of section 280A(c)(1) (relating to certain business use) is amended to read as follows:

"(A) the principal place of business for any trade or business of the taxpayer.".

(d) REPAIR AND MAINTENANCE OF DWELLING UNIT.—The last sentence of paragraph (2) of section 280A(d) (relating to personal use of residence) is amended by inserting ", except that if the taxpayer is engaged in repair and maintenance on a substantially full time basis for any day, such authority shall not allow the Secretary to treat a dwelling unit as being used for personal use by the taxpayer on such day merely because other individuals who are on the premises on such day are not so engaged" after "paragraph".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1975, except that in the case of taxable years beginning after December 31, 1975 and before January 1, 1980 the amendments made by this section shall apply only to taxable years for which, on the date of the enactment of this act, the making of a refund, or the assessment of a deficiency, was not barred by law or any rule of law.

Mr. DOMENICI. I say to my good friend from Kansas that his response to the Senator from Wisconsin regarding the 2-to-1 tax ratio is indeed accurate. But I would say to my good friend that the next question should be asked, which is how many tons of coal does somebody who engages in strip mining produce relative to the incidence of black lung, versus those who are not so engaged? That is where the disparity occurs. The tonnage that you are taxing in strip mining per employee potentially exposed to the disease is some huge ratio, maybe 15 or 20 times as much as underground miners. Yet you tax strip mining 25 cents per ton, raising it to 50 cents per ton while the tax on underground coal is only double. My premise is that this is not an equitable way to tax in terms of which miners contract the dreaded disease.

I am not arguing that we should not pay from strip mined coal. I just think to double it, when we do not have any understanding of why we are paying the benefits for occupational disease, is not the right thing to do. It is not that strip mining should not pay its fair share. I would not even argue with the ratio, if we brought the whole spending base down, made it solvent, and did not have to go to the general fund on a regular basis and for a long, long time to come.

I thank the Senator.

Mr. DOLE. Mr. President, let me explain the modification of the amendment and let me also advise Members there will be one other amendment on the tax side to be discussed. Then we will turn to the benefit side.

I would say to the Members who have a direct interest that it is certainly not this Senator's intention to cut anyone off, but we do hope to get this measure passed and back to the House so it can be enacted and signed by the President. In addition to that, we have one other tax bill—and I might say I understand there is some concern about the second tax bill—and I would say in a general way that it is composed of amendments on which there have been hearings, with regard to which there are no objections by Treasury, upon which there are no objections by the Joint Tax Committee,

upon which there is committee agreement. There is no real revenue loss. Those are the only ones which will be considered in the second tax bill, which will be coming up following passage of this provision.

Mr. PROXMIRE. Would the manager indicate whether, in addition to the various measures he has suggested, there is a report available to the Senate so that we understand the language?

Mr. DOLE. Yes.

Mr. PROXMIRE. We would like the report from the committee as to how the amendments would work.

Mr. DOLE. We will furnish what we have. We do not have the final draft, but we have a draft we will be happy to furnish to the Senator.

Mr. PROXMIRE. Does that have the language?

Mr. DOLE. Yes; we have the language.

Mr. METZENBAUM. Would the Senator from Kansas yield?

Mr. DOLE. With reference to the black lung?

Mr. METZENBAUM. No; not with reference to the black lung. As I understand it, there are three measures having to do with taxes. One is the black lung bill on which the Senator from Kansas, as I understand, intends to add an amendment which would be directing the Secretary of the Treasury with respect to certain clarifications that would be expected. Is that the only thing that would be added to black lung?

Mr. DOLE. The Senator is correct. There will be three provisions which would be added. One would require the Secretary to report, I think by January 1982, information to the Treasury Department and the Joint Committee on Taxation with regard to the number of companies employing leasing and what the leasing transactions are. The Finance Committee believes this provision should be carefully monitored.

Mr. METZENBAUM. I understand the reporting of the leasing is one amendment that the Senator from Kansas is to add to the black lung bill. Is that correct?

Mr. DOLE. That is correct. I might say all of these were approved by the Finance Committee without objection. The other would be the home office deduction, the business deduction, for dwelling units held for rental income, and the third would be a 2-year postponement for the 1976 net operating loss rules.

Mr. METZENBAUM. Would the Senator from Kansas tell us what the cost would be to the Treasury of the second and third amendments?

Mr. DOLE. The leasing amendment reporting requirement——

Mr. METZENBAUM. That is the first one. I am talking about the second and third.

Mr. DOLE. The net operating loss postponement revenue impact is less than $5 million.

Mr. METZENBAUM. And the one with respect to the use of residences for business purposes?

Mr. DOLE. For fiscal 1982, it would be $93 million.

Mr. METZENBAUM. How much?

Mr. DOLE. Fiscal 1982 is $93 million fiscal 1983 is $51 million.

Mr. METZENBAUM. Is it retroactive as well?

Mr. DOLE. That includes the retroactive portion.

Mr. METZENBAUM. The retroactive part would be how much? $93 million?

Mr. DOLE. Yes, $93 million in fiscal 1982, and $51 million in 1983. It would be $68 million in fiscal 1984.

Mr. METZENBAUM. So we are talking about, in the next 3 years, $200 million in revenue loss.

Mr. DOLE. That is substantially accurate, yes.

If I could explain the modification, it might be helpful to the Senator from Ohio and others who are concerned about any of these provisions.

Mr. METZENBAUM. Surely.

Mr. DOLE. Mr. President, among the modifications that the Senator from Kansas has made to the amendment are three changes approved by the Committee on Finance. There is considerable interest in each of these three provisions, and I hope that we can expedite them by adopting this amendment.

THE HOME OFFICE DEDUCTIONS AND BUSINESS DEDUCTIONS FOR DWELLING UNITS HELD FOR RENTAL INCOME

Currently section 280A, added by the 1976 Tax Reform Act, limits the deduction of certain expenses incurred for the use of a dwelling unit in connection with a trade or business or income producing activity of the taxpayer if the taxpayer also uses the dwelling unit for personal purposes.

The Finance Committee amendment will liberalize existing home office rules to permit a business expense deduction for certain taxpayers having more than one trade or business. As long as a home office is the principal place of business for one of the taxpayer's businesses, the expenses will be deductible, even if that business is not the taxpayer's main business activity.

This amendment is consistent with recent decisions of the U.S. Tax Court under current law. The IRS has disagreed with this result in the past, and the statutory change will make clear that the Tax Court interpretation is correct.

In addition, we should encourage, not discourage, an individual who has enough industry to take on a second job operated out of his home.

The committee amendment will also alter rules disallowing business deductions when rental properties are rented to a taxpayers relatives. The committee amendment will no longer treat as personal use arm's-length rentals to family members for use as a principal residence. This provision will also permit certain financing arrangements involving co-ownership by the taxpayer and the lessee.

In an arm's-length transaction, expense deductions under the Tax Code should not depend on whether a taxpayer rents to a stranger or to a relative. If a taxpayer in an arm's-length transaction rents a dwelling unit to a relative, at fair rental value, for use as a principal residence, the Tax Code should not treat him any differently than it would had he rented to a stranger.

In addition, the Finance Committee amendment will make clear that if a taxpayer spends a day maintaining or repairing rental property, the day will not constitute a personal use day even if other family members accompany the taxpayer. Maintenance, however, must be the principal purpose of the trip. If a taxpayer spends a day to repair and maintain rental property, he should not be penalized by loss of deductions, because his teenage son accompanies him, but does not work all day. This amendment will clarify that such a day should not be counted as a personal use "vacation day" in limiting a taxpayers' deductions for rental property.

Finally, this provision will clarify that the personal use rules of section 280A will not be construed to deny otherwise allowable business expenses for travel away from home.

The Finance Committee amendment will make all of these changes in the operation of section 280A effective for open taxable years beginning after December 31, 1975.

THE 2-YEAR POSTPONEMENT IN THE 1976 NET-OPERATING LOSS RULES

The Tax Reform Act of 1976 substantially revised the rules of section 382 which limit net-operating loss carryovers of corporations that undergo a substantial change of ownership through stock purchases or reorganizations. The effective date of the 1976 act amendment was deferred because of technical problems. In the absence of further congressional action, the amendments will become effective on January 1, 1982, with respect to plans for reorganization adopted on or after that date and, for taxable years beginning after June 30, 1982, with respect to sales or exchanges of stock on or after January 1, 1982.

The Finance Committee amendment will provide for a 2-year deferral of the effective date of the 1976 act amendments.

This amendment will permit a careful review of the technical problems of the 1976 Tax Reform Act. It will also remove the uncertainty for taxpayers of a retroactive postponement of losses.

THE NEW LEASING REPORTING REQUIREMENT

This third modification in the amendment will provide in a timely fashion the information the Treasury Department and the Joint Committee on Taxation need to determine which companies are employing leasing, what the volume of leasing transactions is and, perhaps most importantly, how efficiently leasing is operating in providing capital investment incentives for lessees. The Finance Committee believes that this controversial provision must be carefully monitored to insure that it performs as we anticipated. Indeed, I am pleased to report, Mr. President, that our committee began its oversight review of this provision with a full

session with Treasury Department witnesses last Thursday.

It is consistent with this oversight function that we have required information returns to be filed as required by the House legislation. At the same time, we have avoided some of the harsh results provided by the House bill for failure to file. In particular, in the case of an inadvertent failure to file an information return a corrective filing may be made.

I think that our amendment thus makes significant improvement in the House bill and better balances our need for timely, comprehensive information with the need to treat taxpayers fairly and to minimize the burdens of such information reporting.

Those are the amendments and modification, the way I have modified my amendment.

In addition, I say to the Senator from Ohio and any other Senator, that I shall offer it as a separate amendment so that anybody who wants a vote on it will have that opportunity.

The separate amendment states that the Secretary shall prescribe amounts deductible—without substantiation—pursuant to the last sentence of 162(a) but nothing in subparagraph (A) or any other provisions of this title shall permit such a deduction for any taxable year for amounts in excess of the amendments determined to be appropriate under the circumstances.

I shall explain that amendment, although it will be offered separately, because I understand there is some interest in the amendment.

MEMBERS' EXPENSES

The amendment would address the difficult problems faced by a Member of Congress in allocating between deductible business expenses and nondeductible personal expenses.

PROBLEM OF ALLOCATION OF EXPENSES

Present law allows a Member, as a businessman away from home, to deduct as business expenses cost he incurs as a result of having to be in Washington when Congress is in session. It does not allow a Member to deduct the costs entailed in having his family with him. Those are personal expenses.

In the case of most Members of Congress, the cost of lodging, meals, or transportation will be a single amount covering both the Member and his or her family. It would be difficult to determine what portion of groceries purchased for the whole family is attributable to the Member's consumption. The determination could be taken to the absurd in allocating in accordance with the exact amount consumed by each person.

Also, it would be very difficult to be precise in allocating between business use and personal use, home furnishings such as a lamp, a table, or a couch. Would the determination depend on the room in which the lamp or table is located? Would the Member have to establish the amount of time he or she used the lamp or table?

A REASONABLE ALTERNATIVE

It is without question that it would be desirable to attempt to find a way to solve these administrative and recordkeeping problems if we can do it in a manner that is both reasonable and fair.

Undoubtedly, we would be criticized if we established specific rules ourselves.

It has been suggested that we might specifically provide by statute the same per diem which other Federal employees receive in Washington, D.C., which amounts to $75 per day.

This Member is certain that some commentators would find fault with any rule we could devise.

This amendment will provide a basis for the Secretary to make a determination of what recordkeeping relief is appropriate under the circumstances for a Member of Congress—in other words, the Secretary of the Treasury would be directed to determine what amount would be appropriately deducted, without substantiation, for Members expenses incurred in Washington, D.C.

There is precedent for this, as I have suggested. In the Economic Recovery Tax Act, there was a provision for State legislators. The amount deductible is linked to an amount established by the General Services Administration, which makes periodic investigations of the cost of travel of Government employees while on official business. The rates are revised after these investigations to insure that reimbursement is allowed only to the extent necessary to cover actual costs.

It would seem to this Senator that the Secretary of the Treasury should be capable of determining an appropriate amount to reflect actual costs of a Member which could be deducted if a Member does not, or cannot, determine his deductible expenses on an exact basis.

That amendment is not now pending. I just meant to mention that if some Member wants to discuss it. I ask unanimous consent to have printed at this point a detailed analysis of the committee amendment.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

TECHNICAL EXPLANATION OF COMMITTEE AMENDMENT

Additional Two-Year Postponement in the Application of the Net Operating Loss Rules Added by the Tax Reform Act of 1976.

(Sec. 111 of the amendment and sec. 382 of the Code.)

PRESENT LAW

Present rules

If new owners purchased 50 percent or more of the stock of a loss corporation during a 2-year period, the corporation's loss carryovers from prior years generally were allowed in full only if the corporation continued to conduct its prior trade or business or substantially the same kind of businesses. However, if the same business was not continued, loss carryovers generally were completely eliminated. This "purchase" rule applied where one or more of the 10 largest shareholders increased their stock ownership, within a 2-year period, by 50 percentage points or more in a transaction in which the purchasers took a cost basis in their stock (except where the stock was acquired from related persons).

In the case of a tax-free organization, loss carryovers were allowed on a declining scale. If the former owners of the loss company received 20 percent or more of the fair market value of the stock of the acquiring company, the loss carryovers were allowed in full. For each percentage point less than 20 which the former owners received, the loss carryover was reduced by five percent. It was immaterial whether the business of the loss company was continued after the reorganization.

1976 Tax Reform Act rules

The 1976 Act extensively revised the Code provisions dealing with the carryover of net operating losses in cases of acquisitions of loss corporations. The same limitations on loss carryover attributes were to apply to acquisitions made by purchase or through corporate reorganizations. The new provisions changed the basic concepts underlying the rules by deleting the prior continuity of business requirements for purchases and establishing a new continuity of ownership test applicable to both purchases and reorganizations.

Under the 1976 Act, these new provisions were to apply to plans of reorganization adopted on or after January 1, 1978, and to sales or exchanges for taxable years beginning after June 30, 1978. However, the Revenue Act of 1978 extended these effective dates to January 1, 1980, and June 30, 1980. Public Law 96–167 again extended the effective dates until January 1, 1982, with respect to plans of reorganization adopted on or after that date, and until taxable years beginning after June 30, 1982, with respect to sales and exchanges taking place after January 1, 1982. These postponements of the effective dates of the 1976 Act provisions were adopted because a number of technical problems made it advisable to consider additional revisions of the rules.

REASONS FOR CHANGE

Numerous matters, including consideration of the Economic Recovery Tax Act of 1981, have occupied the committee's attention since the most recent effective date extension. As a result, the technical problems present in the 1976 amendments have not yet been resolved. Accordingly, the committee concluded that additional time is needed to resolve these technical problems.

EXPLANATION OF PROVISION

The amendment delays the effective date of the 1976 Act provisions for an additional two years, until January 1, 1984, with respect to plans of reorganization adopted on or after that date, or until taxable years beginning after June 30, 1984, with respect to sales or exchanges after January 1, 1984.

REVENUE EFFECT

The amendment is estimated to reduce budget receipts by less than $5 million annually during the postponement period.

Filing of Information Return Relating to Transactions Under the Safe Harbor Leasing Provisions of Public Law 97–34. (Sec. 112 of the amendment.)

PRESENT LAW

The benefits of depreciation deductions and investment credits attributable to property generally are available only to the owner of the property. In many cases, companies in a tax loss position and thus unable to use currently the tax benefits of owning equipment have been able to obtain a portion of those benefits indirectly by leasing the equipment from companies having sufficient taxable income to use the tax benefits. The use of the tax benefits by the leasing company would be reflected in reduced rental payments charged to the loss company. Prior to the Economic Recovery Tax Act of 1981 (ERTA), the determination of whether these "lease financing" transactions should be treated for tax purposes in accordance with their form as leases or whether they should be recharacterized as in substance conditional sales or financing arrangements required a case-by-case analysis.

Section 201 of ERTA provides a safe harbor that guarantees a transaction will be treated as a lease, rather than a financing arrangement, even though the transaction would not otherwise be a true lease. If the safe harbor requirements are met, the nominal

lessor will be treated as the owner of the property for Federal income tax purposes. Thus, the lessor will be entitled to the associated cost recovery allowances and investment credit.

To be eligible for the safe harbor, the following requirements must be met:

(1) All parties to the agreement must elect;

(2) The nominal lessor must be (a) a corporation (other than a subchapter S corporation or a personal holding company), (b) a partnership all of the partners of which are one of those corporations, or (c) a grantor trust with respect to which the grantor and all beneficiaries of the trust are corporations or a partnership comprised of corporations;

(3) The lessor must have a minimum at-risk investment in the property at all times during the lease term of at least ten percent of the adjusted basis of the property;

(4) The lease term must not exceed the greater of 90 percent of the property's useful life or 150 percent of the ADR midpoint life of the property; and

(5) The property must be "qualified leased property."

Treasury issued temporary regulations interpreting the safe harbor provisions on October 23, 1981 (46 FR 51907). Those regulations were clarified by a second set of temporary regulations on November 13, 1981 (46 FR 56148).

The temporary regulations issued by Treasury contain a requirement that the lessor and lessee must file information returns concerning their election under section 168(f)(8) (Temp. Reg. § 5c–168(f)(8)–2(a)(3)). If the information return is not properly filed by the lessor, the agreement ceases to be treated as a lease, which may result in recapture of tax benefits.

The information return must contain the following information:

(A) The name, address and taxpayer identifying number of the lessor and the lessee;

(B) The district director's office with which the income tax returns of the lessor and lessee are filed;

(C) A description of each property with respect to which the election is made;

(D) The date on which the lessee places the property in service (determined as defined in § 5c.168(f)(8)–6(b)(2)(i)), the date on which the lease begins and the term of the lease;

(E) The recovery property class of the leased property under section 168(c)(2) (for example, 5 years);

(F) For the lessor: the unadjusted basis of the property as defined in section 168(d)(1);

(G) For the lessor only: if the lessor is a partnership or a grantor trust, the name, address, and taxpayer identifying number of the partners or the beneficiaries, and the district director's office with which the income tax return of each partner or beneficiary is filed; and

(H) Such other information as required by the return or its instructions.

The return must be filed by each party with the income tax return for its taxable year during which the lease term begins. However, for taxable years ending in 1981 with respect to lease agreements executed during calendar year 1981, such statement must be filed by the later of (1) the due date (taking extensions into account) of the party's 1981 tax return, or (2) when filing of an amended return is required, with the amended return within 3 months following execution of the lease agreement.

REASONS FOR CHANGE

The committee desires taxpayers to file information quickly concerning "safe harbor" leases in order that the Congress and the Treasury Department have this information to evaluate the new leasing provisions.

EXPLANATION OF PROVISION

Overview

Under the committee amendment, an information return will be required to be filed with the Internal Revenue Service in order for an agreement to qualify as a "lease" under the provisions of the accelerated cost recovery system (sec. 168(f)(8)). The return will be required to be filed with the National Office of the Internal Revenue Service not later than the 30th day after the date the agreement is executed, or January 31, 1982, whichever is later.

Contents of return

The following information will have to be included in the return:

(1) The name, address, and taxpayer identifying number of the lessor and the lessee (and parent company of the lessor or lessee if a consolidated return is filed);

(2) The district director's office (or service center, if applicable) with which the income tax returns of the lessor and lessee are filed;

(3) A description of each individual property with respect to which the election is made;

(4) The date on which the lessee places the property in service, the date on which the lease begins and the term of the lease;

(5) Recovery property class and the ADR midpoint life of the leased property;

(6) The payment terms between the parties to the lease transaction;

(7) Whether the ACRS deductions and the investment tax credit are allowable to the same taxpayer;

(8) Subject to a de minimus rule, the aggregate amount paid to outside parties to arrange the transaction, such as legal and investment banking fees;

(9) For the lessor only: the unadjusted basis of the property as defined in section 168(d)(1);

(10) For the lessor only: if the lessor is a partnership or a grantor trust, the name, address, and taxpayer identifying number of the partners or the beneficiaries, and the district director's office with which the income tax return of each partner or beneficiary is filed; and

(11) Such other information as may be required by the return or its instructions.

Treasury authority to modify requirements

In the case of leases executed after 1982, the Secretary of the Treasury or his delegate may modify the information requirements or filing requirement to coordinate with other information requirements, such as the requirement to file a tax return.

EFFECTIVE DATE

The amendment will apply to recovery property placed in service after December 31, 1980.

REVENUE EFFECT

The amendment will not affect budget receipts.

Effect of failure to file

Under the general rule applicable to leases executed after December 31, 1981, if the lessor and lessee fail to file the return within 30 days after execution of the agreement, the safe harbor provisions will not apply to the agreement for any period of time.

Under a transitional rule for leases executed before January 1, 1982, the agreement will cease to be treated as a lease on February 1, 1982, unless either the lessor or the lessee file the return by January 31, 1982. If the agreement ceases to be characterized as a lease under the safe harbor as a result of a failure to file the information return, the consequences will depend upon the characterization of the parties without regard to the safe harbor. If the lessee would be the owner without regard to the safe harbor, there may be recapture of tax benefits to the lessor. If, without regard to the safe harbor, the lessor would be the owner and the transfer by the lessor would be a lease, the transaction will continue to be treated as a lease.

Exception for failure to file due to reasonable cause

Under both the general rule and transitional rule, if the failure to file is shown to be due to reasonable cause, and not due to willful neglect, the lessor or lessee will be treated as having filed a timely return if a return is filed with the Internal Revenue Service within a reasonable time after the failure to file is ascertained.

Rental of Residences to Family Members and Other Business Use of Residences.

(Sec. 113 of the amendment and sec. 280A of the Code.)

PRESENT LAW

In general

Section 280A, enacted as part of the Tax Reform Act of 1976, disallows the deduction of certain expenses incurred in connection with the use of the taxpayer's home in a trade or business or income-producing activity or in connection with the rental of vacation homes and other residential real estate. The restrictions in section 280A were enacted to replace vague standards on which courts and the Internal Revenue Service differed with more definitive, objective statutory tests for determining the deductibility of expenses. Section 280A applies to individuals, trusts, estates, partnerships, and electing small business corporations.

The deductions under sections 163, 164, and 165 for interest, certain taxes, and casualty losses attributable to a taxpayer's personal residence are not affected by section 280A.

Business use of the home

Unless specifically excepted from section 280A and otherwise allowable, no deductions are allowed with respect to a dwelling unit because of its connection to a taxpayer's trade or business or income producing activities, if the taxpayer uses the dwelling as a residence. One exception to the general rule of section 280A allows deductions attributable to a portion of the taxpayer's residence which is exclusively used on a regular basis as the taxpayer's principal place of business.

On August 7, 1980, proposed Treasury Regulations under section 280A were published in the Federal Register (45 Fed. Reg. 52399). The proposed regulations would define "the taxpayer's principal place of business' as the principal place of the taxpayer's overall business activity. A taxpayer would have only one principal place of business regardless of the number of business activities in which the taxpayer is engaged. The proposed regulations do not follow the U.S. Tax Court decision in *Curphey* v. *Commissioner*, 73 T.C. 763 (1980), which allowed a hospital-employed dermatologist to deduct expenses for a home office which was the principal place of business for his real estate rental business.

Personal use of residence

Section 280A, in general, limits the amount an individual or subchapter S corporation may deduct for expenses attributable to the business use of a dwelling unit, which is in many cases the rental of a vacation home, if the taxpayer's use of the unit for personal purposes is in excess of a specified period of time during a taxable year. This limitation applies only if the taxpayer's use of the dwelling unit for personal purposes during a taxable year exceeds the greater of fourteen days or ten percent of the number of the days during the year for which the unit is rented at a fair rental. If a taxpayer exceeds these personal use limitations, deductions attributable to the business activity are limited to

the amount by which the gross income derived from the business use of the dwelling unit exceeds the deductions otherwise allowable without regard to such business activities (*e.g.*, interest and certain taxes).

If the taxpayer uses a dwelling unit for personal purposes during a taxable year (whether or not the personal use exceeds the personal use limitations), the amount deductible with respect to the expenses attributable to the rental of the dwelling unit is limited to a portion of such expenses, based on the number of days the dwelling unit is rented at a fair rental compared to the total number of days the dwelling unit is used during the taxable year.

The taxpayer generally is deemed to have used a dwelling unit for personal purposes for a day if, for any part of the day, the unit is used for personal purposes by (1) the taxpayer or any other person who has an interest in the home, (2) the brothers and sisters, spouse, ancestors, or lineal descendants of the taxpayer or other owners, (3) any individual who uses the unit under a reciprocal arrangement (whether or not a rental is charged), or (4) any other individual who uses the dwelling unit during a day unless a fair rental is charged.

The Revenue Act of 1978 amended section 280A to provide that the use of a dwelling unit as a taxpayer's principal residence (within the meaning of section 1034) is not to be treated as personal use in determining whether the limitations of section 280A apply to deductions attributable to a "qualified rental period" which immediately precedes or follows a period of use as the taxpayer's principal residence. Under section 280A, a qualified rental period generally is a period of 12 or more consecutive months during which the unit is rented to a person other than a family member, or held for rental, at a fair rental. Thus, section 280A does not apply in the year a taxpayer converts a personal residence into a rental unit or a rental unit into a personal residence, if the period the unit is a rental unit is at least 12 months.

Repairs and Maintenance

Section 280A also provides that the Secretary of the Treasury must prescribe by regulation the circumstances under which use of a dwelling unit for repairs and annual maintenance will not constitute personal use of the unit. Under the proposed regulations published on August 7, 1980, an individual would have to be engaged in repair or maintenance work for a day on a substantially full-time basis i.e., the lesser of eight hours or two-thirds of the time present on the premises, to qualify the day's use of the unit as use for repairs and maintenance. The proposed regulations would require that all individuals on the premises on a day must be engaged in work on the unit on a substantially full-time basis, to avoid the day being treated as one of personal use. However the proposed regulations would disregard the presence of individuals, such as small children, who are incapable of working.

Reasons for Change

The committee believes that the general limitations of section 280A(a) should not apply to a taxpayer's expenses of maintaining a home office merely because the taxpayer has more than one business and does not conduct his principal business from his home.

The committee is also concerned that the personal use limitations of section 280A unnecessarily penalize taxpayers who rent principal residences to family members on the same terms as rentals to unrelated third parties. In addition, the personal use limitations are hampering the ability of taxpayers to obtain affordable housing through creative financing arrangements.

The committee believes that the rental of dwellings at a fair rental for use as a principal residence and the use of a dwelling for business travel purposes are not subject to the same abuses as rentals of vacation homes and, therefore, should not be subject to the limitations of section 280A.

The committee also believes that if a taxpayer spends a normal working day repairing or maintaining a dwelling, Treasury regulations should not treat the taxpayer as having used the dwelling for personal purposes merely because other persons who are on the premises do not work on a substantially full-time basis on such day.

EXPLANATION OF PROVISION

Business use of the home

The committee amendment amends section 280A(c)(1)(A) to provide that the general limitation on deductions in section 280(A) shall not apply to expenses allocable to the regular and exclusive use of a portion of a taxpayer's residence as the principal place of business for any trade or business of the taxpayer. Thus, a taxpayer could have a distinct principal place of business for each separate trade or business and could deduct expenses attributable to the use of a residence as the principal place of business for one or more such businesses, provided the regular and exclusive use requirements are met.

Rentals to family members and co-owners

Under the committee amendment, section 280A(d) is amended to provide that a taxpayer will not be treated as using a dwelling unit for personal purposes by reason of a rental arrangement under which the dwelling unit is rented to any person at a fair rental for use as such person's principal residence. Thus, the rental of a dwelling unit to a member of the taxpayer's family or the family of a co-owner of the dwelling unit does not constitute the personal use of the dwelling unit by the taxpayer if the dwelling unit is rented at a fair rental for use as the family member's principal residence. Of course, if the taxpayer continues to use the dwelling unit, such use will be considered personal use by the taxpayer notwithstanding the rental agreement. Similarly, in the rules relating to rentals of the taxpayer's principal residence, the definition of "qualified rental period" is amended so that a member of the taxpayer's family is treated in the same manner as a rental to an unrelated third party. The committee intends that fair rental be determined by taking into account such factors as: (1) comparable rentals in the area; and (2) whether substantial gifts were made by the taxpayer to the family member at or about the time of the lease or periodically during the year.

In the case of rentals to a person who has an ownership interest in the dwelling unit, the committee amendment provides that the new rule applies only if the rental is under a shared equity financing agreement. In addition, the determination of whether the dwelling unit is rented at a fair rental to the co-owner is to be determined by taking into account the co-owner's ownership interest in the dwelling unit. The committee amendment defines a "shared equity financing agreement" as an agreement under which two or more persons acquire a dwelling unit and one or more of such persons is entitled to occupy the dwelling unit as a principal residence and is required to pay rent to the non-occupant co-owners. Each of the co-owners must acquire an undivided interest for more than 50 years in the entire dwelling unit and any appurtenant land acquired in the transaction to which the shared equity financing agreement relates.

Under the committee amendment, these rules generally apply in determining whether a lessor has used a dwelling unit for personal purposes. If the lessee also used the dwelling unit in a trade or business, e.g., used a portion of the dwelling unit as a home office, the determination of whether the lessee had used the dwelling unit as a residence during the taxable year will not be affected by the determination that the lessor had not used the dwelling unit for personal purposes. For example, if taxpayers A and B are co-owners of a dwelling unit that is rented to B as his principal residence at a fair rental under a shared equity financing agreement, A would not be considered to have used the dwelling unit for personal purposes by reason of the rental arrangement. However, B would be considered to be using the dwelling unit for personal purposes during the period he occupies it as his principal residence. If B sublets a portion of the dwelling unit to a family member at less than a fair rental, the family members use would be considered personal use by B, notwithstanding the fact that the dwelling unit is also being rented to B at a fair rental as his principal residence. However, the sublease would not be considered personal use of the dwelling unit by A unless the sublessee were also a member of A's family.

The committee amendment also provides that section 280A is not to be applied to limit any deduction allowable under section 162(a)(2) (or any deduction that meets the tests of section 162(a)(2) but is allowable under another provision of the Code) by reason of the taxpayer's being away from home in the pursuit of a trade or business (other than the trade or business of renting dwelling units).

Repair and maintenance

The committee amendment also provides that, notwithstanding any ruling, proposed regulation, or regulation to the contrary, a dwelling shall not be treated as used for the personal purposes of the taxpayer on a day the taxpayer repairs or maintains the dwelling on a substantially full-time basis because other persons who are on the premises on such day do not work on a substantially fulltime basis on such day.

EFFECTIVE DATE

The amendment will apply to taxable years beginning after December 31, 1975. Taxpayers can file claims for refund based on the amendments made by this provision, but only to the extent such claims are not otherwise barred under the pertinent limitations provisions of the Code.

REVENUE EFFECT

The amendment is estimated to reduce fiscal year budget receipts by $93 million in 1982, $51 million in 1983, $68 million in 1984, $100 million in 1985, and $148 million in 1986.

Mr. PROXMIRE. Mr. President, will the Senator make copies of that amendment available so we may have copies of it available?

Mr. DOLE. Certainly.

Let me offer the amendment.

Mr. DOLE. The Senator from Ohio has a copy of the amendment. Let me offer the amendment.

Mr. METZENBAUM. In the interim, will the Senator from Kansas be good enough to advise me about this? I think I know the answer, but I want to be certain. The amendment having to do with residences to be used in part for business purposes has no language in it, either directly or indirectly, which would provide a special advantage to Members of Congress. Is that correct?

Mr. DOLE. Is the Senator talking about the amendment I have not yet introduced?

Mr. METZENBAUM. No. I am talking about the amendment having to do with the use of residences for partial business purposes, the one that I think involves

about $200 million in revenue loss. I am asking whether or not there is anything in that amendment—which I have not had an opportunity to study—which would provide a special advantage for Members of Congress.

Mr. DOLE. The amendment codifies tax court case, Curphey against Commissioner. It also clarifies that application of section 280A to a change made in the continuing resolution. As I understand the current law, if you are here without a family, you can deduct housing expenses, and if your family is with you, you may not be able to deduct even a portion of those housing expenses.

Mr. METZENBAUM. It is my understanding that that part of the amendment contained only the issue having to do with the use of residences for business purposes. It was not my understanding that that amendment was in any way applicable to those of us who are in Congress, because I do not know that any of us use our residences in order to be a Member of Congress, except for living purposes; and that the whole thrust of that amendment had to do with the use of your home for business purposes.

What I am trying to find out is this: Is there something that has not been discussed relative to that amendment, as distinguished from the other amendment, which I fully understand and which the Senator from Kansas was good enough to explain, pertaining to the matter of the Internal Revenue Service issuing regulations about what is and what is not deductible?

Mr. DOLE. The general purpose of the amendment is to liberalize the statute so that if somebody uses his residence as a principal place of business, he can have certain deductions.

It also clarifies what was for us, a silly result caused by the interaction of section 280A with a provision of the continuing resolution, which affected Members of Congress: If you had your family here for more than 14 days a year, there was no deduction; but if an unmarried Member of Congress was here or the Member's family was not here with him or her, a deduction would be permitted.

We simply clarified the law across the board. It applies to everyone, not just Members of Congress.

Mr. METZENBAUM. Why does the chairman of the Finance Committee see fit to make this particular amendment—that is, the one having to do with the use of residences for business purposes—retroactive to the year 1975, since that is not the normal procedure around here, to make revenue measures retroactive for 6 years?

Mr. DOLE. We followed the procedure on this amendment that we follow on every other amendment. It had to have the approval of the Treasury. It had to have hearings. It was the amendment of the Senator from Colorado (Mr. ARMSTRONG). I do not believe he is on the floor.

As long as we would limit it to the principal residence, the Treasury signed off on it.

Mr. METZENBAUM. The Treasury has signed off on all these amendments?

Mr. DOLE. Yes. I may have some difficulty with some of my colleagues unless they have signed off on the amendments.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DOLE. I yield.

Mr. LONG. Is it not correct that this provision that goes back to 1976 does not affect Members of Congress?

Mr. DOLE. We put section 280A in 1976. This is not going back to protect Members of Congress. That is right.

Mr. LONG. The part that has to do with Members of Congress has to do with the $3,000 limitation, and that came off in the continuing resolution this year, and that would be effective for 1981.

Mr. DOLE. That is right.

Mr. LONG. We on the committee do not regard it as retroactive legislation when we act in 1981 with regard to one's tax liabilities for 1981.

Mr. DOLE. That is a good point, I say to the Senator from Louisiana. The retroactivity is going to apply across the board to all of the changes to section 280A. not just to the provision that may apply to Members of Congress.

Mr. METZENBAUM. What does the Senator from Kansas mean, when he says that the amendment having to do with the use of residence for business purposes will be clarified—section 280, or whatever the number was—as it pertains to Members of Congress? In what manner will that be clarified, and what will be the impact on Members of Congress?

Mr. DOLE. It gets rid of this discrimination between somebody with a family here in Washington and somebody without a family here. That is all it does. This amendment gives no new benefit to Members of Congress. We have already changed the basic law in the continuing resolution which was passed last week. We removed the deduction limit of $3,000.

Mr. METZENBAUM. Will the Senator from Kansas tell us what is the language that is part of the amendment that is applicable to that clarification?

Mr. DOLE. Page 5, paragraph 4, of the amendment:

> Coordination with section 162(a)(2), etc.—Nothing in this section shall be construed to disallow any deduction allowable under section 162(a)(2) (or any deduction which meets the tests of section 162(a)(2) but is allowable under another provision of this title) by reason of the taxpayer's being away from home in the pursuit of a trade or business (other than the trade or business of renting dwelling units).

Mr. METZENBAUM. Is that it?

Mr. DOLE. That is it.

Mr. METZENBAUM. I confess that I have not been any further educated than I was before.

Mr. PROXMIRE. Mr. President, will the Senator from Kansas explain how that affects Members of Congress? What it seems to say is that if a Member of Congress actually lives in Washington with his family and his children and goes out to his State, his trips to his State are paid for in full—his travel and staying in hotels, and so forth, is paid for in full by the Federal Government.

Yet, when he is back here—which most of us would consider home—we are allowed, I take it, under this section, to make deductions from our income tax.

Mr. DOLE. First, it is the other way around. Second, the repeal of the limit on deductions for Members was done in the continuing resolution. All we are trying to do is to end what I think is inadvertent discrimination between somebody living here by himself, with unlimited deductions for housing, and somebody living here with his family for more than 14 days, when deductions are disallowed. It is a silly discrimination. We do not remove the cap here in this amendment. That was done in the continuing resolution which was passed, I think, in the Appropriations Committee.

Mr. PROXMIRE. Apparently, the continuing resolution—regardless of the regulations which the Internal Revenue Service would apply to other taxpayers—did not permit a Member of Congress to deduct expenses in Washington unless the Internal Revenue Service construed him as being in the same position as any other taxpayer—that is, the main residence was in fact in his State.

Mr. DOLE. As I understand it, the IRS permits deductions for meals and transportation and laundry. But when we came down to the residence, if you had your family here, you could not deduct housing expenses. But if you were single or your family lived in your State, it was unlimited. That was a strange and I believe unintended discrimination.

Somebody might argue, "Why did we change the law in the first place?" That was in the continuing resolution. I think we have an obligation not to discriminate among different classes of Members. If you have your family with you, all we are suggesting is that the same rule should apply.

Mr. LONG. I think it might be helpful to keep in mind how the discrimination happened in the first place.

When the Stevens amendment was offered on an appropriation bill, it had not had the analysis in depth that it would have had if it had gone on an ordinary revenue measure to the tax writing committee. So it ran afoul of the provision we passed in Congress recently about vacation houses.

That provision had to do with ending the practice of people taking a tax advantage by having a second home, a vacation-type home, where they would make it available for rent, and in some cases not even rent it, but they would use it for their personal use as a vacation home.

To end the practice, we provided that if one lives in the home with his wife for more than 14 days, he can only deduct the depreciation and the cost of the housing to the extent that he has rental income from that house.

Clearly, that is not the situation of a Member of Congress. Members of Congress did not rent their housing or did not buy housing, as the case may be, for tax avoidance purposes. They had no gimmick in mind at the time they acquired the housing. They could not deduct it all. They had a $3,000 limitation.

Under that provision, a single person would not be adversely affected but a married person would, and that was a

discrimination that certainly no one intended. So the provision that was proposed by the House of Representatives and amended by the Senate would make it clear that it applies as intended by the continuing resolution for both single and married persons.

Mr. DOLE. I just add the part I read on coordination applies to businessmen. It was not just a special provision for Members. One cannot deduct his personal expenses. He still has to allocate, and he only gets his business expenses.

I know it will probably be misconstrued by those who write about it.

Mr. PROXMIRE. Does this amendment allow for unlimited expense deduction for married Congressmen living in Washington equal to amounts that a single Congressman or one living in the State can get.

Mr. DOLE. No.

Mr. LONG. This should be explained to the Senator also.

Under this provision a Senator cannot receive the deduction for members of his family. He has to allocate. In other words, if he has a wife and children he has to allocate for the portion that they are presumed to use of the house and he is only entitled to the part for himself, so that he is treated for that purpose just as though he were single. He can only claim the part that applies to him. He cannot deduct the part that applies to his family if his family lives with him here in Washington.

I think everyone can see the fairness of it. If a bachelor could deduct the full expense, a married person should at least be permitted to deduct the part of the expense that would apply to him for his proportionate use of the house which he shares with his family.

Mr. PROXMIRE. As I understand it, there will be another amendment in another place offered to secure from the Internal Revenue Service some specific indication of what expenses would be eligible for deduction that would be appropriate; is that correct?

Mr. DOLE. The appropriate amount of expenses that can be deducted by Members of Congress without substantiation, that is correct.

Mr. PROXMIRE. I thank the Senator.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator from Kansas yield for a question?

Mr. DOLE. I yield.

Mr. HARRY F. BYRD, JR. Could we take an example as to how this would work? Assume a Member of Congress comes to Washington and rents a home or rents a condominium, or what-have-you, or stays in a hotel. Assume that he pays a rent of $2,000 a month. As I understand it, under what was done by the continuing resolution and what will take place under this resolution, along with the continuing resolution, he would be able to deduct that $24,000 as a rental expense.

Mr. DOLE. That is correct. The continuing resolution repealed the $3,000 limit on deduction for living expenses by Members of Congress, effective January 1981.

Mr. HARRY F. BYRD, JR. Let us assume that instead of renting he buys a home for $200,000, and that is about the going rate around this town. The depreciation schedule, am I correct, is 15 years now for property of that type?

Mr. DOLE. Only for houses bought in this year or in the future.

Mr. HARRY F. BYRD, JR. I beg pardon.

Mr. DOLE. Only for houses bought this year or in the future.

Mr. HARRY F. BYRD, JR. For houses bought this year or subsequent years?

Mr. DOLE. That is right.

Mr. HARRY F. BYRD, JR. That individual then could take depreciation to the extent of about $15,000 on that house.

Mr. DOLE. He has to allocate between land and building and also allocate between personal and business expense. So I am not sure of the exact amount that could be deducted. It would certainly cut it down markedly, I would think. He cannot claim the land, obviously.

Mr. HARRY F. BYRD, JR. So he would need to allocate a certain cost to the land and certain cost to the building or the house and then depreciate the house.

Mr. DOLE. Only a portion of it.

Mr. HARRY F. BYRD, JR. I beg pardon.

Mr. DOLE. Only a portion of it.

Mr. HARRY F. BYRD, JR. A portion of it. If it is a man and wife, how is it apportioned? Is it 50–50?

Mr. DOLE. It could be, but that is what we hope the IRS, when we adopt the next amendment, will indicate a specific dollar amount that will be deemed reasonable under the circumstances. Without such a specific amount it could be 50–50, or it could be something else. We want to avoid the necessity of making that allocation.

Mr. HARRY F. BYRD, JR. I am sort of looking for the legislative history as to what we have in mind.

Mr. DOLE. Let me say to the Senator from Virginia, and be as candid as I can, that when the $3,000 limit was lifted by action on the continuing resolution last week, the effect of this change is to treat travel expenses of Members of Congress in a sense like the travel expenses of other businessmen away from home on business. Under the rules that apply to businessmen, travel expenses are deductible only if they are reasonable and necessary to the taxpayer's business. If the expenses are lavish or unnecessary, obviously they would not be permitted. They can deduct meals, lodging, rents, depreciable ownership costs such as furnishings in the dwelling unit, insurance, utilities, and repairs attributable to the lodging, transportation expenses, cleaning and laundry expenses, and telephone expenses, just to name some of the deductible expenses.

A Congressman is treated just like a businessman but, before the continuing resolution, could deduct a maximum of $3,000. When the cap was removed by the continuing resolution, we had a problem in trying to determine what would be a reasonable deduction. So this Senator and others have met with the IRS Commissioner to try to get some guidance on what kind of recordkeeping Members would need. Senator PACKWOOD was there. Congressman ROSTENKOWSKI, chairman of the Ways and Means Committee, was there.

What we do not want is to lift the $3,000 lid and then have someone take an exceptionable amount of deductions.

So we thought about expressingly stating that Members could deduct a specified amount such as Federal employees' per diem amount. In the city of Washington the per diem is now $75 a day. Someone said that would not be the best way to approach the problem—that is for the Members to set the specific amount.

So I thought it would be appropriate to leave it up to the IRS Commissioner and the Treasury Department to find something reasonable under the circumstances, rather than Congress establishing a set amount, and that is, in essence, where we are right now.

It is a deduction, not a credit.

Mr. HARRY F. BYRD, JR. There is no ceiling then?

Mr. DOLE. I beg your pardon?

Mr. HARRY F. BYRD, JR. There is no ceiling under the new proposal?

Mr. DOLE. There is no ceiling, but that is a result of the continuing resolution, not as a result of what we are doing. As long as the cap was already removed, we thought it best to have an election where 90 percent of the Members would say "All right, I will take $50 a day, whatever the IRS says is appropriate, whatever guidelines they indicate." I assume 99 percent of the Members will adopt that procedure.

Mr. HARRY F. BYRD, JR. May I ask this question: Is it the Senator's understanding then that the IRS will issue and publish rules and regulations as it affects the Members of Congress?

Mr. DOLE. If we adopt the amendment that I am about to offer, we direct the Secretary to set the amount.

Mr. HARRY F. BYRD, JR. Direct it insofar as the Members of Congress are concerned, not business in general, but insofar as Members of Congress are concerned?

Mr. DOLE. That is correct, and I am prepared to offer that amendment now.

Mr. METZENBAUM. Mr. President, will the Senator from Kansas yield for a question?

Mr. DOLE. I yield.

Mr. METZENBAUM. The Senator from Kansas has asked for the yeas and nays. I am not clear. Is it with respect to the amendment having to do with directing of the Treasury to come out with regulations? I understand at the desk is a substitute amendment. Does that include all four parts of the Finance Committee recommendations?

Mr. DOLE. No.

Mr. METZENBAUM. I am not clear what we are voting on.

Mr. DOLE. The Senator is not voting on anything yet. I am going to offer this amendment. If someone wishes the yeas and nays, they may have it.

Mr. METZENBAUM. I understand the Senator asked for the yeas and nays on what?

Mr. DOLE. I asked for the yeas and nays on the amendment in the nature of a substitute, in addition to the modification.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. DOLE. They have already been ordered.

Mr. METZENBAUM. The yeas and nays have already been ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered on the amendment as modified.

Mr. METZENBAUM. Is that what it is?

Mr. DOLE. Right.

Mr. METZENBAUM. There is a problem. I want it clarified.

UP AMENDMENT NO. 799

(Purpose: Relating to travel expenses while away from home)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 799.

Mr. DOLE. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 5, strike out lines 20 and 21, and insert in lieu thereof the following:

"(b) Treatment of Expenses While Away From Home in Pursuit of Trade of Business.—

"(1) IN GENERAL.—Subsection (f) of section 280A is

On page 5, strike out line 25 and insert in lieu thereof the following:

"(A) IN GENERAL.—Nothing in this section shall be construed to disallow

On page 5, line 31, strike out the end quotation marks and the end period.

On page 5, between lines 31 and 32, insert the following:

"(B) LIMITATION.—The Secretary shall prescribe amounts deductible (without substantiation) pursuant to the last sentence of section 162(a), but nothing in subparagraph (A) or any other provision of this title shall permit such a deduction for any taxable year of amounts in excess of the amounts determined to be appropriate under the circumstances."

Mr. DOLE. The Senator from Kansas explained this amendment briefly earlier, but there may be others who were not here and who have an interest in this.

Let me say that whenever you talk about anything for Members it gets a little controversial, even when it should not be, and I do not think this should be controversial.

What this amendment will do will be to direct the Secretary to prescribe amounts deductible unless a Member of Congress substantiates his expenses allowable under section 162(a).

As I indicated to the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.) we have been troubled about, now that the law has been changed by the continuing resolution—not by any amendment the Senator from Kansas offered but the continuing resolution—which passed last week by a substantial margin in both Houses, first we wanted to correct a discrimination between a single Member or the Member whose family is not living here, and a Member with his family living here, some with five children, which seems to me to be silly discrimination. So it has been corrected by modifying my original amendment.

Having corrected one problem, we next addressed the issue of what expenses should be appropriately deducted without allocating and substantiating every last expense. There are a lot of Members asking "What are we going to do, who is going to decide what we can deduct? It is going to be unlimited." So a lot of Members want some guidelines, and it occurred to us since Federal employees when they are away from home get certain per diem allowances, and that may be an appropriate amount for us to deduct. Immediately many Members came to us, Members who were concerned, and felt there was some justification for the amendment, and said, "I am not certain we ought to do it that way because the press will add up $75 times so many days in session and they will interpret it in some ways as looking like a tax credit or a pay raise."

So overnight the Senator from Kansas and the staff, our staff and the joint committee staff, decided, I guess, to pass the burden of setting the amount to the Secretary. The IRS has stated that they need statutory authority to make that determination for Members and we are now providing it.

The present law allows a Member as a businessman away from home to deduct his business expense costs which he incurs as a result of having to be in Washington on business. It does not allow a Member to deduct the costs entailed in having his family with him.

In the case of most Members of Congress, the cost of lodging, meals or transportation will be a single amount covering both the Member and his family. Allocating the exact amount consumed by each person so far as food, furnishings, whether or not the Member used this lamp, or that room can be very difficult, so it would seem to us as a reasonable alternative that it would be desirable to try to find some way to solve these administrative and recordkeeping problems if we did do it in a manner both reasonable and fair.

As I indicated earlier, there will be some who disagree. But this amendment will provide that the determination of what recordkeeping relief is appropriate under the circumstances shall be made by the Internal Revenue Service. The Secretary of the Treasury would be directed to determine what amount could be appropriately deducted, and I would say, as the amendment says, appropriate under the circumstances, without substantiation. Some may want to substantiate and they can substantiate and deduct more.

There is a precedent for this deduction of certain costs without substantiation. We did that in the Economic Recovery Act for State legislators, and I recall everybody here voted for that amendment which was offered by the Senator from New York (Mr. D'AMATO).

It would seem to this Senator that the Secretary of the Treasury should be and is capable of determining the costs of a Member which could be deducted if a Member does not or cannot deduct his deductible expenses on an exact basis. That is the reason for the amendment.

I think it is clear. I do not think it locks in any specific figure. It does not offend some Members who are concerned about whether the amendment specifies x dollars. It does indicate that, now that we have changed the law, not by anything that the Finance Committee has done but by the continuing resolution, we ought to have some guidelines. We could not agree on any guidelines, very honestly, and we are going to direct that the Treasury set out some guidelines, and we will follow the IRS determination.

Mr. LONG. Mr. President, will the Senator yield at that point?

Mr. DOLE. Yes, I yield.

Mr. LONG. Is it not true that without the Senator's amendment no one here can really know just what he can deduct, especially if he is a married man or she is a married woman? No one can know with any degree of certainty what they can deduct or what they cannot deduct?

For example, assume, speaking of a married person with regard to the home where he lives, clearly he cannot deduct any part of the cost of the land; that is not deductible.

Mr. DOLE. That is correct.

Mr. LONG. But with regard to the home, for starters the person would have to allocate as between his personal expenses and his business expenses. For example, his meals would clearly be deductible, as would laundry and transportation.

On the other hand, he would not be allowed to deduct the part of his expenses which relate to entertainment, like golfing or going to a play.

Then he would have to allocate with regard to the use of the property as between himself and his wife.

The Senator from Kansas, the chairman of the committee, has just stated that he does not know and is not in position to tell us at this moment, as to a man without children, how much he can allocate to himself and how much he can allocate to his wife in the use of the home. That will have to be worked out with the Treasury at some future date. Furthermore, if he has children, he allocates less to himself than if he uses the house for himself, because the children

are using the home and that part is not deductible.

There will be other complexities involved, but just stopping right there, neither the manager of the bill nor the Senator from Louisiana is in position to advise a person how much he can deduct. So what the Senator is trying to do in his amendment is to arrive at an arrangement whereby the Secretary of the Treasury or the collector——

Mr. DOLE. It would be the Secretary.

Mr. LONG. The Internal Revenue Service will say that a person can deduct a certain amount. That does not preclude the taxpayer from itemizing and deducting more than that. But if he does so, he is going to have to contend with all the complexities to which I have referred. The Senator is simply trying to offer an amendment to fix a certain amount a Member of Congress can deduct, so that he could know that that much of it would be deductible.

Mr. DOLE. The Senator is exactly right.

Let me say again, because I think there is a lot of misunderstanding, all we are trying to do is to clarify——

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. DOLE. In a moment. We clarified one provision that was discriminatory. All this amendment does is to direct that the Treasury Secretary and the IRS Commissioner put their heads together and decide what is reasonable under these circumstances.

We are trying to accommodate the Members of this body and the House. Otherwise we are going to have everybody with adults and appeals and different deductions. How do we allocate? It is my feeling that the IRS Commissioner and the Treasury Secretary, if they are directed to do this now, can let us know quite soon just what we can and cannot do unless, of course, we want to substantiate.

Mr. JOHNSTON. On the chance that this amendment does not pass, I would like to get some guidance. If you are a bachelor and you live in a home you can deduct the whole home. My question is if you are married and your wife sleeps in the same bedroom and, therefore, does not take any more room, can you treat yourself as a bachelor?

Mr. DOLE. If she is there for less than 14 days you can. [Laughter.]

Mr. JOHNSTON. If you had a house with, let us say, five bedrooms, and your wife sleeps in your bedroom, then you can treat yourself as a bachelor. If you had two kids and each one of them had two bedrooms each, would you just deduct those two bedrooms from the total rooms in the house or would you have to divide the house into three units, one for yourself and your wife, one for each child, and only deduct a third of the house?

Mr. DOLE. Well, I would not want to deprive the Commissioner of that opportunity to pass on that problem. But he is going to have not only the Senator's problem, he is going to have a hundred others, plus 435 others. That is why I think we ought to do this. All it does is direct the Commissioner and the Treasury Secretary to find out what is reasonable under the circumstances. We think it would save the Commissioner's sanity and probably help some of us.

Mr. JOHNSTON. This amendment may not pass. There may be some Senators who want to go through this exercise. So I would like to get a little legislative history.

The Senator is saying that he thinks maybe if you have a wife and three kids in a home with 10 rooms that you can deduct the 2 bedrooms that the two daughters sleep in and take eight-tenths of your expense of that house. Would that be a reasonable judgment?

Mr. DOLE. He may not be able to deduct any business expenses relating to the house, such as depreciation.

Mr. JOHNSTON. The question is, What part do you allocate to the children or the wife?

Mr. DOLE. The Senator's guess is as good as mine. If we pass this amendment—and I know some are opposed to what was done in the continuing resolution, but please do not take it out on this amendment. We are just trying to clarify the law. There is an old slogan in the House, "Vote no and take the dough." That was on pay raises. But this is not that kind of situation.

We are trying to offer a little simplification here, a little tax simplification for the Members. We are not adding anything. We are clarifying one provision which has already been done in the modification.

All we are doing here is trying to figure out some way so that when you start working on your tax returns you will have some guidance. We thought we had an idea yesterday, but we had a lot of opposition to it—and justified in some areas. So we said, "OK, Congress is not going to try to set any dollar limit based on per diem. We will let the Treasury Secretary make that determination."

I do not see anything unfair about that. The Senator from Kansas believes it is a good accommodation and a good solution. But I could not guess on the Senator's problem.

Mr. JOHNSTON. I thank the Senator. I could not guess, either. Really, I started thinking about what I could and could not deduct and realized that you could go all the way, in my own case, from deducting eight-tenths of a house to deducting a one-fourth of a house. I mean, there is that much differential between two reasonable, rational interpretations of the rule. We really need some help on this. Because what happens if you deduct eight-tenths and the IRS comes in and says, 3 years later, that you were only entitled to deduct one-fourth? If you are like me, you spend every cent you get your hands on and you do not have that money to pay the past assessment. I hope the Senator's amendment passes so we can get some guidance.

Mr. DOLE. I do not think we need a rollcall, but there may be some Senators who want one.

Mr. PROXMIRE. I think we may need one.

Let me ask some questions about this. Does this amendment provide that, once the Internal Revenue Service provides this ruling or this information, then the deduction can be made without substantiation, without documentation? Is that right?

Mr. DOLE. That is correct.

Mr. PROXMIRE. Does that not give the Member of Congress an extraordinary advantage compared to the average business taxpayer who has to substantiate everything?

Mr. DOLE. As I understand their rules now, they have arrangements between them for reimbursement between the employer and employee. So we are not breaking new ground.

Mr. PROXMIRE. Is a businessman allowed to make deductions in broad areas without substantiation, subject to audit?

Mr. DOLE. Yes, without substantiation, where it is either per diem or reimbursement from his employer, the employee has an agreement with the employer and the employee spends the amount specified in the agreement.

Mr. LEAHY. Mileage is another one.

Mr. PROXMIRE. Does this include or is it a separate amendment on the reference to what the Senator referred to before on page 5 of this listing of amendments where he has, "Coordination with section 162. Nothing in this section shall be construed to disallow any deduction allowable under section 162," and so forth. Is that part of this amendment?

Mr. DOLE. No, that was a separate amendment.

Mr. PROXMIRE. That is a separate amendment.

Mr. DOLE. But, again, I would say to the Senator that the law was changed by the continuing resolution. I voted for the continuing resolution. We clarified one aspect of it and tried to get some guidance in the other. That is all I am seeking—clarification in one case and guidance in the other.

Mr. PROXMIRE. I do not want to detain the Senate, but let me ask the Senator, Can he give us any example of an area where a businessman can make a deduction without a substantiation, without documentation and the Internal Revenue Service will honor it?

Mr. DOLE. Under certain circumstances where he has a per diem arrangement or reimbursement arrangement with his employer. I will let the Senator's staff talk to my staff and I think we can work this out.

Mr. PROXMIRE. I thank the Senator.

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER (Mr. WARNER). The Senator from Michigan.

Mr. LEVIN. Mr. President, I wonder if the Senator from Kansas could help me out on this question. It really is a follow-up of the question of the Senator from Wisconsin about 10 minutes ago. If you take the situation where we have a Member of Congress who does not rent or buy a home back in the district or State but simply stays in a hotel room and pays the hotel bill, that bill is reimbursed, as I understand it, by the taxpayers. What

this amendment does is to say, or to continue to say, either way you look at it, that a Member of Congress in Washington can deduct the amount that either he can substantiate belongs to him as expenses or that the IRS, if this latest amendment passes, gives us as a flatout unsubstantiated deduction. Is that right?

Mr. DOLE. It has been the law that you can deduct expenses incurred in Washington, D.C. That has been in the law since 1954. There has been a cap on it for Members of $3,000.

Mr. LEVIN. What this amendment does is remove that cap for all of us, not just for the single person.

Mr. DOLE. I think that is misinformation. We do not do anything with the cap. That was removed in the continuing resolution. I do not want that word to go out that somehow we brought a change in that basic law. That was done last week. We are trying to clarify one area and ask for guidance in the other.

Mr. LEVIN. If the Senator would yield on that, what we did in the continuing resolution was remove the cap for single people. What this does is remove the cap for the rest of us.

Mr. DOLE. It was limited as to everybody. It was removed except for housing expenses as far as families are concerned.

Mr. LEVIN. What this does is remove to the cap for that aspect?

Mr. DOLE. The cap is already removed. It just clarifies between a family member and a nonfamily member. We are not trying to encourage separation. We are trying to bring people together.

Mr. LEVIN. I think we can do that in legislation without reaching this result. Is it fair to say that the result of all of this is that this will yield a financial benefit for all of us if it is adopted and the amount of that benefit will be determined by the IRS when they adopt the per diem or the amount that does not have to be substantiated? Is that a fair summary?

Mr. DOLE. As far as any financial benefit, we are not conferring any financial benefit. That was in the continuing resolution. This Senator voted for it. I am not certain how the Senator from Michigan voted. But we are not now conferring benefits. We are trying to clarify the law with reference to housing expenses and seek the guidance because we could not agree among ourselves on how we ought to do it. It is like appointing a committee.

Mr. LEVIN. I think, in fairness, this does yield and confer a financial benefit for most of us, those of us that are married.

Mr. DOLE. You are going to get the same housing deduction now that the single Members get.

Mr. LEVIN. That is correct. Whether or not you view that as eliminating a discrimination or broadening a loophole is another issue. But, in fairness, it seems to me what we are doing—and I think the Senator from Kansas would acknowledge it—is that we are conferring a benefit on those of us that are married that we, up to now, would not have.

Mr. DOLE. It only does it for housing. It does not affect meals, lodging, cleaning, and laundry, telephone, and whatever other legitimate business expenses the Senators may have.

I am ready to vote.

Mr. LONG. Mr. President, in view of the fact that some Senators are not here who want to be here to vote, I suggest the absence of a quorum.

I withhold that request.

Mr. DOLE. The question is on the amendment.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll for the purpose of ascertaining the presence of a quorum.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question recurs on the amendment of the Senator from Kansas to the substitute offered by the Senator from Kansas.

The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from North Carolina (Mr. HELMS), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), and the Senator from Texas (Mr. TOWER), are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mr. DURENBERGER) and the Senator from North Carolina (Mr. HELMS) would each vote "nay."

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY), the Senator from Vermont (Mr. LEAHY), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Arkansas (Mr. PRYOR), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 46, nays 44, as follows:

[Rollcall Vote No. 492 Leg.]

YEAS—46

Abdnor	Grassley	Nickles
Andrews	Hart	Packwood
Armstrong	Hatch	Pell
Baker	Hatfield	Quayle
Baucus	Hawkins	Rudman
Boschwitz	Hayakawa	Schmitt
Cochran	Hollings	Stafford
Cranston	Huddleston	Stevens
D'Amato	Humphrey	Symms
Danforth	Inouye	Thurmond
Denton	Jepsen	Tsongas
Dodd	Johnston	Wallop
Dole	Laxalt	Weicker
East	Long	Williams
Garn	Mathias	
Gorton	Murkowski	

NAYS—44

Bentsen	Domenici	Mitchell
Biden	Eagleton	Moynihan
Boren	Exon	Nunn
Bradley	Ford	Pressler
Bumpers	Glenn	Proxmire
Burdick	Heflin	Randolph
Byrd, Harry F., Jr.	Heinz	Riegle
	Jackson	Roth
Byrd, Robert C.	Kassebaum	Sarbanes
Cannon	Kasten	Sasser
Chafee	Levin	Simpson
Chiles	Lugar	Specter
Cohen	Mattingly	Stennis
DeConcini	Melcher	Warner
Dixon	Metzenbaum	Zorinsky

NOT VOTING—10

Durenberger	Leahy	Pryor
Goldwater	Matsunaga	Tower
Helms	McClure	
Kennedy	Percy	

So Mr. DOLE's amendment (UP No. 799) was agreed to.

Mr. LONG. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Senators will kindly take their seats and refrain from conversation.

UP AMENDMENT NO. 800

Mr. HATCH. Mr. President, I send a first-degree amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 800.

Mr. HATCH. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment insert the following new title:

TITLE II—BENEFITS AMENDMENTS

SHORT TITLE; GENERAL REFERENCE

SEC. 201. (a) This title may be cited as the "Black Lung Benefits Amendments of 1981".

(b) Except as otherwise specifically provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Black Lung Benefits Act.

ELIGIBILITY STANDARDS

SEC. 202. (a) The fourth sentence of subsection (b) of section 413 is amended by inserting immediately after the words "In any case" a comma and the following: "other than that involving a claim filed on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(b)(1) Paragraphs (2) and (4) of subsection (c) of section 411 are each amended by inserting a new sentence at the end of each as follows: "The provisions of this paragraph shall not apply with respect to claims filed on or after the effective date of the Black Lung Benefits Amendments of 1981".

(2) Paragraph (5) of subsection (c) of section 411 is amended by inserting a new sentence at the end thereof as follows: "The provisions of this paragraph shall not apply with respect to claims filed on or after the day that is 180 days after the effective date of the Black Lung Benefits Amendments of 1981.".

(c) The third sentence of subsection (b) of section 413 is amended by inserting immediately after the word "affidavits" a comma and the following: "from persons not eligible for benefits in such case with respect to claims filed on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(d) Section 430 is amended by striking the words "and by" and inserting in lieu thereof a comma, and by inserting immediately after the phrase "the Black Lung Benefits Reform Act of 1977" the phrase "and the Black Lung Benefits Amendments of 1981".

(e) The Secretary of Labor, in consultation with the Secretary of Health and Human Services, shall undertake a study of current medical methods for the diagnosis of pneumoconiosis, and of the nature and extent of impairment and disability that are attributable to the existence of both simple and complicated pneumoconiosis. The study, together with appropriate recommendations, shall be transmitted to the Congress no later than eighteen months after the effective date of this title.

BENEFITS

SEC. 203. (a)(1) Section 412(a)(2) is amended by inserting immediately after the word "or" a comma and the following: "except with respect to a claim filed under part C of this title on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(2) Section 412(a)(3) is amended by striking the first comma therein, and by inserting immediately after the word "or" the second time it appears therein a comma and the following: "except with respect to a claim filed under part C of this title on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(3) Section 412(a)(5) is amended by striking out the second comma therein, by striking out the phrase "of a miner" the third time it appears therein, and by inserting immediately after the word "or" the second time it appears therein a comma and the following: "except with respect to a claim filed under part C of this title on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(4) Section 401(a) is amended by striking the phrase "or who were totally disabled by this disease at the time of their deaths" each time it appears.

(5) Section 411(a) is amended by inserting immediately after the word "or" a comma and the following: "except with respect to a claim filed under part C of this title on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(6) Section 422(l) is amended by inserting immediately before the period at the end thereof a comma and the following: "except with respect to a claim filed under this part on or after the effective date of the Black Lung Benefits Amendments of 1981,".

(b) Subsection (g) of section 422 is amended by adding at the end thereof a new sentence as follows: "In addition, the amount of benefits payable under this section with respect to any claim filed on or after the effective date of the Black Lung Benefits Amendments of 1981 shall be reduced, on a monthly or other appropriate basis, by the amount by which such benefits would be reduced on account of excess earnings of such miner under section 203(b) through (l) of the Social Security Act if the amount paid were a benefit payable under section 202 of such Act.".

(c) The Secretary of Labor shall undertake a study of the benefits provided by the Black Lung Benefits Act, other benefits received by individuals who receive benefits under that Act, and benefits which would be received were State workers' compensation programs applicable in lieu of benefits under that Act. The study, together with appropriate recommendations, shall be transmitted to the Congress no later than eighteen months after the effective date of this title.

(d) Paragraph (1) of subsection (a) of section 412 is amended by deleting the phrase "50 per centum of the minimum monthly payment to which a Federal employee in grade GS–2, who is totally disabled, is entitled at the time of payment under chapter 81 of title 5, United States Code" and inserting in lieu thereof the phrase "37½ per centum of the monthly pay rate for Federal employees in grade GS–2, step 1".

INTEREST CHARGES

SEC. 204. Subsection (d) of section 422 is amended by adding two new sentences at the end thereof as follows: "If payment is not made within the time required, interest shall accrue to such amounts at the rates set forth in section 424(b)(5) of this title for interest owed to the fund. With respect to payments withheld pending final adjudication of liability, in the case of claims filed on or after the effective date of the Black Lung Benefits Amendments of 1981, such interest shall commence to accumulate 30 days after the date of the determination that such an award should be made.".

SPECIAL CLAIMS

SEC. 205. (a)(1) Subsection (c) of section 422 is amended by inserting "(1)" after "pneumoconiosis", and by inserting before the period at the end thereof a semicolon and the following: "or (2) which was the subject of a claim denied before March 1, 1978, and which is or has been approved in accordance with the provisions of section 435".

(2) Subsection (j) of section 422 is amended by striking out "or" at the end of paragraph (1), by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; or", and by adding at the end thereof the following:

"(3) in which there was a claim denied before March 1, 1978, and such claim is or has been approved in accordance with the provisions of section 435.".

(b) Section 402 is amended by inserting at the end thereof the following new paragraph:

"(i) For the purposes of subsections (c) and (j) of section 422, and for the purposes of paragraph (7) of subsection (d) of section 9501 of the Internal Revenue Code of 1954, the term 'claim denied' means a claim—

"(1) denied by the Social Security Administration; or

"(2) in which (A) the claimant was notified by the Department of Labor of an administrative or informal denial more than 1 year prior to the date of enactment of the Black Lung Benefits Reform Act of 1977 and did not, within 1 year from the date of notification of such denial, request a hearing, present additional evidence or indicate an intention to present additional evidence, or (B) the claim was denied under the law in effect prior to the date of enactment of the Black Lung Benefits Reform Act of 1977 following a formal hearing or administrative or judicial review proceeding.".

EFFECTIVE DATE; SEPARABILITY

SEC. 206. (a) Except as otherwise provided, the provisions of this title shall take effect on January 1, 1982.

(b) If any provision of this title, or the application of such provision to any person or circumstance, shall be held invalid, the remainder of this title, or the application of such provision to persons or circumstances other than those to which it is held invalid, shall not be affected thereby.

The PRESIDING OFFICER. The Chair respectfully requests Senators to return to their seats and refrain from conversation, so that the Senator from Utah may be heard.

Mr. HATCH. Mr. President, this amendment, together with the measure now under consideration from the Finance Committee, comprises the complete package of amendments which the administration has proposed to solve the insolvency problems of the black lung trust fund. I introduced this measure as a bill S. 1922 on December 8, 1981. The record should show that this bill, which is reflected in the pending amendments, enjoys bipartisan support. I am privileged to have such distinguished colleagues as Senator RANDOLPH and Senator HEINZ join me in cosponsoring this measure. The bill was jointly referred to the Labor and Human Resources Committee and the Finance Committee.

On Monday, December 14, the Labor Subcommittee held a long and thorough hearing on the bill. Many witnesses testified, including the administration, and witnesses from the coal industry, organized labor, the insurance industry. These witnesses all testified in favor of the legislation. We also heard from several people who found merit in the bill but felt that other changes should be made in the program. On balance, however, I would say that there is overwhelming support for changes proposed in this bill.

As I just indicated, the proposal promises to bring solvency to a program that is now virtually bankrupt. The program, as structured by the 1977 amendments, was supposed to be financially self-sufficient by 1984. However, today the trust fund is in debt to the Treasury by approximately $1.5 billion. The indebtedness is projected to skyrocket to $5.7 billion in 8 years and by the year 2010 reach $19.7 billion. In short, unless a strong new source of revenue is injected, the trust fund will never be self-sustaining.

Thus everyone agrees that a key component to a solution to the problem is a tax increase. The bill does this. But recognizing the tax increase under current projections will make the fund solvent by 1995, the bill makes this increase temporary—terminating by 1995, earlier if solvency is achieved before then.

I should emphasize that this tax is not one imposed on the individual taxpayer. Rather it is one assessed on underground and surface mine operators as a manufacturers excise tax on coal production.

The bill also addresses what many regard is the underlying reason for the trust fund's insolvency—namely, the eligibility criteria. This without question has evoked tremendous controversy. Many have contended that the current criteria are simply too loose and that thousands of claimants who are not truly disabled have received benefits. Recent studies by the General Accounting Of-

fice have tended to confirm this. In 1980, GAO reported that 88 percent of claims approved by the Social Security Administration were based on inadequate or conflicting medical evidence. This year GAO has reported that its survey of DOL-approved claims revealed 84 percent of the cases were based on inadequate or conflicting medical evidence.

However, it is always easier to state the problem than to achieve a complete solution. The bill, as developed under the guidance of the Department of Labor, reflects a consensus among the interested parties of what eligibility changes are needed to begin restoring this as a disability program, and no longer a pension program.

At this point I would like to briefly outline what the principal provisions of the total package of amendments do:

A. ELIGIBILITY STANDARDS

Eliminate the 15-year respiratory or pulmonary impairment presumption. Renders inapplicable for all claims filed after the effective date a rebuttable presumption that a miner not diagnosed as having complicated pneumoconiosis is totally disabled due to pneumoconiosis if evidence demonstrates the existence of a totally disabling respiratory or pulmonary impairment and the miner was engaged in coal mine employment (underground or conditions substantially similar to underground) for at least 15 years.

Eliminate the 10-year respirable disease presumption. Renders inapplicable for all claims filed after the effective date a rebuttable presumption that a miner's death was due to pneumoconiosis if he or she died from a respiratory disease and was engaged in coal mine employment for at least 10 years.

Eliminate the 25-year survivor presumption. Renders inapplicable, to claims filed more than 6 months after the effective date a rebuttable presumption which entitled the survivor of a miner who died before March 2, 1978 and who had at least 25 years of coal mine employment prior to June 30, 1971 to benefits, unless it is established that at the time of death the miner was not partially or totally disabled due to pneumoconiosis.

Eliminate the restriction on the Department of Labor's authority to use a second opinion on chest X-rays. Eliminates for claims filed after the effective date the prohibition against use of substantive evidence obtained from physicians who have demonstrated proficiency in evaluating chest X-rays for pneumoconiosis.

Amend restrictions on the interpretation of affidavits in the case of a deceased miner. Amends the act by modifying the mandatory provision that where there is no medical or other relevant evidence in the case of a deceased miner, affidavits shall be considered to be sufficient to establish that the miner was totally disabled due to pneumoconiosis. On or after the effective date the term "affidavits" in this section includes only affidavits from persons not eligible for benefits in such case.

DOL and HHS to study and report any further legislative recommendations within 18 months. This study is to focus on the state of the medical arts concerning the diagnosis of pneumoconiosis and the relationship of simple and complicated pneumoconiosis to physical impairment and economic disability.

B. BENEFITS

Eliminate survivors' unrelated death benefits. With respect to claims filed on or after the effective date, amends the act by limiting benefit payments to only situations where it can be established that the death of the miner was due to pneumoconiosis.

Imposition of excess earnings offset. With respect to claims filed on or after the effective date, amends the act by providing for a reduction of benefits on account of excess earnings.

DOL to study the relationship of the black lung program to other workers' compensation programs and report any legislative recommendations within 18 months. This study will review other State and Federal workers' compensation and disability programs as to their eligibility criteria and benefit levels, as well as review other sources of income received by persons who have pneumoconiosis.

C. INTERIM BENEFITS; INTEREST CHARGES

Limitation of interim benefit payments from the black lung disability trust fund (BLDTF). Amends the act to eliminate the obligation for the trust fund to pay lump-sum retroactive benefit payments to claimants (following an initial determination of eligibility) while the claim is being contested by a responsible operator.

Increase interest charges to responsible operators. Amends the act by requiring responsible operators to pay interest to the BLDTF at the same rate as for other overdue Federal debts in those cases where the BLDTF is required to make "interim benefit" payments because of the failure of the responsible operator to make such payments while the claim is being contested. Would also require the responsible operator to pay interest to the claimant, at the same rate, for benefit payments not paid to the claimant on an interim basis by the BLDTF.

D. LIABILITY OF FUND FOR SPECIAL CLAIMS

Transfer of liability for special claims to the BLDTF. Amends the act by transferring to the BLDTF the liability for claims denied and closed prior to the 1977 amendments to the act and subsequently approved pursuant to section 435 of the Federal Mine Safety and Health Act of 1977 (Black Lung Benefits Act).

E. EXCISE TAX

Tax rate to be raised to 50 cents per ton for surface-mined coal, $1 per ton for underground-mined coal, not to exceed 4 percent of sales price. This increase would be a doubling of the current tax rate until the current deficit in the trust fund is retired.

New tax rate to revert to current levels at the end of 1995 or sooner, if the current debt is repaid prior to that date. This is to be a tax increase of limited duration for the specific purpose of debt retirement.

Mr. President, a question has been raised regarding the proper interpretation of the provisions in the bill relating to the availability of survivor's benefits in those cases where the miner's death is unrelated to pneumoconiosis. We have been very concerned about the authority in current law to pay survivor's benefits in those situations. S. 1922, and the pending amendments, reflects that concern by eliminating prospectively the authority to initiate benefit payments when that happens. The administration expressed these same concerns in Deputy Under Secretary of Labor Robert Collyer's testimony before the Senate Labor Subcommittee, December 14, 1981.

I want to emphasize, however, that it it is not the purpose of S. 1922, and the pending amendments, to deny survivor's benefits when complications of pneumoconiosis have caused a miner's death or where pneumoconiosis was a substantially contributing factor to that death. For example, pneumoconiosis may have been a substantially contributing cause of death in a case where the principal cause of death was pneumonia.

Of course, survivors would not be eligible for benefits in those situations where death was caused by a traumatic injury or an unrelated medical condition.

As a procedural matter, a survivor would initially file a claim for benefits. I understand that the Labor Department's claims examiners will be instructed to give all such claims the highest priority in developing the evidence necessary to reach a fair and prompt decision. Once the Labor Department has received medical evidence establishing that pneumoconiosis was the cause of death or a substantially contributing factor to the death, the survivor will receive benefits unless the weight of the evidence developed by the Labor Department's Deputy Commissioner or by a responsible operator establishes that the death was unrelated to pneumoconiosis. In cases involving a responsible operator, the burden would, of course, be on it to present medical evidence to rebut evidence by the survivor which otherwise would appear to establish eligibility for benefits.

It is my expectation that the Department of Labor would administer the new law in accordance with this explanation of the survivorship provisions.

Mr. NICKLES. Mr. President, I wish to join with my colleague, the chairman of the Labor Committee, Senator HATCH, in recommending the adoption of this amendment.

Two days ago, along with Senator RANDOLPH, we conducted extensive hearings on the administration's request for changes in the black lung program.

It was pointed out by the testimony of several people the problems of the trust fund that have been alluded to somewhat and which will be addressed by the increase in the tax.

Mr. President, what we wanted to do by the hearing was to consider recommendations proposed by the administration to tighten up eligibility and to eliminate the fraud and abuse that proliferated in the black lung program certainly

since its inception, but even more importantly, since the amendments of 1972 and 1977.

The changes that we made, and I shall repeat them very, very quickly, are prospective only. In other words, they will not affect claims that are already in the pipeline but they will only affect claims that will be coming in the future.

I will just outline a couple of those.

We eliminated three presumptions.

One presumption was basically that if a coal miner worked in the mines for 10 years or more that he automatically could be determined to have black lung disease.

GAO reported a study where they found 88 percent of the persons who were receiving black lung benefits under the Social Security Administration could not substantiate that they had black lung disease.

So we made that change. We eliminated the 10-year presumption. We also eliminated the presumption that if the deceased miner worked for 10 or more years and died from a respiratory disease, it was automatically presumed he died from black lung.

Mr. President, it was found in many cases that was not the case.

We eliminated a couple other presumptions that automatically again assume that a coal miner had black lung. In many cases we found he did not.

We also eliminated the provision that was added in 1977 that prohibited the rereading or a second opinion of X-rays. In many cases we found that mistakes were made initially but the operators, or whoever wanted to contest the claim, the insurance company, could not contest the claim because it prohibited rereading or additional checking of the X-rays.

Mr. President, we made some other changes, I think, which are substantial even though they are prospective in effect.

I personally have some reservations. I wish we could have gone further.

I think Senator RANDOLPH will agree we have been able to come up with a program that can be passed on both sides of Congress, a program that needs to be tightened up. At least we will be taking a step to tighten up to see that these abuses will not continue, at least at the same rate they have continued in the past.

We heard testimony from the administration that 30, 40, to 50 percent of the black lung claims in the past have been approved. We find now that this administration has tightened down the approval rate of claims somewhere in the neighborhood of 12 to 13 percent and that, if the amendment as proposed by Senator HATCH and myself is enacted, the approval rate will decline to somewhere in the neighborhood of 4 percent.

Mr. President, Senator CHAFEE, Senator DOMENICI, Senator LONG, and others have mentioned that we need to go further, and I wholeheartedly concur.

Additional changes need to be made in definitions. We need to redefine who miners are again. It was greatly liberalized in the past. We need to change the definition of the black lung disease itself. We also need to further redefine "total disability."

With those definition changes and a few other changes that have been discussed, and hopefully with a positive amendment such as that offered by Senator LONG that is not in this bill that would set a definite time and from that time no longer could the Treasury continue to make advances to this program, I think we will make some positive changes in getting this program off the backs of the general taxpayers and at least on to the coal operators and to the coal industry where it rightfully belongs.

I can tell the Members of this body that certainly in the committee of which I am chairman, the Labor Subcommittee, our committee continues and will continue to look into the black lung program and will make every endeavor we possibly can to insure that benefits, particularly those benefits paid in the future, will only go to those coal miners who are truly disabled by complicated pneumoconiosis, black lung.

Mr. President, I hope our colleagues will allow this amendment to go through, and I hope that we will be successful in the future to make additional changes as needed.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia has sought recognition. The Senator from West Virginia is recognized.

Mr. RANDOLPH. I can withhold my comments.

Mr. DOLE. Mr. President, I have been in touch with a few Members on the House side. We can hopefully get this bill passed today. We have a time problem. I am not trying to shut anyone off. I suggest if we really want the black lung bill, we move as quickly as we can. Some may not want the black lung bill. That is their business.

Mr. FORD. Mr. President, will the Senator from West Virginia yield?

Mr. RANDOLPH. I yield.

Mr. FORD. Mr. President, I am pleased to see that the Senate is moving quickly to correct the growing problems of the black lung trust fund. It is estimated that without corrective legislative action, the black lung trust fund will experience a $9 billion deficit, including principal and interest due to the U.S. Treasury, by 1995. Clearly, the time for legislation to restore the fund's solvency is past due. The changes in eligibility that have been introduced and the proposed increases in the excise tax rates would help solve the long-term problems of the fund and return it to sound financial footing. These changes are designed to eliminate the need for Treasury advances after fiscal year 1985 and to allow for full repayment to the Treasury of accumulated principal and interest by fiscal year 1995. But most importantly, these changes will do so without affecting the benefits of current beneficiaries.

The proposed reform we are considering this morning has been endorsed by the administration, the coal industry, and the United Mine Workers. It represents much deliberation and compromise by all parties concerned about the solvency of the trust fund and the security of benefits for those miners who have been debilitated by black lung. The needs of the families and survivors of black lung victims are no less real today than they were in 1969 when the black lung program was first initiated.

Mr. President, I am hopeful that the Senate and House can move quickly on this measure, and put to rest the concerns of both those who are responsible for the solvency of the black lung trust fund and those who depend upon the fund for benefits. I realize that these changes will not completely satisfy everyone, but I believe that this reform is the most satisfactory measure that could have been devised under the circumstances. I commend the Senate for its timely action on this matter and urge that we move ahead with these changes.

I thank the distinguished Senator from West Virginia.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. RANDOLPH. Mr. President, the urgency for the passage of this measure is something that has been stressed. Regardless of the positions and the votes to be cast by Members it is the matter of timing that is critical in this situation. I add to what the able Senator from Oklahoma (Mr. NICKLES) has said a few moments ago. The Labor Subcommittee did meet on Monday of this week.

We heard testimony for 4½ hours. That testimony came from the coal industry represented through the National Coal Association; the United Mine Workers of America representing not all but a large segment of those who mine coal throughout the United States, including not only deep mining and surface mining; and the administration through the Labor Department. Other witnesses included Representative JOHN ERLENBORN, the Edison Electric Institute, and the American Insurance Association.

This amendment was not actually drafted here in the Senate. But we were knowledgeable as to what was in the amendment. The able chairman of the Labor and Human Resources Committee, in his brief presentation of the amendment, has indicated those who joined in its presentation for purposes of the hearing and hoped-for favorable action in this body. I joined in that effort.

It was my belief that this was necessary and it was something in which I wanted to participate. My name was included as one of the cosponsors of the legislation offered by the able Senator from Utah.

I did this in a cooperative effort, remembering that the legislation on black lung came from that committee of which I have been a member during the 23 years that I have had the responsibility to serve in this body.

Having been associated with the black lung program authorization from its inception in 1969, at that time I joined Senator ROBERT C. BYRD in offering an amendment for the first appropriation in this body. I believe it is right for me to be a part of bringing this legislation to the floor.

It is my hope that with the agreement of varying groups that are often in conflict, we will be able to move quickly with this black lung proposal.

This does not mean we are rushing something through. Rather, we are coping with a vital subject. There has been a long counseling period of bringing together those parties which have an interest in the black lung program, recognizing the human element and the financial considerations which are involved.

The able Presiding Officer now in the Chair as we discuss this matter comes from the Commonwealth of Virginia as one of its Senators, and in that State, coal is mined, as in 26 States in this country. Those 26 States where coal is mined include: Alabama, Alaska, Arkansas, Colorado, Idaho, Illinois, Indiana, Kansas, Kentucky, Louisiana, Maryland, Missouri, Montana, Nevada, New Mexico, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, and Wyoming.

Sometimes we fail to recognize where coal is mined. Coal is mined to a great degree, a substantial degree, in many of the counties of the Commonwealth of Virginia, and with Senator WARNER in the Chair and Senator HARRY F. BYRD in his seat, I mention Virginia only to indicate that throughout our country coal is being mined. To every State of the Union the benefits from the passage of the original act and amendments, have gone to those who were miners and their survivors, including widows and children, who are in other States.

Mr. President, the black lung laws have grown out of the recognition by the Congress and others that a major effort was needed to improve health and safety conditions in our Nation's coal mines. The laws recognize the need to ameliorate the economic distress of coal miners and their families afflicted by the disabling black lung disease which arose out of those conditions.

My commitment to a strong black lung program has not slackened over these years since the original program was enacted. Indeed, as the sponsor of the first black lung legislation, which became title IV of the Federal Coal Mine Health and Safetv Act of 1969, as amended, I have consistently fought to develop the strongest compensation program possible, and it has sometimes been a difficult struggle.

At this time the black lung disability trust fund faces a financial crisis. I am cosponsoring the administration's bill introduced by Senators HATCH, NICKLES, HEINZ, and myself, because of the critical deficit facing the fund. The fund finances black lung payments, and we must take action now to correct the serious problem so that disabled miners and their families can continue to receive the modest compensation payments promised them under the law.

Mr. President, this is a critical time in our Nation, we must deal with budget constraints and energy concerns and many other issues, but we must not forget as we press ahead, that we are here on behalf of and to serve human needs. In the final analysis, the first priority of the black lung program is the coal miner, the man or woman who travels deep into the Earth, into the core of our mountains in West Virginia for instance, and brings out of those depths, the rich, black coal which we use to heat our homes, and power our electric lights, and for many other uses around the world.

The coal miner, in the performance of his or her job, is subjected to incredibly hazardous situations, and sometimes, those situations turn into nightmares for the miner and for his family, when sudden death traps the miner in the form of a roof collapse as we know occurred in Bergoo, W. Va. That tragic accident claimed the lives of three miners on December 4. Then a few days later, on December 7, an explosion in a mine in Topmost, Ky., took the lives of eight miners just as suddenly and just as catastrophically. And, before we could cope with these human tragedies in the coalfields of Appalachia, the very next day, December 8, an explosion in Whitwell, Tenn., again shattered families by extinguishing the lives of 13 more miners. These are tragic accidents and our hearts go out to the families and friends of these miners who were simply doing their jobs, who were simply trying to earn a living in the coal mines.

In 1981, there have been 143 deaths due to mine accidents. Every day that a miner enters a coal mine, he must consider the danger to his occupation, and while it may be in the far reaches of his mind, every miner knows the danger that may await him. And every miner's family knows the danger that may await him.

Of course, every miner does not face a mine accident, but every miner does face the possibility of developing the disabling black lung diseases. Every miner who breathes coal dust luckily does not contract one of these disabling occupational diseases, but for those who do suffer from these irreversible debilitating diseases, and for their surviving dependents, we have a compensation program, and I intend to preserve a strong compensation program for these brave, individuals for risking their lives to mine coal. For those who suffer impaired breathing and disability from pulmonary diseases resulting from prolonged inhalation of coal dust, there is no adequate compensation to substitute for their health.

And there is no substitution in compensation for a family who has lost their loved ones—husbands, fathers, sons, brothers, and now, also, wives, mothers, daughters, and sisters—to these terrible diseases. But, we must try.

Mr. President, there are those who look at the costs of these programs and say we cannot afford them. But, this Nation has a national policy, established under the Federal Coal Mine Health and Safety Act of 1969, as amended, which states in part, that—

> The first priority and concern of all in the coal or other mining industry must be the health and safety of its most precious resource—the miner.

And further, that—

> There is an urgent need to provide more effective means and measures for improving the working conditions and practices in the Nation's coal or other mines in order to prevent death and serious physical harm, and in order to prevent occupational diseases originating in such mines.

Title IV of the Federal Coal Mine Health and Safety Act of 1969, as amended, provides for benefits to miners who have contracted the occupational disease of pneumoconiosis and who are totally disabled as a result. The black lung program is part of this Nation's commitment to our miners and their families, and I am deeply concerned about the financial problems facing the black lung disability trust fund, which provides the payments to beneficiaries who qualify under the law for this compensation.

The deficit facing the black lung disability trust fund must be resolved, and this measure, which is before us today, will achieve this objective. It may not be a perfect measure, but it represents an agreement, as I indicated earlier, of the interested and affected parties.

This measure is the most equitable solution we could find, given the current circumstances. Senators may not be in agreement on the large sum of money which is involved. But I believe it is good for us to remember the words of Franklin Delano Roosevelt in his acceptance speech for renomination to the Presidency on June 27, 1936. F. D. R. said:

> Government can err, Presidents do make mistakes, but the immortal Dante tells us that divine justice weighs the sins of the cold-blooded and the sins of the warm-hearted in different scales. Better the occasional faults of a Government that lives in a spirit of charity than the consistent omissions of a Government frozen in the ice of its own indifference.

I urge approval of the pending black lung proposal.

I appreciate the opportunity to work with the chairman of our committee, Senator HATCH; with the chairman of our subcommittee, Senator NICKLES; with Senator DOLE who is handling this legislation in the overall, from the Finance Committee, and with Senator LONG of that committee. I commend these Senators for their effective efforts in bringing this measure to the Senate for consideration.

Now the Senate must make a decision. It is important for us to do this. Napoleon Bonaparte said:

> Nothing is more difficult and, therefore, more precious than to be able to decide.

Mr. CHAFEE. Mr. President, as we have discussed earlier today, this whole

black lung program, in my judgment, is a program that is out of control. It is a program that is harnessed by the changes that were made in 1977 and which, in my judgment, were extremely unfortunate.

We have made it perfectly clear that those who legitimately indeed suffer from the black lung disease should be compensated. But this program is universally recognized as going way beyond that.

All right. That is where we are. I do think the changes proposed by the Senator from Oklahoma, with the able assistance of the senior Senator from West Virginia, are effective for prospective cases, in other words, cases that have not even been filed.

But as to the cases that have been filed, I understand they proceed under the old rules.

Mr. President, we are in a situation where as far as I am concerned this is clearly half a loaf. But, as the saying goes, half a loaf is better than none. Apparently those who have worked on this—and I have great respect for those who are involved—feel this is the best that could be achieved. I am not at all sanguine that when suggestions are made we will try to take up the other errors or the problems that are involved in the current legislation in the future.

I think once we pass these, once the coal operators are relieved of past obligations, once we increase the tax, there will be little chance of making the corrections in past cases.

Nonetheless, this is something, and based on that, although it is not with the wildest enthusiasm. I will support, I want to indicate that I do support, the measure that is before us.

Mr. DOLE. Mr. President, as far as I know there is nobody demanding a rollcall on this particular amendment. They are demanding rollcalls on the substitute, as amended.

The PRESIDING OFFICER. Is there further debate on this amendment? If not, the question is on agreeing to the amendment of the Senator from Utah.

The amendment (UP No. 800) was agreed to.

Mr. DOLE. Mr. President, as far as the Senator from Kansas knows, there are no further amendments. Does the Senator from West Virginia know of any additional amendments?

Mr. RANDOLPH. I know of no amendment, other than the one with which we have just dealt.

Mr. METZENBAUM. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. The yeas and nays have been ordered on the Dole substitute, as amended.

Mr. DOLE. Mr. President, there has been some suggestion, in addition to the vote on the amendment, the substitute amendment, that there would be some who would want a vote on final passage. It is going to be the identical vote. I hope, in the spirit of those who want the black lung bill acted on today by the House, that we have just one vote. It will be an identical vote. I could vitiate the yeas and nays on the substitute and have it on final passage, but I have been advised by Senator PROXMIRE that he wanted a vote on both.

Mr. President, I suggest the absence of a quorum so we may make certain everybody has been protected.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the inquiry.

Mr. DOLE. The yeas and nays have been ordered. The vote would be on the substitute, as modified with the Hatch amendment, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOLE. Mr. President, we have had a quorum call in for 5 or 6 minutes. Members who are absent have been notified. I suggest that we vote.

The PRESIDING OFFICER. The question is on agreeing to the substitute amendment of the Senator from Kansas (Mr. DOLE). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), and the Senator from Texas (Mr. TOWER) are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON) and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 56, nays 36, as follows:

[Rollcall Vote No. 493 Leg.]

YEAS—56

Andrews	Gorton	Matsunaga
Armstrong	Grassley	Murkowski
Baucus	Hart	Nickles
Boschwitz	Hatch	Packwood
Burdick	Hatfield	Pell
Byrd, Harry F., Jr.	Hawkins	Quayle
Chafee	Hayakawa	Randolph
Cochran	Heinz	Rudman
Cohen	Helms	Schmitt
D'Amato	Hollings	Simpson
Danforth	Huddleston	Specter
Denton	Humphrey	Stafford
Dodd	Jepsen	Stevens
Dole	Johnston	Symms
East	Laxalt	Thurmond
Ford	Leahy	Tsongas
Garn	Long	Wallop
Glenn	Lugar	Warner
	Mathias	Williams

NAYS—36

Abdnor	Eagleton	Moynihan
Bentsen	Exon	Nunn
Biden	Heflin	Pressler
Boren	Inouye	Proxmire
Bradley	Jackson	Pryor
Bumpers	Kassebaum	Riegle
Byrd, Robert C.	Kasten	Roth
Cannon	Levin	Sarbanes
Chiles	Mattingly	Sasser
DeConcini	Melcher	Stennis
Dixon	Metzenbaum	Weicker
Domenici	Mitchell	Zorinsky

NOT VOTING—8

Baker	Goldwater	Percy
Cranston	Kennedy	Tower
Durenberger	McClure	

So Mr. DOLE's amendment (UP No. 798), as modified and amended, was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The amendment as modified and amended is agreed to.

Mr. DOLE. Mr. President, I know of no other amendments. I ask for third reading.

The PRESIDING OFFICER. If there be no further amendments to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time. The bill was read the third time.

REPORTING REQUIREMENT FOR TAX LEASES

● Mr. PELL. Mr. President, I support the amendment offered by the Senate Finance Committee as an amendment to the black lung legislation, requiring early reporting to the Treasury Department of "tax leases" entered into by companies during 1981 under the new special leasing provisions of the Economic Recovery Tax Act.

I have introduced, with Senator BUMPERS and a number of additional cosponsors, legislation (S. 1896) to repeal the special leasing provisions. I am convinced that the special leasing provisions, which permit companies to buy and sell Federal tax credits through transactions that are not leases but will be treated as leases by the Internal Revenue Service, is bad public policy.

The public trading of Federal tax credits as though they were bushels of wheat or shares of stock is offensive to the public, and an inefficient and deceptive way of providing investment incentives to companies, both profitable or not profitable, that do not owe any Federal taxes. The price of giving these tax subsidies to companies without Federal tax liability, is to give a share of the tax credits to companies who buy the credits through leases but have done nothing to earn the additional tax credits.

It will be very helpful to the Congress when this special leasing provision is considered in the next session to have the most accurate information possible about the use of the special leasing provisions during 1981. The reporting requirement in the amendment to the black lung legislation is essential if we are to have accurate statistics on the use of the leasing provision, and I commend the Finance Committee for presenting the proposal.●

Mr. ROBERT C. BYRD. Mr. President, the measure before the Senate deals with a subject that deeply affects my State of West Virginia. Thousands of West Virginians earn their daily bread by working in coal mines.

Working conditions in coal mines are extremely unpleasant. Coal dust in mines remains a problem, and that dust causes pneumoconiosis—black lung—the scourge of miners.

However, dust levels have been subject to controls for more than 10 years, and progress has been made in controlling dust since the Coal Mine Health and Safety Act became law in 1969.

We must maintain the momentum for progressive improvement in dust levels and in coal mine working conditions generally, so that miners will not have to fear either a quick death in an accident or a slow death from black lung disease.

The latent nature of pneumoconiosis must be recognized. An accumulation of coal dust in a miner's lungs may not produce clearly recognizable black lung symptoms immediately. These symptoms—coughing, spitting blood, and shortness of breath—may appear long after a miner's last exposure to coal dust.

The measure before the Senate attempts to provide for the financial integrity of the black lung disability trust fund. Unless the fund is bolstered, the entire black lung benefits program could be put in jeopardy in the future.

I compliment the manager of the bill, Mr. DOLE, and the ranking minority manager, Mr. LONG, on a very skillful job, and I express my personal appreciation to them in that regard.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Idaho (Mr. MCCLURE), the Senator from Illinois (Mr. PERCY), the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. BAKER) would vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. CRANSTON) is necessarily absent.

The PRESIDING OFFICER (Mr. WALLOP). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 63, nays 30, as follows:

[Rollcall Vote No. 494 Leg.]

YEAS—63

Andrews	Danforth	Hatch
Armstrong	Denton	Hatfield
Baucus	Dixon	Hawkins
Boschwitz	Dodd	Hayakawa
Burdick	Dole	Heflin
Byrd, Harry F., Jr.	East	Heinz
Byrd, Robert C.	Ford	Helms
Chafee	Garn	Hollings
Cochran	Glenn	Huddleston
Cohen	Gorton	Humphrey
D'Amato	Grassley	Inouye
	Hart	Jackson
Jepsen	Murkowski	Stafford
Johnston	Nickles	Stevens
Kennedy	Packwood	Symms
Laxalt	Pell	Thurmond
Leahy	Quayle	Tsongas
Long	Randolph	Wallop
Lugar	Rudman	Warner
Mathias	Schmitt	Williams
Matsunaga	Simpson	
Melcher	Specter	

NAYS—30

Abdnor	Eagleton	Pressler
Bentsen	Exon	Proxmire
Biden	Kassebaum	Pryor
Boren	Kasten	Riegle

Domenici	Nunn	Zorinsky

NOT VOTING—7

Baker	Goldwater	Tower
Cranston	McClure	
Durenberger	Percy	

So the bill (H.R. 5159) was passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MATTINGLY). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECORD CARRIER COMPETITION ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 271.

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States:

Resolved, That the bill from the Senate (S. 271) entitled "An Act to repeal section 222 of the Communications Act of 1934", do pass with the following amendments:

Strike out all after the enacting clause, and insert:

SHORT TITLE

SECTION 1. This Act may be referred to as the "Record Carrier Competition Act of 1981".

COMPETITION AMONG RECORD CARRIERS

SEC. 2. Section 222 of the Communications Act of 1934 is amended to read as follows:

"COMPETITION AMONG RECORD CARRIERS

"SEC. 222. (a) For purposes of this section:

"(1) The term 'existing international record carrier' means any international record carrier which is eligible, on the date of the enactment of the Record Carrier Competition Act of 1981, to obtain record traffic from a record carrier in the United States for delivery outside the United States.

"(2) The term 'international record carrier' means any United States record carrier which derives a majority of its revenues during any calendar year from the provision of international record communications services between points of entry into or exit from the United States and points outside the United States.

"(3) The term 'primary existing international record carrier' means any existing international record carrier which is engaged in the direct provision of record communications services between the United States and 4 or more continents.

"(4) The term 'record carrier' means a common carrier engaged in the offering for hire of any record communications service, including service on interstate network facilities between 2 points located in the same State. Such term does not include any common carrier which derives a majority of its revenues during any calendar year from the provision of services other than record communications service.

"(5) The terms 'record communications facility' and 'facility' mean any telecommunications facility or equipment designed or used primarily to provide any record communications service.

"(6) The term 'record communications service' means any telecommunications service which is designed or used primarily to transfer information which originates or terminates in written or graphic form.

"(b)(1) The Commission shall, to the maximum extent feasible, promote the development of fully competitive domestic and international markets in the provision of record communications service, so that the public may obtain record communications service and facilities (including terminal equipment) the variety and price of which are governed by a fully competitive marketplace. The Commission shall reduce the extent to which it regulates record carriers as the development of competition among record carriers replaces the need for regulation to protect the public.

"(2) In furtherance of the purposes of this section, the Commission shall assure that none of the costs of regulated or unregulated record communications services and facilities (including terminal equipment) are borne by the users of any other record communications services.

"(c)(1)(A) Each record carrier shall make available to any other record carrier, upon reasonable request, full interconnection with any record communications service or record communications facility operated by such record carrier. Such record communications service or facility shall be made available, through written agreement, upon terms and conditions which are just, fair, and reasonable, and which are otherwise consistent with the purposes of this section.

"(B)(i) If any record carrier engages both in the offering for hire of domestic record communications services and in the offering for hire of international record communications services, then such record carrier shall be treated as a separate domestic record carrier and a separate international record carrier for purposes of administering the interconnection requirements established in subparagraph (A).

"(i) In any case in which such separate domestic record carrier furnishes interconnection to such separate international record carrier, any interconnection which such separate domestic record carrier furnishes to other international record carriers shall be (1) equal in type and quality; and (II) made available at the same rates and upon the same terms and conditions.

"(iii) In any case in which such separate international record carrier furnishes interconnection to such separate domestic record carrier, any interconnection which such separate international record carrier furnishes to other domestic record carriers shall be (I) equal in type and quality; and (II) made available at the same rates and upon the same terms and conditions.

"(iv)(I) Subject to the provisions of subclause (II), if a request for interconnection under subparagraph (A) is for the purpose of providing international record communi-

cations service, then the agreement entered into under subparagraph (A) shall require that the allocation of record communications service between points outside the United States and points of entry in the United States shall be based upon a pro rata share of record communications service between points of exit out of the United States and points outside the United States provided by the carrier making such request for interconnection.

"(II) The requirement established in subclause (I) shall not apply in any case in which the customer requesting any record communications service between a point outside the United States and a point of entry in the United States has the option to specify the international record carrier which will provide such record communications service.

"(2) If any request made by a record carrier under paragraph (1) will require an agreement under which any record communications service or record communications facility operated by one of the parties to such agreement will be used by any other party to such agreement, then such agreement shall establish a nondiscriminatory formula for the equitable allocation of revenues derived from such use between the parties to such agreement, except that each party to such agreement shall have the right to establish the total price charged by such party to the public for any such service which is originated by such party, consistent with the provisions of section 203. To the extent possible, and consistent with the provisions of paragraph (3)(B)(ii), the Commission shall require that such equitable allocation of revenues be based upon the relative costs of the record communications service or facility employed as a result of such agreement.

"(3)(A) The Commission, as soon as practicable (but not later than 15 days) after the date of the enactment of the Record Carrier Competition Act of 1981, shall convene a meeting between (i) all existing international record carriers; and (ii) any record carriers which the Commission determines would be parties to any agreement under paragraph (1). Such meeting shall be held for the purpose of negotiating the agreement required in paragraph (1). Representatives of the Commission shall attend such meeting for purposes of monitoring such negotiations.

"(B)(i) If—

"(I) any record carriers specified in subparagraph (A)(ii); and

"(II) a majority of the primary existing international record carriers involved in the meeting convened by the Commission under subparagraph (A);

fail to enter into an agreement before the end of the 45-day period following the beginning of such meeting, then the Commission shall issue an interim or final order which establishes a just, fair, reasonable, and nondiscriminatory agreement which is consistent with the purposes of this section. Subject to the provisions of paragraph (4)(B), any such agreement established by the Commission shall be binding upon such parties.

"(ii) Such interim or final order shall be issued not later than 90 days after the date on which the Commission convenes the meeting under subparagraph (A). If—

"(I) any record carriers specified in subparagraph (A)(ii); and

"(II) a majority of the primary existing international record carriers involved in the meeting convened by the Commission under subparagraph (A);

reach an agreement which complies with the requirements of this section, and such agreement is entered into before the issuance of such order by the Commission under this subparagraph, then such agreement of the parties shall take effect and the Commission shall not be required to issue any such order.

"(C) Any record carrier which is not subject to the agreement entered into, or established by the Commission, under this paragraph may elect to be subject to the terms of such agreement upon furnishing written notice to the Commission and to all existing parties to such agreement.

"(D)(i) The agreement entered into, or established by the Commission, under this paragraph shall terminate at the end of the 3-year period following the effective date of such agreement, except that the Commission shall have authority to provide that such agreement shall continue in effect if the Commission determines that such continuation is necessary to carry out the purposes of this section.

"(ii) After the expiration of such agreement, in any case in which a record carrier seeking interconnection in accordance with paragraph (1) is unable to enter into an agreement for the provision of such interconnection, the Commission shall have authority to establish an agreement for such interconnection in accordance with the provisions of this section.

"(E) No United States record carrier shall have any authority to enforce any provision contained in an agreement for the provision of record communications service or facilities which is entered into or renewed after the date of the enactment of the Record Carrier Competition Act of 1981, if the Commission determines that such provision impedes the development or operation of competitive record communications service markets.

"(4)(A) The Commission shall have authority to vacate or modify any agreement entered into by any record carriers under this section if the Commission determines that such agreement is not consistent with the purposes of this section. During the 3-year period specified in paragraph (3)(D)(i), the Commission shall vacate or modify any such agreement under this subparagraph if the Commission determines that such agreement discriminates against any carrier.

"(B) In any case in which the Commission issues an interim or final order under paragraph (3)(B), the parties which are specified in subclauses (I) and (II) of paragraph (3)(B)(ii) and which are subject to such order shall have authority to supersede the application of such order by entering into an agreement which is consistent with the purposes of this section, except that any such agreement shall be subject to the authority of the Commission under subparagraph (A).

"(5) In any case in which a United States record carrier (other than an international record carrier) submits an application to the Commission for authority to provide international record communications service, the Commission shall not have any authority to take any final action with respect to such application until the end of the 120-day period following the date a written agreement is entered into between such record carrier and existing international record carriers under paragraph (3) (or following the effective date of any interim or final order issued by the Commission under paragraph (3)(B) with respect to such carriers). The limitation upon Commission authority established in this paragraph shall expire at the end of the 210-day period following the date of the enactment of the Record Carrier Competition Act of 1981.

"(d) Each record carrier shall be authorized to provide record communications service in the United States domestic market and in the international market. Any such carrier seeking to provide such service, directly or indirectly, shall submit an application to the Commission under section 214. The Commission shall act expeditiously upon any such application.".

COMMISSION OVERSIGHT OF DISTRIBUTION FORMULAS

SEC. 3. (a) Subject to the provisions of subsection (b), the Federal Communications Commission shall exercise its authority under the Communications Act of 1934 to continue its oversight of the establishment of just and reasonable distribution formulas for unrouted outbound telegraph traffic and the allocation of revenues with respect to such traffic, consistent with the purposes of section 222 of the Communications Act of 1934, as amended in section 2.

(b) The provisions of subsection (a) shall cease to have any force or effect at the end of the 1-year period beginning on the date of the enactment of this Act.

EFFECT OF AMENDMENT UPON CERTAIN CONTRACTS

SEC. 4. The amendment made in section 2 shall not affect the validity of the terms of any otherwise lawful contract relating to the distribution of outbound international record traffic between any domestic record carrier and any international record carrier if such contract was entered into before June 23, 1981.

Amend the title so as to read: "An Act to amend the Communications Act of 1934 to eliminate certain provisions relating to consolidations or mergers of telegraph and record carriers and to create a fully competitive marketplace in record carriage, and for other purposes.".

UP AMENDMENT NO. 801

Mr. STEVENS. Mr. President, I send an amendment to the desk on behalf of Senator GOLDWATER and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) for Mr. GOLDWATER proposes an unprinted amendment numbered 801.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed to be inserted by the House engrossed amendment to the text of the bill, insert the following:

SHORT TITLE

SECTION 1. This Act may be referred to as the "Record Carrier Competition Act of 1981".

COMPETITION AMONG RECORD CARRIERS

SEC. 2. Section 222 of the Communications Act of 1934 is amended to read as follows:

"COMPETITION AMONG RECORD CARRIERS

"SEC. 222. (a) For purposes of this section:

"(1) The term 'primary existing international record carrier' means any record carrier which (A) derives a majority of its revenues during any calendar year from the provision of international record communications services between points of entry into or exit from the United States and points outside the United States; (B) is eligible, on the date of the enactment of the Record Carrier Competition Act of 1981, to obtain record traffic from a record carrier in the United States for delivery outside the United States; and (C) is engaged in the direct provision of record communications services between the United States and four or more continents.

"(2) The term 'record carrier' means a common carrier engaged in the offering for

hire of any record communications service, including service on interstate network facilities between two points located in the same State. Such term does not include any common carrier which derives a majority of its revenues during any calendar year from the provision of services other than record communications service.

"(3) The term 'record communications service' means those services traditionally offered by telegraph companies, such as telegraph, telegram, telegram exchange, and similar services involving an interconnected network of teletypewriters.

"(b)(1) The Commission shall, to the maximum extent feasible, promote the development of fully competitive domestic and international markets in the provision of record communications service, so that the public may obtain record communications service and facilities (including terminal equipment) the variety and price of which are governed by competition. In order to meet the purposes of this section, the Commission shall forbear from exercising its authority under this Act as the development of competition among record carriers reduces the degree of regulation necessary to protect the public.

"(2) In furtherance of the purposes of this section, record carriers shall not impose upon users of any regulated record communications services the costs of any other services or facilities (including terminal equipment), whether regulated or unregulated.

"(c)(1)(A)(i) In implementing its responsibilities under section 201(a), the Commission shall require each record carrier to make available to any other record carriers, upon reasonable request, full interconnection with any facility operated by such record carrier, and used primarily to provide record communications service. Such facility shall be made available, through written agreement, upon terms and conditions which are just, fair, and reasonable, and which are otherwise consistent with the purposes of this section.

"(ii)(I) Subject to the provisions of subclause (II), if a request for interconnection under clause (i) is for the purpose of providing international record communications service, then the agreement entered into under clause (i) shall require that the allocation of record communications service between points outside the United States and points of entry in the United States shall be based upon a pro rata share of record communications service between points of exit out of the United States and points outside the United States provided by the carrier making such request for interconnection.

"(II) The requirement established in subclause (I) shall not apply in any case in which the customer requesting any record communications service between a point outside the United States and a point of entry in the United States has the option to specify the international record carrier which will provide such record communications service.

"(B) The Commission shall require that—

"(i) if any record carrier engages both in the offering for hire of domestic record communications services and in the offering for hire of international record communications services, then such record carrier shall be treated as a separate domestic record carrier and a separate international record carrier for purposes of administering interconnection requirements;

"(ii) in any case in which such separate domestic record carrier furnishes interconnection to such separate international record carrier, any interconnection which such separate domestic record carrier furnishes to other international record carriers shall be (I) equal in type and quality; and (II) made available at the same rates and upon the same terms and conditions; and

"(iii) in any case in which such separate international record carrier furnishes interconnection to such separate domestic record carrier, any interconnection which such separate international record carrier furnishes to other domestic record carriers shall be (I) equal in type and quality; and (II) made available at the same rates and upon the same terms and conditions.

The requirements of clauses (i), (ii), and (iii) shall not apply to a record carrier if such record carrier does not have a significant share of the market for record communications services.

"(2) If any request made by a record carrier under paragraph (1)(A)(i) will require an agreement under which any record communications service or facility operated by one of the parties to such agreement will be used by any other party to such agreement, then such agreement shall establish a nondiscriminatory formula for the equitable allocation of revenues derived from such use between the parties to such agreement, except that each party to such agreement shall have the right to establish the total price charged by such party to the public for any such service which is originated by such party, consistent with the provisions of section 203. To the extent possible, and consistent with the provisions of paragraph (3)(B)(ii), the Commission shall require that such equitable allocation of revenues be based upon the costs of the record communications service or facility employed as a result of such agreement.

"(3)(A) The Commission, as soon as practicable (but not later than 15 days) after the date of the enactment of the Record Carrier Competition Act of 1981, shall convene a meeting among all record carriers which the Commission determines would be parties to any agreement required by paragraph (1)(A)(i). Such meeting shall be held for the purpose of negotiating any such agreement. Representatives of the Commission shall attend such meeting for purposes of monitoring and presiding over such negotiations.

"(B)(i) In the case of any such required agreement, if—

"(I) the record carrier subject to the interconnection requirement; and

"(II) a majority of the primary existing international record carriers involved in the meeting convened by the Commission under subparagraph (A);

fail to enter into an agreement before the end of the 45-day period following the beginning of such meeting, then the Commission shall issue an interim or final order which establishes a just, fair, reasonable, and nondiscriminatory agreement which is consistent with the purposes of this section. Any such agreement established by the Commission shall be binding upon such parties.

"(ii) Such interim or final order shall be issued not later than 90 days after the date on which the Commission convenes the meeting under subparagraph (A). In the case of any such required agreement, if—

"(I) the record carrier subject to the interconnection requirement; and

"(II) a majority of the primary existing international record carriers involved in the meeting convened by the Commission under subparagraph (A);

reach an agreement which complies with the requirements of this section, and such agreement is entered into before the issuance of such order by the Commission under this subparagraph, then such agreement of the parties shall take effect and the Commission shall not be required to issue any such order.

"(C) Any record carrier which is not subject to the agreement entered into, or established by the Commission, under this paragraph may elect to be subject to the terms of such agreement upon furnishing written notice to the Commission and to all existing parties to such agreement. After a carrier makes such an election, the terms and arrangements established by the agreement shall apply to such carrier to the extent practicable; as determined by the Commission.

"(4) The Commission shall have authority to vacate or modify any agreement entered into by any record carriers under this section if the Commission determines that (A) such agreement is not consistent with the purposes of this section; or (B) such agreement unjustly or unreasonably discriminates against any record carrier.

"(5) If the Western Union Telegraph Company submits an application to the Commission for authority to provide international record communications service, the Commission shall not have any authority to take any final action with respect to such application until the end of the 120-day period following the date a written agreement is entered into between such Company and other record carriers under paragraph (3), or following the effective date of any interim or final order issued by the Commission under paragraph (3)(B) with respect to such carriers. The limitation upon Commission authority established in this paragraph shall expire at the end of the 210-day period following the date of the enactment of the Record Carrier Competition Act of 1981.

"(d) Subject to the provisions of subsection (c)(5), each record carrier may provide record communications service in the United States domestic market and in the international market. Any record carrier seeking to provide domestic record communications service may provide such service without submitting an application to the Commission under section 214 unless the Commission requires such a submission. The Commission shall act expeditiously upon any application submitted pursuant to section 214.

"(e)(1) At the end of the 36-month period following the date of the enactment of the Record Carrier Competition Act of 1981, the provisions of subsection (c), other than paragraph (1)(B) of such subsection, shall cease to have any force or effect.

"(2) The provisions of paragraph (1) shall not be construed to affect the obligation of any carrier to interconnect with any other carrier pursuant to this Act.".

COMMISSION OVERSIGHT OF DISTRIBUTION FORMULAS

SEC. 3. (a) Subject to the provisions of subsection (b), the Federal Communications Commission shall exercise its authority under the Communications Act of 1934 to continue its oversight of the establishment of just and reasonable distribution formulas for unrouted outbound telegraph traffic and the allocation of revenues with respect to such traffic, consistent with the purposes of section 222 of the Communications Act of 1934, as amended in section 2.

(b) The provisions of subsection (a) shall cease to have any force or effect at the end of the 1-year period beginning on the date of the enactment of this Act.

EFFECT OF AMENDMENT UPON CERTAIN CONTRACTS

SEC. 4. The amendment made in section 2 shall not affect the validity of the terms of any otherwise lawful contract relating to the distribution of outbound international record traffic between any domestic record

carrier and any international record carrier if such contract was entered into before June 23, 1981.

AMENDMENT TO OTHER LAW

SEC. 5. (a) Section 122(a) of the Rock Island Transition and Employee Assistance Act is amended by adding at the end thereof the following new sentence: "The Commission shall have authority to authorize continued rail service under this section over the lines of the Rock Island Railroad until the disposition of the properties of the estate of the Rock Island Railroad.".

(b) The applicability of the amendment by subsection (a) to Interstate Commerce Commission Service Order 1498 shall expire at the end of May 15, 1982.

(By request of Mr. STEVENS the following statement was ordered to be printed in the RECORD:)

● Mr. GOLDWATER. Mr. President, S. 271, introduced on January 27, 1981, was passed by the Senate on June 23, 1981. It is designed to promote competition in the international telecommunications record markets by removing existing statutory barriers to Western Union entry into international markets.

The House of Representatives moved expeditiously to adopt its own version of S. 271. I congratulate the House on its success in moving this long-overdue legislation. The amendment I offer today is consistent with the goals of the Senate and House view—that the Communications Act not be a barrier to the development of a fully competitive international market.

This amendment would simplify the pending bill substantially. There were concerns that the Federal Communications Commission was not carrying out its responsibilities under the Communications Act of 1934 to insure fair and adequate interconnection arrangements among the affected carriers. In an effort to urge the Commission and the carriers to move expeditiously, the House has included statutory language which is clearly duplicative of existing Commission authority under the 1934 act. The duplication provisions are merely designed to settle the existing, outstanding, lingering disputes among record carriers regarding Western Union's obligations to interconnect for the provision of record services.

This bill would simply set a timetable for accomplishing these interconnection goals, have the interconnection arrangements in place for 3 years, and remove this added layer of regulation at the end of the 3-year period. Thereafter, the carriers and the Commission would continue to rely solely on the existing act's provisions, a carrier with a significant share of the market for record services, and which provides domestic and international services would be required to treat those domestic and international services separately. Interconnection between the international and domestic operations of any carrier would be made available to any other international or domestic carrier on a nondiscriminatory basis.

Whatever language of this bill duplicates that of the existing act must be interpreted as additional authority for the Commission—not as a substitute for such existing authority. To the extent that the language of this bill and the act are in conflict, the language of the 1934 act must predominate. Of course, the issue of duplicative authority will disappear after 3 years when the regulatory provisions of this bill will "sunset."

This bill further seeks to promote entry by new carriers into the international market. It assures that a carrier generating record traffic destined for outside the United States be guaranteed a pro rata share of inbound or return traffic. A new carrier will not benefit from this section once it obtains an operating agreement from a foreign country. Our hope is that this provision would encourage foreign telecommunications entities to deal with all U.S. carriers and to cease practices that exclude some carriers.

This amendment takes another step in the deregulation of domestic telecommunications markets. It requires that any record carrier seeking to provide domestic record communications services may do so without submitting an application under section 214 of the act, unless the Commission so orders. This relieves the Commission, in most cases, from finding that the public interest, convenience, and necessity would be served by the proposed domestic service.

Any carrier, however, seeking to provide international services will continue to file an application under section 214 of the act. The difference in treatment for international services is based upon our belief that the Commission still has a more significant role to play in the direction of the development of a truly competitive international marketplace.

It is also based upon our belief that, in time, our procompetitive policies will not be frustrated in foreign markets—but as of now, the international market needs greater coordinated U.S. influence.

This amendment expressly authorizes the Commission to forbear from regulating record carriers and their services as competition develops. This means that there is no provision in the existing 1934 act or in this bill that will require FCC action in a competitive record marketplace.

Finally, the provisions of S. 271 designed to expedite Commission processes must not be interpreted to relieve the Commission of its obligations under the Administrative Procedure Act.

Mr. President, I believe this amendment, simplifying and clarifying the goals of both Houses, will go far in assuring the development of competition in our record market. I, hereby, move its adoption.●

ROCK ISLAND RAILROAD AMENDMENT

Mrs. KASSEBAUM. Mr. President, I am grateful for the inclusion of this amendment which will clarify the power of the Interstate Commerce Commission to authorize continued rail service over the lines of the bankrupt Rock Island Railroad.

When Congress passed the Rock Island Transition and Employee Assistance Act of 1980, section 122 was included to permit the ICC to allow continued service over these lines until final disposition of the properties of the bankrupt estate. Unfortunately, the courts have construed this section as authorizing the ICC to issue these service orders only on a temporary basis until the court approved a final abandonment. With respect to the Rock Island, a court order permitting abandonment became effective in March of this year. Accordingly, an existing ICC order that would have provided continued service over the Rock Island line serving Kansas, Oklahoma, and Texas has been invalidated by the courts, and this service is scheduled to cease on December 31.

Mr. President, the importance of rail service to the economy of the Midwestern States is well known. The old Rock Island rail system remains an economic lifeline to the Midwest. Huge volumes of agricultural and industrial products are transported over these lines. In Kansas, nearly 40 percent of the total commercial grain storage capacity is served by the Rock Island system. The consequences of the court's action will be to deprive approximately 77 cities, towns, and communities, and hundreds of shippers of rail service. In addition, approximately 400 railroad employees, most of whom are ex-Rock Island employees, will have to be released from service this month.

The amendment which I offer is intended to clarify what the congressional intent was in enacting section 122(a) of the Rock Island Transition and Employee Assistance Act. The House and Senate committees with jurisdiction understand the critical emergency facing shippers and communities in Texas, Oklahoma, and Kansas as a result of the Bankruptcy Court's recent interpretation of section 122(a). Because of this emergency situation, the House committee has agreed to accept this amendment, despite the lack of any hearings or committee action. However, the House committee feels strongly that it must have the opportunity to review this problem, and other problems related to the Rock Island Railroad, through normal committee procedures, next year. For that reason, the applicability of the amendment to the case giving rise to the Bankruptcy Court's interpretation of section 122(a) is effective only until May 15, 1982.

Mr. CANNON. Earlier this year the Senate passed S. 271 in order to remove the statutory ban on Western Union entering international markets. The Senate bill was a simple and straightforward repeal of section 222 of the Communications Act.

The House has taken S. 271 and amended it extensively. Most of the provisions inserted by the House are geared toward the transition from a highly regulated record carrier industry—both domestically and internationally—to one more competitive marketplace-oriented. It seems to me that these transition provisions are within the scope of the bill that the Senate enacted. My principal concern is not so much with the provision themselves, but to assure that we are truly moving toward less regulation and more competition in this industry.

Hence, today we are offering amendments to the House-passed version of this legislation that clarify the transition nature of most of the provisions. I believe that these changes will be acceptable to the House. The basic concept in these proposed amendments is that the Federal Communications Commission currently has the authority to do everything that the bill directs them to do. We are merely giving specific guidance during a transition period as to the regulatory policies that we want to emphasize.

Some of the provisions in the bill overlap with certain other parts of the current Communications Act. It is not the intent to override, either explicitly or implicitly, any other sections of the Communications Act. There is to be no implication drawn that in the absence of legislation the Commission does not have the same interconnection authority through section 201(a) as it does through this provision.

Nor are we saying that the Commission does not currently have the authority to forebear from regulation. We are simply providing policy guidance for the transition period. After that period of time, the bill makes it clear that the Commission has authority to continue its regulatory functions in the manner most consistent with promoting competition.

I think it is important to point out that this bill is a genuine deregulation bill in one major respect. It specifically removes the statutory barriers for entry into the domestic record carrier market. Applicants no longer need file applications under section 214 of the act unless specifically required to do so by the Commission. We have left a residual of FCC authority in this area to cover such contingencies as satellite applications or similar circumstances.

The Commission could also use its authority to require 214 applications by dominant carriers who do not now provide extensive record carrier service. In any case, it is the strong desire that the residual authority be used sparingly, if at all.

The domestic record carrier market is currently a virtual monopoly by one carrier. Open entry is the best solution to breaking that monopoly. The Commission should not exercise its authority except for technical considerations or to promote competition. Moreover, in light of this entry decontrol, we would encourage the Commission to examine other regulations imposed upon the record carrier industry and forebear from whatever regulation that is not necessary—including tariffs, reporting requirements, and so on.

By way of explanation, those provisions of the legislation that specifically do not apply to any record carrier not having a "significant market share" of the market for record communications services, leave the Commission with substantial discretion. In determining which carriers do or do not have a substantial market share at any given time, the FCC must look at the overall picture of the number of carriers involved and the various percentages of market share.

It is our view that currently all but four carriers would be exempted from these provisions—ITT World Communications, Inc.; RCA Global Communications, Inc.; TRT Telecommunications Corp.; and Western Union International, Inc. If in the future, smaller carriers build their market share to a substantial share, or if Western Telegraph Co. enters international markets, they would also be included.

There is another aspect of this bill that also warrants comment. The international telecommunications market has proven to be difficult for new carriers to enter because of the resistance by foreign telecommunications monopolies, the PTT's. We believe that this bill's interconnection guidance, including subsection (c)(1)(A)(ii)—the "inbound flow" provision, is a good first step in aiding U.S. carriers that want to enter the international record market. The Commission should explore other ways to aid U.S. entry overseas.

While the "inbound flow" part of the interconnection subsection ceases to have any force or effect 3 years after the date of enactment under the provisions of subsection (e)(1), the Commission has the authority under other provisions of the Communications Act, including section 201, to continue such a requirement if it finds that such a requirement will enhance competition in the international record communications market and there is not a more effective method of easing entry and thereby increasing competition in the international record communications market.

Mr. HOLLINGS. Mr. President, the amendment offered to the House amendment to S. 271 provides for a sunset of 3 years to the interconnection, including return flow, requirements of the bill. The purpose of these sunset amendments about to be agreed upon by the Senate is to fall back upon the general provisions of the Communications Act after the initial 3-year period of operation under the specific terms and conditions of interconnection and return flow detailed in this measure.

This is appropriate, Mr. President, because this bill, in our view, merely makes explicit authority already available to the FCC under section 201(a) and other sections of the act. Both during and after this 3-year start-up period, of course, other remedies in addition to the ones specified in this bill might be chosen by the Commission to achieve a competitive environment in international record telecommunications.

It would be completely consistent with these sunset provisions that the Commission at the end of or prior to the expiration of the 3-year period to extend these specific interconnection and return flow provisions and to adopt any other provisions deemed by them to assure the continuation of a competitive environment under the existing authority of the Communications Act as amended.

Indeed, if the new carriers that we expect might enter this business have not signed operating agreements with foreign PTT's at that time, we would expect the FCC to continue the interconnection, including return flow, requirements in subpart (c). Rather than freezing in detailed remedies forever, the purpose of the sunset provision is to point the way and we are relying on the Commission's general authority to extend or modify these remedies to assure the continuing accomplishment of purposes of this act, that is, providing a competitive environment for both existing and new carriers in the international record carrier business.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I move that the Senate concur in the amendments of the House with an amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. HART. Mr. President, I wonder if the Senator from Alaska will yield for a question?

Mr. STEVENS. I am happy to yield.

Mr. HART. Mr. President, I do not want to be picky on this last day, but this Senator has a personal interest in a bill that is pending. I have been trying all day to find out what the schedule is. I wonder if the Senator from Alaska, as the floor manager, would lay out what the agenda is for all Senators?

Mr. STEVENS. I thank the Chair and I thank the Senator.

It is my understanding we are now going to proceed with bills which have passed the House or will pass the House if we get them to the House in time. Following that we will take up other matters, including, I believe, the matter in which the Senator from Colorado is deeply interested, the NRC bill, which we will get to as soon as we can. We have no similar assurance that the House will pass that bill today. We do have assurance the House will pass the bills we are working on at this point.

Mr. HART. I wonder if the Senator has any idea at what time we will be on that?

Mr. STEVENS. Our present process, as I understand it, is trying to handle the matters which would be almost pro forma and are going to take about the next hour, but not much more, and we will try to do it in less time than if it is possible.

Mr. HART. I thank the Senator.

CZECHOSLOVAKIAN CLAIMS SETTLEMENT ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1946.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1946) entitled "An Act to provide for the final settlement of certain claims against Czechoslovakia, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

SHORT TITLE

SECTION 1. This Act may be cited as the "Czechoslovakian Claims Settlement Act of 1981".

APPROVAL OF AGREEMENT

SEC. 2. (a) The Congress hereby approves the Agreement between the Government of the United States of America and the Government of the Czechoslovak Socialist Republic on the Settlement of Certain Outstanding Claims and Financial Issues, initialed at Prague, Czechoslovakia on November 6, 1981.

(b) The President may, without further approval by the Congress, execute such technical revisions of the Agreement approved by subsection (a) of this section as in his judgment may from time to time be required to facilitate the implementation of that Agreement. Nothing in this subsection shall be construed to authorize any revision of that Agreement to reduce any amount to be paid by the Government of the Czechoslovak Socialist Republic to the United States Government under the Agreement, or to defer the payment of any such amount.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) "Agreement" means the Agreement on the Settlement of Certain Outstanding Claims and Financial Issues approved by section 2(a) of this Act;

(2) "national of the United States" has the meaning given such term by section 401(1) of the International Claims Settlement Act of 1949;

(3) "Commission" means the Foreign Claims Settlement Commission of the United States;

(4) "Fund" means the Czechoslovakian Claims Fund established by section 402(b) of the International Claims Settlement Act of 1949;

(5) "Secretary" means the Secretary of the Treasury; and

(6) "property" means any property, right, or interest.

THE FUND

SEC. 4. (a) The Secretary shall cover into the Fund the amount paid by the Government of the Czechoslovak Socialist Republic in settlement and discharge of claims of nationals of the United States pursuant to article 1(1) of the Agreement, and shall deduct from that amount $500,000 for reimbursement to the United States Government for expenses incurred by the Department of the Treasury and the Commission in the administration of this Act and title IV of the International Claims Settlement Act of 1949. The amount so deducted shall be covered into the Treasury to the credit of miscellaneous receipts. The deduction required by this subsection shall be made in lieu of the deduction provided in section 402(e) of the International Claims Settlement Act of 1949.

(b) The Secretary shall establish three accounts in the Fund into which the amount covered into the Fund pursuant to subsection (a) of this section, less the deduction required by that subsection, shall be covered as follows:

(1) An account into which $72,500,000 shall be covered, to be available for payment in accordance with section 8 of this Act on account of awards certified pursuant to section 410 of the International Claims Settlement Act of 1949.

(2) An account into which $1,500,000 shall be covered, to be available for payment in accordance with section 8 of this Act on account of awards determined pursuant to section 5 of this Act.

(3) An account into which the remainder of amounts in the Fund shall be covered, to be available for payment in accordance with section 8 of this Act on account of awards determined pursuant to section 6 of this Act.

DETERMINATION OF CERTAIN CLAIMS

SEC. 5. (a) The Commission shall receive and determine, in accordance with applicable substantive law, including international law, the validity and amount of claims by nationals of the United States against the Government of the Czechoslovak Socialist Republic for losses resulting from the nationalization or other taking of property owned at the time by nationals of the United States, which nationalization or other taking occurred between August 8, 1958, and the date on which the Agreement enters into force. In making the determination with respect to the validity and amount of any such claim and the value of the property taken, the Commission is authorized to accept the fair or proved value of such property as of the time when the property taken was last operated, used, managed, or controlled by the national or nationals of the United States asserting the claim, regardless of whether such time is prior to the actual date of nationalization or other taking by the Government of the Czechoslovak Socialist Republic.

(b) The Commission shall certify to the Secretary the amount of any award determined pursuant to subsection (a).

DETERMINATION OF OTHER CLAIMS

SEC. 6. (a)(1) The Congress finds that—

(A) in the case of certain persons holding claims against the Czechoslovakian Government who became nationals of the United States by February 26, 1948, the date on which the current Communist Government of Czechoslovakia assumed power, under generally accepted principles of international law the properties of those persons were taken by the Communist Government because the actions by the previous Government of Eduard Benes against those properties were accompanied by promises of compensation which the Communist Government repudiated; and

(B) while the Commission had the authority to deny those claims described in subparagraph (A) on the basis that the properties involved had been taken by the Benes Government while the claimants were not yet nationals of the United States, the effect of that denial is to withhold compensation to persons who have been United States citizens for many years and whose expropriated property has benefited the Communist Government of Czechoslovakia no less than properties expropriated more directly and clearly by the Communist Government.

(2)(A) It is therefore the purpose of this section, in accordance with the intent of the Congress in enacting title IV of the International Claims Settlement Act of 1949 and in the interests of equity, to make ex gratia payments to the claimants described in paragraph (1) of this subsection.

(B) The Congress reaffirms the principle and practice of the United States to seek compensation from foreign governments on behalf only of persons who were nationals of the United States at the time they sustained losses by the nationalization or other taking of their property by those foreign governments. In making payments under this section, the Congress does not establish any precedent for future claims payments.

(b) The Commission shall reopen and redetermine the validity and amount of any claim against the Government of Czechoslovakia which was filed with the Commission in accordance with the provisions of title IV of the International Claims Settlement Act of 1949, which was based on property found by the Commission to have been nationalized or taken by the Government of Czechoslovakia on or after January 1, 1945, and before February 26, 1948, and which was denied by the Commission because such property was not owned by a person who was a national of the United States on the date of such nationalization or taking. The provisions of section 405 of the International Claims Settlement Act of 1949 requiring that the property upon which a claim is based must have been owned by a national of the United States on the date of nationalization or other taking by the Government of Czechoslovakia shall be deemed to be met if such property was owned on such date by a person who became a national of the United States on or before February 26, 1948. The Commission shall certify to the Secretary the amount of any award determined pursuant to this subsection.

PROCEDURES

SEC. 7. (a) The provisions of sections 401, 403, 405, 406, 407, 408, 409, 414, 415, and 416 of the International Claims Settlement Act of 1949, to the extent that such provisions are not inconsistent with this Act, together with such regulations as the Commission may prescribe, shall apply with respect to any claim determined pursuant to section 5(a) of this Act or redetermined pursuant to section 6(b) of this Act.

(b) Not later than sixty days after the date of the enactment of this Act, the Commission shall establish and publish in the Federal Register a period of time within which claims described in section 5 of the Act must be filed with the Commission, and the date for the completion of the Commission's affairs in connection with the determination of those such claims and claims described in section 6 of this Act. Such filing period shall be not more than one year after the date of such publication in the Federal Register, and such completion date shall be not more than two years after the final date for the filing of claims under section 5. No person holding a claim to which section 6 of this Act applies shall be required to refile that claim before the Commission makes the redetermination required by that section.

PAYMENT OF AWARDS

SEC. 8. (a) As soon as practicable after the date of the enactment of this Act, the Secretary shall make payments from amounts in the account established pursuant to section 4(b)(1) of this Act on the unpaid balance of each award certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949.

(b) As soon as practicable after the Commission has completed the certification of awards pursuant to section 5(b) of this Act, the Secretary shall make payments on account of each such award from the amounts in the account established pursuant to section 4(b)(2) of this Act.

(c) As soon as practicable after the Commission has completed the certification of awards pursuant to section 6(b) of this Act, the Secretary shall make payments on account of each such award from the amounts in the account established pursuant to section 4(b)(3) of this Act.

(d) In the event that—

(1) the amounts in the account established pursuant to section 4(b)(2) of this Act exceed the aggregate total of all awards certified by the Commission pursuant to section 5(b) of this Act, or

(2) the amounts in the account established pursuant to section 4(b)(3) of this Act exceed the aggregate total of all awards certified by the Commission pursuant to section 6(b) of this Act.

the Secretary shall cover such excess amounts into the account established pursuant to section 4(b)(1) of this Act. The Secretary shall make payments pursuant to subsection (a) of this section, from such excess amounts, on the unpaid balance of awards certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949.

(e) Payments under this section shall be made on the unpaid balance of each award which bear to such unpaid balance the same proportion as the total amount in the account in the Fund from which the payments are made bears to the aggregate unpaid balance of all awards payable from that account. Payments under this section, and applications for such payments, shall be made in accordance with such regulations as the Secretary may prescribe.

(f) In the event that—

(1) the Secretary is unable, within three years after the date of the establishment of the account prescribed by section 4(b)(1) of this Act, to locate any person entitled to receive payment under this section on account of an award certified by the Commission pursuant to section 410 of the International Claims Settlement Act of 1949 or to locate any lawful heirs, successors, or legal representatives of that person, or if no valid application for payment is made by or on behalf of that person within six months after the Secretary has located that person or that person's heirs, successors, or legal representatives; or

(2) within six months after the Commission has completed the certification of awards pursuant to sections 5(b) and 6(b) of this Act, no valid application for payment is made by or on behalf of any person entitled to receive payment under this section on account of an award certified by the Commission pursuant to either such section,

the Secretary shall give notice by publication in the Federal Register and in such other publications as the Secretary may determine that, unless valid application for payment is made within sixty days after the date of such publication, that person's award under title IV of the International Claims Settlement Act of 1949 or this Act, as the case may be, and that person's right to receive payment on account of such award, shall lapse. Upon the expiration of such sixty-day period that person's award and right to receive payment shall lapse, and the amounts payable to that person shall be paid pro rata by the Secretary on account of all other awards under title IV of the International Claims Settlement Act of 1949 or this Act, as the case may be.

INVESTMENT OF FUNDS

SEC. 9. The Secretary shall invest and hold in separate accounts the amounts held respectively in the accounts established by section 4 of this Act. Such investment shall be in public debt securities with maturities suitable for the needs of the separate accounts and bearing interest at rates determined by the Secretary, taking into consideration the average market yield on outstanding marketable obligations of the United States of comparable maturities. The interest earned on the amounts in each account established by section 4 of this Act shall be used to make payments, in accordance with section 8(e) of this Act, on awards payable from that account.

IMPLEMENTATION OF AGREEMENT

SEC. 10. (a) If, within sixty days after the date of the enactment of this Act—

(1) the Government of the Czechoslovak Socialist Republic does not make the payments to the United States Government described in article 6(2) of the Agreement, or

(2) the Czechoslovak Government does not receive the gold provided in article 6(1) of the Agreement,

the provisions of this Act shall cease to be effective, and the provisions of the Agreement may not be implemented unless the Congress approves the Agreement after the end of that sixty-day period.

(b) The sixty-day period for implementation of the Agreement required by subsection (a) shall be extended by an additional period of thirty calendar days if, before the expiration of that sixty-day period, the Secretary of State certifies in writing that such extension is consistent with the purposes of this Act and reports that certification to the Speaker of the House of Representatives and to the Chairman of the Committee on Foreign Relations of the Senate, together with a detailed statement of the reasons for the extension. If at the end of that additional thirty-day period the events set forth in paragraphs (1) and (2) of subsection (a) have not occurred, the provisions of this Act shall cease to be effective and the provisions of the Agreement may not be implemented unless the Congress approves the Agreement after the end of that thirty-day period or unless, before the expiration of that thirty-day period, authorizes by joint resolution a further extension of time for implementation of the Agreement. Such joint resolution shall be considered in the Senate in accordance with the provisions of section 601(b) of the International Security Assistance and Arms Export Control Act of 1976, and in the House of Representatives a motion to proceed to the consideration of such joint resolution after it has been reported by the appropriate committee shall be treated as highly privileged.

SOCIAL SECURITY AGREEMENT

SEC. 11. The Secretary of State shall conduct a detailed review of the exchange of letters between the United States and Czechoslovakia providing for reciprocal social security payments to residents of the two countries. Such review should include an examination of the extent to which Czechoslovakia is complying with the spirit and provisions of the letters, a comparison of the benefits being realized by residents of Czechoslovakia and of the United States under the letters, and an evaluation of the basis of differences in such benefits. The Secretary of State, in consultation with the Department of Health and Human Services, shall report to the Congress, not later than six months after the date of the enactment of this Act, the results of such review, together with any recommendations for legislation or changes in the agreement made by the letters that may be necessary to achieve greater comparability and equity of benefits for the residents of the two countries. Such report should include specific assessments of the feasibility, likely effects, and advisability of terminating United States social security payments to residents of Czechoslovakia in response to inequities and incomparabilities of benefits payments under the exchange of letters.

UP AMENDMENT NO. 802

Mr. STEVENS. Mr. President, I send to the desk a series of amendments submitted on behalf of Senator PERCY, chairman of the Committee on Foreign Relations.

The PRESIDING OFFICER (Mr. RUDMAN). The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) for Mr. PERCY proposes an unprinted amendment numbered 802.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 18, following the word "amount", strike out the figure $500,000 and insert the figure "$50,000".

On page 4, line 2, following the date "1949", change the period to a semi-colon and insert the following phrase: "however, it is the sense of the Congress that the United States government is entitled to a larger percentage of the total award (generally presumed to be 5 per cent) and that the ex gratia payment hereinafter provided to certain claimants, who were otherwise excluded from sharing in this claims settlement under generally-accepted principles of international law and United States practice, is justified only by the extraordinary circumstances of this case and does not establish any precedent for future claims negotiations or payments."

On page 4, line 6, following the word "which", strike out the figure "$72,500,000" and insert "$74,550,000".

On page 5, line 20 (or thereabouts), following the word "power", strike out the comma and all language down to and including the word "repudiated" on page 6, line 3.

Mr. President, this bill would approve the agreement negotiated with Czechoslovakia for the compensation of American citizens whose property was expropriated by the Communist Government of Czechoslovakia in 1948. The Senate has previously passed a version of this bill which is virtually identical to the one just received from the House, with one exception. The House would include a provision which would devote $7 million of the total lump sum settlement payed by Czechoslovakia to a group of people—the so-called Benes group—who were not U.S. citizens at the time of the original taking of their property by the pre-Communist Benes Government.

Under longstanding U.S. practice and accepted principles of international law, the U.S. Government was not able to negotiate on behalf of people who were not citizens at the time their property was lost. Therefore, the Foreign Claims Settlement Commission, after a full hearing in 1958, decided that this group of people were not eligible to share in any future claims settlement negotiated with the Czech Government. (Attached is a paper prepared for me by the Department of State describing this so-called continuous nationality principle.)

Those members of the Foreign Relations and Finance Committees who have had an interest in this legislation have sought to preserve this principle and therefore, the bill which passed the Senate last Friday did not include an amount for the Benes claimants.

Given the strong arguments in the House, however, that some payment to the Benes group are justified because of the compelling equities of their case, and in the interest of resolving this matter during this session, we have here agreed to include $4.95 million for this group, but to do so with the understanding that this money is being paid ex gratia out of the share which would otherwise be pro-

vided to the U.S. Treasury as compensation for the expenses of the Government in negotiating and implementing this agreement, plus $925,000 from the account which would otherwise have been held to pay those claimants who may still come forward because they were not adjudicated claimants in 1958 and are hereafter found to be eligible to recover.

In short, Mr. President, we are agreeing to provide some compensation to the Benes group, but only because the formula I have just outlined allows us to do so without violating two important principles of U.S. practice and international law: First, that the U.S. Government—that is, the U.S. taxpayer—is entitled to some reimbursement from the amounts awarded to claimants under a lump-sum settlement of this kind, and second, that only those people who were American citizens at the time their property was taken are entitled to be represented by the U.S. Government in claims negotiations and to share in the the resulting settlement.

I urge the Senate to accept this bill as reamended and I hope the House will act expeditiously to see that it becomes law this year.

THE CONTINUOUS NATIONALITY PRINCIPLE

Under generally accepted principles of international law, a claim for compensation for losses or damages may be espoused by one government against another only on behalf of persons who were nationals of the espousing government at the time of the loss or damage and continuously thereafter until the date of the presentation of the claim. This principle of continuous nationality rests on two primary foundations.

First, the espousing government is in reality asserting its own right to redress for a breach of an international legal duty owed to it, through injury to its nationals; no such breach occurs when the persons involved were not nationals of the espousing government at the time of inquiry.

Second, any other rule could give rise to nationality shopping among claimants seeking a government willing to assert a claim notwithstanding the absence of a breach of an international legal duty to that government at the time the loss or damage took place.
